On September 9, 1997, the Commission issued a notice requesting public comment on proposed revisions to the testing method currently used to determine the tar, nicotine and carbon monoxide ratings of cigarettes. The proposed methodology would require that each cigarette variety be tested under two different sets of smoking conditions, rather than the single set used under the current system. The revised test method would produce tar, nicotine and carbon monoxide yields using both the current testing parameters and more intensive smoking conditions, thus producing a range of potential yields for each cigarette. The Commission also requested comment on: (1) the feasibility of generating the upper tier of ratings through mathematical formulas, rather than actual testing on a smoking machine; and (2) the usefulness and feasibility of two different legends that could be used in advertising to disclose the ratings. Comments are due by February 4, 1998.

By direction of the Commission, Commissioner Thompson and Commissioner Swindle not participating.

Donald S. Clark,

Secretary.

Food and Drug Administration

[Docket No. 97N–0385]

Agency Information Collection Activities; Announcement of OMB Approval

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that a collection of information entitled "Premarket Approval of Medical Devices" has been approved by the Office of Management and Budget (OMB) under the Paperwork Reduction Act of 1995 (the PRA).

FOR FURTHER INFORMATION CONTACT: Margaret R. Schlosburg, Office of Information Resources Management (HFA–250), Food and Drug Administration, 5600 Fishers Lane, Rockville, MD 20857, 301–827–1223.

SUPPLEMENTARY INFORMATION: In the **Federal Register** of September 30, 1997 (62 FR 51112), the agency announced that the proposed information collection had been submitted to OMB for review and clearance under section 3507 of the PRA (44 U.S.C. 3507). An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. OMB has now approved the information collection and has assigned OMB control number 0910–0231. The approval expires on September 30, 1998.

Dated: January 14, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

Health Resources and Services Administration

Advisory Council; Notice of Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), announcement is made of the following National Advisory body scheduled to meet during the month of February 1998.

Name: National Advisory Council on the National Health Service Corps.

Date and Time: February 5–8, 1998.

Place: Arkansas Excelsior Hotel, 3 State House Plaza, Little Rock, Arkansas 72201, Telephone: (501) 375–5000.

The meeting is open to the public.

Agenda: Agenda items include updates on the NHSC program; reports from the State Primary Care Organization, State Primary Care Association, and the Area Health Education Center programs and meetings of NHSC workgroups on scholarship taxation issues pertaining to the NHSC of the 21st century.

The opening meeting will be held on Thursday, February 5 from 6:00 p.m. to 9:00 p.m. On Friday and Saturday, meetings will begin at 8:00 a.m. and conclude around 5:30 p.m. Site visits will be made on Friday.

Anyone requiring information regarding the subject Council should contact Ms. Eve Morrow, National Advisory Council on the National Health Service Corps, Health Resources and Services Administration, 8th floor, 4350 East-West Highway, Bethesda, Maryland 20814, Telephone (301) 594–4144.

Agenda Items are subject to change as priorities dictate.

Dated: January 16, 1998.

Jane M. Harrison,

Acting Director, Division of Policy Review and Coordination.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

Submission for OMB Review; Comment Request; Case-Control Study of Cancer and Related Disorders Among Benzene-Exposed Workers in China

SUMMARY: Under the provisions of Section 3506(c)(2)(A) of the Paperwork Reduction Act of 1995, the National Cancer Institute (NCI), the National Institutes of Health (NIH), has submitted to the Office of Management and Budget (OMB) a request to review and approve the information collection listed below. This proposed information collection was previously published in the **Federal Register** on January 24, 1997, page 3705, and allowed 60 days for public comment. No public comments were received. The purpose of this notice is to allow an additional 30 days for public comment. The National Institutes of Health may not conduct or sponsor, and the respondent is not required to respond to, an information collection that has been extended, revised, or implemented on or after October 1, 1995, unless it displays a currently valid OMB control number.

Proposed collection

Title: Case-Control study of Cancer and Related Disorders Among Benzene-Exposed Workers in China. *Type of Information Collection Request:* New. *Need and Use of Information Collection:* A case-control study will examine the relationship between exposure to benzene and the risk of

VOL 63 ISS 15 JA 23 1998 UMI

lymphohematopoietic malignancies and related disorders and lung cancer in Chinese workers. Cases and controls will be selected from participants in a recent cohort study of benzene-exposed workers in China. The data will be used by the NCI to examine risk among workers exposed to low levels of benzene, and to characterize the dose and time-specific relationship between benzene exposure and disease risk. *Frequency of Response:* One-time study. *Affected Public:* Individuals or households. *Type of Respondents:* Workers. The annual reporting burden is as follows: *Estimated Number of Respondents:* 515; *Estimated Number of Responses per Respondent:* One; *Average Burden Hours per Response:* 0.425; and *Estimated Total Annual Burden Hours Request:* 219.

There are no Capital Costs, Operating Costs, and/or Maintenance Costs to report.

Request for comments

Written comments and/or suggestions from the public and affected agencies are invited on one or more of the following points: (1) Whether the proposed collection or information is necessary for the proper performance of the function of the agency, including whether the information will have practical utility; (2) The accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used; (3) Ways to enhance the quality, utility, and clarity of the information to be collected; and (4) Ways to minimize the burden of the collection of information on those who are to respond, including the use of appropriated automated, electronic, mechanical, or other technological collection techniques or other forms of information technology.

Direct comments to OMB

Written comments and/or suggestions regarding the item(s) contained in this notice, especially regarding the estimated public burden and associated response time, should be directed to the: Office of Management and Budget, Office of Regulatory Affairs, New Executive Office Building, Room 10235, Washington, D.C. 20503, Attention: Desk Officer for NIH. To request more information on the proposed project or to obtain a copy of the data collection plans and instruments, contact: Dr. Richard Hayes, Project Officer, National Cancer Institute, Executive Plaza North, Room 418, Rockville, Maryland 20892–7364, or call non-toll-free number (301) 496–9093, or FAX your request to (301) 402–1819, or E-mail your request, including your address to HayesR@epndce.nci.nih.gov.

Comments Due Date: Comments regarding this information collection are best assured of having their full effect if received on or before February 23, 1998.

Dated: December 13, 1998.

Reesa L. Nichols,

OMB Project Clearance Liaison.

National Institutes of Health

National Institute of Dental Research; Notice of a Meeting of the National Advisory Dental Research Council

Pursuant to Public Law 92–463, notice is hereby given of a meeting of the National Advisory Dental Research Council, National Institute of Dental Research, on January 20–21, 1998, Conference Rooms E1–E2, Building 45, National Institutes of Health, Bethesda, Maryland. This meeting will be open to the public from 8:30 a.m. until adjournment on January 21, 1998, for general discussion and program presentations. Attendance by the public will be limited to space available.

In accordance with the provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. and sec. 10(d) of Public Law 92–463, the meeting of the Council will be closed to the public on January 20, 1:00 p.m. to recess for the review, discussion and evaluation of individual grant applications. These applications and information concerning individuals associated with the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal applications and reports, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

This notice is being published less than fifteen days prior to the meeting due to the urgent need to meet timing limitations imposed by the review and funding cycle.

Dr. Dushanka V. Kleinman, Executive Secretary, National Advisory Dental Research Council, and Deputy Director, National Institute of Dental Research, National Institutes of Health, Building 31, Room 2C39, Bethesda, Maryland 20891 (telephone (301) 496–9469) will furnish a roster of committee members, a summary of the meeting, and other information pertaining to the meeting upon request. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact the Executive Secretary listed above in advance of the meeting.

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4263–N–73]

Notice of Proposed Information Collection for Public Comment

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: March 24, 1998.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to: Reports Liaison Officer, Shelia E. Jones, Department of Housing & Urban Development, 451–7th Street, S.W., Room 7230, Washington, DC 20410.

FOR FURTHER INFORMATION CONTACT: James Selvaggi at (202) 708–3773 x4647 for copies of the proposed forms and other available documents.

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35 as amended).

The Notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) Enhance the quality, utility, and clarity of the information to be collected; and (4) Minimize the burden of the collection of information on those who are to respond; including through the use of appropriate automated collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

VOL 63 ISS 15 JA 23 1998 UMI

This Notice also lists the following information:

Title of Proposal: Empowerment Zone/Enterprise Community Application Form.

OMB Control Number, if applicable: 2506–0148.

Description of the need for the information and proposed use: The application information collected is reviewed by HUD and USDA to recommend applicants for 1998 designation of either an urban or a rural Empowerment Zone. Twenty (20) Empowerment Zones will be designated in 1998 (15 urban and 5 rural). The annual progress reports will be used as required by the statute to determine the success of each designee in meeting its established benchmarks and in evaluating the program as a whole.

Agency form numbers, if applicable: HUD–40003.

Members of affected public: Units of local government and states, applying jointly.

Estimation of the total numbers of hours needed to prepare the information collection including number of respondents, frequency of response: *Nomination*—number of responses—300; hours of response—50; *Annual report*—15 (one annual progress report per grantee); 15 hours of response per grantee.

Status of the proposed information collection: Current approval will expire 2/15/98.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: January 15, 1998.

Saul N. Ramirez, Jr.,

Assistant Secretary for Community Planning and Development.

Notice of Proposed Information; Collection for Public Comments

AGENCY: Office of the Assistant Secretary for Public and Indian Housing, HUD.

ACTION: Notice.

SUMMARY: The proposed information collection requirement described below will be submitted to the Office of Management and Budget (OMB) for review, as required by the Paperwork Reduction Act. The Department is soliciting public comments on the subject proposal.

DATES: Comments due: March 24, 1998.

ADDRESSES: Interested persons are invited to submit comments regarding this proposal. Comments should refer to the proposal by name and/or OMB Control Number and should be sent to Mildred M. Hamman, Report Liaison Officer, Public and Indian Housing, Department of Housing and Urban Development, 451 7th Street, SW., Room 4328, Washington, DC 20410–5000.

FOR FURTHER INFORMATION CONTACT: Mildred M. Hamman, (202) 708–3642, extension 4128, for copies of the proposed forms not other available documents. (This is not a toll-free number).

SUPPLEMENTARY INFORMATION: The Department will submit the proposed information collection to OMB for review, as required by the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35, as amended).

This notice is soliciting comments from members of the public and affected agencies concerning the proposed collection of information to: (1) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility; (2) evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information; (3) enhance the quality, utility, and clarity of the information to be collected; and (4) minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated collection techniques or other forms of information technology; e.g. permitting electronic submission of responses.

This notice also lists the following information.

Title of Proposal: Application Requirements, Public and Indian Housing (PIH) Youth Sports Program.

OMB Control Number: 2577–0140.

Description of the need for the information and proposed use: The Youth Sports Program requires eligible applicants to submit information to HUD for review and evaluation against the selection criteria contained in the Notice of Funding Announcement (NOFA) which is published in the **Federal Register**, for possible funding. Approved applicants are rated and ranked by HUD, approved/disapproved for funding, and notified of their selection/rejection.

Agency form numbers, if applicable: Forms HUD–2880, HUD–50070, HUD–50071 (SF–24, SF–LLL).

Members of the affected public: State or Local Governments, Non-profit institutions.

Estimation of the total number of hours needed to prepare the information collection including number of respondents, frequency of response, and hours of responses: 500 respondents, each Fiscal Year if funds are appropriated by Congress, 24 average hours per response, 12,000 hours for a total reporting burden.

Status of the proposed information collection: Reinstatement.

Authority: Section 3506 of the Paperwork Reduction Act of 1995, 44 U.S.C. Chapter 35, as amended.

Dated: January 20, 1998.

Kevin Emanuel Marchman,

Assistant Secretary for Public and Indian Housing.

BILLING CODE 4210–33–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

[Docket No. FR–4235–N–39]

Federal Property Suitable as Facilities to Assist the Homeless

AGENCY: Office of the Assistant Secretary for Community Planning and Development, HUD.

ACTION: Notice.

SUMMARY: This notice identifies unutilized, underutilized, excess, and surplus Federal property reviewed by HUD for suitability for possible use to assist the homeless.

FOR FURTHER INFORMATION CONTACT: Mark Johnston, room 7256, Department of Housing and Urban Development, 451 Seventh Street SW, Washington, DC 20410; telephone (202) 708–1226; TDD number for the hearing- and speech-impaired (202) 708–2565 (these telephone numbers are not toll-free), or call the toll-free Title V information line at 1–800–927–7588.

SUPPLEMENTARY INFORMATION: In accordance with 24 CFR part 581 and section 501 of the Stewart B. McKinney Homeless Assistance Act (42 U.S.C. 11411), as amended, HUD is publishing this Notice to identify Federal buildings and other real property that HUD has reviewed for suitability for use to assist the homeless. The properties were reviewed using information provided to HUD by Federal landholding agencies regarding unutilized and underutilized buildings and real property controlled by such agencies or by GSA regarding its inventory of excess or surplus Federal property. This Notice is also published in order to comply with the December 12, 1988 Court Order in *National Coalition for the Homeless* v. *Veterans Administration*, No. 88–2503–OG (D.D.C.).

Properties reviewed are listed in this Notice according to the following categories: Suitable/available, suitable/unavailable, suitable/to be excess, and unsuitable. The properties listed in the three suitable categories have been reviewed by the landholding agencies, and each agency has transmitted to HUD: (1) Its intention to make the property available for use to assist the homeless, (2) its intention to declare the property excess to the agency's needs, or (3) a statement of the reasons that the property cannot be declared excess or made available for use as facilities to assist the homeless.

Properties listed as suitable/available will be available exclusively for homeless use for a period of 60 days from the date of this Notice. Homeless assistance providers interested in any such property should send a written expression of interest to HHS, addressed to Brian Rooney, Division of Property Management, Program Support Center, HHS, room 5B–41, 5600 Fishers Lane, Rockville, MD 20857; (301) 443–2265. (This is not a toll-free number.) HHS will mail to the interested provider an application packet, which will include instructions for completing the application. In order to maximize the opportunity to utilize a suitable property, providers should submit their written expressions of interest as soon as possible. For complete details concerning the processing of applications, the reader is encouraged to refer to the interim rule governing this program, 24 CFR part 581.

For properties listed as suitable/to be excess, that property may, if subsequently accepted as excess by GSA, be made available for use by the homeless in accordance with applicable law, subject to screening for other Federal use. At the appropriate time, HUD will publish the property in a Notice showing it as either suitable/available or suitable/unavailable.

For properties listed as suitable/unavailable, the landholding agency has decided that the property cannot be declared excess or made available for use to assist the homeless, and the property will not be available.

Properties listed as unsuitable will not be made available for any other purpose for 20 days from the date of this Notice. Homeless assistance providers interested in a review by HUD of the determination of unsuitability should call the toll free information line at 1–800–927–7588 for detailed instructions or write a letter to Mark Johnston at the address listed at the beginning of this Notice. Included in the request for review should be the property address (including zip code), the date of publication in the **Federal Register**, the landholding agency, and the property number.

For more information regarding particular properties identified in this Notice (*i.e.*, acreage, floor plan, existing sanitary facilities, exact street address), providers should contact the appropriate landholding agencies at the following addresses: *COE:* Mr. Bob Swieconek, Army Corps of Engineers, Management & Disposal Division, Pulaski Building, Room 4224, 20 Massachusetts Avenue, NW, Washington, DC 20314–1000; (202) 761–1749; *GSA:* Mr. Brian K. Polly, Assistant Commissioner, General Services Administration, Office of Property Disposal, 18th and F Streets, NW, Washington, DC 20405; (202) 501–2059; *NAVY:* Mr. Charles C. Cocks, Department of the Navy, Director, Real Estate Policy Division, Naval Facilities Engineering Command, Code 241A, 200 Stovall Street, Alexandria, VA 22332–2300; (703) 325–7342; (These are not toll-free numbers).

Dated: January 15, 1998.

Fred Karnas, Jr.,

Deputy Assistant Secretary for Economic Development.

Office of the Secretary

[WO–220–1060–00–24 1A]

Notice of Reestablishment of the Wild Horse and Burro Advisory Board

AGENCY: Bureau of Land Management, Interior.

ACTION: Reestablishment of the Wild Horse and Burro Advisory Board.

SUMMARY: This notice is published in accordance with Section 9(a)(2) of the Federal Advisory Committee Act of 1972 (5 U.S.C. App.). Pursuant to Section 7 of the Wild Free-Roaming Horse and Burro Act (Pub. L. 92–195), notice is hereby given that the Secretary of the Interior and the Secretary of Agriculture are reestablishing the Wild Horse and Burro Advisory Board to provide advice concerning management, protection, and control of wild free-roaming horses and burros on the public lands administered by the Department of the Interior, through the Bureau of Land Management, and the Department of Agriculture, through the Forest Service.

FOR FURTHER INFORMATION CONTACT: Bud C. Cribley, Wild Horse and Burro Program Specialist, Department of the Interior, Bureau of Land Management, Room 314, 1620 L Street, N.W., Washington, D.C. 20006, (202) 452–5073.

Certification

I hereby certify that the reestablishment of the Wild Horse and Burro Advisory Board is necessary and in the public interest in connection with the Secretary of the Interior's statutory responsibilities to manage the lands and resources administered by the Bureau of Land Management.

Dated: December 23, 1997.

Bruce Babbitt,

Secretary of the Interior.

BILLING CODE 4310–84–P

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Notice of Intent To Revise the U.S. Fish and Wildlife Service Manual and Establish Regulations as They Relate to the National Wildlife Refuge System Improvement Act of 1997 (Pub. L. 105–57)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice.

SUMMARY: The National Wildlife Refuge System Improvement Act of 1997 (Refuge Improvement Act) was signed by President Clinton on October 9, 1997. The Refuge Improvement Act amends and builds upon the National Wildlife Refuge System Administration Act of 1966 (NWRSAA), (16 U.S.C. 668dd *et seq.*). This notice advises the public that the U.S. Fish and Wildlife Service (Service) will be developing new or revised policies pursuant to the Refuge Improvement Act. The key policy areas to be addressed are listed later in **SUPPLEMENTARY INFORMATION**. This notice also identifies opportunities for public review and comment.

Interested persons contacting the Service as described in **ADDRESSES** below, will be provided draft Service Manual chapters as they are prepared and will be notified of due dates for written comments. Final chapters will be issued following review of public comments. Proposed regulations will be developed through the rule making process.

ADDRESSES: Requests to receive copies of the specific draft Service Manual chapters as they are prepared should be sent via mail to: Refuge Improvement Act Project, U.S. Fish and Wildlife Service, Division of Refuges, 4401 N. Fairfax Dr., Rm. 670, Arlington, VA 22203, Fax (703) 358–2248, or email to: Refuge_Improvement_Act@FWS.gov.

Each request should include a complete mailing address to which the draft chapters will be sent.

SUPPLEMENTARY INFORMATION: The nearly 93 million acre National Wildlife Refuge System (Refuge System) has been administered, since its inception, under a collection of Presidential proclamations, Executive Orders, administrative orders, and laws. Until 1966, and enactment of the National Wildlife Refuge System Administration Act (NWRSAA), there was no single Federal law that governed administration of the Refuge System. The NWRSAA provided guidance for refuge management; but in the 32 years since its passage, Refuge System acreage has grown more than threefold, wildlife management issues have increased in complexity and controversy, and the demands for recreational and economic uses of refuges have increased substantially.

The Refuge Improvement Act amends and builds upon the NWRSAA in a manner that provides an "Organic Act" for the Refuge System similar to those laws which exist for other Federal Lands. The Refuge Improvement Act will serve to ensure that the Refuge System is effectively managed as a national system of lands, waters, and interests for the protection and conservation of our nation's wildlife resources.

The Refuge Improvement Act's principal focus is to establish clearly the wildlife conservation mission of the Refuge System, provide guidance to the Secretary of the Interior for management of the Refuge System, provide a mechanism for unit-specific planning, and give managers clear direction and procedures for making determinations regarding wildlife conservation and public uses of units of the Refuge System.

The Service will be implementing the Refuge Improvement Act by developing new or revised Service Manual chapters for the Refuge System. All units within the Refuge System will be managed with regard to these chapters which will guide management strategies for achieving individual unit purposes and the Refuge System mission.

Key issues to be addressed in specific Service Manual chapters include:

- Biological integrity of the Refuge System;
- Appropriate general public uses for the System;
- Implementation of the compatibility test; and
- Comprehensive conservation planning.

Public input into the development of these key Service Manual chapters is essential. The Service will provide these draft chapters to interested agencies and individuals as described above in **ADDRESSES**. These draft chapters will also be available on the National Wildlife Refuge System web site: (http://refuges.fws.gov) during the pre-rulemaking public review and comment period. Any resulting proposed regulations will be available for public review and comment through the rule making process.

Due to the varying levels of complexity of issues, some chapters will require more time for development than others. Therefore, specific draft chapters will be made available to the public as they are prepared. The Refuge

Improvement Act requires the Service to establish new compatibility policy and regulations within two years of enactment. There are no other directives in the Refuge Improvement Act for specific policy updates; however, the Service desires to move forward expeditiously on the specific policies listed in this notice to incorporate the most important provisions of the Refuge Improvement Act into all management functions. The Service estimates that draft Service Manual chapters for these issues will be available for public review and comment beginning in May 1998.

This notice and the public participation in this implementation process is being conducted in accordance with the policy and rulemaking requirements of the Administrative Procedures Act (5 U.S.C. 553), other appropriate Federal laws and regulations, including the National Wildlife Refuge System Improvement Act of 1997 (Pub. L. 105–57), Executive Order 12996, and associated Service policies and procedures.

Dated: January 16, 1998.

Donald Barry,

Deputy Assistant Secretary for Fish and Wildlife and Parks.

DEPARTMENT OF AGRICULTURE

Forest Service

[CO–030–5101–00–YCKD; COC–51280]

Notice of Availability of the Draft Supplement to the Final Environmental Impact Statement for a TransColorado Gas Transmission Project; Colorado and New Mexico

AGENCY: Bureau of Land Management, Department of the Interior, and Forest Service, Department of Agriculture.

ACTION: Notice of Availability of a Supplement to The Final Environmental Impact Statement TransColorado Gas Transmission Project; Colorado and New Mexico.

SUMMARY: In accordance with the National Environmental Policy Act, the Bureau of Land Management (BLM), as lead agency, and in cooperation with the U.S. Forest Service (USFS) has prepared a Draft Supplement (Supplement) to the Final Environmental Impact Statement (FEIS) for the TransColorado Gas Transmission (TransColorado) project on federal lands in Colorado and New Mexico. TransColorado is the proponent. Lands managed by the BLM in the Montrose, Craig, and Grand Junction Districts in Colorado, and the Farmington District in New Mexico, and the USFS in the Uncompahgre and San Juan National Forests, Colorado, are crossed by the TransColorado pipeline project. The Supplement addresses the environmental impacts of the construction, operation, maintenance, and ultimate abandonment of known proposed route changes and minor realignments (less than 100 ft.) of the approved pipeline and right-of-way (ROW) grant COC–51280, and the impacts of the proposed construction and use of known additional temporary work areas adjacent to the approved ROW or, proposed ROW route changes or minor realignments. This Supplement will also address the impacts of the construction and use minor realignments and alternative temporary work areas in unspecified locations. These unspecified temporary work areas and minor realignments will be addressed to accommodate conditions that might be encountered during construction. Also addressed in the Supplement are proposed modifications to several environmental protection measures contained in the original right-of-way (ROW) grant and Record of Decision (ROD).

Please focus comments on the proposed actions and alternatives in the Supplement to the FEIS.

DATES: The 60-day public comment period for the Draft Supplement runs from January 23, 1998 until March 9, 1998.

Written comments on the Draft Supplement must be submitted or postmarked no later than March 9, 1998. Written comments may also be presented at the public meetings to be held on February 17, 1998, at 7:00 p.m. in the Double Tree Inn, 501 Camino del Rio in Durango, Colorado; on February 18, 1998 at 7:00 p.m. at the Ponderosa Restaurant, 108 South 8th in Dolores, Colorado; and on February 19, 1998 at 7:00 pm at the Holiday Inn, 755 Horizon Drive in Grand Junction, Colorado.

ADDRESSES: Any comments on this document should be sent to Bill Bottomly, TransColorado Project Manager, Bureau of Land Management, Montrose District Office, 2465 South Townsend Avenue, Montrose, CO 81401. The Draft Supplement to the FEIS and the FEIS are available for public review at the above address, and at the following offices of the BLM and USFS: the Grand Junction District Office, the Montrose District Office, the Grand Mesa/Uncompahgre/Gunnison National Forest Office, the San Juan National Forest/San Juan Resource Area office, and the Farmington District Office.

Public reading copies are available at the federal depository libraries in Colorado and New Mexico and public libraries within San Juan County, New Mexico, and La Plata, Montezuma, Dolores, San Miguel, Montrose, Delta, Mesa, Garfield and Rio Blanco Counties, Colorado.

FOR FURTHER INFORMATION CONTACT: Bill Bottomly (970) 240–5337, Ilyse Auringer (970) 385–1341, or Steve Hemphill (970) 874–6633.

SUPPLEMENTARY INFORMATION: After preparing a Draft and Final Environmental Impact Statement in 1992, the BLM and the USFS signed Records of Decision on December 1, 1992 and issued a ROW grant and adjacent Temporary Use Permit (TUP) for subsequent construction, operation and maintenance of the 292 mile-long TransColorado Gas Transmission pipeline from Meeker, Colorado to Bloomfield, New Mexico. Under the authority of the Mineral Leasing Act of 1920 (30 U.S.C. 185), as amended by the Act of November 16, 1973 (37 Stat. 567), BLM issued a 50 foot-wide ROW grant on December 4, 1997, accompanied by a 25 foot-wide TUP, excepting 1.7 miles near Grand Junction, Colorado. The FERC issued TransColorado a Certificate of Public Convenience and Necessity on June 3, 1994. TransColorado completed the 22.5 mile Phase I of the project in December, 1996. The proponent is now prepared to construct the remainder of the pipeline during 1998.

Public participation has occurred throughout the Supplement to the FEIS process. The Notice of Intent (NOI) to prepare this Supplement to the FEIS was published in the **Federal Register** on November 21, 1997. "Open House" forums were held from October 21 through December 10, 1997 at Norwood, Durango, Delta, Rangely, Dolores, and Grand Junction, Colorado. Field trips to locations on the San Juan National Forest were offered on November 15 and 22, 1997.

Signed: January 14, 1998.

Jamie E. Connell,

Associate District Manager, Montrose District, BLM.

Robert L. Storch,

Forest Supervisor, Grand Mesa/Uncompahgre/Gunnison National Forests.

Bureau of Land Management

[NM–910–08–1020–00]

New Mexico Resource Advisory Council Meeting.

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Council meeting.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972 (FACA), 5 U.S.C. Appendix 1, The Department of the Interior, Bureau of Land Management (BLM), announces a meeting of the New Mexico Resource Advisory Council (RAC). The meeting will be held on March 5 and 6, 1998 at the Western Sizzlin Restaurant, 1010 South White Sands, Alamogordo, NM. The agenda for the RAC meeting will include agreement on the meeting agenda, any RAC comments on the draft summary minutes of the last two RAC meetings, of November 20–21, 1997 in Albuquerque, MN., and February 20, 1998 in Santa Fe, NM., briefings and discussions on the status of the NEPA process for the RAC Standards for Public Land Health and Guidelines for Livestock Grazing Management and other NEPA concerns, on establishment of RAC Subgroups for the BLM Field Offices, on the Lesser Prairie Chicken, on the McGregor Range Withdrawal, on implementation of the Standards for Public Land Health and Guidelines for Livestock Grazing Management and on other items as appropriate. An optional field tour will be available for RAC members to McGregor Range on the morning of Saturday, March 7, 1998. The tour will take most of the morning. Time and location to meet for the tour will be established after discussion with RAC members during the March 5 and 6, 1998 meeting

The meeting will begin on March 5, 1998 at 8:30 a.m. The meeting is open to the public. The time for the public to address the RAC is on Thursday, March 5, 1998, from 3:00 p.m. to 5:00 p.m. The RAC may reduce or extend the end time of 5:00 p.m. depending on the number of people wishing to address the RAC. The length of time available for each person to address the RAC will be established at the start of the public comment period and will depend on how many people there are that wish to address the RAC. At the completion of the public comments the RAC may continue discussion on its Agenda items. The meeting on March 6, 1998, will be from 8:00 a.m. to 3:00 p.m. The end time of 3:00 p.m. for the meeting may be changed depending on the work remaining for the RAC.

FOR FURTHER INFORMATION CONTACT: Bob Armstrong, New Mexico State Office, Planning and Policy Team, Bureau of Land Management, 1474 Rodeo Road, P.O. Box 27115, Santa Fe, New Mexico 87502–0115, telephone (505) 438–7436.

SUPPLEMENTARY INFORMATION: The purpose of the Resource Advisory Council is to advise the Secretary of the Interior, through the BLM, on a variety of planning and management issues associated with the management of public lands. The Council's responsibilities include providing advice on long-range planning, establishing resource management priorities and assisting the BLM to identify State and regional standards for rangeland health and guidelines for grazing management.

Dated: January 16, 1998.

Richard A. Whitley,

Deputy State Director.

Northwest Colorado Resource Advisory Council Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Meeting and Televideo Conference.

SUMMARY: The next meeting of the Northwest Colorado Resource Advisory Council will be held on Friday, February 20, 1998, in Grand Junction, Colorado, following a televideo broadcast from the BLM National Training Center in Phoenix, Arizona.

DATES: Friday, February 20, 1998.

ADDRESSES: For further information, contact Joann Graham, Bureau of Land Management (BLM), Grand Junction District Office, 2815 H Road, Grand Junction, Colorado 81506; Telephone (970) 244–3037.

SUPPLEMENTARY INFORMATION: The meeting will follow a BLM National Resource Advisory Council televideo broadcast. The broadcast will air from 9:30 a.m. to 12:00 noon in the BLM Grand Junction District Office, 2850 H Road, Grand Junction, Colorado. The Northwest RAC meeting will be from 12:45 p.m. to 4:45 p.m. Agenda items include an update of the roadless inventory review and subcommittee reports on fire, land exchanges, and recreation.

The televideo conference and the resource advisory council meeting are open to the public. Interested persons may make oral statements at the meetings or submit written statements following the meeting. Per-person time limits for oral statements may be set to allow all interested persons an opportunity to speak.

Summary minutes of council meetings are maintained in both the Grand Junction and Craig District Offices. They are available for public inspection and reproduction during regular business hours within thirty (30) days following the meeting.

Dated: January 13, 1998.

Mark T. Morse,

District Manager, Craig and Grand Junction Districts.

Mojave-Southern Great Basin Resource Advisory Council—Notice of Meeting Locations and Times

AGENCY: Bureau of Land Management, Interior.

ACTION: Resource Advisory Council Meeting Locations and Times.

DATES: Date is February 26, 1998, from 1:00 p.m.. to approximately 4 p.m. and will reconvene on February 27, 1998 and meet from 8 a.m. to 4:40 p.m. The public comment period will begin at 8:30 a.m. on February 27, 1998.

ADDRESSES: The council will meet at the Las Vegas District Office, 4765 West Vegas Drive, Las Vegas, NV 89108–2135.

FOR FURTHER INFORMATION CONTACT: Phillip L. Guerrero, Las Vegas Field Office, Public Affairs Officer, telephone: (702) 647–5046.

SUMMARY: In accordance with the Federal Land Policy and Management Act and the Federal Advisory Committee Act of 1972 (FACA), 5 U.S.C., the Department of the Interior, Bureau of Land Management (BLM), council meeting of the Mojave-Southern Great Basin Resource Advisory Council (RAC) will be held as indicated above. The agenda includes a public comment period, and discussion of public land issues.

VOL

UMI

The Resource Advisory Council develops recommendations for BLM regarding the preparation, amendment, and implementation of land use plans for the public lands and resources within the jurisdiction of the council. For the Mojave-Great Basin RAC this jurisdiction is Clark, Esmeralda, Lincoln and Nye counties in Nevada. Except for the purposes of long-range planning and the establishment of resource management priorities, the RAC shall not provide advice on the allocation and expenditure of Federal funds, or on personnel issues.

The RAC may develop recommendation for implementation of ecosystem management concepts, principles and programs, and assist the BLM to establish landscape goals and objectives.

All meetings are open to the public. The public may present written comments to the council. Public comments should be limited to issues for which the RAC may make recommendations within its area of jurisdiction. Depending on the number of persons wishing to comment, and time available, the time for individual oral comments may be limited. Individuals who plan to attend and need further information about the meetings, or need special assistance such as sign language interpretation or other reasonable accommodations, should contact Phillip L. Guerrero at the Las Vegas District Office, 4765 Vegas Dr., Las Vegas, NV 89108, telephone, (702) 647–5000.

Dated: January 15, 1998.

Phillip L. Guerrero,

Public Affairs Officer.

Bureau of Land Management

[NV–020–1430–01; N–62221]

Notice of Realty Action for Proposed Occupancy Lease of Public Lands for Commercial Photography Camp, and Continued Use as a Base Camp in Conjunction With Livestock Management Activities, Nevada

AGENCY: Bureau of Land Management, Interior.

ACTION: The proposed leasing of public land for a year round camp for conducting commercial photography instruction, as well as for continued use as a base camp in conjunction with existing livestock management activities.

The site proposed for leasing under provisions of section 302 of the Federal Land Policy and Management Act (FLPMA) of 1976 and 43 CFR Part 2920 is described as follows:

Mount Diablo Meridian, Nevada

T. 46 N., R. 32 E.,

Sec. 32: SW¼NW¼NW¼SW¼.

The proposal would include approximately 1 acre.

The parcel affected by the proposed lease is located near Gartiez Spring in the Bilk Creek Mountain Range. No additional development/construction, or surface disturbance of the area, would occur as a result of this lease.

No other proposals will be accepted. The proposed parcel is encumbered by a cabin and ancillary facilities, owned by the applicant and permitted under Section 4 of the Taylor Grazing Act. The proposal is to expand the existing authorized uses of the parcel to include a commercial photography camp. Therefore, no other proposals would be acceptable.

The proposal would be authorized by a lease for a term of 10 years. The lease could be renewed at the discretion of the authorized officer.

The proposed parcel has not been appraised at this time, so no estimate of rent is available. However, rent will not be less than the appraised fair market value.

For a period of 45 days from the date of publication of this Notice in the **Federal Register**, interested parties may submit comments to the District Manager, Winnemucca Field Office, 5100 E. Winnemucca Boulevard, Winnemucca, Nevada 89445. In the absence of adverse comments, an application for the proposed use will be processed in accordance with proper application procedures.

FOR FURTHER INFORMATION CONTACT: Mary Figarelle, Realty Specialist, Winnemucca Field Office, 5100 E. Winnemucca Boulevard, Winnemucca, Nevada, 89445, or call (702) 623–1500.

Dated: January 9, 1998.

Ron Wenker,

District Manager, Winnemucca, Nevada.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[UT080–08–1020 00 241A]

Book Cliffs Resource Management Plan

AGENCY: Bureau of Land Management, DOI.

ACTION: Notice of intent to amend plan.

SUMMARY: This notice is to advise the public that the Bureau of Land Management (BLM) is proposing to do a plan amendment for the Book Cliffs Resource Management Plan (RMP) located in Uintah County, Utah.

DATES: The comment period for the proposed plan amendment will commence with publication of this notice. Comments must be submitted on or before February 23, 1998.

FOR FURTHER INFORMATION CONTACT: Duane De Paepe, Planning and Environmental Coordinator, Vernal Field Office, Bureau of Land Management, 170 South 500 East, Vernal, Utah 84078. Existing planning documents and information are available at the above address or telephone (435) 781–4403. Comments on the proposed plan amendment should be sent to the above address.

SUPPLEMENTARY INFORMATION: The BLM is proposing to amend the Book Cliffs RMP, which includes public and Ute Indian tribal lands in Uintah County, Utah. The proposed amendment would authorize oil and gas leasing and development in the Hill Creek Federal Oil and Gas Unit located approximately 35 miles south of Vernal, Utah, encompassing approximately eight square miles (or 5,350 acres) within Sections 27 through 34 of Township 10 South, Range 20 East. Approximately 78 percent (4,150 acres) of the project area is located on lands belonging to the Uintah and Ouray Indian Reservation. Approximately 18 percent (960 acres) is located on public lands administered by the BLM, and the remaining approximately 4 percent (240 acres) is located on private lands. An environmental assessment is being prepared to analyze the impacts of this proposal and alternatives.

Dated: January 9, 1998.

G. William Lamb,

Utah State Director.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[ID–957–1220–00]

Idaho: Filing of Plats of Survey; Idaho

The plat of the following described land was officially filed in the Idaho State Office, Bureau of Land Management, Boise, Idaho, effective 9:00 a.m. January 15, 1998.

The plat representing the dependent resurvey of portions of Mineral Survey No. 2153, and a survey of lot 22 in section 14, T. 24 N., R. 1 E., Boise Meridian, Idaho, Group 1003, was accepted January 15, 1998. This survey was executed to meet certain administrative needs of the Bureau of Land Management. All inquiries concerning the survey of the above described land must be sent to the Chief, Cadastral Survey, Idaho State Office, Bureau of Land Management, 1387 South Vinnell Way, Boise, Idaho, 83709–1657.

Dated: January 15, 1998.

Duane E. Olsen,

Chief Cadastral Surveyor for Idaho.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR–957–00–1420–00: G8–0074]

Filing of Plats of Survey: Oregon/Washington

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice.

SUMMARY: The plats of survey of the following described lands are scheduled to be officially filed in the Oregon State Office, Portland, Oregon, on or before February 23, 1998.

Willamette Meridian

Oregon

T. 16 S., R. 5 E., accepted November 25, 1997
T. 41 S., R. 43 E., accepted November 25, 1997
T. 39 S., R. 4 W., accepted November 21, 1997
T. 20 S., R. 6 W., accepted December 30, 1997
T. 35 S., R. 6 W., accepted December 24, 1997
T. 28 S., R. 6 W., accepted November 12, 1997
T. 31 S., R. 10 W., accepted November 21, 1997

Washington

T. 6 N., R. 19 E., accepted November 21, 1997
T. 30 N., R. 7 W., accepted December 15, 1997

If protests against a survey, as shown on any of the above plat(s), are received prior to the date of official filing, the filing will be stayed pending consideration of the protest(s). A plat will not be officially filed until the day after all protests have been dismissed and become final or appeals from the dismissal affirmed.

The plat(s) will be placed in the open files of the Oregon State Office, Bureau of Land Management, 1515 S.W. 5th Avenue, Portland, Oregon 97201, and will be available to the public as a matter of information only. Copies of the plat(s) may be obtained from the above office upon required payment. A person or party who wishes to protest against a survey must file with the State Director, Bureau of Land Management, Portland, Oregon, a notice that they wish to protest prior to the proposed official filing date given above. A statement of reasons for a protest may be filed with the notice of protest to the State Director, or the statement of reasons must be filed with the State Director within thirty (30) days after the proposed official filing date.

The above-listed plats represent dependent resurveys, survey and subdivision. **FOR FURTHER INFORMATION CONTACT:** Bureau of Land Management, (1515 S.W. 5th Avenue) P.O. Box 2965, Portland, Oregon 97208.

Dated: January 9, 1998.

BILLING CODE 4310–33–M

DEPARTMENT OF THE INTERIOR

Minerals Management Service

Agency Information Collection Activities: Proposed Collection; Comment Request

AGENCY: Minerals Management Service (MMS), Interior.

ACTION: Notice of extension of a currently approved information collection.

SUMMARY: As part of its continuing effort to reduce paperwork and respondent burden, MMS invites the public and other Federal agencies to comment on a proposal to extend the currently approved collection of information discussed below. The Paperwork Reduction Act of 1995 (PRA) provides that an agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid Office of Management and Budget (OMB) control number.

DATES: Submit written comments by March 24, 1998.

ADDRESSES: Direct all written comments to the Rules Processing Team, Minerals Management Service, Mail Stop 4020, 381 Elden Street, Herndon, Virginia 20170–4817.

FOR FURTHER INFORMATION CONTACT: Alexis London, Rules Processing Team, telephone (703) 787–1600. You may also contact Alexis London to obtain a copy of this collection of information.

SUPPLEMENTARY INFORMATION:

Title: 30 CFR 250, Subpart P, Sulphur Operations.

OMB Control Number: 1010–0086.

Abstract: The Outer Continental Shelf (OCS) Lands Act (43 U.S.C. 1331 *et seq.*), as amended, requires the Secretary of the Interior to preserve, protect, and develop oil and gas resources in the OCS; make such resources available to meet the Nation's energy needs as rapidly as possible; balance orderly energy resource development with protection of the human, marine, and coastal environment; ensure the public a fair and equitable return on the resources offshore; and preserve and maintain free enterprise competition. To carry out these responsibilities, MMS has issued regulations at 30 CFR Part 250. Subpart P, Sulphur Operations, of that part contains requirements and procedures for sulphur drilling, well-completion, and well-workover operations and production in the OCS.

The MMS uses the information collected under subpart P to ensure that sulphur operations and production in the OCS are carried out in a manner that is safe and pollution free. If respondents submit proprietary information, it will be protected under 30 CFR 250.18, Data and information to be made available to the public. No items of a sensitive nature are collected. The requirement to respond is mandatory.

Estimated Number and Description of Respondents: Currently there is only one active Federal OCS sulphur lease operator.

Frequency: On occasion, varies by section.

Estimated Annual Reporting and Recordkeeping Hour Burden: There are 447 burden hours currently approved for this collection.

Comments: The MMS will summarize written responses to this notice and address them in its submission for OMB approval. All comments will become a matter of public record. We will also consult with the respondent on the accuracy of the burden estimate. As a result of the consultation and comments we receive, we will make any necessary adjustments for our submission to OMB. In calculating the burden, MMS may have assumed that respondents perform some of the requirements and maintain records in the normal course of their activities. The MMS considers these to be usual and customary. Commenters are invited to provide information if they disagree with this assumption and they should tell us what the burden hours and costs imposed by this collection of information are.

VOL 63 ISS 15 JA 23 1998 UMI

(1) The MMS specifically solicits comments on the following questions:

(a) Is the proposed collection of information necessary for the proper performance of MMS's functions, and will it be useful?

(b) Are the estimates of the burden hours of the proposed collection reasonable?

(c) Do you have any suggestions that would enhance the quality, clarity, or usefulness of the information to be collected?

(d) Is there a way to minimize the information collection burden on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other forms of information technology?

(2) In addition, the PRA requires agencies to estimate the total annual reporting and recordkeeping cost burden for the collection of this information. The MMS needs your comments on this item. Your response should split the cost estimate into two components: (a) total capital and startup cost component; and (b) annual operation, maintenance, and purchase of services component. Your estimates should consider the costs to generate, maintain, and disclose or provide the information. You should describe the methods you use to estimate major cost factors, including system and technology acquisition, expected useful life of capital equipment, discount rate(s), and the period over which you incur costs. Capital and startup costs include, among other items, computers and software you purchase to prepare for collecting information; monitoring, sampling, drilling, and testing equipment; and record storage facilities. Generally, your estimates should not include equipment or services purchased: before October 1, 1995; to comply with requirements not associated with the information collection; for reasons other than to provide information or keep records for the Government; or as part of customary and usual business or private practices.

MMS Information Collection Clearance Officer: Jo Ann Lauterbach, (202) 208–7744.

Dated: January 12, 1998.

E. P. Danenberger,

Chief, Engineering and Operations Division.

BILLING CODE 4310–MR–P

DEPARTMENT OF THE INTERIOR

Bureau of Reclamation

Umatilla Basin Project, Umatilla, OR

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of intent to prepare an Environmental Impact Statement.

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau of Reclamation (Reclamation) proposes to prepare an environmental impact statement (EIS) on implementing Phase III of the Umatilla Basin Project. The Phase III study will evaluate the potential for modifying and expanding Reclamation's existing Umatilla Basin Project (Project) to provide additional flows in the Umatilla River for anadromous fish. In addition, the study will evaluate potential measures to improve municipal and industrial water supplies in the study area. Alternatives, including no action, will be evaluated in the EIS.

ADDRESSES:

Bureau of Reclamation, Pacific Northwest Regional Office, 1150 N Curtis Road, Suite 100, Boise, ID 83706–1234.

Bureau of Reclamation, Upper Columbia Area Office, P.O. Box 1749, Yakima, WA 98907–1749.

FOR FURTHER INFORMATION CONTACT: For information on the study, contact Robert Hamilton, Activity Manager, at (208) 378–5087 or at the above regional office address. For information regarding the NEPA process, contact John Tiedeman, Environmental Specialist, at (509) 575–5848 ext. 238 or at the above area office address.

SUPPLEMENTARY INFORMATION: Authorization for this study is contained in the Feasibility Studies Act of 1966, Public Law 89–561. The study will build upon prior activities authorized as part of the Project. These activities meet some but not all of the fishery needs of the basin. Recent data collected from monitoring of instream flows indicate that the restoration of flows resulting from Project activities to date will be less than originally estimated.

This study will evaluate the potential of providing water from the Columbia River to the Westland Irrigation District in exchange for water normally diverted from the Umatilla River. This would leave additional flows for resident and anadromous fish species in the river downstream of the Westland Irrigation District diversion. Restoration of the fishery would be of major cultural and economic importance to the Confederated Tribes of the Umatilla Reservation for whom anadromous fisheries are Indian Trust Assets. Other opportunities for instream enhancement and opportunities for enhancement of municipal and industrial water supplies will also be evaluated.

Reclamation plans to conduct public scoping meetings to identify issues and concerns will be used in the development of alternatives. The dates, times, and locations of public scoping meetings will be noted in newspapers of general circulation in the Pendleton and Hermiston, Oregon, areas and surrounding communities.

Dated: January 15, 1998.

John W. Keys, III,

Regional Director, Pacific Northwest Region.

BILLING CODE 4310–94–M

AGENCY FOR INTERNATIONAL DEVELOPMENT

Agency Information Collection Activities; Proposed Collection; Comment Request

ACTION: Renew Collections: Comment Request.

SUMMARY: U.S. Agency for International Development (USAID) is making efforts to reduce the paperwork burden. USAID invites the general public and other Federal agencies to take this opportunity to comment on the following continuing information collections, as required by the Paperwork Reduction Act of 1995. Comments are requested concerning: (1) Whether the continuing collections of information is necessary for the proper performance of the functions of the agency, including whether information shall have practical utility; (2) the accuracy of the burden estimates; (3) ways to enhance the quality, utility, and clarity of the information collected, and (4) ways to minimize the burden of the collection of information on the respondents, including the use of automated collection techniques or other forms of information technology.

Comments regarding this information collection are best assured of having their full effect if received within 60 days of this notification.

ADDRESSES INFORMATION TO: Beverly Johnson, Bureau for Management, Office of Administrative Services, Information and Records Division, U.S. Agency for International Development, Washington, D.C. 20523, 202–712–1365 or via e-mail bjohnson@usaid.gov.

SUPPLEMENTARY INFORMATION:

OMB Number: OMB 0412–0550.

Form Numbers: AID 1570–13 and 1570–14.

Title: Narrative/Time-Line and Report on Commodities (Quarterly Reports).

Type of Submission: Renew.

Purpose: The purpose of this information collection is to properly respond to the annual competition among applicants who apply on behalf of their sponsored overseas institutions, independent reviewers and ASHA need to assess the strength and capability of the U.S. organizations, the overseas institutions and the merits of their proposed projects. Easily accessible historical records on past accomplishments and performance by repeat USOs, would speed the grant making process and provide documented reasons for both successful and unsuccessful applications.

Annual Reporting Burden:

Respondents: 70.

Total annual responses: 1,470.

Total annual hours requested: 735.

Dated: January 14, 1998.

Willette L. Smith,

Chief, Information and Records Division Bureau for Management, Office of Administrative Services.

BILLING CODE 6116–01–M

INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

Agency for International Development Board for International Food and Agricultural Development Interim Advisory Committee on Food Security; Notice of Meeting

Pursuant to the Federal Advisory Committee Act, notice is hereby given of the Board for International Food and Agricultural Development (BIFAD) Interim Advisory Committee Meeting. The meeting will be held from 9:00 a.m. to 5:00 p.m. on February 11, 1998, at the Pan-American Health Organization, located at 525 23rd Street N.W., Washington DC, 20523, in Conference Room B.

The Interim Advisory Committee will provide input to the U.S. Government on the Development of a long-term action plan in support of commitments made in the U.S. Country Paper and at the World Food Summit.

The meeting is open to the public. Any interested person may attend the meeting, may file written statements with the Committee before or after the meeting, or present any oral statements in accordance with procedures established by the Committee, to the extent that time available for the meeting permits.

Those wishing to attend the meeting should contact Mr. George Like at the Agency for International Development, Ronald Reagan Building, Office of Agriculture and Food Security, 1300 Pennsylvania Avenue, N.W., Room 2.11–072, Washington DC, 20523–2110, telephone (202) 712–1436, fax (202) 216–3010 or internet [glike@usaid.gov] with your full name.

Anyone wishing to obtain additional information about BIFAD should contact Mr. Tracy Atwood the Designated Federal Officer for BIFAD. Write him in care of the Agency for International Development, Ronald Reagan Building, Office of Agriculture and Food Security, 1300 Pennsylvania Avenue, N.W., Room 2.11–005, Washington DC, 20523–2110, telephone him at (202) 712–5571 or fax (202) 216–3010.

Tracy, Atwood,

AID Designated Federal Officer, (Chief, Food Policy Division, Office of Agriculture and Food Security, Economic Growth Center, Bureau for Global Programs).

BILLING CODE 8116–01–M

DEPARTMENT OF LABOR

Employment Standards Administration

Wage and Hour Division; Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedes decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, N.W., Room S–3014, Washington, D.C. 20210.

Modifications to General Wage Determination Decisions

The number of decisions listed in the Government Printing Office document entitled "General Wage Determinations Issued Under the Davis-Bacon and Related Acts" being modified are listed by Volume and State. Dates of publication in the **Federal Register** are in parentheses following the decisions being modified.

Volume I:

None.

Volume II:

None.

Volume III:

None.

Volume IV:

None.

Volume V:

None.

Volume VI:

None.

Volume VII:

None.

General Wage Determination Publication

General wage determinations issued under the Davis-Bacon and related Acts, including those noted above, may be found in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon and Related Acts". This publication is available at each of the 50 Regional Government Depository Libraries and many of the 1,400 Government Depository Libraries across the country.

The general wage determinations issued under the Davis-Bacon and related Acts are available electronically by subscription to the FedWorld Bulletin Board System of the National Technical Information Service (NTIS) of the U.S. Department of Commerce at (703) 487–4630.

Hard-copy subscriptions may be purchased from: Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, (202) 512–1800.

When ordering hard-copy subscription(s), be sure to specify the State(s) of interest, since subscriptions may be ordered for any or all of the seven separate volumes, arranged by State. Subscriptions include an annual edition (issued in January or February) which includes all current general wage determinations for the States covered by each volume. Throughout the remainder of the year, regular weekly updates are distributed to subscribers.

Signed at Washington, D.C. this 16th day of January 1998.

Carl J. Poleskey,

Chief, Branch of Construction Wage Determinations.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[Notice (98–006)]

NASA Advisory Council, Life and Microgravity Sciences and Applications Advisory Committee, Commercial Advisory Subcommittee; Meeting

AGENCY: National Aeronautics and Space Administration.

ACTION: Notice of meeting.

SUMMARY: In accordance with Federal Advisory Committee Act, Pub. L. 92–463, as amended, the National Aeronautics and Space Administration announces a meeting of the NASA Advisory Council, Life and Microgravity Sciences and Applications Advisory Committee, Commercial Advisory Subcommittee.

DATES: Wednesday, February 4, 1998, 8:30 a.m. to 5:00 p.m.

ADDRESSES: NASA Headquarters, Room MIC 6, 300 E Street SW, Washington DC 20546.

FOR FURTHER INFORMATION CONTACT: Ms. Candace Livingston, Code UX, National Aeronautics and Space Administration, Washington, DC 20546, 202/358–0697.

SUPPLEMENTARY INFORMATION: The meeting will be open to the public up to the seating capacity of the room. Advance notice of attendance to the Executive Secretary is requested. The agenda for the meeting will include the following topics:

—Stewardship Accounting Standard
—Access to Space
—Commercialization Team Activities and Findings
—Selection/Transition Criteria
—Overview of three Commercial Space Centers

It is imperative that the meeting be held on this date to accommodate the scheduling priorities of the key participants. Visitors will be requested to sign a visitor's register.

Dated: January 13, 1998.

Alan M. Ladwig,

Associate Administrator for Policy and Plans, National Aeronautics and Space Administration.

BILLING CODE 7510–01–M

NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration, Office of Records Services.

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice at least once monthly of certain Federal agency requests for records disposition authority (records schedules). Records schedules identify records of sufficient value to warrant preservation in the National Archives of the United States. Schedules also authorize agencies after a specified period to dispose of records lacking administrative, legal, research, or other value. Notice is published for records schedules that propose the destruction of records not previously authorized for disposal, or reduce the retention period for records already authorized for disposal. NARA invites public comments on such schedules, as required by 44 U.S.C. 3303a(a).

DATES: Requests for copies must be received in writing on or before March 9, 1998. Once the appraisal of the records is completed, NARA will send a copy of the schedule. The requester will be given 30 days to submit comments.

ADDRESSES: Address requests for single copies of schedules identified in this notice to the Civilian Appraisal Staff (NWRC), National Archives and Records Administration, 8601 Adelphi Road College Park, MD 20740–6001. Requesters must cite the control number assigned to each schedule when requesting a copy. The control number appears in the parentheses immediately after the name of the requesting agency.

FOR FURTHER INFORMATION CONTACT: Michael L. Miller, Director, Records Management Programs, National Archives and Records Administration, 8601 Adelphi Road, College Park, MD 20740–6001, telephone (301) 713–7110.

SUPPLEMENTARY INFORMATION: Each year U.S. Government agencies create billions of records on paper, film, magnetic tape, and other media. In order to control this accumulation, agency records managers prepare records schedules specifying when the agency no longer needs the records and what happens to the records after this period. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. These comprehensive schedules provide for the eventual transfer to the National Archives of historically valuable records and authorize the disposal of all other records. Most schedules, however, cover records of only one office or program or a few series of records, and many are updates of previously approved schedules. Such schedules also may include records that are designated for permanent retention.

Destruction of records requires the approval of the Archivist of the United States. This approval is granted after a thorough study of the records that takes into account their administrative use by the agency of origin, the rights of the Government and of private persons directly affected by the Government's activities, and historical or other value.

This public notice identifies the Federal agencies and their subdivisions requesting disposition authority, includes the control number assigned to each schedule, and briefly describes the records proposed for disposal. The records schedule contains additional information about the records and their disposition. Further information about the disposition process will be furnished to each requester.

Schedules Pending

1. General Accounting Office (N1–411–97–1). Updated comprehensive records schedule.

2. Department of Justice (N1–060–98–1). Facilitative records and training material accumulated by the International Criminal Investigation Training Program.

3. Department of the Treasury, Bureau of Alcohol, Tobacco, and Firearms (N1–436–97–2). Special Occupational Tax System and Federal Excise Tax System.

4. Environmental Protection Agency (N1–412–97–2). Waste Isolation Pilot Plants certification records (official docket copy will be preserved).

5. Federal Mine Safety and Health Review Commission (N1-470–98–1). Working files of case-related records of the Chief Administrative Law Judge, Administrative Law Judges, and law clerk of the Chief Judge.

6. U.S. Office of Government Ethics (N1–522–98–2). Office of General Counsel and Legal Policy trust files.

7. Panama Canal Commission (N1–185–98–2). Expenditure accounting records.

Dated: January 16, 1998.

Michael J. Kurtz,

Assistant Archivist for Record Services—Washington, DC.

BILLING CODE 7515–01–P

NATIONAL SCIENCE FOUNDATION

Alan T. Waterman Award Committee; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting:

Name: Alan T. Waterman Award Committee (#1172).

Date and Time: Monday, February 9, 1998; 8 a.m.–3 p.m.

Place: Room 370, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Mrs. Susan E. Fannoney, Executive Secretary, Room 1220, National Science Foundation, 4201 Wilson Blvd., Arlington, VA 22230. Telephone: 703/306–1096.

Purpose of Meeting: To provide advice and recommendations in the selection of the Alan T. Waterman Award recipient.

Agenda: To review and evaluate nominations as part of the selection process for awards.

Reason for Closing: The nominations being reviewed include information of a personal nature where disclosure would constitute unwarranted invasions of personal privacy. These matters are exempt under 5 U.S.C. 552b(c)(6) of the Government in the Sunshine Act.

Dated: January 20, 1998.

NATIONAL SCIENCE FOUNDATION

Special Emphasis Panel in Bioengineering and Environmental Systems; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Name: Special Emphasis Panel in Bioengineering and Environmental Systems (No. 1189).

Date and Time: February 11–12, 1998; 8:00 a.m.–6:00 p.m.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 390, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: H. Frederick Bowman, Program Director, Biomedical Engineering and Research to Aid Persons with Disabilities, Division of Bioengineering and Environmental Systems, National Science Foundation, 4201 Wilson Boulevard, Arlington, VA 22230, Telephone: (703) 306–1318.

Purpose of Meeting: To provide advice and recommendations concerning proposals submitted to NSE for financial support.

Agenda: To review and evaluate proposals as part of the selection process for awards.

Reason for Closing: The proposals being reviewed include information of a proprietary or confidential nature, including technical information; financial data, such as salaries; and personal information concerning individuals associated with the proposals. These matters are exempt under 5 U.S.C. 552b(c), (4) and (6) of the Government in the Sunshine Act.

Dated: January 20, 1998.

NATIONAL SCIENCE FOUNDATION

Advisory Committee for Computer and Information Science and Engineering; Committee of Visitors; Notice of Meeting

In accordance with the Federal Advisory Committee Act (Pub. L. 92–463, as amended), the National Science Foundation announces the following meeting.

Name: Advisory Committee for Computer and Information Science and Engineering; Committee of Visitors, Networking Research Program (1115).

Date and Time: February 2–3, 1998; 8:30 am–5:00 pm each day.

Place: National Science Foundation, 4201 Wilson Boulevard, Room 1150, Arlington, VA 22230.

Type of Meeting: Closed.

Contact Person: Tatsuya Suda, Program Director, Division of Advanced Networking Infrastructure & Research, 4201 Wilson Boulevard, Arlington, VA 22230. Phone: (703) 306–1950.

Purpose of Meeting: To carry out Committee of Visitors (COV) review, including examination of decisions on proposals, reviewer comments, and other privileged materials.

Agenda: To provide oversight review of the Networking Research Program.

Reason for Closing: The meeting is closed to the public because the Committee is reviewing proposal actions that will include privileged intellectual property and personal information that could harm individuals if they are disclosed. If discussions were open to the public, these matters that are exempt under 5 U.S.C. 552b(c) (4) and (6) of the Government in the Sunshine Act would be improperly disclosed.

Reason for Late Notice: Meeting Notice was inadvertently misplaced.

Dated: January 16, 1998.

Committee on Equal Opportunities in Science and Engineering; Notice of Meeting

In accordance with the Federal Advisory Committee Act, Pub.L 92–463, as amended, the National Science Foundation announces the following meeting:

Name: Committee on Equal Opportunities in Science and Engineering (#1173).

Date and Time: February 9–10, 1998; 8:30 a.m. to 5:00 p.m. and 8:45 a.m. to 5:00 p.m.

Place: Room 1235, National Science Foundation, 4201 Wilson Blvd., Arlington, VA.

Type of Meeting: Open.

Contact Person: Sue Kemnitzer, Executive Secretary, Room 585, NSF, 4201 Wilson Blvd., Arlington, Va. 22230. Phone: (703) 306–1382.

Minutes: May be obtained from the contact person at the above address.

Purpose of Meeting: To advise NSF on policies and activities of the Foundation to encourage full participation of women, minorities, and persons with disabilities currently underrepresented in scientific, engineering, professional, and technical fields and to advise NSF concerning implementation of the provisions of the Science and Engineering Equal Opportunities Act.

Agenda

1. Briefing on congressional activities related to science and engineering, including briefing on FY 1999 congressional budget;
2. NSF's GPRA Strategic Plan review;
3. Follow up on development of a Strategic Plan for the Committee and other items from previous meetings; and
4. Briefings and discussions on capacity building, disability issues, and education partnerships.

Dated: January 15, 1998.

BILLING CODE 7555–01–M

NUCLEAR REGULATORY COMMISSION

[Docket Nos. 50–269, 50–270, and 50–287]

Oconee Nuclear Station, Units 1, 2, and 3; Notice of Consideration of Issuance of Amendment to Facility Operating License, Proposed No Significant Hazards Consideration Determination, and Opportunity for a Hearing

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating License Nos. DPR–38, DPR–47, and DPR–55 issued to Duke Energy Corporation (the licensee) for operation of the Oconee Nuclear Station, Units 1, 2, and 3, located Oconee County, South Carolina.

The proposed amendments would revise Technical Specification (TS) Table 4.1–1 and Specification 4.5.2.1.2 to allow a one-time extension for specified Unit 2 refueling outage surveillances during operating cycle 16.

Before issuance of the proposed license amendments, the Commission will have made findings required by the Atomic Energy Act of 1954, as amended (the Act) and the Commission's regulations.

The Commission has made a proposed determination that the amendment request involves no significant hazards consideration. Under the Commission's regulations in 10 CFR 50.92, this means that operation of the facility in accordance with the proposed amendments would not (1) involve a significant increase in the probability or consequences of an accident previously evaluated; or (2) create the possibility of a new or different kind of accident from any accident previously evaluated; or (3) involve a significant reduction in a margin of safety. As required by 10 CFR 50.91(a), the licensee has provided its analysis of the issue of no significant hazards consideration, which is presented below:

This proposed change has been evaluated against the standards in 10 CFR 50.92 and has been determined to involve no significant hazards, in that operation of the facility in accordance with the proposed amendment would not:

1. Involve a significant increase in the probability or consequences of an accident previously evaluated?

No. A review of the previous two instrument channel tests and calibrations for the instruments discussed in the amendment request concluded that no adverse affects should occur as a result of the one-time extension. The ICCM [Inadequate Core Cooling Monitor] should be available to perform its intended function during the requested extension period. Thus, the probability and consequences of an accident previously evaluated will not be significant[ly] increased.

In addition, a review of the previous ES channel 5 and 6 manual trip test and Reactor Building Cooling system test that are discussed in the amendment request concluded that no adverse affects should occur as a result of the one-time extension. ES channels 5 and 6 and the Reactor Building Cooling system should be available to perform their intended function during the requested extension period. Thus, the probability and consequences of an accident previously evaluated will not be significantly increased.

2. Create the possibility of a new or different kind of accident from the accidents previously evaluated?

No. Since the one-time extension should not cause any adverse effects on the ICCM, ES channels 5 and 6, or Reactor Building Spray system, a new or different kind of accident from the accidents which were previously evaluated will not occur. The ICCM, ES channels 5 and 6, and Reactor Building Cooling system, should be available to perform their intended function during the requested extension period.

3. Involve a significant reduction in a margin of safety?

No. The margin of safety will not be significantly reduced by this amendment request because the ICCM, ES channels 5 and 6, and Reactor Building Cooling system, should be available to perform their intended function during the requested extension period. In addition, the review of the previous tests and calibrations which are discussed in the amendment request concluded that no adverse affects should occur as a result of the one-time extension.

Duke has concluded based on the above information that there are no significant hazards involved in this amendment request.

The NRC staff has reviewed the licensee's analysis and, based on this review, it appears that the three standards of 10 CFR 50.92(c) are satisfied. Therefore, the NRC staff proposes to determine that the amendment request involves no significant hazards consideration.

The Commission is seeking public comments on this proposed determination. Any comments received within 30 days after the date of publication of this notice will be considered in making any final determination.

Normally, the Commission will not issue the amendment until the expiration of the 30-day notice period. However, should circumstances change during the notice period such that failure to act in a timely way would

VOL
63
ISS
15
JA
23
1998
UMI

result, for example, in derating or shutdown of the facility, the Commission may issue the license amendment before the expiration of the 30-day notice period, provided that its final determination is that the amendment involves no significant hazards consideration. The final determination will consider all public and State comments received. Should the Commission take this action, it will publish in the **Federal Register** a notice of issuance and provide for opportunity for a hearing after issuance. The Commission expects that the need to take this action will occur very infrequently.

Written comments may be submitted by mail to the Chief, Rules and Directives Branch, Division of Administrative Services, Office of Administration, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and should cite the publication date and page number of this **Federal Register** notice. Written comments may also be delivered to Room 6D22, Two White Flint North, 11545 Rockville Pike, Rockville, Maryland, from 7:30 a.m. to 4:15 p.m. Federal workdays. Copies of written comments received may be examined at the NRC Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC.

The filing of requests for hearing and petitions for leave to intervene is discussed below.

By February 23, 1998, the licensee may file a request for a hearing with respect to issuance of the amendment to the subject facility operating license and any person whose interest may be affected by this proceeding and who wishes to participate as a party in the proceeding must file a written request for a hearing and a petition for leave to intervene. Requests for a hearing and a petition for leave to intervene shall be filed in accordance with the Commission's "Rules of Practice for Domestic Licensing Proceedings" in 10 CFR Part 2. Interested persons should consult a current copy of 10 CFR 2.714 which is available at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina. If a request for a hearing or petition for leave to intervene is filed by the above date, the Commission or an Atomic Safety and Licensing Board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel, will rule on the request and/or petition; and the Secretary or the designated Atomic Safety and Licensing Board will issue a notice of hearing or an appropriate order.

As required by 10 CFR 2.714, a petition for leave to intervene shall set forth with particularity the interest of the petitioner in the proceeding, and how that interest may be affected by the results of the proceeding. The petition should specifically explain the reasons why intervention should be permitted with particular reference to the following factors: (1) the nature of the petitioner's right under the Act to be made party to the proceeding; (2) the nature and extent of the petitioner's property, financial, or other interest in the proceeding; and (3) the possible effect of any order which may be entered in the proceeding on the petitioner's interest. The petition should also identify the specific aspect(s) of the subject matter of the proceeding as to which petitioner wishes to intervene. Any person who has filed a petition for leave to intervene or who has been admitted as a party may amend the petition without requesting leave of the Board up to 15 days prior to the first prehearing conference scheduled in the proceeding, but such an amended petition must satisfy the specificity requirements described above.

Not later than 15 days prior to the first prehearing conference scheduled in the proceeding, a petitioner shall file a supplement to the petition to intervene which must include a list of the contentions which are sought to be litigated in the matter. Each contention must consist of a specific statement of the issue of law or fact to be raised or controverted. In addition, the petitioner shall provide a brief explanation of the bases of the contention and a concise statement of the alleged facts or expert opinion which support the contention and on which the petitioner intends to rely in proving the contention at the hearing. The petitioner must also provide references to those specific sources and documents of which the petitioner is aware and on which the petitioner intends to rely to establish those facts or expert opinion. Petitioner must provide sufficient information to show that a genuine dispute exists with the applicant on a material issue of law or fact. Contentions shall be limited to matters within the scope of the amendment under consideration. The contention must be one which, if proven, would entitle the petitioner to relief. A petitioner who fails to file such a supplement which satisfies these requirements with respect to at least one contention will not be permitted to participate as a party.

Those permitted to intervene become parties to the proceeding, subject to any limitations in the order granting leave to intervene, and have the opportunity to participate fully in the conduct of the hearing, including the opportunity to present evidence and cross-examine witnesses.

If a hearing is requested, the Commission will make a final determination on the issue of no significant hazards consideration. The final determination will serve to decide when the hearing is held.

If the final determination is that the amendment request involves no significant hazards consideration, the Commission may issue the amendment and make it immediately effective, notwithstanding the request for a hearing. Any hearing held would take place after issuance of the amendment.

If the final determination is that the amendment request involves a significant hazards consideration, any hearing held would take place before the issuance of any amendment.

A request for a hearing or a petition for leave to intervene must be filed with the Secretary of the Commission, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, Attention: Rulemakings and Adjudications Staff, or may be delivered to the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, by the above date. A copy of the petition should also be sent to the Office of the General Counsel, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, and to J. Michael McGarry, III, Winston and Strawn, 1200 17th Street, NW., Washington, DC 20036, attorney for the licensee.

Nontimely filings of petitions for leave to intervene, amended petitions, supplemental petitions and/or requests for hearing will not be entertained absent a determination by the Commission, the presiding officer or the presiding Atomic Safety and Licensing Board that the petition and/or request should be granted based upon a balancing of the factors specified in 10 CFR 2.714(a)(1)(i)-(v) and 2.714(d).

For further details with respect to this action, see the application for amendments dated January 15, 1998, which is available for public inspection at the Commission's Public Document Room, the Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Oconee County Library, 501 West South Broad Street, Walhalla, South Carolina.

Dated at Rockville, Maryland, this 20th day of January 1998.

For the Nuclear Regulatory Commission.

David E. LaBarge,

Senior Project Manager, Project Directorate II–2, Division of Reactor Projects—I/II, Office of Nuclear Reactor Regulation.

BILLING CODE 7590–01–P

SECURITIES AND EXCHANGE COMMISSION

Sunshine Act Meeting

Notice is hereby given, pursuant to the provisions of the Government in the Sunshine Act, Pub. L. 94–409, that the Securities and Exchange Commission will hold the following meeting during the week of January 26, 1998.

A closed meeting will be held on Thursday, January 29, 1998, at 10:00 a.m.

Commissioners, Counsel to the Commissioners, the Secretary to the Commission, and recording secretaries will attend the closed meeting. Certain staff members who have an interest in the matters may also be present.

The General Counsel of the Commission, or his designee, has certified that, in his opinion, one or more of the exemptions set forth in 5 U.S.C. 552b(c)(4), (8), (9)(A) and (10) and 17 CFR 200.402(a)(4), (8), (9)(i) and (10), permit consideration of the scheduled matters at the closed meeting.

Commissioner Johnson, as duty officer, voted to consider the items listed for the closed meeting in a closed session.

The subject matter of the closed meeting scheduled for Thursday, January 29, 1998, at 10:00 a.m., will be:

Institution and settlement of injunctive actions.

Institution and settlement of administrative proceedings of an enforcement nature.

At times, changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: The Office of the Secretary at (202) 942–7070.

Dated: January 21, 1998.

Jonathan G. Katz,

Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39555; File No. SR–NASD–97–98]

Self-Regulatory Organizations; Notice of Filing and Immediate Effectiveness of Proposed Rule Change by the National Association of Securities Dealers, Inc. Relating to SelectNet Fees

January 15, 1998.

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 31, 1997, the National Association of Securities Dealers, Inc. ("NASD" or "Association") through its wholly owned subsidiary, the Nasdaq Stock Market, Inc. ("Nasdaq") filed with the Securities and Exchange Commission ("Commission" or "SEC") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the NASD. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

Pursuant to Rule 19b–4 under the Act Nasdaq is herewith filing a proposed extension of the temporary 50% fee reduction currently charged under NASD Rule 7010(1) for the execution of a transaction in SelectNet.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the NASD included statements concerning the purpose of and basis for the proposed rule change.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

Nasdaq is proposing to extend the temporary 50% fee abatement currently charged under NASD Rule 7010(1) for the execution of a transaction in SelectNet. This proposed extension continues the current SelectNet fee reduction from $2.50 per side to $1.25 per side and is effective January 1, 1998, through March 31, 1998. The proposed extension constitutes only a temporary abatement in the fee Nasdaq collects and, if no further action is taken, SelectNet fees will revert to the $2.50 per side level on April, 1998.

The reasons justifying a SelectNet fee reduction are contained in Nasdaq's original rule filing in October of 1997 seeking a 50% abatement for the period of October 1, 1997, through December 31, 1997.[2] SelectNet usage has continued to grow with more than 107,000 transactions in October of 1997 and over 79,000 transactions in November of 1997. Nasdaq believes that while the level of SelectNet activity supports a continuation of lower SelectNet fees, the volatility of current SelectNet usage levels militates in favor of the maintenance of the fee reduction on a temporary basis.

Nasdaq believes that the proposed extension of the fee reduction is consistent with Section 15A(b)(5) of the Act, which requires that the rules of the NASD provide for the equitable allocation of reasonable dues, fees and other changes among members and issuers and other persons using any facility or system which the NASD operates or controls.

B. Self-Regulatory Organization's Statement on Burden on Competition

The NASD believes that the proposed rule change will not result in any burden on competition that is not necessary or appropriate in furtherance of the purposes of the Act.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received From Members, Participants, or Others

Comments were neither solicited nor received.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

This filing applies to the assessment of SelectNet fees to NASD members, and thus the proposed rule change is effective immediately upon filing pursuant to Section 19(b)(3)(A)(ii)[3] of the Act and subparagraph (e)(2) of Rule 19b–4 under the Act[4] because the proposal is establishing or changing a due, fee or other charge.

At any time within 60 days of the filing of the proposed rule change, the Commission may summarily abrogate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Act.

[4] 17 CFR 240.19b–4(e)(2).

VOL 63 ISS 15 JA 23 1998 UMI

IV. Solicitation of Comments

Interested persons are invited to submit written data, views, and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Room. Copies of such filing will also be available for inspection and copying at the principal office of the NASD. All submissions should refer to File No. SR–NASD–97–98 and should be submitted by February 13, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[5]

Margaret H. McFarland,

Deputy Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39548; File No. SR–Phlx–97–23]

Self-Regulatory Organizations: Philadelphia Stock Exchange, Inc.; Order Granting Approval to Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval to Amendment No. 2 Relating to the Treatment of PACE Orders in Double-up/Double-down Tick Situations

January 13, 1998.

I. Introduction

On May 2, 1997, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") submitted to the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] a proposed rule change relating to double-up/double-down automatic price improvement and manual price protection. On August 4, 1997, the Exchange submitted to the Commission Amendment No. 1 to the proposed rule change.[3]

The proposed rule change was published for comment in Securities Exchange Act Release No. 39000 (September 2, 1997), 62 FR 47865 (September 11, 1997). No comments were received on the proposal. On October 20, 1997, the Exchange submitted to the Commission Amendment No. 2 to the proposed rule change.[4] This order approves the proposal, including Amendment No. 2 on an accelerated basis.

II. Description

A. Background

The Exchange, pursuant to Rule 19b–4 of the Act, proposes to adopt Supplementary Material .07(c) to Phlx Rule 229, Philadelphia Stock Exchange Automatic Communication and Execution ("PACE") System, relating to automatic double-up/double-down price improvement and manual double-up/double-down price protection. The PACE System accepts orders for automatic or manual execution in accordance with the provisions of Phlx Rule 229, which governs the operation of the PACE System and defines its objectives and parameters. Agency orders received through PACE are subject to certain minimum execution parameters and non-agency orders are subject to the provisions of Supplementary Material .02 of Rule 229. In addition, Rule 229 establishes execution parameters for orders depending on type (market or limit), size, and the guarantees offered by specialists.[5]

B. Automatic Double-up/Double-down Price Improvement

The Exchange proposes to adopt Rule 2929.07(c)(i), Automatic Double-up/Double-down Price Improvement, which would state that where the specialist voluntarily agrees to provide automatic double-up/double-down price improvement to all customers and all eligible orders in a security, in any instance where the bid/ask spread of the PACE Quote[6] is a ¼ point or greater, market and marketable limit orders[7] in NYSE-listed or Amex-listed securities for 599 shares or less that are received through PACE in double-up/double-down situations shall be provided with automatic price improvement of ⅛ of a point, beginning at 9:45 a.m.

Under the proposal, a "double-up/double-down situation" is defined as a trade that would be at least: (i) ¼ point (up or down) from the last regular way sale on the primary market; or (ii) ¼ point from the regular way sale that was the previous intra-day change on the primary market. The term "double" originated with two ⅛ point ticks, meaning ¼ of a point. Under the proposal, a down tick of 1/16 of a point followed by a down tick of 3/16 of a point would be a double-down situation, because it equals ¼ of a point.

As an example of the part (i) of the definition of a double up/double-down situation, assuming that the specialist has agreed to participate in this feature, where the PACE Quote is 22½–22¾, if the last sales on the primary market were 22¾ followed by a down tick at 22⅝, a double-up/double-down situation would not occur for a market order to buy, because buying at 22¾ is a single up tick of ⅛ of a point and, thus, does not meet the ¼ point requirement. Under the proposal, because no double-up/double-down situation occurred, no automatic price improvement would be afforded. However, applying part (ii) of the definition, a double-up/double-down situation would occur for a sell order, because a sale at 22½ is a ¼ point away from the next-to-last intra-day change, executed at 22¾. Under the proposal, the market order to sell would be automatically executed at 22⅝, providing an ⅛ point price improvement over the otherwise-automatic execution at 22½.

Where the PACE Quote is 22¼–22¾, with the last sale at 22½, part (i) of the definition would apply to a market order to buy or sell, because buying at 22¾ creates a double-up tick (¼ of a point away from 22½) and selling at 22¼ creates a double-down tick (also ¼ of a point away from 22½).

If the last sale was at 22¾ and the next-to-last sale was at 22½, part (i) of the definition would apply to a market order to sell, because selling at 22¼ creates a double-down tick ½ of a point away from 22¾, and part (ii) of the definition would apply to a buy order, because buying at 22¾, although not an up or down tick from the last sale of 22¾, is ¼ of a point away from the next to last change, executed at 22½.

If the last sale was at 22⅝ and the next-to-last sale was at 22½, part (ii) of the definition would apply to a market order to buy, because buying at 22¾ creates a double-up tick (¼ of a point away) from 22½, as well as to a market order to sell, because selling at 22¼ creates a double-down tick (¼ of a point away) from 22½.

Pursuant to part (ii) of the definition of a double-up/double-down situation, this term includes qualifying changes from the last change, not just the two previous last sales. For example, where the last sales on the primary market were: 22½; 22⅜; and 22⅜, with the PACE Quote at 22¼–22½, a market order to sell that would otherwise be executable at 22¼ should be price-improved to 22⅜, because it is a double-down tick (¼ of a point away) from the last "change" or sale that was the previous change (meaning the change from 22½ to 22⅜).[8] Under part (i) of the definition, this order would not qualify as a double-up/double-down situation, because an execution at 22¼ would be only ⅛ of a point away from the last sale of 22⅜.

To explain the interaction between the POES window and the automatic double-up/double-down price improvement feature, assuming that the PACE Quote is 15½–¾ and the last sale was at 15½, an order to buy 500 shares would be subject to automatic price improvement, because buying at 15¾ creates a double up tick (¼ of a point away) from the last sale at 15½. The order would be automatically executed under the proposal at 15⅝ (giving ⅛ of a point price improvement over the PACE Quote of 15¾) and no POES window would occur. The proposed automatic double-up/double-down price improvement feature results in an automatic execution, with no window, timer or delay. If, on the other hand, the order was to sell 500 shares, a double-up/double-down situation would not occur, because selling at 15½ is not a double-up/double-down situation (not ¼ of a point away from the last sale); this order would be POES-eligible such that the POES window would apply. At the expiration of the POES window, absent manual specialist intervention, this order would be manually executed at 15½, its Stop Price.

Automatic double-up/double-down price improvement also would be available for marketable limit orders. As an example, assuming that the specialist has agreed to participate in this feature, where the PACE Quote is 15½–15¾, and the last sale was at 15½, an order to buy 500 shares at 15¾ would be subject to automatic price improvement, because buying at 15¾ creates a double up tick (¼ of a point away) from the last sale at 15½. The order to buy 500 shares at 15¾ is a marketable limit order, because it is immediately executable on the offer. Under this proposal, this order would be automatically executed at 15⅝, receiving price improvement of ⅛ of a point.

The Exchange notes that the execution resulting from the automatic price improvement feature can *create* a double-up/double-down situation; for instance, where the PACE Quote is 32–32¼ and the last sale was at 32⅜, a sell order that would be executable at 32 would be improved to 32⅛, which is a double-down tick (¼ point from 32⅜ to 32⅛).

Automatic double-up/double-down price improvement will not occur where the execution price would be outside the primary market high/low range for the day, if out-of-range protection was elected by the member organization entering the order pursuant to Rule 229.07(a). The following example illustrates how the execution price before automatic price improvement can be out-of-range. Where the primary market high and low for the day are 22½ and 22¼, the last sale was at 22⅜ and the PACE Quote is 22⅝–22⅞, an incoming market order to sell would revert to manual status since an execution at 22⅝ (or 22¾, if automatic price improvement would have been applied) would constitute an out-of-range execution (*i.e.*, an execution at 22⅝ would have been at a price about the 22½ high for the day). The next example illustrates how the execution price could be out-of-range as a result of automatic price improvement. Where the primary market high and low for the day are 22⅝ and 22¼, the last sale was at 22⅜ and the PACE Quote is 22⅝–22⅞, an incoming sell order executable at 22⅝ would *not* be improved to 22¾, because such price would be out-of-range (*i.e.*, an execution at 22¾ would have been at a price above the 22⅝ high for the day). Instead, the order would revert to manual status, and the specialist would either stop the order or execute if at 22⅝. Absent out-of-range protection, the 22⅝ execution would have been a double-up situation (¼ of a point away from the last sale of 22⅜).

The Exchange represented that it is proposing to extend its price improvement initiative to double-up/double-down situations, because these are particularly suitable for price improvement. Instead of affording an automatic execution at the PACE Quote, the proposal results in an automatic execution that improves on that price by an ⅛ of a point.

The Exchange has determined that, as with many PACE features and participation in the PACE System itself, automatic double-up/double-down price improvement should be made available on a voluntary, symbol-by-symbol basis, so that specialists can determine which securities are suitable for the program. Moreover, the Exchange has asserted that the availability of a price improvement feature benefits the specialist function, especially in high-volume securities, where stopping orders and effecting manual intervention are time-consuming, can delay execution, and do not necessarily result in price improvement.

C. Manual Double-up/Double-down Price Protection

The Exchange also proposes to adopt a manual double up/double-down price protection provision as Rule 229.07(c)(ii). Currently, a form of manual double-up/double-down price protection is a feature of the PACE System, but is neither mandatory, nor

[5] 17 CFR 200.30-3(a)(12).

[1] 15 U.S.C. § 78s(b)(1).

[2] 17 CFR 240.19b–4.

[3] *See* Letter from Philip H. Becker, Senior Vice President and Chief Regulatory Officer, Phlx, to Michael Walinskas, Senior Special Counsel, Division of Market Regulation, SEC, dated August 1, 1997 ("Amendment No. 1").

[4] *See* Letter from Philip H. Becker, Senior Vice President, Phlx, to Michael Walinskas, Senior Special Counsel, SEC, dated October 17, 1997 ("Amendment No. 2"). Amendment No. 2 revises the proposal to provide that relief from the requirements concerning double-up/down guarantee sizes may be granted pursuant to the extraordinary circumstances language contained in the text of proposed Rule 229.07(c)(iii), rather than that of existing Rule 229.13. Moreover, the text of Rule 229.07(c)(iii) is proposed to be amended to state that extraordinary circumstances also include situations where the Exchange is unable to receive market quotations in a timely and accurate manner. In addition, while the Form 19b–4 filing containing the proposed rule change stated that member organizations may decline to participate in both double-up/down automatic price improvement and manual price protection, the text of proposed Rule 229.07(c)(i)(D) did not reflect this option. Amendment No. 2 adds such language to the text.

[5] Rule 229.05 provides that round-lot market orders up to 500 shares and partial round-lot ("PRL") market orders of up to 599 shares, which combine a round-lot with an odd-lot, are stopped at the PACE Quote at the time of their entry into PACE ("Stop Price") for a 30 second delay to provide the Phlx specialist with the opportunity to effect price improvement when the spread between the PACE Quote exceeds ⅛ of a point. This feature is known as the Public Order Exposure System ("POES") "window." Rule 229.05 further provides that market orders for more than 599 shares that a specialist voluntarily has agreed to execute automatically also are entitled to participation in POES. If orders eligible for POES are not executed within the POES 30 second window, the order is automatically executed at the Stop Price.

[6] The PACE Quote consists of the best bid/offer among the American Stock Exchange ("Amex"); New York Stock Exchange ("NYSE"); Pacific Exchange; Phlx, Boston Stock Exchange, Cincinnati Stock Exchange, and Chicago Stock Exchange, as well as the Intermarket Trading System/Computer Assisted Execution System ("ITS/CAES"). *See* Rule 229.

[7] A market order is an order to buy or sell a stated amount of a security at the best price obtainable when the order is received. A marketable limit order is an order to buy or sell a stated amount of a security at a specified price, which is received at a time when the market is trading at or better than such specified price.

[8] The first down tick was from 32½ to 32⅜, and the second down tick would have been from 32⅜ to 32¼ had the order been executed. The intervening sale at 32⅜ does not change this result.

VOL 63 ISS 15 JA 23 1998 UMI

available in all securities.[9] Nor has it been incorporated into Exchange rules. Thus, the Exchange is proposing to replace the existing voluntary feature with the proposed mandatory feature. This aspect of the proposal is intended to impose a double-up/double-down price protection requirement upon specialists that choose not to participate in the automatic price improvement feature. Manual price protection would apply in ⅛ point-wide markets or greater in double-up/double-down situations; thus, unlike automatic price improvement, which is triggered only by ¼ point-wide or greater markets, a 3/16 point-wide market would trigger manual price protection. Further, the Exchange has represented that in situations where both manual double-up/double-down price protection and POES would otherwise apply, an order will receive manual price protection, but will not be eligible for POES.[10]

The proposed manual double-up/double-down price protection provision would stop eligible orders (*i.e.*, automatically executable market and marketable limit orders of 599 shares or less in NYSE- or Amex-listed securities received through PACE in double-up/double down situations, beginning at 9:45 a.m.) to give such orders the possibility of receiving manual price improvement from the specialist. Under this proposal, an eligible order would be "stopped" by the specialist at the PACE Quote at the time of its entry into PACE, meaning that the order is guaranteed to receive at least the price by the end of the trading day. Consistent with Phlx Equity Floor Procedure Advice A–2 ("Advice A–2") specialists are required to display stopped orders at an improved price and any contra-side orders received by the specialist will be taken into account for purposes of determining when to execute a stopped order and at what price.

The Exchange has represented that the purpose of a manual price protection provision is to provide an alternative double-up/double-down feature, which allows for price improvement, albeit not automatic, for securities which the specialist has determined are not appropriate for the automatic feature, due to, for example, liquidity, trading patterns, and volatility. In this regard, the Exchange has stated that less liquid stocks may trade in sizes that render it unfair to specialists to afford automatic price improvement to such orders and manage the resulting positions.[11]

D. Both Features

For both automatic price improvement and manual price protection, specialists may establish higher sizes than the 599 share minimum (but less than or equal to the specialist's automatic execution guarantee), which may be changed effective the next day. Member organizations entering PACE orders ("PACE Users") will be notified of any such changes.

Specialists choosing to activate the automatic feature would also be subject to the procedure described above (*i.e.*, it would become effective the next day). In addition, switching between the automatic and manual features triggers this procedure. Signing up for the manual price protection feature is not required, because all specialists will be required to participate.

PACE Users entering orders may decline to participate in the automatic and manual double-up/double-down features; however, they may not choose to participate in only one of the two features. Moreover, odd-lot orders are not eligible for either proposed feature. Further, the proposed features are available only for orders that are eligible for automatic execution. For instance, non-marketable limit orders and orders exceeding a specialist's automatic execution guarantee size are not eligible for either proposed feature, because the features depend upon either stopping or automatically improving orders guaranteed a certain automatic execution price.

Finally, the proposed rule change provides that both proposed features may be disengaged in a security or floor-wide in extraordinary circumstances. In addition to fast market conditions, extraordinary circumstances also include systems malfunctions and other circumstances that limit the Exchange's ability to receive, disseminate, or update market quotations in a timely and accurate manner.

III. Discussion

For the reasons discussed below, the Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, with the requirements of Section 6(b).[12] In particular, the Commission believes the proposal is consistent with the Section 6(b)(5) requirements that the rules of an exchange be designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to remove impediments to and perfect the mechanism of a free and open market and a national market system, and, in general, to protect investors and the public interest.[13]

Over the years, the Commission has recognized that the increased competition for order flow that results from permitting regional specialists to attract orders from other markets by providing price improvement opportunities and superior quotations enhances market making ability and the quality of customer order execution. The Commission has approved proposals by national securities exchanges to integrate price improvement opportunities, on both an automatic and manual basis, into their automatic execution systems. Accordingly, the Commission believes that the Exchange's present proposal, which would adopt both automatic price improvement and manual price protection features in double-up/double-down situations, may enhance both intermarket competition and order execution quality on the Exchange. In addition, the Commission believes that both features should contribute to the maintenance of orderly markets by Phlx specialists because they help to reduce the price variations occurring from trade to trade on low volume.

A. Automatic Double-up/Double-down Price Improvement

Under the proposal, specialists voluntarily may agree to provide automatic price improvement of ⅛ of a point from the PACE Quote to all customers and all market and marketable limit orders of up to 599 (or higher, if elected by the specialist)

[9] The Exchange has represented that the current double-up/down price protection feature has been in use since 1991. If elected by the entering member organization in a security selected by the specialist as eligible for this feature, orders within the specialist's automatic execution guarantee size are stopped in double/up/down situations.

[10] Telephone conversation between Philip Becker, Senior Vice President and Chief Regulatory Officer, Phlx, and Jon Kroeper, Special Counsel, Division of market Regulation, SEC, dated November 7, 1997. The Phlx proposal also states that the POES window is not applicable where the automatic double up/down price improvement feature is applicable.

[11] Specifically, the Exchange has stated that its reference to trading patterns may cover stocks where the spread between the bid and offer is very narrow, with little trading occurring between such bid/offer spread, or very wide, with most trading on the bid/offer. Moreover, the Exchange has stated its belief that low volatility stocks may not be appropriate for automatic price improvement, because little movement in the stock may also indicate that little trading is occurring between the bid and offer price.

[12] 15 U.S.C. § 78f(b).

[13] In approving the proposed rule change, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. § 78c(f).

shares in a particular security on a stock-by-stock basis, in any instance where the bid/ask spread of the PACE Quote is ¼ point or greater and an automatic execution at the PACE Quote would create a double-up/double-down situation from the last primary market sale. The Commission believes that the adoption of this proposed feature by the Exchange is appropriate in that its use by Phlx specialists should increase the likelihood that eligible customer orders, particularly marketable limit orders, will be executed at an improved price over the PACE Quote. As stated above, certain market orders already are stopped in the POES window for 30 seconds to give the specialist the opportunity to provide price improvement to such orders.[14] The Commission's Division of Market Regulation previously has noted that price improvement windows, such as POES, by themselves rarely provide an execution that betters the quoted market.[15] The Exchange's proposal should enhance the price improvement opportunities available for such orders as it will provide automatic price improvement to eligible orders in double-up/double-down situations.

The Commission's recent Report on the Practice of Preferencing found that the frequency of price improvement for marketable limit orders was significantly lower than that for market orders when measured across exchanges, spreads, and order size ranges.[16] As marketable limit orders currently are not eligible for the POES window, the Commission finds that the proposed automatic price improvement feature should have a beneficial impact, in that it should increase significantly the price improvement opportunities available to marketable limit orders, as such orders otherwise would be executed automatically at the PACE Quote upon their entry into PACE.

B. Manual Double-up/Double-down Price Protection

The Exchange also has proposed to adopt a mandatory manual double-up/double-down price protection feature.[17] In situations where a specialist has not agreed to provide automatic double-up/double-down price improvement, this feature would stop all market and marketable limit orders of up to 599 shares (or higher, if elected by the specialist) to all customers in all stocks in instances where the bid/ask spread of the PACE Quote is ⅛ or greater in double-up/double-down situations, making it possible for the specialist to provide price improvement to such orders.

The Commission historically has been concerned that the practice of stopping stock may compromise the specialist's fiduciary duties to unexecuted limit orders on the specialist's limit order book.[18] The Commission, however, has approved the practice in instances where the harm to existing orders on the specialist's limit order book was believed to be offset by the resulting reduced spread and possibility of price improvement for the stopped order. The Commission believes that the instances in which the Exchange's proposal is intended to apply are appropriate for the use of stopping stock procedures.

Further, the Commission notes that the proposal and existing Phlx procedures provide for the display of stopped orders by Phlx specialists. Specifically, Advice A–2, which governs the handling of stopped orders on the Phlx equity floor, requires a Phlx specialist who stops an order pursuant to the feature to display such an order in his or her quote at an improved price.[19]

Moreover, as was stated above in connection with double-up/double-down price improvement, the proposed manual double-up/double-down price protection feature gives the specialist the opportunity to provide price improvement to orders that would otherwise be subject to immediate automatic execution at the PACE Quote. Additionally, a specialist voluntarily may extend automatic price improvement or manual price protection in double-up/double-down situations to orders for more than 599 shares, provided the level is at or below the specialist's automatic execution guarantee. This aspect of the proposal should have a beneficial impact as it appears to be specifically targeted to provide the possibility of price improvement by the specialist to orders currently lacking such opportunities.

The Commission also believes that the proposal, taken together with Advice A–2, the proposal provides adequate guidelines for a specialist's handling of orders that are stopped in double-up/double-down situations in a manner consistent with his or her obligation to maintain fair and orderly markets.[20] In particular, proposed Rule 229.07(c)(ii) provides that orders that are stopped for manual double-up/double-down price protection are guaranteed to receive at least the Stop Price by the end of the trading day. While the specialist's provision of this guarantee is implicit in the concept of stopping stock, it is not stated explicitly in Advice A–2.[21]

[14] *See supra* note 5.

[15] *See*, Division of Market Regulation, SEC, *Market 2000: An Examination of Current Equity Market Developments* (January 1994), at Study V, n.19.

[16] *See* SEC, *Report on the Practice of Preferencing* (April 11, 1997) at Tables V–8A to V–8C.

[17] As stated above, the Exchange has represented that its existing manual double-up/double-down price improvement feature has been in use since 1991. *See supra* note 9 and accompanying text.

The Commission notes that Section 19(b) of the Act provides that each self-regulatory organization is required to file any proposed rule change with the Commission and that no proposed rule change shall take effect unless approved by the Commission or otherwise permitted in accordance with its provisions.

[18] *See* SEC, Report of Special Study of Securities Markets, 88th Cong., 1st Sess., H.R. Doc. No. 95, pt. 2, at 150–154; Preferencing Report, *supra* note 16, at Part II.B.4. For example, in a market quoted 20–20⅛ (with a minimum variation of 1/16 of a point), 1000 shares bid and offered, the offer representing a customer limit order, the specialist receives a market order to buy 500 shares. If the specialist decides to stop the market order, the specialist will change his or her quote to 20 1/16–20⅛, 500 shares bid and 1000 shares offered, the bid representing the stopped market order. If the specialist subsequently receives a market order to sell 500 shares, the specialist will execute the sell order against the stopped order at 20 1/16, improving the price for the stopped order. However, the sell limit order at 20⅛ with priority on the book is bypassed and does not receive the execution it would have had if the stop had not been granted. In addition, if the market turns away from the limit price (*i.e.*, moves to 20–20 1/16 or lower), the limit order may never be executed.

The Commission notes, however, that because manual double-up/double-down price protection only is available in ⅛ point markets and greater, and the minimum trading variation on the Phlx currently is 1/16, the proposal does not implicate the Commission's particular and continuing concerns with the practice of stopping stock in minimum variation markets that were set forth in the Preferencing Report. *See* Preferencing Report, *supra* note 16, at Part II.B.4.

[19] The Commission notes that the Exchange has represented that in situations where both manual double-up/double-down price protection and POES would otherwise apply, an order will receive manual price protection, but will not be eligible for POES. *See supra* note 9. The Commission believes that this aspect of the proposal should increase order exposure on the Exchange, as orders stopped for manual price protection will be required to be displayed in the specialist's quote, whereas orders eligible for POES are displayed only to the specialist. *See supra* note 5.

[20] *See* Phlx Rule 203.

[21] In approving the Phlx's adoption of Advice A–2 in 1994, the Commission stated its belief that "further action could be taken [by the Exchange] to ensure proper handling of stopped stock." *See* Securities Exchange Act Release No. 34614 (August 30, 1994), 59 FR 46280 (September 7, 1994) (File No. SR–Phlx–93–41). Specifically, the Commission stated that it expected the Phlx to submit a proposed rule change to complement its floor procedure advice. The Commission set forth a number of elements that the Exchange should consider including in such a rule, namely: a definition of the agreement to "stop" stock and the obligations of the member who agrees to grant the stop; the market conditions under which a stop should be granted; a policy for the execution of stopped stock and, in particular, for determining the price at which the order should be executed; and pilot procedures for minimum variation

Continued

VOL 63 ISS 15 JA 23 1998 UMI

C. Provisions Common to Both Proposed Features

Under Rule 229.07(a), PACE Users may elect that if an automatic execution of their orders at the PACE Quote would result in an execution price that is outside the primary market high-low range for that trading day, such orders would be routed to the specialist for manual execution at or within the high-low range of the day. The proposal provides that PACE Users may elect that neither automatic double-up/double-down price improvement nor manual double-up/double-down price protection will occur where the execution price (before or after the application of automatic price improvement) or Stop Price, respectively, would be outside the high-low range for the day. In such instances, orders would be handled manually by the specialist and be subject to an execution at or within the primary market high-low range of the day. The Commission believes that this aspect of the proposal is appropriate in that it provides PACE Users with greater flexibility as to the disposition of their orders. Moreover, providing such flexibility could enhance the Exchange's competitive position among firms seeking an appropriate venue for the execution of their order flow.

In addition, under proposed Rule 229.07(c)(i)(D), PACE Users may decline to participate in the automatic and manual double-up/double-down features; however, they may not choose to participate in only one of the two features.[22] The Commission believes that such a provision is appropriate in that it should offer a preferred alternative to PACE Users for whom a prompt execution at a definitive price is most important. As described above, when the manual double up/double down price protection feature is applicable, a significant time delay may occur when an order is stopped and price improvement is attempted. In addition, as with offering PACE Users the alternative between double-up/double-down features and out-of-range services, offering PACE Users the option to decline both features may enhance its competitive position among order execution venues. The Commission further believes that the Exchange's decision to require that PACE Users only may decline to participate in both features, not a particular one, is a decision that appropriately falls within the business judgment of the Exchange.

Further, proposed Rule 229.07(c)(i) and (c)(ii) set forth procedures through which specialists may activate automatic double-up/double-down price improvement in a particular stock, switch between the automatic and manual features, and change the size of the orders that will be eligible for either feature. In each instance, the change will be effective the next trading day, and PACE Users will be notified of any such changes. The Commission believes the proposal provides satisfactory procedures in this regard. In particular, the Commission believes that making these changes effective on the next trading day is appropriate in that it grants specialists the necessary flexibility to manage the proposed features in light of changing market conditions. At the same time, it alleviates concerns that specialists potentially may take advantage of their unique knowledge with respect to incoming PACE order flow to make intra-day modifications to the double-up/double-down features that would be to the detriment of other market participants.

Finally, proposed PACE Rule 229.07(c)(iii) provides that both double-up/double-down features may be disengaged in one or more securities, upon the presence of extraordinary circumstances, as determined by two Phlx Floor Officials. Extraordinary circumstances are defined to include fast market conditions, systems malfunctions and other circumstances that limit the Exchange's ability to receive, disseminate, or update market quotations in a timely manner. The Commission believes that this aspect of the proposal is appropriate in that it provides sufficient guidance to the Phlx membership by clearly delineating the circumstances under which the double-up/double down features may be disengaged and the procedure to be followed in seeking such disengagement. The Commission further believes that the provision requiring two Floor Officials to approve the disengagement of both double-up/double-down features is important. Specifically, while the particular categories of events covered in the proposed paragraph generally are appropriate grounds for the disengagement of the double-up/double-down features, the Commission believes that requiring Floor Officials to confirm that such conditions exists is a necessary safeguard to ensure the appropriate treatment of PACE orders eligible for these features.[23]

The Commission finds good cause for approving Amendment No. 2 to the proposed rule change prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Amendment No. 2 revises the proposals to provide that relief from the requirements concerning double-up/double-down guarantee sizes may be granted pursuant to the extraordinary circumstances language contained in the text of proposed Rule 229.07(c)(iii) to the PACE Rule, rather than that of existing PACE Rule 229.13. The Commission believes that amending the proposal to utilize Rule 229.07(c)(iii) for this purpose is a reasonable approach, as this provision has been formulated specifically for use in double-up/double-down situations, whereas Rule 229.13 was developed to apply in the context of specialist performance obligations. In addition, Amendment No. 2 revises the text of proposed Rule 229.07(c)(iii) to state that extraordinary circumstances also include situations where the Exchange is unable to receive market quotations in a timely and accurate manner, as well as where it is unable to disseminate or update such quotations. The Commission finds that the addition of this provision is appropriate in that such instances may interfere with the ability of PACE to determine whether a double-up/double-down situation actually has occurred, and the ability of specialists to handle orders stopped pursuant to the manual feature. Further, Amendment No. 2 adds language to the text of proposed Rule 229.07(c)(i)(D) to state specifically that member organizations may decline to participate in both double-up/double-down features. While this alternative was set forth in the Form 19b–4 filing containing the proposed rule change, it was not reflected in the text of proposed Rule 229.07(c)(i)(D). The Commission finds that this aspect of the change is appropriate in that it will serve as a reminder to member organizations of the availability of this alternative. Finally, the Commission notes that the proposed rule change was noticed previously in the **Federal Register** for the full statutory period and the Commission did not receive any comments on it. Therefore, the Commission believes that it is consistent with Section 6(b)(5) of the Act to approve Amendment No. 2 to the proposed rule change on an accelerated basis.

markets that are consistent with the rules of priority, parity, and precedence. The Commission continues to believe strongly that the Exchange should submit a proposed rule change pursuant to Section 19(b) of the Act and Rule 19b-4 thereunder to adopt such a stopping stock rule.

[22] A firm's election to not participate in the double up/double down features will apply to trading in all Phlx stocks; the firm will not be able to make separate elections on a security by security basis. Phone conversation between Michael Walinskas, SEC and Edith Hallahan, Phlx, January 13, 1998.

[23] In addition, the Commission expects the Exchange to monitor the performance of Floor Officials in granting any requests by specialists to disengage the double-up/double-down features.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning Amendment No. 2 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submission, all subsequent amendments, all written statements with respect to the proposed rules changes that are filed with the Commission, and all written communications relating to Amendment No. 2 between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. § 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available at the principal office of the Exchange. All submissions should refer to File No. SR–Phlx–97–23 and should be submitted by February 13, 1998.

V. Conclusion

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[24] that the proposed rule change (SR–Phlx–97–23), as amended, is approved.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[25]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39549; File No. SR–Phlx–96–38]

Self-Regulatory Organizations; Order Approving Proposed Rule Change and Notice of Filing and Order Granting Accelerated Approval of Amendment Nos. 2, 4 and 5 to the Proposed Rule Change by the Philadelphia Stock Exchange, Inc., Relating to the Listing of Flexible Exchange Traded Equity and Index Options

January 14, 1998.

I. Introduction

On August 21, 1996, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed a proposed rule change with the Securities and Exchange Commission ("SEC" or "Commission"), pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act")[1] and Rule 19b–4 thereunder,[2] to provide for the listing and trading of Flexible Exchange Options ("FLEX options") on specified indexes ("FLEX index options") and equity securities ("FLEX equity options").

Notice of the proposal was published for comment and appeared in the **Federal Register** on September 24, 1996.[3] The Phlx submitted to the Commission Amendment No. 1 to its proposal on March 6, 1997.[4] Notice of Amendment No. 1 was published for comment and appeared in the **Federal Register** on April 24, 1997.[5] The Phlx submitted to the Commission Amendment No. 2 to its proposal on July 1, 1997.[6] The Phlx submitted Amendment No. 3, on August 27, 1997,[7] which was subsequently replaced in its entirety by Amendment No. 4, which the Phlx submitted to the Commission on November 7, 1997.[8]

The Phlx submitted Amendment No. 5 to the Commission on January 6, 1998.[9]

No comment letters were received on the proposed rule change or on Amendment No. 1 to the proposed rule change. This order approves the Exchange's proposal, as amended by Amendment Nos. 1 through 5.

II. Background

The purpose of the Exchange's proposal is to provide a framework for the Exchange to list and trade equity and index options that give investors the ability, within specified limits, to designate certain of the terms of the options. In recent years, an over-the-counter ("OTC") market in customized options has developed which permits participants to designate the basic terms of the options, including size, term to expiration, exercise style, exercise price, and exercise settlement value, in order to meet their individual investment needs. Participants in this OTC market are typically institutional investors, who buy and sell options in large-size transactions through a relatively small number of securities dealers. To compete with this growing OTC market in customized options, the Exchange

[2] 17 CFR 240.19b–4.

[3] *See* Securities Exchange Act Release No. 37691 (September 17, 1996), 61 FR 50060.

[4] In Amendment No. 1 to its proposed rule change, the Phlx restated the original proposal and proposed several changes as set forth in detail in Section III of this release.

[5] *See* Securities Exchange Act Release No. 38519 (April 17, 1997), 62 FR 20048.

[6] In Amendment No. 2, the Exchange amended the Request for Quote process to require a Requesting Member to indicate the size of an order and the intention to cross, if applicable. In addition, the Phlx proposes specific position limits of 22,000 contracts for Super Cap Index options. *See* Letter from Edith Hallahan, Director and Special Counsel, Regulatory Services, Phlx, to Sharon Lawson, Senior Special Counsel, Office of Market Supervision ("OMS"), Division of Market Regulation ("Market Regulation"), Commission, dated June 25, 1997 ("Amendment No. 2").

[7] *See* Letter from Theresa McCloskey, Vice President, Phlx, to Sharon Lawson, Senior Special Counsel, OMS, Market Regulation, Commission, dated August 26, 1997 ("Amendment No. 3").

[8] The Phlx replaces Amendment No. 3, in its entirety, with Amendment No. 4, and proposes to: (1) eliminate the application of position and exercise limits to FLEX equity options; (2) reduce the minimum size applicable to a Request-for-Quote for a closing transaction in already-opened FLEX equity options from 100 to 25 contracts; (3) clarify the parity and priority principles for FLEX options transactions; (4) amend the proposed rule change to refer consistently to "FLEX index and equity options" (as opposed to index FLEX options); (5) correct the text of proposed Rule 1079(b)(6) regarding the crossing procedure to reflect that the crossing intention has already been announced as part of the RFQ, as amended by Amendment No. 2; and (6) amend proposed Rule 1079(a)(1) to clearly state that any options-eligible security pursuant to Rule 1009 is eligible to underlie FLEX equity options trading and any index underlying Non-FLEX options trading is also eligible for FLEX index options trading. These proposed changes are described more fully herein. *See* Letter from Philip H. Becker, Senior Vice President, General Counsel and Chief Regulatory Officer, Phlx, to Sharon Lawson, Senior Special Counsel, OMS, Market Regulation, Commission, dated November 3, 1997.

[9] The Phlx proposes in Amendment No. 5 to replace section 3 of Amendment No. 4 and withdraw the examples provided in Amendment 4. In Amendment No. 5, the Phlx clarifies: (1) the parity and priority principles for FLEX options transactions; and (2) that each assigned ROT or assigned Specialist is not required to respond with a quote in every instance, unless requested by a Floor Official. *See* Letter from Michele R. Weisbaum, Vice President and Associate General Counsel, Phlx, to Sharon Lawson, Senior Special Counsel, OMS, Market Regulation, Commission, dated December 9, 1997 ("Amendment No. 5").

VOL 63 ISS 15 JA 23 1998 UMI

proposes to adopt rules [10] to permit the introduction of trading in FLEX options in an exchange auction market environment, with The Options Clearing Corporation ("OCC") as issuer and guarantor.[11] Thus, FLEX options are structured with a minimum size reflecting the larger-sized trades of these institutional users. The Exchange's proposal will allow FLEX option market participants to designate the following contract terms: (1) exercise price (except for certain limitations for FLEX equity call options); [12] (2) exercise style (*i.e.*, American [13] or European,[14]; (3) expiration date; [15] (4) option type (put, call, or hedge order); and (5) form of settlement (for index options—A.M., P.M. or average).

The proposed rule, Rule 1079, is based upon the Exchange's Rule 1069, Customized Foreign Currency Options, and Exchange experience with trading this product since November, 1994.[16] Generally, FLEX options shall be traded in accordance with many existing option and index option rules; however, Rule 1079 contains certain new trading procedures unique to FLEX options. In addition, the Exchange believes that the proposal is similar to the rules and proposals of other exchanges respecting flexible options.[17]

OCC will be the issuer and guarantor of all FLEX index and equity options. Similarly, the Commission has previously, designated FLEX index and equity options as standardized options for purposes of the options disclosure framework established under Rule 9b–1 of the Act.[18]

III. Description of the Proposal[19]

The Phlx proposes to adopt Rule 1079, FLEX™ index and equity[20] options, which would govern the trading of FLEX index and equity options on the Exchange. The Exchange proposes to designate all Phlx index options as eligible for FLEX options trading.[21] Thus, the Phlx is proposing to trade FLEX options on industry (narrow-based) index options pursuant to the proposed rule, in addition to market (broad-based) index options. Further, the Phlx is proposing to trade FLEX equity options on securities which are options-eligible pursuant to Rule 1009.

Proposed Rule 1079 contains the characteristics, trading procedure and other provisions applicable to trading FLEX options. All FLEX options must be quoted and traded in the trading crowd of the corresponding non-FLEX option. The Exchange notes that the Automated Options Market ("AUTOM") system will not be available for FLEX options. Proposed Rule 1079 also states that although FLEX options are generally subject to the rules in the options section,[22] to the extent that the provisions of Rule 1079 are inconsistent with other applicable Exchange rules, Rule 1079 takes precedence with respect to FLEX options.

Because FLEX options would not be continuously quoted, nor are series pre-established, the variable terms of FLEX options shall be established by the following process. In order to initiate a transaction, a Requesting Member must submit an RFQ to the appropriate trading crowd, announcing the terms of the quote sought. The characteristics, including which terms and to what degree customization will be available, are outlined in Rule 1079(a).[23] For example, the exercise strike price respecting FLEX index options can be specified at the time the quote is requested in terms of a specific index value number (*e.g.*, 553.5), a method for fixing such number (*e.g.*, 10 basis points over the index value at a certain time, or with the future trading at a certain price), or a percentage of index value calculated as of the open or close of trading on the Exchange on the trade date (*e.g.*, 5% above the close).[24] Similarly, respecting FLEX equity options, the exercise strike price can be specified in terms of a specific dollar amount rounded to the nearest one-eighth of a dollar, or a percentage of the underlying security rounded to the nearest tick. However, the Exchange proposes to amend its original proposal to state that customization of FLEX equity option strike prices for calls will not be permitted; only strikes that may be listed pursuant to Rule 1012 are eligible, such that the strike price must be consistent with strike price intervals permissible for standardized non-FLEX equity options.[25]

The exercise style can be either American or European,[26] regardless of the exercise style of the listed option.[27] The expiration date can also be customized, specifying any business day (non-holiday)—any month, day and year within five years for Flex index options and three years for FLEX equity options.

[10] *See* Phlx Rule 1079.

[11] For a discussion of clearance and settlement procedure for FLEX options, *see* Securities Exchange Act Release No. 37318 (June 18, 1996) (SR–OCC–96–03). For example, OCC may depart from regular expiration date procedures and deadlines in the case of equity FLEX options, pursuant to OCC Rule 805, Interpretation and Policy .03.

[12] The Exchange believes that the flexible exercise price feature could result in an available call option that would not be eligible to be a qualified covered call ("QCC") under Section 1092(c)(4) of the Internal Revenue Code, thus jeopardizing a modest tax benefit currently enjoyed by writers of standardized non-FLEX equity call options. Accordingly, the Phlx's rules will restrict exercise prices for FLEX equity call options. *See also* Securities Exchange Act Release No. 37726 (September 25, 1996) (File No. SR–Amex–96–29; SR–CBOE–96–56; and SR–PSE–96–31).

[13] An American-style equity option is one that may be exercised at any time on or before the expiration date.

[14] A European-style equity option is one that may be exercised only during a limited period of time prior to expiration of the option.

[15] The proposal, however, requires that the expiration date of a FLEX equity option may not fall on a day that is on, or within two business days of the expiration date of a Non-FLEX equity option. In addition, FLEX index options must have an expiration date within 5 years of issuance, and FLEX equity options within 3 years of issuance.

[16] Securities Exchange Act Release No. 34925 (November 1, 1994) (SR–Phlx–94–18).

[17] *See, e.g.*, CBOE Rules 24A.1–24A.17; Amex Rules 900G, et. seq., and PSE Rules 8.100–8.115.

[18] FLEX index options and FLEX equity options have been deemed "standardized options" for purposes of the Rule 9b–1 options disclosure framework. *See e.g.*, Securities Exchange Act Release Nos. 31920 (February 24, 1993) (Order approving FLEX options based on the S&P 100 and 500 Indexes); 31910 (February 23, 1993) (FLEX index option 9b–1 order); and 36841 (February 14, 1996) (Order approving FLEX equity options for CBOE and PCX, and designating FLEX equity options, and FLEX index options traded and settled in certain designated foreign currencies, as "standardized options"). *See also* Securities Exchange Act Release No. 37824 (October 15, 1996) (FLEX equity option 9b–1 order).

[19] The original proposal was published for comment in Securities Exchange Act Release No. 37691 (September 17, 1996) (File No. SR–Phlx–96–38).

[20] The term "FLEX" is a trademark of the Chicago Board Options Exchange, Inc. ("CBOE").

[21] The following are the current Phlx market index options: Value Line Composite Index ("VLE"), National Over-the-Counter Index ("XOC"), and U.S. Top 100 Index ("TPX"). The following are the current Phlx industry index options: OTC Industrial Average Index ("OTZ"), Bank Index ("BKX"), Gold/Silver Index ("XAU"), Semiconductor Index ("SOX") and Utility Index ("UTY"), Forest and Paper ("FPP"), Plane ("PLN"), Phone ("PNX"), and Oil Service ("OSX"). Because the Super Cap Index ("HFX") is neither a market or an industry index, the Exchange applies a position limit of 5,500 contracts for the non-FLEX overlying option. This position limit is lower than the position limit tiers for standardized non-FLEX industry index options. In addition, the Exchange proposes to delete the provision that requires approval by the Options Committee prior to listing an otherwise eligible FLEX product. *See* Amendment No. 4, *supra* note 8.

[22] *See* Phlx Rules 1000, et. seq.

[23] The Exchange represents that Rule 1079 generally parallels the provisions of Rule 1069 governing customized foreign currency options.

[24] Initially, the exercise strike price will not be available for customization as a percentage, pending systems enhancements.

[25] *See* Rule 1012, Commentary .05.

[26] An American style option may be exercised at any time up to its expiration, while a European style option can only be exercised on its expiration day. *See* Phlx Rule 1000(b)(35).

[27] In certain circumstances, European style FLEX equity options may be adjusted to require the delivery upon exercise of a fixed amount of cash. *See* OCC By-Law, Article VI, Section 11, Interpretation and Policy .08.

However, FLEX options may not expire on any day that falls on or within two business days of (prior or subsequent to) a mid-month expiration day for a non-FLEX option on the same underlying index or security (other than a quarterly expiring index option). [28] In addition, a FLEX option cannot expire on the same day that series is established at OCC.[29]

With respect to the minimum size of FLEX *market index* option quotes, if there is no open interest in the particular series when an RFQ is submitted, the minimum value size of an RFQ is $10 million underlying equivalent value; if there is open interest, the minimum value size of an RFQ for an opening or closing transaction is $1 million underlying equivalent value, or the remaining underlying equivalent value on a closing transaction, whichever is less. The underlying equivalent value is defined as the aggregate underlying value of a FLEX index option (index multiplier times the current index value) multiplied by the number of FLEX index options. The minimum value size for a responsive quote in FLEX market index options is $1 million underlying equivalent value, or the remaining underlying equivalent value on a closing transaction, whichever is less.

With respect to the minimum size of FLEX *industry* index option quotes, if there is no open interest in the particular series when an RFQ is submitted, the minimum value size of an RFQ is $5 million underlying equivalent value; this amount is one-half of the minimum size proposed by the Phlx and currently in place on other options exchanges for flexible broad-based index options. Where there is open interest, the minimum value size of an RFQ for an opening or closing transaction is $1 million underlying equivalent value, or the remaining underlying equivalent value on a closing transaction, whichever is less. The minimum value size for a responsive quote is $1 million underlying equivalent value, or the remaining underlying equivalent value on a closing transaction, whichever is less.

With respect to the minimum size of FLEX *equity* option quotes, if there is no open interest in the particular series when an RFQ is submitted, the minimum value size of an RFQ is 250 contracts; if there is open interest, the minimum value size of an RFQ is 100 contracts in the case of an opening transaction; and 25 contracts, or the remaining size on a closing transaction, whichever is less. The minimum value size for a responsive quote in FLEX equity options is 25 contracts, or the remaining size on a closing transaction, whichever is less.[30] The Phlx also proposes that the minimum size for FLEX equity options exercises is reduced from the originally proposed 100 contracts to 25 contracts.

The Exchange proposes to lower the minimum size from 100 to 25 contracts under such circumstances, in part, to conform to the rules of other options exchanges.[31] Further, the Exchange believes that the ability to close positions in increments smaller than 100 contracts should attract additional FLEX trading interest. The Exchange notes that market participants wanting to execute an opening transaction in a particular series of FLEX equity options will continue to be required to meet the 250 or 100 minimum contract requirement.

Assigned ROTs and assigned Specialists, who respond to an RFQ, are required to respond to each RFQ with a certain minimum size. Respecting FLEX market index options, assigned ROTs and assigned Specialist, who respond to an RFQ, are required to respond with at least $10 million underlying equivalent value or the dollar amount requested in the RFQ, whichever is less. Respecting FLEX industry index options, assigned ROTs and assigned Specialists, who respond to an RFQ, are each required to respond with at least $5 million underlying equivalent value or the dollar amount requested in the RFQ, whichever is less. Respecting FLEX equity options, assigned ROTs and assigned Specialist, who respond to an RFQ, are required to respond with a market of at least 250 contracts or the size amount requested in the RFQ, whichever is less.

The settlement value for FLEX index options may be specified as the value reported on the Exchange at the: (i) close of trading (P.M.-settled), (ii) opening of trading (A.M.-settled), or (iii) as an average over a specified period of time, within parameters established by the Exchange.[32] For example, the third category includes the average of the index's opening and closing settlement values on the expiration date, the average of the index's high and low values on the expiration date, or the average of the index's opening, closing, high and low values on the expiration date. However, American style FLEX index options exercised prior to the expiration date can only settle based on the closing value on the exercise date.[33] FLEX index options maybe designated for settlement in U.S. dollars, British pounds, Canadian dollars, Deutsche marks, European Currency Units, French francs, Japanese yen or Swiss francs. With respect to the settlement process applicable to FLEX equity options, exercise settlement shall be by physical delivery of the underlying security pursuant to Rule 1044. Also, FLEX equity options will be subject to the exercise-by-exception procedures of OCC.[34]

With respect to the quote format of FLEX options, a bid and/or offer in the form of a specific dollar amount reflected as a fractional price (*e.g.*, 1/8, 1/4), or a percentage of the underlying security or underlying equivalent value, rounded to the nearest minimum tick shall be acceptable. The option type may be a put, call or hedge order.[35]

The quoting and trading procedure for FLEX options, beginning with the RFQ, is enumerated in Rule 1079(b). Submitting an RFQ is the first step in quoting FLEX options. The Requesting Member must first announced the RFQ to the trading crowd of the non-FLEX option and then submit an RFQ ticket, containing the following: (1) Underlying index or security, (2) type, (3) exercise style, (4) expiration date, (5) exercise price, and, respecting FLEX index options, (6) settlement value (*e.g.*, A.M. or P.M.), and (7) the designated settlement currency. Thereafter, on receipt of an RFQ in proper form, the assigned Specialist or the Requesting

[28] Quarterly expiring index options expire on the first business day of the month following the end of the calendar quarter.

[29] This provision replaces language in Rule 1079(a)(6)(C) of the original proposal stating that a new series cannot be opened on the day of exercise.

[30] The Exchange originally proposed minimum closing (if there is open interest) and responsive transaction sizes of 100 contracts. *See* Amendment No. 4, *supra* note 8.

[31] *See, e.g.*, Securities Exchange Act Release No. 38839 (July 15, 1997), 62 FR 39040 (July 21, 1997) (order approving File No. SR–CBOE–97–10).

[32] The Exchange proposes to retain its existing securities information vendor as the reporting authority for FLEX index options, respecting any additional index value calculations required due to the type of customization offered by FLEX options. The Exchange is not proposing, at this time, to utilize its own Index Calculation Engine ("ICE") System as the reporting authority for FLEX options. *See* Securities Exchange Act Release No. 38292 at n.4 (February 15, 1997) (SR–Phlx–96–36).

[33] This limitation is currently in place on other exchanges trading FLEX options and with respect to other American style A.M.-settled index options. *See* Characteristics and Risks of Standardized Options Trading, February 1994, at page 48.

[34] OCC Rule 805 provides for automatic exercise of in-the-money options at expiration without the submission of an exercise notice to OCC if the price of the security underlying the option is at or above a certain price (for calls) or at or below a certain price (for puts); and the non-exercise of an option at expiration if the price of the security underlying the option does not satisfy such price levels.

[35] *See* Rules 1000(b)(7) and 1066(f).

VOL 63 ISS 15 JA 23 1998 UMI

Member shall cause the terms of the RFQ to be disseminated as an administrative text message through the Options Price Reporting Authority ("OPRA").[36] RFQs, responsive quotes, booked orders and completed trades will be promptly reported to OPRA and disseminated as an administrative text message. The Exchange notes that although certain information is not required to be part of the RFQ (such as account type, crossing intention, response time and size), this information will be reflected on the final order ticket. Further, the size and crossing intention must be voiced as part of voicing the RFQ.[37]

Following the RFQ announcement, a preset response time will begin, during which members may provide responsive quotes. As stated in paragraph (b)(2), the response time, between two and 15 minutes, will be determined by the Options Committee.[38] During the response time, qualified members may provide responsive quotes to the RFQ, which may be entered, modified or withdrawn during such response time. At the end of the response time, the assigned Specialist, or if none, the Requesting Member shall determine the best bid and offer ("BBO"), based on price, disseminating such market with reference to the corresponding RFQ. However, where two or more bids/offers are at parity, proposed Phlx Rule 1079(b)(3) states that bids/offers submitted by an assigned Specialist, assigned ROT or customer will have priority over the bids/offers submitted by non-assigned ROTs and by controlled accounts as defined in Phlx Rule 1014(g)(i).[39] The Exchange has also explicitly set forth in the text of the proposed rule and Advice F–28 stating that all transactions must be in compliance with Section 11 of the Act and the rules promulgated thereunder.

Following the determination of the BBO, a BBO Improvement Interval may be invoked if the Requesting Member rejects the BBO or the BBO is for less than the entire size requested. The BBO Improvement Interval is a two minute time period during which the BBO may be matched or improved. As a result of the Improvement Interval, a new BBO is established, which is disseminated with reference to the corresponding RFQ. An assigned ROT and the assigned Specialist who responded with a market during the response time may immediately join the new BBO.

A trade in FLEX options cannot be executed until the end of the response time or BBO Improvement Interval. Once the response time or BBO Improvement Interval ends, the Requesting Member is given the first opportunity to trade on the market by voicing a bid/offer in the trading crowd.[40] The Requesting Member has no obligation to accept any bid or offer for a FLEX option. If the Requesting Member rejects the BBO or the BBO size exceeds the entire size requested, another member may accept such BBO or the unfilled balance of the BBO. Acceptance of a bid/offer creates a binding contract under Exchange rules.

Once the BBO is established, the RFQ remains open that trading day, unless a trade occurs, and a member may re-quote the market with respect to the open RFQ without submitting an additional RFQ. If a trade occurs, a new RFQ is required. Only an assigned ROT or assigned Specialist who responded to the open RFQ during the response time or BBO Improvement Interval may immediately join the re-quoted market, thus matching for parity purposes. Neither the Requesting Member, nor the re-quoting member, is given the first opportunity to trade on the re-quoted market.

Further, there will be a limit order book for FLEX options. The Specialist in the listed non-FLEX equity or index option, whether or not assigned in FLEX options, must accept FLEX orders on the FLEX book after completion of the RFQ process. Only customer day limit orders may be placed on the FLEX index or FLEX equity option book. Booked orders expire at the end of each trading day. The limit price and size must be written on the RFQ ticket and disseminated as an administrative text message through OPRA. In order to trade with the book, an executing member must quote the market and announce the trade. The Exchange proposes to delete the provision that the executing member has priority over other members, including assigned ROTs and the assigned Specialist, seeking to trade with the booked order. The purpose of this change is to trade FLEX options off the book similarly to non-FLEX options, noting that this consistency should prevent confusion.

Generally, on the Phlx options floor, a cross may take place in accordance with Rule 1064. The Requesting Member must voice the crossing intention as part of voicing the RFQ. With respect to FLEX options, after the BBO has determined, the Requesting Member intending to cross must bid (or offer) at or better than the BBO. If the Requesting Member's bid/offer is at the BBO, the Requesting Member may execute 25% or a fair split, whichever is greater, of the contra-side of the order that is the subject of the RFQ. For instance, if there are two members on parity at the BBO, the Requesting Member and an assigned ROT, the Requesting Member is entitled to receive 50% of the contra-side contracts, which is a fair split, not just the 25% guaranteed minimum right of participation. The remainder of the contra-side is split in accordance with the parity/priority provision applicable to determining the BBO, such that assigned ROTs/Specialists may be afforded priority.

If the Requesting Member's bid/offer improves the existing BBO, an assigned ROT or assigned Specialist who responded with a market during the response time or BBO Improvement Interval, may immediately join the Requesting Member's improved bid or offer, thus matching for parity purposes. However, the Requesting Member may execute 25% or a fair split, whichever is greater, of the contra-side of the order that is the subject of the RFQ. The remainder of the contra-side is split in accordance with the parity/priority provision applicable to determining the BBO, such that assigned ROTs/Specialists may be afforded priority. However, broker-dealer crosses and solicited orders, as defined in Rule 1064, are not eligible for the split afforded by these crossing provisions. Broker-dealer crosses and solicited orders must be announced and bid/offered, under the FLEX crossing provision. No 25% minimum guaranteed right of participation applies to solicited orders or broker-dealer/broker-dealer crosses. In addition, crossing transactions may not be subject to a minimum right of participation, because a customer-to-customer cross would not be required to yield the

[36] Operationally, the Requesting Member provides this information to data entry personnel, who enter it into Exchange systems.

[37] *See* Amendment No. 2, *supra* note 6, and Amendment No. 4, *supra* note 8.

[38] Initially, the Options Committee has established a response time of ten minutes. Although this Committee will be authorized to change the response time within the permissible range, any such change will be preceded by notice to the Exchange membership. *See also* CBOE Rule 24A.4(a)(3)(iii).

[39] In Amendment No. 5, the Phlx states that assigned Specialist and Assigned ROTs generally should not receive priority over customer orders in FLEX options transactions, because of their duty under the Act and Exchange rules to assist in the maintenance of a fair and orderly market by responding to temporary disparities between supply and demand, a lack of price continuity or a temporary distortion in pricing relationships. *See* Amendment No. 5, *supra* note 9.

[40] Thus, when a Requesting Member seeks to trade on the established BBO, an assigned ROT/Specialist cannot participate. For example, where the BBO is 6–7, if the Requesting Members seek to sell 500 contracts at 6, the Requesting Member has priority for that purpose.

remainder (75%) to assigned ROTs/Specialists.

The Exchange notes that an ROT and Specialist may trade FLEX options as an assigned ROT/Specialist or as a non-assigned ROT/Specialist. However, the FLEX assigned Specialist must be the specialist in the non-FLEX option. ROTs and Specialists must apply on the appropriate Exchange form to be assigned in FLEX options. An assigned ROT or assigned Specialist may choose to be assigned in a particular FLEX option, but must respond with a market respecting any FLEX option upon request by a Floor Official.

Assigned ROTs and the assigned Specialist will be subject to certain obligations respecting the trading of FLEX options. For example, the affirmative and negative market making obligations of Rule 1014(c) apply. Further, as noted above, assigned ROTs and the assigned Specialist, who respond to an RFQ, are required to respond with a market of the minimum size.[41] At least two Exchange members (ROTs and/or a Specialist) shall be assigned to each FLEX option. If there is an assigned Specialist and an assigned ROT, the FLEX option will trade pursuant to the specialist system, just as non-FLEX options currently do on the Exchange. If, however, there is no assigned Specialist in a FLEX option, two assigned ROTs are required for that FLEX option to trade.

Assigned ROTs and the assigned Specialist who responded with a market during the response time may join a new bid/offer voiced during the Improvement Interval and prior to a cross, provided they do so immediately and subject to preserving the priority of customer orders. Enabling assigned ROTS and the assigned Specialist to join such new bid/offer affords them parity at that new BBO.

Generally, FLEX option positions are not taken into account when calculating position limits for non-FLEX index options on the same index.[42] Accordingly, FLEX market index options currently approved for non-FLEX options trading will be subject to a separate position limit of 200,000 contracts on the same side of the market.[43] FLEX industry index options will be subject to a position limit of four times the current position limit—36,000, 48,000 or 60,000 contracts on the same side of the market.[44]

The Exchange notes that FLEX market index option limits are the same as the provisions of other exchanges.[45] The Exchange also believes that four times the non-FLEX limit is an appropriate limit for FLEX industry index options.[46]

Respecting FLEX equity options, the Exchange proposes to eliminate the application of position and exercise limits under a two-year pilot program.[47] Rule 1079(d)(2) would continue to state that position limits for non-FLEX equity options shall not be taken into account when calculating position limits for non-FLEX equity options, or FLEX or non-FLEX index options.

The Exchange is proposing to add that each member or member organization (other than a Specialist or Registered Options Trader) that maintains a position on the same side of the market in excess of three times the level established pursuant to Rule 1001 for non-FLEX equity options of the same class on behalf of its own account of a customer shall report information on the FLEX equity option position, positions in any related instrument, the purpose or strategy for the position and the collateral used by the account. This report shall be in the form and manner prescribed by the Exchange. In addition, whenever the Exchange determines that a higher margin requirement is necessary in light of the risks associated with a FLEX equity option position in excess of three times the level established for non-FLEX equity options of the same class, the Exchange may impose such higher margin requirement and/or may assess capital charges upon the member organization carrying the account to the extent of any margin deficiency resulting from the higher margin requirement.

The Exchange notes that the purpose of the amendment is to compete with the other option exchanges' that have been approved for identical position limit treatment for FLEX equity options,[48] and to attract additional investor interest, and to structure FLEX equity options in a more flexible fashion. There will still, however, be position and exercise limits for FLEX index options, as described above.

The Exchange believes that the elimination of position/exercise limits for FLEX equity options is appropriate in light of the institutional nature of the product. Phlx states that one particular potential institutional use of FLEX options is for stock repurchase programs, which can be utilized by stock issuers in the form of put sales. The Exchange believes that eliminating position limits may attract this business, and thus, bring significant options volume into the realm of exchange trading.[49]

The Exchange believes that attracting additional market participation to FLEX equity options should improve liquidity and the quality of FLEX markets for all participants. The amendment would require member organizations to report positions exceeding three times the non-FLEX position limit in that option. Whenever a member files such a report with the Exchange, the Exchange may request a higher margin requirement in light of the risks associated with such a FLEX equity options position. Thus, the Exchange believes that the amendment is reasonable and consistent with the market protection and anti-manipulation purposes of position/exercise limits. Enhanced reporting is

[41] However, assigned ROTs and assigned Specialists are not required to provide continuous quotes or markets at a certain minimum bid-ask differential (quote spread parameter).

[42] However, positions in P.M.-settled customized index options shall be aggregated with positions in quarterly expiring options ("QIXs") on the same index, *if* the customized option expires at the close of trading on or within two business days of the last trading day in a quarter. The Exchange is authorized to trade QIXs on certain index options pursuant to Rule 1101A(b)(iv), although none currently trade.

[43] The following are the current Phlx market (broad-based) index options: Value Line Composite Index ("VLE"), National Over-the-Counter Index ("XOC"), and U.S. Top 100 Index ("TPX"). If the Exchange wants to list and trade FLEX options on a broad-based index subsequently approved for non-FLEX options trading, the Exchange must submit a Rule 19b–4 filing with the Commission proposing appropriate FLEX market index options position limits.

[44] The following are the current Phlx industry (narrow-based) index options: OTC Industrial Average Index ("OTZ"), Bank Index ("BKX"), Gold/Silver Index ("XAU"), Semiconductor Index ("SOX"), Utility Index ("UTY"), Forester and Paper ("FPP"), Plane ("PLN"), Phone ("PNX"), and Oil Service ("OSX"). Because the Super Cap Index ("HFX") is neither a market or an industry index, the Exchange applies a position limit (5,500 contracts) that is lower than the position limit tiers for standardized non-FLEX industry index options. Accordingly, the position limit for FLEX options overlying the Super Cap Index will be 22,000 contracts (4 times 5,500 contracts—the existing non-FLEX position limit). *See* Amendment No. 2, *supra* note 6.

[45] *See e.g.*, CBOE Rule 24A.7(b).

[46] *See* Phlx rule 1001A(b). In 1996, these limits were raised from 6,000, 9,000 or 12,000 contracts to 9,000, 12,000 or 15,000 contracts. Securities Exchange Act Release No. 37863 (October 24, 1996) (File No. SR–Phlx–96–33). Thus, the proposed change in the corresponding FLEX limits is a change from the original proposal reflecting four times the previous limits.

[47] *See* Amendment No. 4., *supra* note 8. The Exchange originally proposed position limits of three times the position limit applicable to non-FLEX equity options, pursuant to Rule 1001. The Phlx will provide the Commission with status report after one-and-a-half years of the pilot for the Commission to assess the effects on the markets of the elimination of position and exercise limits on FLEX equity options.

[48] *See* Securities Exchange Act Release No. 39032 (September 9, 1997) (File Nos. SR–Amex–96–19; SR–CBOE–96–79; SR–PCX–97–09) ("FLEX Equity Option Position Limit Approval Order").

[49] The Commission notes that issuers would, of course, need to comply with all applicable provisions of the federal securities laws in conducting their share repurchase programs.

VOL 63 ISS 15 JA 23 1998 UMI

intended to facilitate the Exchange's surveillance function respecting larger FLEX positions.

The exercise limit for FLEX index options would apply, equivalent to the applicable FLEX index option position limit. The minimum exercise size, however, would be the lesser of $1 million or the remaining size of the position respecting index options, and the lesser of 25 contracts or the remaining size of the position respecting equity options.

The proposal requires any ROT and Specialist to submit a Letter of Guarantee [50] issued by a clearing member organization, specifically accepting financial responsibility for all FLEX option transactions made by such person. Moreover, an assigned Specialist in FLEX index options shall be required to maintain a minimum of $1,000,000 in net capital. An assigned ROT in FLEX index options will be required to maintain a minimum of $100,000 in net liquid assets. Floor Brokers must maintain a minimum of $50,000 in net capital to qualify to trade FLEX options. Assigned ROTs, the assigned Specialist and Floor Brokers must immediately notify the Exchange's Examinations Department upon failure to be in compliance with these requirements. The Exchange may waive the financial requirements of this Rule in unusual circumstances. Assigned Specialists/ROTs in FLEX equity options, as well as non-assigned ROTs/Specialists in FLEX options, are required to comply with Exchange financial requirements.[51]

The Exchange also proposes to adopt Floor Procedure Advice F–28, Trading FLEX Index and Equity Options, to parallel most of the provisions of Rule 1079(b), including those pertaining to requesting quotations, responses, determining the BBO, the BBO Improvement Interval, executing a trade and crossing. Advice F–28 is not proposed to contain a fine schedule, such that it does not require inclusion in the Exchange's minor rule violation enforcement and reporting plan.

There will be no trading rotations in FLEX options, either at the opening or at the close of trading. The Exchange has determined that, initially, FLEX options will begin trading at 10:00 a.m., one half hour after the normal opening of trading non-FLEX options on the Exchange, in order to limit the burden on the trading crowd. FLEX industry index and equity options will trade until 4:02 p.m., to correspond to the non-FLEX options similar to FLEX market index options, which would trade until 4:15 p.m. The Exchange may establish other trading times for FLEX options within the regular trading hours for the non-FLEX options, including coordination with FLEX trading hours on other exchanges and reflecting new trading hours for non-FLEX options.[52]

In addition, the RFQ process, which allows a set period of time for bids and offers to be determined, is also designed to create an orderly trading environment, recognizing that greater variation in option terms requires sufficient time to respond with a quote. The Phlx believes, therefore, that the response time and the BBO Improvement Interval should thus promote depth and liquidity.

In order to provide adequate liquidity in FLEX options, two assigned members, whether ROTs or Specialists, are required for each FLEX option, and must be present for a trade to occur.[53] In addition, the minimum size requirements are intended to attract depth and liquidity to FLEX options.

Other FLEX provisions are intended to minimize the market impact of this product. For one, the expiration date may not fall on or within two business days before or after the normal mid-month Friday expiration for options. Because the expiration date of FLEX options may not correspond to a non-FLEX expiration, FLEX options should not affect the market for the underlying securities at the same time. This, in turn, minimizes the impact of FLEX options on the marketplace.

Second, position and exercise limits will apply to FLEX index options, although separate from those applicable to non-FLEX index options. The Exchange believes that separate, higher limits and non-aggregation are appropriate for FLEX index options, which are intended to compete with OTC options that are not subject to such limits. The higher limits reflect the institutional nature and resulting larger size of FLEX index options.

Although FLEX options are characterized by variable terms, not all FLEX option terms can be customized. As stated above, the expiration date cannot fall on certain days. Customization of FLEX equity option strike prices for calls will not be permitted, due to tax issues arising out of the definition of a qualified covered call. Thus, only equity option call strikes that may be listed pursuant to Rule 1012 are eligible, such that the strike price must be consistent with strike price intervals permissible for equity options. In addition, American-style FLEX index options exercised prior to the expiration date can only settle based on the closing value on the exercise date. Despite these restrictions on customization, the Phlx believes FLEX options should nevertheless address a market need for variation in contract terms.

The Exchange believes that FLEX options not only combine variable terms with an auction marketplace and OCC guarantee, but FLEX options will also offer transparency of quotes and trades, because the proposal requires prompt and complete quotation and transaction reporting. Although flexible options will not be continuously quoted, once an RFQ is received, its terms, as well as the responding quotes, will be disseminated by Exchange systems. The terms of any resulting trade will also be disseminated. Specifically, the assigned Specialist, or if none, the Requesting Member will ensure immediate dissemination to OPRA in the form of an administrative text message, which will, in turn, disseminate the information to subscribing vendors.

The Exchange expects to implement a separate computer system to handle FLEX index and equity options, similar to the system utilized for customized foreign currency options. The Exchange expects that initially FLEX options will be entered into this system at a limited number of locations on the trading floor, which will be described in detail by notice to the options trading floor.

The Exchange proposes to utilize a limit order book for FLEX option orders resulting from the RFQ process. The purpose of the book is to accommodate customers who have specified a limit price for a FLEX option order that is away from the market established during the RFQ process. The limit order book will be limited to customer day limit orders, which much be accepted by the Specialist, whether or not that Specialist is assigned in FLEX options. As such, the Specialist must monitor FLEX markets for any booked orders. The Exchange is requiring all Specialists, whether acting as an assigned FLEX Specialist or not, to maintain a FLEX book for consistency with the procedures for non-FLEX options and to prevent investor confusion. The Exchange believes that the FLEX order book should serve as a useful tool for customers, as does the current limit order book respecting non-FLEX options. With respect to booked orders for the same FLEX option (identical terms), Rule 1014 will apply to determine priority and parity among such orders.[54] When trading with a booked order, a member must re-quote the market and announce the trade.

The Exchange proposes to delete the provision in the original proposal that the executing member has priority over other members, including assigned ROTs and the assigned Specialist, seeking to trade with the booked order. The purpose of this change is to trade booked FLEX options similarly to non-FLEX options, noting that this consistency should prevent confusion.

The Exchange also proposes that an RFQ remain open that trading day, as opposed to expiring immediately, as long as a trade has not occurred. The market must be re-quoted before a member attempts to trade on an existing RFQ. The advantage of an RFQ remaining open is that a re-quote does not require the submission of a new RFQ, thereby avoiding the delay of a new response time where such time may not be needed due to a recent quote. Because an option quoted earlier in the trading day should be easier to price, such that a new response time is not required, the Exchange believes that it may be burdensome to repeat the RFQ process. Thus, RFQs remaining open streamlines FLEX trading and eliminates unnecessary delays. Any time a market is re-quoted that day, the new BBO and any resulting trade are disseminated with reference to the original RFQ. However, once a trade occurs, a new RFQ is required.[55]

Certain aspects of proposed Rule 1079 differ from FLEX provisions of other exchanges. For instance, discretionary transactions would not be permitted in FLEX index and equity options.[56] Thus, the existing provisions of Rule 1065 will apply to prohibit such transactions.

Second, the Exchange also notes that there may not be a Specialist in FLEX options. Where there is an assigned FLEX Specialist, that FLEX option will trade pursuant to the Phlx's specialist system. Where there is no assigned FLEX Specialist, two assigned ROTs are required. Only the assigned Specialist in the non-FLEX (listed) option may apply to be an assigned Specialist in the FLEX option.[57] but is not required to do so in order to participate. Instead, the non-FLEX Specialist may be an assigned ROT in the FLEX option, or not assigned at all. The current responsibilities of a Specialist to determine a market based on the bids and offers voiced as well as to disseminate bids/offers and trades may be handled by the Requesting Member, where there is no assigned Specialist in that FLEX option. If a trade occurs where the Requesting Member is not a participant and there is no assigned Specialist, the responsibility to submit the trade falls upon the seller or largest participant, in accordance with existing trading procure.[58]

Third, the Exchange has also determined that FLEX options will trade in the crowd of the non-FLEX option in order to facilitate participation by assigned ROTs who will most likely be located in that crowd. The Exchange believes that encouraging market making activity, whether or not assigned, should foster liquidity in FLEX options.

IV. Discussion

The Commission finds that the proposals are consistent with the requirements of the Act and the rules and regulations thereunder applicable to a national securities exchange, and, in particular, the requirements of Sections 6(b)(5) [59] and 11A [60] of the Act. Specifically, the Commission finds that the Exchange's proposal is designed to provide investors with a tailored or customized product for eligible index and equity options that may be more suitable to their investment needs. Moreover, consistent with Section 11A of the Act, the proposal should encourage fair competition among brokers and dealers and exchange markets, by allowing the Exchange to compete with the growing OTC market in customized index and equity options.

The Commission believes the Exchange's proposal reasonably addresses its desire to meet the demands of sophisticated portfolio managers and other institutional investors who are increasingly using the OTC market in order to satisfy their hedging needs. Additionally, the Commission believes that the Exchange's proposal will help promote the maintenance of a fair and orderly market, consistent with Sections 6(b)(5) and 11A of the Act, because the purpose of the proposal is to extend the benefits of a listed, exchange market to index and equity options that are more flexible than current listed options and that currently trade OTC. The benefits of the Exchange's options market include, but are not limited to, a centralized market center, an auction market with posted transparent market, quotations and transaction reporting, parameters and procedures for clearance and settlement, and the guarantee of OCC for all contracts traded on the Exchange.[61]

The Commission believes the Exchange's trading procedures for FLEX index and equity options are reasonably designed to provide some of the benefits of an Exchange auction market along with features of a negotiated transaction between investors. In approving the proposal, the Commission recognizes that the Exchange's proposed FLEX option trading program will allow the trading of option contracts of substantial value, for which continuous quotations may be difficult to sustain. The Commission believes that the Exchange has adequately addressed these concerns by establishing procedures for quotes upon request, which must be firm for a designated period of time and which will be disseminated through OPRA.

The Commission also believes that it is reasonable that an RFQ remain open for that particular trading day once a BBO is established. Specifically, the Commission believes that if the Requesting Member does not accept the BBO, it is reasonable for the Exchange to allow the RFQ to remain open so that the trading crowd may re-quote the market in response to the same contract set forth in the existing RFQ without submitting another RFQ.

The Commission notes that this provision only allows a member to re-quote the market later in the day with respect to the open RFQ from which a trade has not been executed.

The Commission also believes that it is reasonable for the Exchange to allow for FLEX orders to be accepted onto a FLEX limit order book. As noted above, the Specialist in the listed non-FLEX equity or index option, whether or not

[50] *See* Phlx Rule 703.

[51] *See* Phlx Rule 703.

[52] Under this proposal, expanding and narrowing FLEX trading hours within the regular trading hours of the particular product would not require a proposed rule change pursuant to Section 19(b) of the Act. The Exchange, however, will notify its members, in advance, prior to making any such change. Any proposal to expand trading hours outside of established regular trading hours would have to be submitted as a proposed rule change to the Commission pursuant to Section 19(b) of the Act.

[53] *See* Floor Procedure Advices A–10, Specialist Trading with Book, and C–1, Ascertaining the Presence of ROTs in a Trading Crowd, which require that, in addition to the Specialist, a ROT be present during a transaction.

[54] The Exchange notes that although the principles of price/time priority and simultaneous bids/offers at parity of Rule 1014 apply, the enhanced specialist participation of sub-paragraphs (g) (ii) and (iii) are not applicable to FLEX options.

[55] The Exchange notes that the Options Committee may determine to established an abbreviated response time for a new RFQ, because the full ten minutes may not be required for pricing determinations.

[56] *See e.g.*, CBOE Rule 24A.6, which states that a Floor Broker may be given discretion with respect to the number of FLEX contracts to be purchased or sold.

[57] If the option is not listed on the Exchange, specialist functions may be allocated by the Exchange pursuant to Phlx Rules 500 et seq.

[58] *See* Floor Procedure Advice F–2, Time Stamping, Matching and Access to Matched Trades.

[60] 15 U.S.C. 78k–1.

[61] In approving this rule, the Commission notes that it has considered the proposed rule's impact on efficiency, competition, and capital formation. 15 U.S.C. 78c(f).

VOL 63 ISS 15 JA 23 1998 UMI

assigned in FLEX options, will maintain a FLEX limit order book. The Commission believes that a FLEX limit order book, maintained by a Specialist, should help to accommodate FLEX options trading.

The Commission notes that the Phlx is the first exchange to create a limit order book for FLEX options. The Commission believes that by establishing both a FLEX and non-FLEX limit order book for the same option classes, the Exchange should monitor the use of the FLEX limit order book to ensure that members are not using the limit order book to trade ahead of non-FLEX limit orders for the same options class. The Commission believes that this concern is minimized because FLEX options should generally have an expiration date at least two days before or after the expiration date for the corresponding non-FLEX option, thus FLEX and non-FLEX option contracts are not fungible.

Additionally, the Commission believes that the Exchange's proposal to provide a minimum right of participation of at least 25% of the trade to Exchange members who initiate Requests for Quotes in respect of FLEX options and indicate an intention to cross or act as principal on the trade, is consistent with the Act. In addition, under Phlx rules, all FLEX options transactions must be in compliance with the priority, parity, and precedence requirements of Section 11 of the Act,[62] and Rules 11a1–1(T)[63] and 11b–1,[64] promulgated thereunder. These provisions set forth, among other things, the conditions in which members must yield priority to public customers' bids and offers at the same price.

The Commission also believes that the Exchange's proposal to require at least two assigned ROTs, or an assigned specialist and an assigned ROT for each FLEX option class, is consistent with the Act. The Commission notes that the Exchange's rules currently provide a framework that encourages assigned ROTs and specialists, to actively make responsive quotes to provide liquidity in FLEX options. In fact, assigned ROTs and specialists, who respond to an RFQ, must do so with a market of the minimum size in response to the RFQ. Further, assigned ROTs and specialists must provide a market in any FLEX option when requested by a Floor Official. Accordingly, the Commission believes that this requirement should be sufficient to provide quotations in response to an RFQ and generally accommodate FLEX options trading.

The Commission also believes that the Exchange's proposal to permit FLEX equity options trading on any options-eligible security regardless of whether Non-FLEX equity options overlie that security and trade on the Exchange is reasonable, in that it promotes fair competition among exchanges, consistent with Section 11A of the Act, and will perfect the mechanism of a free and open market and serve to protect investors and the public interest in accordance with Section 6(b)(5) of the Act. The Commission notes that Phlx FLEX equity options must still meet the eligibility requirements and criteria set forth in Phlx Rule 1009.

In addition, the Commission believes that the Exchange's proposal to designate all currently approved Phlx index options as eligible for FLEX index options trading is consistent with the Act. The Commission notes, however, that when submitting a Section 19(b) proposal to list and trade a new non-FLEX index options product, the Exchange must, in the same filing, specifically propose to list and trade the FLEX index options in the same proposed rule change. If the Exchange is not prepared at that time to seek approval for the listing of FLEX options overlying the proposed index, then the Exchange should submit a rule filing pursuant to Section 19(b) of the Act proposing to list FLEX options on that index at an appropriate time in the future.

The Commission believes it is consistent with Section 6(b)(5) of the Act for the Phlx to establish trading hours for FLEX options that begin thirty minutes after the non-FLEX market trading hours, and end at the same time as normal non-FLEX market trading hours. The Commission also believes that because of the nature of the FLEX market, in contrast to the Non-FLEX market, it is reasonable to permit the Exchange, in its discretion, to restrict or expand trading hours for FLEX options, so long as such trading hours occur within the normal options trading hours of the Exchange.[65]

The Commission believes that the Exchange's proposal to restrict exercise prices for calls on FLEX equity options, as described above, reasonably balances the desire of sophisticated portfolio managers and other institutional investors to trade flexible equity options products, with the need to eliminate the potential that the trading of such options could inadvertently impact a tax benefit currently provided to writers of standardized call options that qualify as QCCs.[66] In approving this provision, the Commission recognizes that the Exchange will restrict the flexibility of investors in determining an essential term of FLEX equity call options contracts (*i.e.*, the exercise price). Nevertheless, investors will still be able to designate contract terms for exercise style (*i.e.*, American or European) and expiration date.[67] Based on this and the current tax framework for QCCs, the Commission believes the limitations imposed by the proposal is appropriate and should still provide investors with a more flexible product than one with standardized option terms while protecting investors in the standardized equity call options market.[68]

The Commission also believes that it is reasonable for the Exchange to propose to eliminate position and exercise limits for FLEX equity options on a two-year pilot basis. While the Commission has generally taken a gradual, evolutionary approach toward expansion of position and exercise limits, the Commission is willing to approve the two-year pilot program for FLEX equity options for several reasons. First, the FLEX equity options market is characterized by large, sophisticated institutional investors (or extremely high net worth individuals), who have both the experience and ability to engage in negotiated, customized transactions. For example, with a required minimum size of 250 contracts to open a transaction in a new series, FLEX equity options are designed to appeal to institutional investors, and it is unlikely that many retail investors would be able to engage in options transactions at that size. Second, the Exchange's other rules and provisions governing FLEX equity options will remain applicable. Third, the OCC will serve as the counter-party guarantor in every exchange-traded transaction. Fourth, the proposed elimination of position and exercise limits for FLEX equity options could potentially expand the depth and liquidity of the FLEX equity market without significantly increasing concerns regarding intermarket manipulations or

[62] 15 U.S.C. 78k.

[63] 17 CFR 240.11a1–1(T).

[64] 17 CFR 240.11b–1.

[65] *See supra* note 52.

[66] The Commission notes that the Exchange must file a proposed rule change with the Commission, pursuant to Section 19(b) of the Act, to withdraw or modify this exercise price policy regarding FLEX equity call options.

[67] Of course, investors will also be able to designate exercise price for FLEX equity put options and FLEX index call and put options.

[68] The Commission notes, that OCC, in the approved FLEX equity option 9b–1 ODD supplement, informs investors of the limitation of exercise price intervals when writing FLEX equity call options. *See* FLEX equity options 9b–1 order, *supra* note 18.

disruptions of the options or the underlying securities. Finally, the Exchange's surveillance programs will be applicable to the trading of FLEX equity options and should detect and deter trading abuses arising from the elimination of position and exercise limits.

As described above, the Exchange have adopted important safeguards that will allow them to monitor large positions in order to identify instances of potential risk and to assess additional margin and/or capital charges, if necessary. By monitoring accounts in excess of three times the Non-FLEX equity option position limit in this manner, the Exchange should be provided with the information necessary to determine whether to impose additional margin and/or whether to assess capital charges upon a member organization carrying the account. In addition, this information should allow the Exchange to determine whether a large position could have an undue effect on the underlying market and to take the appropriate action.

Given the size and sophisticated nature of the FLEX equity options market, along with the new reporting and margin requirements, the Commission believes that eliminating position and exercise limits for FLEX equity options for a two-year pilot period should not substantially increase manipulative concerns. Nevertheless, the Commission will be able to assess the effects on the markets of the Exchange's proposals during the two-year pilot period. If problems were to arise during such pilot period, the Commission believes that the enhanced market surveillance of large positions should help the Exchange to take the appropriate action in order to avoid any manipulation or market risk concerns.

Nevertheless, because the Commission has only recently agreed to eliminate position and exercise limits for a derivative product, the Commission cannot rule out the potential for adverse effects on the securities markets for the component securities underlying FLEX equity options. To address this concern, the Commission has approved the proposal for a two-year pilot period. The Exchange will undertake to monitor, among other things, open interest and potential adverse market effects and to report to the Commission on the status of the program no later than eighteen months after the order's date of effectiveness. The reporting of the Exchange's experiences should include, among other things, such information as:

(i) The type of strategies used by FLEX equity options market participants and whither FLEX equity options are being used in lieu of existing standardized equity options;

(ii) the type of market participants using FLEX equity options during the pilot program;

(iii) the average size of the FLEX equity option contract during the pilot program, the size of the largest FLEX equity option contract on any given day during the pilot program, and the size of the largest FLEX equity option held by a single customer/member during the pilot program; and

(iv) any impact on the prices of underlying stocks during the establishment or unwinding of FLEX positions that are greater than three times the standard non-FLEX equity option position limits.[69]

The Commission also believes that it is reasonable for the Exchange to conform its rules to the rules of other options exchanges to reduce from 100 contracts to 25 contracts the minimum value size of closing transactions in and exercises of FLEX equity options. The Commission notes that market participants wanting to execute an opening transaction in a particular series of FLEX equity options will continue to be required to meet the 250 (if no open interest in a particular FLEX series) or 100 (if open interest in a particular FLEX series) minimum contract requirement. The Commission believes that this should help to ensure that transactions in FLEX equity options remain of substantial size and, therefore, the product is geared to an institutional, rather than a retail market.

The Commission also believes that the Phlx's proposal to include certain designated foreign currencies in the list of variable FLEX index option contract terms is a reasonable response by the Exchange to meet the demands of sophisticated portfolio managers and other institutional investors. Additionally, the Commission believes that the Phlx's proposal will help to promote the maintenance of a fair and orderly market because it extends the benefits of a listed exchange market to FLEX index options that trade and settle in certain designated foreign currencies.

The Commission believes that investors should benefit from the additional flexibility by permitting them to designate quotation and settlement terms in various foreign currencies while continuing to ensure adequate investor protection in the trading of these products. The potential risk of settling FLEX options in foreign currencies rather than U.S. dollars is also disclosed in the ODD pursuant to Rule 9b–1 of the Act.[70]

The Commission also notes that FLEX index options can be constructed with expiration exercise settlement based on the closing values of the component securities, which could potentially result in adverse effects for the markets in these securities.[71] Although the Commission continues to believe that basing the settlement of index products on opening as opposed to closing prices on Expiration Friday helps alleviate stock market volatility,[72] these market impact concerns are reduced in the case of FLEX options because expiration of these options will not correspond to the normal expiration of Non-FLEX options, stock index futures, and options on stock index futures. In particular, FLEX options, will never expire on any "Expiration Friday." More specifically, the expiration date of a FLEX option may not occur on a day that is on, or within, two business days of the expiration date of a Non-FLEX option. The Commission believes that this should reduce the possibility that the exercise of FLEX options at expiration will cause any additional pressure on the market for underlying securities at the same time that Non-FLEX options expire.

In addition, the proposal would limit the effect on securities markets by addressing the relationship between FLEX index options and QIXs. As proposed, Phlx Rule 1079(d)(1) requires P.M.-settled FLEX options to be aggregated with QIXs that are based on the same index and have the same expiration date. In such a case, the FLEX options would be aggregated two days prior to expiration subject to the position limits for the QIX options on the applicable index. The Commission believes that these rules should help prevent an investor from using FLEX options for the purpose of avoiding the position limits applicable to QIXs.

Nevertheless, because the position limits for both FLEX index options are much higher than those currently existing for outstanding exchange-traded index options (and FLEX equity options have no position limit requirements) and open interest in one or more FLEX option series could grow to significant levels, it is possible that FLEX options might have an impact on the securities markets for the securities underlying FLEX options. The Commission expects the Exchange to

[69] For a more complete discussion of the Commission's findings regarding the elimination of FLEX equity options position limits, *see* FLEX Equity Option Position Limit Approval Order, *supra* note 50.

monitor the actual effect of FLEX options once trading commences and take prompt action (including timely communication with the self-regulatory organizations responsible for oversight of trading in the underlying securities) should any unusual market effects develop.

The Exchange represents that FLEX options will allow them to compete with OTC markets and help meet the demand for customized options products by institutional investors. The minimum value sizes for opening transactions in FLEX options are designed to appeal to institutional investors, and it is unlikely that most retail investors would be able to engage in options transactions at that size. Nevertheless, the FLEX equity option minimum size for opening transactions [73] is much smaller than that for FLEX index options. The Commission also notes that, in approving the proposal to establish 25 contracts as the minimum contract requirement for closing transactions in, and exercises of, FLEX equity options, adequate surveillance guidelines should be in place to ensure that only sophisticated investors with the necessary financial resources to sustain the possible losses arising from transactions in the requisite FLEX options class size are utilizing this product. The Commission's staff has reviewed Phlx's surveillance program and believes it provides a reasonable framework in which to monitor such investor open interest.

Because of these established minimum contract requirements for both opening and closing transactions in FLEX equity options, the Commission requests that the Exchange monitor its respective comparative levels of institutional and retail investor open interest in FLEX equity options for one year from the commencement of its FLEX equity option trading program. In particular, the Commission requests that the Exchange provide a report to the Commission's Division of Market Regulation describing the nature of investor participation (*i.e.*, retail vs. institutional) in FLEX equity options no later than two months following the one-year anniversary of FLEX equity options trading on the Exchange. If the Exchange determines in the interim that the proposed rule change has resulted in a pattern of retail investor participation in FLEX equity options, it should notify the Commission's Division of Market Regulation to determine if (1) the minimum contract requirements for opening transactions should be increased from 250 contracts, and/or (2) the minimum contract requirements for closing truncations should be restored to the originally proposed level.

The Commission also notes that effective surveillance guidelines are essential to ensure that the Exchange has the capacity to adequately monitor trading in FLEX options for potential trading abuses. The Commission's staff has reviewed Phlx's surveillance program and believes it provides a reasonable framework in which to monitor the trading of FLEX options on its trading floor and detect as well as deter manipulation activity and other trading abuses.

In order to ensure adequate systems processing capacity to accommodate the additional options listed in accordance with the FLEX options program, OPRA has concluded that the additional traffic generated by FLEX index and equity options traded on the Phlx is within OPRA's capacity.[74]

The Commission finds good cause for approving Amendment No. 2 prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Specifically, this amendment proposes that (1) the RFQ include the size and intention to cross, consistent with the existing procedures of other exchanges; and (2) a specific position limit of 22,000 contracts for the Super Cap Index option be adopted. The Commission believes that the proposed amendment further clarifies the proposal and does not raise any new or unique regulatory issues.

Accordingly, the Commission believes, consistent with Section 6(b)(5) of the Act, that good cause exists, to approve Amendment No. 2 to the proposal on an accelerated basis.

The Commission finds good cause for approving Amendment No. 4 prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register** [75] Specifically, as noted above, the Exchange's proposal to (1) eliminate the application of position and exercise limits to FLEX equity options for a two-year pilot period; and (2) reduce the minimum size applicable to a Request-for-Quote for a closing transaction in already-opened FLEX equity options from 100 to 25 contracts, are identical to proposals by other options exchanges that were recently approved by the Commission. Therefore, the Commission believes that the proposal raises no new regulatory issues.

Further, the Commission believes that other changes incorporated into Amendment No. 4, including, proposals to: (1) amend the proposal rule change to refer consistently to "FLEX index and equity options" (as opposed to index FLEX options); (2) correct the text of proposed Rule 1079(b)(6) regarding the crossing procedure to reflect that the crossing intention has already been announced as part of the RFQ, as amended by Amendment No. 2; and (3) amend proposed Rule 1079(a)(1) to clearly state that any options-eligible security pursuant to Rule 1009 to eligible to underlie FLEX equity options trading. The Commission also believes that these amendments do not raise any new regulatory issues.

Accordingly, the Commission believes, consistent with Section 6(b)(5) of the Act, that good cause exists, to approve Amendment No. 4 to the proposal on an accelerated basis.

The Commission finds good cause for approving Amendment No. 5 prior to the thirtieth day after the date of publication of notice of filing thereof in the **Federal Register**. Specifically, as noted above, the Exchange's proposed amendment clarifies: (1) the parity and priority principles for FLEX options transactions; and (2) that each assigned ROT or assigned Specialist is not required to respond with a quote in every instance, unless requested by a Floor Official. These provisions are substantially similar to those of other options exchanges that were recently approved by the Commission. Therefore, the Commission believes that the proposal raises no new regulatory issues.

Accordingly, the Commission believes, consistent with Section 6(b)(5) of the Act, that good cause exists, to approve Amendment No. 5 to the proposal on an accelerated basis.

Interested persons are invited to submit written date, views and arguments concerning Amendment Nos. 2, 4 and 5 to the proposed rule change. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of this submission, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any person, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying at the Commission's Public Reference Section, 450 Fifth Street, N.W., Washington, D.C. 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to SR–Phlx–96–38 and should be submitted by February 13, 1998.

[73] The minimum size for an opening transaction in FLEX equity options is 250 contracts for any FLEX series in which there is no open interest, and 100 contracts in any currently opened FLEX series.

[74] *See* Letter from Joseph P. Corrigan, Executive Director, OPRA, to Sharon Lawson, Senior Special Counsel, OMS, Market Regulation, Commission, dated October 20, 1997. ("OPRA Capacity Letter").

[75] As noted *supra* in note 8, Amendment No. 4 supersedes Amendment No. 3, in its entirety.

V. Conclusion

For the reasons discussed above; the Commission finds that the proposal is consistent with the Act and Sections 6 and 11A of the Act, in particular. In addition, the Commission has previously concluded pursuant to Rule 9b–1 under the Act, that FLEX options, including FLEX equity options and FLEX index options, and FLEX index options traded and settled in certain designated foreign currencies, are standardized options for purposes of the options disclosure framework established under Rule 9b–1 of the Act.[76] Apart from the flexibility with respect to strike prices, expiration dates, exercise styles, and settlement (for FLEX index options), all of the other terms of FLEX options are standardized pursuant to OCC and Phlx rules.

Standardized terms include matters such as exercise procedures, contract adjustments, time of issuance, effect of closing transactions, restrictions on exercise under OCC rules, margin requirements, and other matters pertaining to the rights and obligations of holders and writers.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act,[77] that the proposal (File No. SR–Phlx–96–38), as amended, including Amendment Nos. 2, 4 and 5 on an accelerated basis, is approved. In addition, the portion of the proposal eliminating FLEX equity options position and exercise limits is approved on a pilot basis until January 14, 2000.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[78]

Jonathan G. Katz,

Secretary.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–39552; File No. SR–Phlx–97–65]

Self-Regulatory Organizations; Notice of Filing of Proposed Rule Change by the Philadelphia Stock Exchange, Inc. Establishing an Enhanced Parity Split Pilot Program for Specialists in Foreign Currency Options Effective Until December 31, 1998

January 14, 1998.

Purusant to Section 19(b)(1) of the Securities Exchange Act of 1934 ("Act"),[1] notice is hereby given that on December 1, 1997, the Philadelphia Stock Exchange, Inc. ("Phlx" or "Exchange") filed with the Securities and Exchange Commission ("Commission") the proposed rule change as described in Items I, II, and III below, which Items have been prepared by the Exchange. The Commission is publishing this notice to solicit comments on the proposed rule change from interested persons.

I. Self-Regulatory Organization's Statement of the Terms of Substance of the Proposed Rule Change

The Exchange seeks to revise Exchange Rule 1014(h) to establish an enhanced parity split pilot program ("Pilot Program") for its foreign currency option ("FCO") specialists effective until December 31, 1998.

The text of the proposed rule change is available at the Office of the Secretary, the Exchange, and at the Commission.

II. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

In its filing with the Commission, the Exchange included statements concerning the purpose of and basis for the proposed rule change and discussed any comments it received on the proposed rule change. The text of these statements may be examined at the places specified in Item IV below. The Exchange has prepared summaries, set forth in sections A, B, and C below, of the most significant aspects of such statements.

A. Self-Regulatory Organization's Statement of the Purpose of, and Statutory Basis for, the Proposed Rule Change

1. Purpose

The Exchange previously provided and enhanced parity split to the specialist dealing in dollar denominated delivery German Mark ("3D German Mark") options.[2] The enhanced parity split gave the specialist 50% of the first 500 contracts of any trade in 3D German Mark options. The Exchange eliminated the enhanced parity split earlier this year because the specialist in 3D German Mark options and other traders of the product found it to be of little benefit.[3] At the time the enhanced parity split was eliminated, the Exchange informed the Commission that it would continue to study the potential use of an enhanced parity split for all FCO specialists on a broader basis. This proposed rule change sets forth the Exchange's plan for the expanded use of the enhanced parity split in FCOs.

The Exchange seeks to implement an enhanced parity split procedure similar to the one currently applied to transactions in equity and index options at the Exchange.[4] Under the Pilot Program, however, the application of the proposed FCO enhanced parity split would be more widespread, and the enhanced parity split would be available to all FCO specialists assigned to FCO products.[5] The Pilot Program would be in effect until December 31, 1998.

The enhanced parity split would apply to the first 500 contracts in a FCO transaction in a FCO transaction. When the enhanced parity split is applied, the

[1] 15 U.S.C. 78s(b)(1).

[2] The enhanced parity split for the specialist in 3D German Mark options was first approved on December 29, 1994. *See* Securities Exchange Act Release No. 35177 (Dec. 29, 1994), 60 FR 2419 (Jan. 9, 1995). 3D German Mark options are cash-settled, European-style, cash/spot foreign currency option contracts on the German Mark that trade in one-week and two-week expirations.

[3] The enhanced parity split was eliminated as of September 8, 1997. *See* Securities Exchange Act Release No. 39030 (Sept. 8, 1997), 62 FR 48332 (Sept. 15, 1997). The sole specialist firm trading 3D German Mark options indicated that the enhanced parity split was not particularly useful and that it did not generally take advantage of it. Furthermore, the Exchange represented that the order size in 3D German Mark options generally was not large enough to trigger the application of the enhanced parity split (*i.e.*, such orders represented less than 100 contracts).

[4] The Exchange recently amended its enhanced parity split pilot program for equity and index option specialists to expand its application. As a result of the amendment, all index options and all newly listed equity options receive the enhanced parity split. However, only 50% of those equity options not considered "newly listed" are eligible to receive the enhanced parity split. In addition, specialists are now permitted to revise the list of eligible equity options on a quarterly basis, rather than an annual basis. *See* Securities Exchange Act Release No. 39401 (Dec. 4, 1997), 62 FR 65300 (Dec. 11, 1997).

[5] It should be noted that because FCOs on the Italian Lira and the Spanish Peseta are traded as customized options, there are no specialists assigned to those products. For simplicity and clarity, all further references to FCOs shall not include these two products.

VOL 63 ISS 15 JA 23 1998 UMI

FCO specialist will be counted as two crowd participants when determining the allocation of the FCO contracts among the trading crowd participants on parity, except in the following circumstances: (i) when there is one other trading crowd participant on parity, the FCO specialist will receive 60% of the FCO contracts making up the order; or (ii) when there are two other trading crowd participants on parity, the FCO specialist will receive 40% of the FCO contracts making up the order.

Because a customer bid/offer for under 100 FCO contracts is deemed to have time priority over all other bids/offers, such an order will not be subject to the enhanced parity split.[6] This provision will help ensure that small customer orders are not disadvantaged by the application of the enhanced parity split. If a FCO transaction involves more than 500 contracts, those contracts exceeding the 500 contract threshold will be allocated on a pro rata basis among the crowd participants on parity.

It should be noted that the application of this enhanced parity split will be mandatory. Therefore, with respect to any FCO transaction that implicates the enhanced parity split, the FCO specialist will be required to accept the preferential allocation and may not decline the enhancement.[7]

2. Statutory Basis

The Exchange believes that the proposed rule change is consistent with Section 6 of the Act,[8] in general, and with Section 6(b)(5),[9] in particular, in that it is designed to promote just and equitable principles of trade; to prevent fraudulent and manipulative acts and practices; to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in securities; to remove impediments to and perfect the mechanism of a free and open market and a national market system; and to protect investors and the public interest. The Exchange further believes that the proposed rule change balances the competing interests of specialists and market makers while assisting specialists in making tight and liquid markets and protecting customer interests.

B. Self-Regulatory Organization's Statement on Burden on Competition

The Exchange does not believe that the proposed rule change will impose any inappropriate burden on competition.

C. Self-Regulatory Organization's Statement on Comments on the Proposed Rule Change Received from Members, Participants or Others

The Exchange did not solicit or receive written comments with respect to the proposed change.

III. Date of Effectiveness of the Proposed Rule Change and Timing for Commission Action

Within 35 days of the date of publication of this notice in the **Federal Register** or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding, or (ii) as to which the Exchange consents, the Commission will:

(A) by order approve such proposed rule change, or

(B) institute proceedings to determine whether the proposed rule change should be disapproved.

IV. Solicitation of Comments

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons making written submissions should file six copies thereof with the Secretary, Securities and Exchange Commission, 450 Fifth Street, NW., Washington, DC 20549. Copies of the submissions, all subsequent amendments, all written statements with respect to the proposed rule change that are filed with the Commission, and all written communications relating to the proposed rule change between the Commission and any persons, other than those that may be withheld from the public in accordance with the provisions of 5 U.S.C. 552, will be available for inspection and copying in the Commission's Public Reference Section, 450 Fifth Street, NW., Washington, DC 20549. Copies of such filing will also be available for inspection and copying at the principal office of the Exchange. All submissions should refer to File No. SR–Phlx–97–55 and should be submitted by February 13, 1998.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.[10]

Jonathan G. Katz,

Secretary.

[FR Doc. 98–1553 Filed 1–22–98; 8:45 am]

BILLING CODE 8010–01–M

[6] Exchange Rule 1014(h), "Options on Foreign Currencies," Section (i), states that "all bids/offers of customer accounts for under 100 contracts have time priority over all other bids/offers" on the FCO floor. In that instance, the FCO specialist cannot be on parity with such customer so the enhanced parity split will not apply. However, because Exchange Rule 1014(h)(i) does not confer time priority on customer orders for 100 or more contracts, FCO specialists may avail themselves of the enhanced parity split when interacting with customer orders involving 100 or more FCO contracts.

DEPARTMENT OF STATE

[Public Notice No. 2714]

International Telecommunications Advisory Committee (ITAC) U.S. Study Group A of the Telecommunications Standardization Sector (ITAC–T); Meeting Notice

The Department of State announces a meeting, under the International Telecommunications Advisory Committee (ITAC), of Study Group A of the Telecommunications Standardization Sector (ITAC–T). The meeting will be held Wednesday, February 18, 1998, beginning at 9:30 a.m. and scheduled for all day, in Room 1207 of the Department of State, 22nd and C Street, NW, Washington, D.C.

The purpose of ITAC is to advise the Department on policy, technical and operational matters and to provide strategic planning recommendations, with respect to international telecommunications and information issues. The purpose of this meeting is to develop United States positions for upcoming ITU–T meetings dealing with standards activities of the International Telecommunication Union (ITU). In particular, the meeting agenda will include preparation for planned ITU–T meetings of (1) Study Group 3 (Tariff and Accounting Principles including related telecommunications economic and policy issues) scheduled for June 3–12, 1998; and (2) Study Group 2 (Numbering and Routing) to be held March 3–13, 1998. Questions regarding the agenda or ITAC–T Sector activities in general may be directed to William Kirsch, Department of State (202 647–0197), fax number (202 647–7407).

All participants may join in discussions, subject to instructions of the chair. In this regard, entry to the building is controlled. If you wish to attend, please send a fax to (202) 647–7407 at least 24 hours before the

DEPARTMENT OF STATE

[Public Notice No. 2669]

Proposed Unidroit Convention and Its Aircraft Protocol Meeting Notice

AGENCY: Department of State.

ACTION: Notice is hereby given of an Advisory Committee meeting to be held on Thursday, February 26 starting at 9:00 a.m. in the Civil Aeromedical Institute auditorium, Room 254, located at 6500 S. MacArthur Blvd, Oklahoma City, Oklahoma. The meeting will end at or before 1:00 p.m. on February 26. There may be an afternoon session from 2:00 p.m. to 5:00 p.m. for further discussion.

Attendance: The meeting is open to the public, free of charge, and is limited to available seating. It may be of interest to persons associated with the selling, leasing, and financing of aircraft and aircraft engines, including persons who search title, give title opinions, submit conveyances for recordation to the FAA Aircraft Registry, or otherwise participate in aircraft financing.

Nature: The meeting is intended only to provide information. No formal record will be made. No written comments will be accepted from the audience.

Agenda:

(1) Introductory remarks
(2) Purpose of UNIDROIT Convention
(3) Status of actions taken (UNIDROIT Convention and Aircraft Protocol)
(4) Summary of UNIDROIT Convention with emphasis on registration of international interests
(5) Summary of Aircraft Protocol
(6) Relationship of UNIDROIT Convention to existing laws and treaties
(7) Question and Answer Period

Background: The United States Government, through the United States Department of State, has been participating with other nations in studying a proposed multilateral convention (UNIDROIT Convention) to protect international secured interests in mobile equipment, including aircraft.

A preliminary draft of the UNIDROIT Convention will be submitted to the UNIDROIT Governing Council in early 1998. Thereafter, it is expected that the draft will be circulated to States to determine whether to proceed to intergovernmental negotiations to conclude the Convention.

As proposed, the UNIDROIT Convention would not take effect unless a protocol has been adopted for a specific category of mobile objects. In that regard, UNIDROIT's Aircraft Equipment Protocol Group has completed a preliminary draft protocol which would pertain to certain large airframes and large helicopters, and jet and turbine engines.

The UNIDROIT Convention and Aircraft Equipment Protocol together, when and if adopted and enacted into law by contracting states would provide a comprehensive international system to protect leasing and financing interests. Significant features might include default remedies, priorities, and establishment of an international registration system to register (record) international consensual interests, non-consensual interests, assignments, prospective assignments, and subordinations.

It is anticipated that the international registration system would be primarily an electronic notice system. As proposed, the international registration system is not intended to interfere with countries' existing national registration and recordation systems (e.g., Parts 47 and 49 of the Federal Aviation Regulations).

FOR FURTHER INFORMATION CONTACT: Joseph R. Standell, Aeronautical Center Counsel, Federal Aviation Administration, P.O. Box 25082, Oklahoma City, OK 73125, telephone number (405) 954–3296; fax number (405) 954–4676.

Dated: December 17, 1997.

Harold S. Burman,

Executive Director, Secretary of State's Advisory Committee on Private International Law, United States Department of State.

BILLING CODE 4701–06–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

Aviation Rulemaking Advisory Committee—New Task

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of a new task assignment for the Aviation Rulemaking Advisory Committee (ARAC).

SUMMARY: Notice is given of a new task assigned to and accepted by the Aviation Rulemaking Advisory Committee (ARAC). This notice informs the public of the activities of ARC.

FOR FURTHER INFORMATION CONTACT: Joseph A. Hawkins, Director, Office of Rulemaking, ARM–1, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, DC 20591; telephone (202) 267–9677 or fax (202) 267–5075.

SUPPLEMENTARY INFORMATION:

Background

The FAA has established an Aviation Rulemaking Advisory Committee to provide advice and recommendations to the FAA Administrator, through the Associate Administrator for Regulation and Certification, on the full range of the FAA's rulemaking activities with respect to aviation-related issues. This includes obtaining advice and recommendations on the FAA's commitment to harmonize its Federal Aviation Regulation (FAR) and practices with its trading partners in Europe and Canada.

The Task

This notice is to inform the public that the FAA has asked ARAC to provide advice and recommendation on the following harmonization task:

Prevention of Fuel Tank Explosions

Prepare a report to the FAA/JAA that provides specific recommendations and proposed regulatory text that will eliminate or significantly reduce the hazards associated with explosive vapors in transport category airplane fuel tanks. Proposed regulatory text should ensure that new type designs, in-production airplanes and the existing fleet of transport airplanes are designed and operated so that during normal operation (up to maximum certified operating temperatures) the presence of explosive fuel air vapors in all fuel tanks is eliminated, significantly reduced or controlled to the extent that there could not be a catastrophic event. (This task addresses means of reducing explosion hazards by eliminating or controlling explosive fuel vapors. The FAA is also engaged in a separate activity to evaluate whether additional actions should be taken to ensure that ignition sources are not present within fuel tanks. Therefore, control of ignition sources is not within the scope of this task.) In developing recommendations to the authorities, a report should be generated that includes the following:

(1) An analysis of the threat of fuel tank explosion due to internal and external tank ignition sources for the major fuel system designs making up the transport fleet, including transport airplanes with heat sources adjacent to or within the fuel tanks. The SAFER data presented to the FAA in 1978, which includes evaluation of fuel tank safety in both operational and post crash conditions, should be used as a starting point for determining the level of safety.

(2) An analysis of various means of reducing or eliminating exposure to operation of transport airplane fuel tanks with explosive fuel air mixtures (e.g. inerting, cooling of lower center tank surfaces, combination of cooling and modified fuel properties, etc.) or eliminating the resultant hazard if ignition does occur (installation of selective/voided/full tank reticulating foam, explosion suppression systems). Technical discussion of the feasibility, including cost/benefit analysis, of implementing each of the options on a fleet retrofit, current production, and new type design airplanes should also be provided.

(3) An analysis of the cost/benefit of modified fuel properties that reduce exposure to explosive vapors within fuel tanks. The FAA has asked industry through the American Petroleum Institute to provide pertinent information on fuel properties. The degree of modification to fuel properties necessary to eliminate or significantly reduce exposure to explosive fuel tank ullage spaces in fleet operation must be determined by the group. Factors that may enhance the benefits of modified fuels, such as cooling provisions incorporated to reduce fuel tank temperatures, should be considered. Cost information for the various options should be developed. Information regarding the effects of modified fuel properties on airplane operations, such as engine air/ground starting at low temperatures, maintenance impact, emissions and fuel freeze point, should be analyzed by the group and be provided.

(4) Review comments to the April 3, 1997, **Federal register** notice (62 FR 16014) and any additional information such that validated cost benefit data of a certifiable system is provided for the various options proposed by commenters. This information will be used in preparing regulatory action.

Note: In many cases specific cost data provided in the comments to the notice was competition sensitive; therefore the ARAC group should contact commenters directly and request participation in the group.

(5) Recommended objective regulatory actions that will eliminate, significantly reduce or control the hazards associated with explosive fuel air mixtures in all transport airplane fuel tanks to the extent that there could not be a catastrophic event.

In addition to the above task, the working group should support the FAA in evaluation of application of the proposed regulation to the various types of transport airplanes (turbopropeller, business jets, large transports, and other turbine-powered aircraft types which may be affected by a change in fuel properties/availability) and any impact on small businesses.

This activity will be tasked for a 6-month time limit to complete the task defined above. The FAA will consider the recommendations produced by ARAC and initiate future FAA regulatory action. However, if the group is unable to provide the FAA with proposed regulatory language within this time period, the FAA will initiate rulemaking independently. Participants of the ARAC should be prepared to participate on a full-time basis for a 6-month period if necessary.

ARAC Acceptance of Task

ARAC has accepted this task and has chosen to assign it to a new Fuel Tank Harmonization Working Group. The new working group will serve as staff to the ARAC Executive Committee to assist ARAC in the analysis of the assigned task. Working group recommendations must be reviewed and approved by ARAC. If ARAC accepts the working group's recommendations, it will forward them to the FAA as ARAC recommendations.

The Fuel Tank Harmonization Working Group should coordinate with other harmonization working groups, organizations, and specialists as appropriate. The working group will identify to ARAC the need for additional new working groups when existing groups do not have the appropriate expertise to address certain tasks.

Working Group Activity

The Fuel Tank Harmonization Working Group is expected to comply with the procedures adopted by ARAC. As part of the procedures, the working group is expected to:

1. Recommend a work plan for completion of the task, including the rationale supporting such a plan, for consideration at the ARAC Executive Committee meeting held following publication of this notice.

2. Give a detailed conceptual presentation of the proposed recommendations, prior to proceeding with the work stated in item 3 below.

3. Draft a report and/or any other collateral documents the working group determines to be appropriate.

4. Provide a status report at each meeting of the ARAC Executive Committee.

Participation in the Working Group

The Fuel Tank Harmonization Working Group will be composed of experts having an interest in the assigned task. A working group member need not be a representative of a member of the full committee.

An individual who has expertise in the subject matter and wishes to become a member of the working group should write to the person listed under the caption **FOR FURTHER INFORMATION CONTACT** expressing that desire, describing his or her interest in the tasks, and stating the expertise he or she would bring to the working group. All requests to participate must be received no later than February 2, 1998. The requests will be reviewed by the ARAC chair, the executive director, and the working group chair, and the individuals will be advised whether or not the request can be accommodated.

The Secretary of Transportation has determined that the formation and use of ARAC are necessary and in the public interest in connection with the performance of duties imposed on the FAA by law.

Meetings of the ARAC Executive Committee will be open to the public. Meetings of the Fuel Tank Harmonization Working Group will not be open to the public, except to the extent that individuals with an interest and expertise are selected to participate. No public announcement of working group meetings will be made.

Issued in Washington, DC, on January 20, 1998.

Joseph A. Hawkins,

Executive Director, Aviation Rulemaking Advisory Committee.

BILLING CODE 4910–13–M

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 33540]

Blue Mountain Railroad, Inc.—Trackage Rights Exemption—Union Pacific Railroad Company

Union Pacific Railroad Company (UP) will agree to grant local trackage rights to Blue Mountain Railroad, Inc. (BMR) between: (1) UP milepost 210.0 at

VOL 63 ISS 15 JA 23 1998 UMI

Juniper, OR, and UP milepost 218.0 at Wallula Heights, WA; and (2) UP milepost 0.0 at Wallula, WA, and UP milepost 2.0 near Attilia, WA, a total distance of 10 miles. BMR will be permitted to provide local switching service only to Boise Cascade Corporation, Ponderosa Fibers, and WATCO, Inc., at Wallula, WA.

The transaction is expected to be consummated on or shortly after January 15, 1998, the effective date of the exemption.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C.10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33540, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423–0001. In addition, a copy of each pleading must be served on: Karl Morell, Ball Janik LLP, Suite 225, 1455 F Street, N.W., Washington, DC 20005.

Decided: January 15, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 33474]

Iowa Interstate Railroad, Ltd.—Lease and Operation Exemption—Union Pacific Railroad Company

AGENCY: Surface Transportation Board.

ACTION: Notice of Exemption.

SUMMARY: Under 49 U.S.C. 10502, the Board exempts from the requirements of 49 U.S.C. 10902 the lease by Iowa Interstate Railroad, Ltd. (IAIS) and operation of 6.4 miles of railroad owned by Union Pacific Railroad Company between milepost 358.568 at Des Moines, IA, and milepost 365.0 at West Des Moines, IA, in Polk County, IA, subject to labor protective conditions.

DATES: The exemption will be effective 60 days after IAIS certifies to the Board that it has posted at the workplace of the employees on the affected line, and served on the national offices of the labor unions with employees on the affected line, a notice of the transaction, setting forth the types and numbers of jobs expected to be available, the terms of employment and principles of employee selection, and the line that is to be leased. Petitions to stay must be filed by February 23, 1998. Petitions to reopen must be filed by March 16, 1998.[1]

ADDRESSES: An original and 10 copies of all pleadings referring to STB Finance Docket No. 33474 must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, NW., Washington, DC 20423–0001; in addition, a copy of all pleadings must be served on petitioner's representative: T. Scott Bannister, 1300 Des Moines Building, 405–6th Avenue, Des Moines, IA 50309.

FOR FURTHER INFORMATION CONTACT: Joseph H. Dettmar (202) 565–1600. [TDD for the hearing impaired (202) 565–1695.]

SUPPLEMENTARY INFORMATION: Additional information is contained in the Board's decision. To purchase a copy of the full decision, write to, call or pick up in person from: DC NEWS & DATA, INC., 1925 K Street, N.W., Suite 210, Washington, DC 20006. Telephone: (202) 289–4357. [Assistance for the hearing impaired is available through TDD services (202) 565–1695.]

Decided: January 12, 1998.

By the Board, Chairman Morgan and Vice Chairman Owen.

Vernon A. Williams,

Secretary.

BILLING CODE 4915–00–P

UNITED STATES INFORMATION AGENCY

Submission for OMB Review; Comment Request

AGENCY: United States Information Agency.

ACTION: Submission for OMB Review; comment request.

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), this notice announces that the following information collection activity has been forwarded to the Office of Management and Budget (OMB) for review and comment. USIA is requesting approval of an information collection entitled "Applications for Administrative and Teaching Exchanges/Seminars Abroad" under OMB control number 3116–0181 which is scheduled to expire on February 28, 1998. This request for comment is being made pursuant to the Paperwork Reduction Act of 1995 (Pub. L. 104–13; 44 U.S.C. 3506(c)(2)(A)).

The information collection activity involved with the program is conducted pursuant to the mandate given to the United States Information Agency under the terms and conditions of the Mutual and Educational and Cultural Exchange Act of 1961, P.L. 87–256.

DATES: Comments are due on or before February 23, 1998.

COPIES: Copies of the Request for Clearance (OMB 83–I), supporting statement, and other documents that have been submitted to OMB for approval may be obtained from the USIA Clearance Officer. Comments should be submitted to the Office of Information and Regulatory Affairs of OMB, Attention: Desk Officer for USIA, and also to the USIA Clearance Officer.

FOR FURTHER INFORMATION CONTACT: Agency Clearance Officer, Ms. Jeannette Giovetti, United States Information Agency, M/AOL, 301 Fourth Street, S.W., Washington, D.C. 20547, telephone (202) 619–4408, internet address JGiovett@USIA. GOV; and OMB review: Ms. Victoria Wassmer, Officer of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Docket Library, Room 1002, NEOB, Washington, D.C. 20503, Telephone (202) 395–5871.

SUPPLEMENTARY INFORMATION: An Agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The **Federal Register** notice with a 60-day comment period soliciting comments on this collection of information was published on November 25, 1997 (vol. 62, no. 227). Public reporting burden for this collection of information (Paper Work Reduction Project: OMB No. 3116–0181) is estimated to average two (2) hours per response. Responses are voluntary and respondents are required to respond only one time, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the date needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to the United States Information Agency, M/AOL, 301 Fourth Street, S.W., Washington, D.C. 20547; and to the Office of Information and Regulatory Affairs, Office of Management and Budget, New Executive Office Building, Docket Library, Room 10202, NEOB, Washington, D.C. 20503.

[1] The due dates for petitions for stay and reopening presuppose that IAIS will promptly certify that the required notice to employees has been given, and that the employees therefore have a reasonable period of time in which to file any petition. Should IAIS be delayed for a significant period of time in making that certification, we will entertain requests to extend the period of time for filing petitions to stay or reopen.

Current Actions

This information collection has been submitted to OMB for the purpose of requesting reinstatement for a three-year period and approval of revisions regarding the total annual burden hours.

Title: "Applications for Administrative and Teaching Exchanges/Seminars Abroad".

Form Number: IAP–92.

Abstract: To be used by applicants under the Fulbright Teacher Exchange Program which provides opportunities for U.S. Teachers to exchange positions for designated periods with foreign counterparts, or to attend one of a number of short-term seminars abroad on a variety of topics.

Proposed Frequency of Responses:

No. of Respondents—940
Recordkeeping House—2.0
Total Annual Burden—1880

Dated: January 16, 1998.

Rose Royal,

Federal Register Liaison.

Culturally Significant Objects Imported for Exhibition Determinations

Notice is hereby given of the following determinations: Pursuant to the authority vested in me by the Act of October 19, 1965 (79 Stat. 985, 22 U.S.C. 2459), Executive Order 12047 of March 27, 1978 (43 FR 13359, March 29, 1978), and Delegation Order No. 85–5 of June 27, 1985 (50 FR 27393, July 2, 1985), I hereby determine that the objects to be included in the exhibit "Augustin Pajou, Royal Sculptor" (see list),[1] imported from abroad for the temporary exhibition without profit within the United States, are of cultural significance. These objects are imported pursuant to loan agreements with the foreign lenders. I also determine that the exhibition or display of the listed exhibit objects at The Metropolitan Museum of Art, New York, New York, from on or about February 23, 1998, to on or about May 24, 1998, is in the national interest. Public Notice of these determinations is ordered to be published in the **Federal Register**.

Dated: January 20, 1998.

Les Jin,

General Counsel.

Department of Education

Strengthening Institutions Programs; Notice Inviting Applications for New Awards for Fiscal Year 1998; Notice

VOL
63
ISS
15
JA
23
1998
UMI

DEPARTMENT OF EDUCATION

[CFDA No. 84.031]

Strengthening Institutions Programs; Notice Inviting Applications for New Awards for Fiscal Year 1998

Purpose of Program: Provide grants to eligible institutions of higher education to improve their academic quality, institutional management, and fiscal stability in order to increase their self-sufficiency.

This grant program should be seen as an opportunity for applicants to support those elements of the National Education Goals that are relevant to their unique missions.

Deadline for Transmittal of Applications: March 17, 1998.

Deadline for Intergovernmental Review: April 9, 1998.

Applications Available: Applications will be mailed by January 26, 1998 to the office of the president of all institutions that will receive an application to be designated as an eligible institution under the Strengthening Institutions Program.

Available Funds: $17,000,000.

Estimated Range of Awards: $327,000 to $350,000 per year for five-year development grants; $30,000 to $35,000 for one-year planning grants.

Estimated Average Size of Awards: $338,500 per year for five-year development grants; $32,500 for one year planning grants.

Estimated Number of Awards: 48 development grants; 14 planning grants.

Project Period: 60 months for development grants; 12 months for planning grants.

Note: The Department is not bound by any estimates in this notice.

Special Funding Considerations: In tie-breaking situations described in 34 CFR 607.23 of the Strengthening Institutions program regulations, the Secretary awards one additional point under § 607.23 to an application from an institution that has an endowment fund for which the current market value, per full-time equivalent (FTE) student, *is less than the average, per FTE student,* at similar type institutions; and one additional point to an application from an institution that has expenditures for library materials, per FTE student, that are less than the average, per FTE student, at similar type institutions.

For the purposes of these funding considerations, an applicant must be able to demonstrate that the current market value of its endowment fund, per FTE student, or expenditures for library materials, per FTE student, is less than the following national average for base year 1995–96:

	Average market value of endowment fund, per FTE	Average library expenditures for materials, per FTE
Two-year Public Institutions	$1,332	$45
Two-year Non-profit, Private Institutions	11,567	121
Four-year Public Institutions	2,829	165
Four-year Non-profit Private Institutions	42,579	254

If a tie still remains after applying the above, the Secretary determines that institutions will receive an award according to a combined ranking of two year-and four-year institutions. The ranking is established by awarding points for combined FTE averages of library expenditures and endowment values by similar type institutions. Institutions whose combined FTE averages of library expenditures and endowment values are the lowest are ranked higher in strict numerical order.

Applicable Regulations: (a) The Department of Education General Administrative Regulations (EDGAR) in 34 CFR Parts 74, 75, 77, 79, 82, 85, and 86; and (b) the regulations for this program in 34 CFR Part 607.

SUPPLEMENTARY INFORMATION: Please note that 34 CFR 607.9(b)(2), (3) and (4) have been superseded by § 313(a) of the Higher Education Act of 1965, as amended (HEA). Accordingly, please disregard those sections, which are found in appendix VI of the application.

In making awards for fiscal year 1998, the Secretary will give priority for grants to the highest ranked applicants who are not or were not recipients of an *individual* Strengthening Institutions Program development grant on or after October 1, 1997. While institutions that *are or were* recipients of individual Strengthening Institutions Program development grants on or after October 1, 1997 may submit applications if they wish, those applications will be reviewed only if funds are available after all priority applications are funded. The Secretary *does not* anticipate having any funds available after all priority applications are funded.

In § 312 of the FY 1998 appropriation bill, Congress authorized the use of up to 20% of grant funds awarded to an institution under the Part A-Strengthening Program for endowment building. Any institution seeking to use Part A funds for endowment building purposes *shall indicate that intention* in its application and shall abide by the departmental regulations in 34 CFR Part 628 governing the Endowment Challenge Grant program. Only institutions requesting and competing successfully for new individual development grants in Fiscal Year 1998 may use up to 20% of the funds for endowment building; non-competing continuation grantees are not eligible for endowment building.

FOR FURTHER INFORMATION CONTACT: Blanca Westgate, U.S. Department of Education, 600 Independence Avenue, SW, Portals Building, Suite CY–80, Washington, D.C. 20202–5335. Telephone: (202) 708–8839. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern Time, Monday through Friday.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audio tape, or computer diskette) on request to the contact person listed in the preceding paragraph.

Individuals with disabilities may obtain a copy of the application package in an alternate format, also, by contacting that person. However, the Department is not able to reproduce in an alternate format the standard forms included in the application package.

Electronic Access to This Document

Anyone may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or portable document format (pdf) on the World Wide Web at either of the following sites:

1998
UMI

DEPARTMENT OF ENERGY

Record of Decision for the Department of Energy's Waste Isolation Pilot Plant Disposal Phase

AGENCY: U.S. Department of Energy.

ACTION: Record of decision.

SUMMARY: The Department of Energy (DOE or Department) is issuing this record of its decision to dispose of transuranic (TRU) waste at the Waste Isolation Pilot Plant (WIPP), a mined repository located 2,100 feet below the surface in an ancient salt deposit near Carlsbad, New Mexico. Under this decision, DOE will dispose of up to 175,600 cubic meters (6.2 million cubic feet) of TRU waste generated by defense activities at WIPP after preparation (i.e., treatment, as necessary, including packaging) to meet WIPP's waste acceptance criteria. This waste includes TRU waste accumulated in aboveground storage since 1970 and TRU waste to be generated over approximately the next 35 years. This waste does not include TRU waste commingled with polychlorinated biphenyls in concentrations greater than or equal to 50 parts per million. Transportation of waste to WIPP will initially be by truck, although the Department reserves the option to use commercial rail transportation in the future. DOE will comply with the requirements and waste limits in the WIPP Land Withdrawal Act, as amended, and the Consultation and Cooperation Agreement between New Mexico and the Department of Energy. DOE has applied for a permit from the New Mexico Environment Department under the Resource Conservation and Recovery Act concerning mixed TRU waste (TRU waste containing radioactive and hazardous constituents); such a permit is not needed for disposal of other TRU waste at WIPP.

Implementation of this decision is contingent upon obtaining a Compliance Certification from the United States Environmental Protection Agency (EPA). EPA recently proposed to certify that WIPP complies with applicable EPA requirements for TRU waste disposal (62 FR 58792, October 30, 1997).

This Record of Decision documents the Department's decision to implement the Preferred Alternative, as analyzed in the "Waste Isolation Pilot Plant Disposal Phase Final Supplemental Environmental Impact Statement" (DOE/EIS–0026–FS2, September 1997) (SEIS–II). This Record of Decision is being issued in coordination with the preparation of the Record of Decision on the treatment and storage of TRU waste, which is based on the "Waste Management Programmatic Environmental Impact Statement" (DOE/EIS–0200, May 1997) (WM PEIS). The WM PEIS Record of Decision will specify the DOE sites at which TRU waste will be prepared and stored before disposal.

SUPPLEMENTARY INFORMATION:

Background

Since the mid-1940s, DOE's research and development, nuclear weapons production, and nuclear fuel reprocessing activities have produced transuranic (TRU) waste. TRU waste is waste that contains alpha particle-emitting radionuclides with atomic numbers greater than that of uranium (92) and half-lives greater than 20 years in concentrations greater than 100 nanocuries per gram of waste.

TRU waste is classified according to the radiation dose rate at a package surface. Contact-handled (CH) TRU waste has a radiation dose rate at a package surface of 200 millirem per hour or less; this waste can safely be handled directly by personnel. Remote-handled (RH) TRU waste has a radiation dose rate at a package surface greater than 200 millirem per hour, and must be handled remotely (e.g., with machinery designed to shield workers from radiation).

TRU waste that has both radioactive and hazardous constituents is known as mixed TRU waste. The hazardous component of mixed TRU waste is regulated under the Resource Conservation and Recovery Act (RCRA). DOE estimates that approximately 60 percent of TRU waste is mixed TRU waste. In addition, some TRU waste is commingled with polychlorinated biphenyls (PCBs) in concentrations greater than or equal to 50 parts per million and is known as PCB commingled TRU waste. Disposal of PCBs is regulated under the Toxic Substances Control Act.

Before 1970, TRU waste was disposed of in shallow land burial sites. Since 1970, TRU waste has been retrievably stored in aboveground facilities at DOE sites. Plutonium stabilization and management activities, environmental restoration (which could include remediation of sites where TRU waste was buried before 1970), decontamination and decommissioning, waste management, and defense testing and research are expected to generate additional TRU waste.

The Department began examining the environmental impacts of TRU waste disposal under the National Environmental Policy Act (NEPA) in the late 1970s. After issuing the "Final Environmental Impact Statement for the Waste Isolation Pilot Plant" (DOE/EIS–0026, October 1980), the Department decided in a 1981 Record of Decision to begin phased development of WIPP to demonstrate the safe disposal of TRU waste in bedded salt. Consequently, the Department has, since 1981, been preparing to dispose of and isolate TRU waste by emplacing it in the Waste Isolation Pilot Plant (WIPP), a mined repository located 2,100 feet below the surface in an ancient salt deposit near Carlsbad, New Mexico. The major construction activities at WIPP have been completed. WIPP consists of the Waste Handling Building where waste would be received and inspected, an underground disposal area, and a waste handling shaft for transfer of waste from the surface to the disposal area. WIPP was designed for a total capacity of 175,600 cubic meters (6.2 million cubic feet) of TRU waste.

In 1990, after issuing the "Final Supplement Environmental Impact Statement for the Waste Isolation Pilot Plant" (DOE/EIS–0026–FS, January 1990), DOE issued a Record of Decision that continued the phased development of WIPP by instituting an experimental program to further examine WIPP's suitability as a TRU waste repository. In September 1997, DOE issued the "Waste Isolation Pilot Plant Disposal Phase Final Supplemental Environmental Impact Statement" (DOE/EIS–0026–FS2) (SEIS–II), which analyzes the environmental impacts of proposed disposal operations at WIPP. The Department has prepared this Record of Decision pursuant to the Council on Environmental Quality Regulations for implementing the provisions of NEPA (40 CFR parts 1500–1508) and the Department of Energy regulations implementing NEPA (10 CFR part 1021).

While SEIS–II was prepared to inform DOE's decision on whether to open WIPP for the disposal of TRU waste, the "Waste Management Programmatic Environmental Impact Statement" (DOE/EIS–0200, May 1997) (WM PEIS) was prepared to inform DOE's decision on where to treat (which includes packaging) and store TRU waste prior to disposal. In the WM PEIS, DOE examined several TRU waste treatment and storage site consolidation strategies (i.e., whether to treat and store TRU waste at the DOE sites where it is generated, at a few regional DOE sites, or at a centralized DOE site). In coordination with this WIPP Record of Decision, DOE is separately preparing a Record of Decision, supported by the WM PEIS, that specifies whether, and if so, where, to consolidate TRU waste for preparation and storage pending disposal.

Purpose and Need for Agency Action

The Department needs to safely dispose of the TRU waste that has accumulated at DOE sites and to provide for the disposal of additional TRU waste to be generated over approximately the next 35 years (through approximately 2033) in a manner that protects public health and the environment. DOE prepared SEIS-II in order to help DOE make the following decisions:

- Whether to open and operate WIPP for the disposal of TRU waste, and, if so,
- Which portions of the TRU waste inventory would be disposed of,
- To what minimum level TRU waste must be treated for disposal, and
- What mode of transportation would be used to transport TRU waste to WIPP.

WIPP Operation

With respect to the decision on whether to open WIPP, SEIS-II examines the environmental impacts of four alternatives that involve operating the facility (the Proposed Action and other Action Alternatives) and the impacts of two alternatives that involve dismantling and closing WIPP and continuing storage of TRU waste at the generating sites (the No Action Alternatives).

Waste Inventories

SEIS–II uses the most recent inventory data available for its analysis, including data from "The National Transuranic Waste Management Plan," (DOE/NTP–96–1204, Revision 0, September 1996)(TRU Waste Management Plan). Using these data, SEIS–II examines the environmental impacts of disposing of different inventories of TRU waste. For purposes of analysis in SEIS–II, the DOE TRU waste inventory is divided into a Basic Inventory and an Additional Inventory. The Basic Inventory consists of (1) TRU waste generated by defense activities (defense waste) that has been placed in retrievable storage since 1970 and (2) defense TRU waste that would continue to be generated over approximately the next 35 years as a result of plutonium stabilization and management activities, environmental restoration (including remediation of some sites where defense TRU waste was buried before 1970), decontamination and decommissioning, waste management, and defense testing and research. The Basic Inventory volume (per recent estimates analyzed in SEIS–II) is approximately 170,000 cubic meters (6 million cubic feet). The Additional Inventory consists of commercial and non-defense waste (waste for which DOE has responsibility and which was generated by activities other than defense activities), PCB commingled TRU waste, and waste that was buried before 1970 that is not included in the Basic Inventory (because, for example, DOE does not expect remediation activities to occur within approximately the next 35 years, or because the extent of remediation has not been determined). The Additional Inventory also includes non-defense and commercial waste that DOE believes could be generated over approximately the next 35 years. The Additional Inventory volume (per recent estimates analyzed in SEIS–II) is approximately 142,500 cubic meters (5 million cubic feet).

The WIPP Land Withdrawal Act, as amended in 1996, limits the capacity of WIPP to 175,600 cubic meters (6.2 million cubic feet). The Act also specifies that only defense TRU waste may be disposed of at WIPP. In addition, the Consultation and Cooperation (C&C) Agreement between DOE and the State of New Mexico limits the volume of RH–TRU waste to 7,080 cubic meters (250,000 cubic feet). Using the volume estimates analyzed in SEIS–II, disposal of the Basic Inventory would be within these limits, and disposal of the Basic Inventory and all of the Additional Inventory would exceed these limits.

Waste Treatment Levels

SEIS–II examines treatment of TRU waste to three different levels before disposal: treatment to meet the planning basis WIPP waste acceptance criteria (WIPP WAC), thermal treatment to meet RCRA land disposal restriction (LDR) levels, and treatment by shred and grout. The planning basis WIPP WAC is that level of treatment and packaging in WIPP WAC Revision 5, with anticipated revisions as analyzed in SEIS–II. Treatment to planning basis WIPP WAC would require repackaging of TRU waste to meet transportation and disposal regulations and DOE policies. Treatment to LDR levels would use a thermal process that would substantially condense the waste and yield a vitrified or metal ingot waste form. Such treatment would also remove any organic hazardous constituents and immobilize any hazardous metals in mixed TRU waste and PCB commingled TRU waste. Treatment by shredding the waste and sealing it in grout would reduce gas generation, but would create a much larger waste volume. As set forth in this WIPP Record of Decision, DOE has concluded that waste destined for WIPP should at a minimum be prepared (i.e., treated as needed, and packaged) according to the planning basis WIPP WAC. As noted previously, in coordination with this WIPP Record of Decision, DOE is preparing a Record of Decision, based on the WM PEIS, that will specify whether, where, and to what extent to consolidate TRU waste for preparation and storage pending disposal.

Transportation Modes

SEIS–II analyzes the transport of TRU waste by truck, by regular rail and truck (truck transportation from those sites that do not have rail access), and by dedicated rail and truck. Regular rail refers to use of commercial rail lines, with TRU waste being included on trains that are also carrying other types of freight. Dedicated rail would also use commercial rail lines, with trains composed exclusively of rail cars carrying TRU waste.

The Department has investigated and continues to investigate the possibility of using rail transportation, but considers it less reasonable than truck transportation at this time. The primary factors that make rail transportation less reasonable are (1) limited interest of rail carriers in handling shipments of TRU waste, (2) the higher cost of dedicated rail transportation as compared to truck transportation, (3) the initial cost of acquiring additional transport containers needed for rail transportation (because three times as many containers are needed for each shipment), and (4) DOE's inability to obtain rail carrier assurance that TRU waste container transit will enable DOE to unseal the containers within 60 days of loading, as required by Nuclear Regulatory Commission regulations. Regular rail transportation, because of its lower public health impacts and cost, is still

VOL 63 ISS 15 JA 23 1998 UMI

considered a desirable option for some waste transportation in the future, provided that the factors that make it currently less reasonable can be mitigated.

Alternatives Considered

SEIS–II examines the environmental impacts of the Proposed Action, three other reasonable Action Alternatives, and two No Action Alternatives that involve the waste inventories and treatment levels described above.

1. Proposed Action (Preferred Alternative)

Under the Proposed Action, DOE would open WIPP and dispose of 175,600 cubic meters (6.2 million cubic feet) of post-1970 defense TRU waste (except PCB commingled TRU waste), which is the Basic Inventory of TRU waste adjusted up to the capacity limits specified in the WIPP Land Withdrawal Act and the C&C Agreement. The waste would be treated as necessary to meet the planning basis WIPP WAC. Based on the inventory volume and the anticipated emplacement rate, TRU waste would be disposed of at WIPP over a 35-year period. Transportation would be by truck.

The Department identified the Proposed Action as its Preferred Alternative in the final SEIS–II. Under the Preferred Alternative, TRU waste transportation would initially be by truck; however, the Department reserves the option to use commercial rail transportation of TRU waste in the future.

The Proposed Action (and Preferred Alternative) would isolate TRU waste for more than 10,000 years and would comply with the WIPP Land Withdrawal Act and the C&C Agreement. However, this alternative would not dispose of the Additional Inventory.

2. Action Alternative 1

Under Action Alternative 1, the Department would dispose of the Basic and Additional Inventories of TRU waste (except PCB commingled TRU waste) at WIPP, after treating the waste to meet the planning basis WIPP WAC. SEIS–II analyzes the disposal of TRU waste over the 160-year period needed for emplacement of this amount of waste at the anticipated emplacement rate. SEIS–II also analyzes the environmental impacts associated with the modifications to WIPP facilities and operations that would be needed to increase the emplacement rate and reduce the disposal time (for this alternative, to 60 years). SEIS–II analyzes transportation by truck and transportation by rail (regular commercial and dedicated trains).

Action Alternative 1 would isolate TRU waste for more than 10,000 years, and would dispose of defense, non-defense, and commercial TRU waste and TRU waste that was buried before 1970. DOE could not implement Action Alternative 1 unless the WIPP Land Withdrawal Act and the C&C Agreement were modified accordingly. In addition, under Action Alternative 1, DOE would not dispose of PCB commingled TRU waste at WIPP.

3. Action Alternative 2

Under Action Alternative 2, the Department would dispose of the Basic and Additional Inventories of TRU waste (including PCB commingled TRU waste) at WIPP after treating the waste thermally to LDR levels. SEIS–II analyzes the disposal of waste over the 150-year period needed for emplacement of this volume given thermal loading constraints and anticipated emplacement rate. SEIS–II also analyzes the environmental impacts associated with the modifications to WIPP facilities and operations that would be needed to increase the emplacement rate and reduce the disposal time (for this alternative, to 70 years). SEIS–II analyzes three subalternatives (Alternatives 2A, 2B, and 2C) that examine consolidated thermal treatment at DOE sites.

Action Alternative 2 would isolate TRU waste for more than 10,000 years, and would dispose of defense, non-defense, and commercial TRU waste, PCB commingled TRU waste, and TRU waste that was buried before 1970. DOE could not implement this alternative unless the WIPP Land Withdrawal Act and the C&C Agreement were modified accordingly.

4. Action Alternative 3

Under Action Alternative 3, DOE would dispose of the Basic and Additional Inventories of TRU waste (except PCB commingled TRU waste) at WIPP after treatment by a shred and grout process. SEIS–II analyzes the disposal of waste over the 190-year period needed for emplacement of this volume at the anticipated emplacement rate. SEIS–II also analyzes the environmental impacts associated with the modifications to WIPP facilities and operations that would be needed to increase the emplacement rate and reduce the disposal time (for this alternative, to 75 years). The impacts of both truck and rail transportation are analyzed.

Action Alternative 3 would isolate TRU waste for more than 10,000 years, and would dispose of defense, non-defense, and commercial TRU wastes and TRU waste that was buried before 1970. DOE could not implement Action Alternative 3 unless the WIPP Land Withdrawal Act and the C&C Agreement were modified accordingly. The treatment method under this alternative would increase the volume of the waste to be disposed of, thus increasing transportation. In addition, under Action Alternative 3, DOE would not dispose of PCB commingled TRU waste at WIPP.

5. No Action Alternative 1

Under No Action Alternative 1, the Department would thermally treat the Basic and Additional Inventories of TRU waste and store the waste indefinitely in newly constructed monitored retrievable storage facilities. SEIS–II analyzes two subalternatives that examine the impacts of thermal treatment. The impacts of transporting TRU waste to treatment sites by both truck and rail transportation are analyzed. WIPP would be dismantled and closed under this alternative.

No Action Alternative 1 would treat TRU waste to RCRA LDR levels and indefinitely store the treated waste. Treatment to LDR levels would reduce human health impacts in the event of a release of the stored waste. This alternative would not offer the isolation afforded by deep geologic disposal, would require periodic maintenance of storage facilities and waste repackaging, and could not be implemented without modification of agreements that DOE has reached with several states regarding the offsite disposition of TRU waste. No Action Alternative 1 would require the use of effective institutional controls for the indefinite future.

6. No Action Alternative 2

Under No Action Alternative 2, DOE would continue to store newly generated TRU waste at generator sites in existing or planned storage facilities. The newly generated waste would be treated to meet the planning basis WIPP WAC to facilitate safe storage; however, the waste form would not protect human health if the waste were released. No transportation is analyzed for this alternative, because the waste is assumed to remain indefinitely where it was generated. WIPP would be dismantled and closed under this alternative.

This alternative would not involve impacts to workers and the public associated with thermal or shred and grout treatment or with transportation. However, this alternative would not offer the isolation afforded by deep geologic disposal, would require periodic maintenance of storage facilities and waste repackaging for the indefinite future, and could not be implemented without modification of agreements that DOE has reached with several states regarding the offsite disposition of TRU waste.

Environmentally Preferable Alternative

In identifying its environmental preference among alternatives for the long-term management of TRU waste, DOE considered both near-term and long-term (through and beyond 10,000 years) human health and environmental impacts. There are alternatives that would result in low near-term impacts but relatively high long-term impacts, and identifying the environmentally preferable alternative(s) requires judgment concerning these impacts and sensitivity concerning the uncertainties of some of the near-term and long-term impacts.

SEIS–II estimates that some potential near-term fatalities, mainly among workers as a result of industrial accidents from waste treatment operations, would occur under all alternatives. The largest number of potential fatalities would occur as a result of thermal treatment under Action Alternative 2 (up to approximately 14 fatalities) and No Action Alternative 1 (up to approximately 13 fatalities), and the smallest under No Action Alternative 2 (approximately 1 fatality), under which only newly generated waste would be treated. Thermal treatment may result in air quality exceedances for radionuclides, offsite treatment impacts (including fatalities), and, for thermal treatment at WIPP (Action Alternative 2C), potentially disproportionately high and adverse impacts to minority and low income populations near WIPP.

Some potential near-term fatalities also could occur from storage operations under all of the alternatives; a larger number of fatalities could occur as a result of a natural disaster, such as an earthquake with a small annual probability of occurring damaging an aboveground TRU waste storage facility. For the No Action Alternatives, however, the associated risks would continue for the indefinite future. Long-term storage risks would also occur for the Additional Inventory that would not be disposed of under the Proposed Action and for PCB commingled TRU waste that would not be disposed of under Action Alternatives 1 and 3.

Transportation for treatment and for disposal are estimated to cause more fatalities (mainly involving the general public) than other near-term waste management operations. The largest number of fatalities are estimated to occur under the three Action Alternatives, in which the most waste would be sent to WIPP. The analysis shows, however, that regular commercial rail service would have lower potential fatalities than transportation by either dedicated rail service or by truck. The consequences of low probability accidents would be similar for all transportation options. In contrast, the No Action Alternatives would pose little to no transportation risk, depending on the alternative, but would not dispose of the waste.

Thus, SEIS–II analyses show that, in the near term, No Action Alternative 2 would be environmentally preferable. For the long term, however, disposal of as much of DOE's TRU waste as possible at WIPP is environmentally preferable to indefinite storage, because disposal isolates the waste and avoids the long-term need to protect the public and workers from exposure to stored waste, a protection than cannot be assured over the long periods of time that TRU waste poses a health hazard to the public. The long-term impacts of indefinite storage of TRU waste under No Action Alternative 2 and, to a lesser extent, No Action Alternative 1, would result primarily from future exposures to stored waste should DOE lose institutional control of the storage facilities in the future. Over the long term, there would also be an increasing probability of adverse impacts from a natural disaster. Such impacts could be exacerbated by future population growth near DOE sites. SEIS–II analyses show that there is virtually no benefit to long-term repository performance from thermal or shred and grout treatment of waste as compared to treatment to meet the planning basis WIPP WAC.

Considering both near-term and long-term impacts, therefore, Action Alternative 1 is the environmentally preferable alternative, with transportation of waste by regular commercial rail service to the maximum extent possible to lessen near-term impacts. Action Alternative 1 would dispose of defense, non-defense, and commercial TRU waste (with the exception of PCB commingled TRU waste) and TRU waste that was buried prior to 1970, after treatment as necessary to meet the planning basis WIPP WAC. This alternative would dispose of a greater amount of TRU waste than the Proposed Action.

Comments on SEIS–II and Agency Responses

SEIS–II was initiated by a notice of intent published in the **Federal Register** on August 18, 1995. A draft SEIS–II was issued in November 1996, and public hearings were held in January 1997. Approximately 4,000 comments were received from individuals, organizations, states, tribes, and Federal agencies during the 90-day comment period. Many of the comments received on the draft SEIS–II expressed strong opinions in favor of or against disposal at WIPP, or suggested revisions to SEIS–II. The final SEIS–II, issued in September 1997, incorporated many changes in response to public comments and internal review, including updating of waste volumes, TRU waste locations, and the long-term performance assessment.

The Department received four letters on the final SEIS–II. The Environmental Protection Agency (EPA) Region 6 letter stated that the agency had completed its review and had no further comments on the final SEIS–II. The State of Tennessee's Department of Environment and Conservation, the State of Idaho Oversight Program, and the Southwest Research and Information Center submitted comments which the Department has considered.

In its comments, the DOE Oversight Division of the Tennessee Department of Environment and Conservation requested clarification of responses provided in SEIS–II regarding: (1) Consolidation of TRU waste at sites prior to being shipped to WIPP, (2) management of "special case" waste, (3) management of the excess inventory of RH–TRU waste if WIPP's capacity is reached, and (4) plans and schedules for transporting TRU waste to WIPP. In addition, the State asked DOE to provide assurance in the Record of Decision that RH–TRU waste will be removed from DOE's Oak Ridge site in accordance with the Oak Ridge Reservation Site Treatment Plan.

Decisions regarding consolidation of TRU waste for preparation and storage pending disposal will be made in the Record of Decision for the WM PEIS. With regard to what the commenter referred to as "special case" waste, such waste that is classified as post-1970 defense TRU waste is included in the SEIS–II analysis as CH–TRU waste as part of the Basic Inventory, and under this Record of Decision upon preparation to meet the planning basis WIPP WAC would be disposed of at WIPP. Materials cited by the commenter that are not classified as TRU waste could not be disposed of at WIPP and are beyond the scope of SEIS–II and this Record of Decision. Regarding the comment about the excess inventory of RH–TRU waste, DOE expects that there will be sufficient capacity at WIPP to

VOL 63 ISS 15 JAN 23 1998 UMI

dispose of all RH–TRU waste currently in storage and to be generated over approximately the next 35 years, based on the most recent estimates contained in the TRU Waste Management Plan. DOE's proposed plans and schedule for transporting waste from particular sites to WIPP are contained in the TRU Waste Management Plan. Finally, as stated in SEIS–II, DOE intends to meet its obligations with regard to the disposition of TRU waste as set forth in the agreements (including Site Treatment Plans) that it has reached with states and in related court orders.

The State of Idaho Oversight Program requested that the ROD be consistent with the agreements made with the State with regard to transuranic waste that will be disposed of at WIPP. As noted above, the Department intends to fulfill its obligations with regard to the disposition of TRU waste as set forth in its agreements with states and in related court orders.

In its comments on the final SEIS–II, the Southwest Research and Information Center stated that disposal of TRU waste in a high-level waste repository is a reasonable alternative that was not examined in SEIS–II or the WM PEIS. This commenter also stated that, because all of the estimated TRU waste inventory would not be disposed of at WIPP, DOE will be required to consider additional disposal sites, and that such other sites were not considered in SEIS–II or the WM PEIS. Further, the commenter stated that DOE should prepare a comprehensive NEPA analysis of storage and disposal options for all of DOE's nuclear waste, including all TRU waste, before issuing a Record of Decision on TRU waste disposal at WIPP. Finally, the commenter asked for clarification of DOE's position regarding the opening of WIPP without a RCRA permit from the New Mexico Environment Department.

The Department has examined all reasonable TRU waste disposal alternatives in SEIS–II and the preceding environmental impact statements, including disposal in a high-level waste repository and disposal at sites other than WIPP. DOE decided in 1981 to develop WIPP for the disposal of TRU waste, and SEIS–II confirms that WIPP is an effective disposal facility for TRU waste. The most recent waste volume estimates contained in the TRU Waste Management Plan indicate that DOE would be able to dispose of all of the TRU waste currently in storage, and waste to be generated by DOE over approximately the next 35 years. In SEIS–II, DOE analyzes the disposal at WIPP of all defense, non-defense, and commercial TRU waste and TRU waste that was buried prior to 1970. The WM PEIS comprehensively analyzes the management of all of DOE's radioactive and hazardous waste types. With regard to the RCRA permit issue, DOE has applied for a RCRA permit from the New Mexico Environment Department for mixed TRU waste. Such a permit is not needed for disposal of other TRU waste at WIPP.

Decision

The Department will dispose of up to 175,600 cubic meters (6.2 million cubic feet) of defense TRU waste (except PCB commingled TRU waste) at WIPP. Transportation of waste to WIPP will initially be by truck, although the Department reserves the option to use commercial rail transportation in the future. DOE will prepare (including treatment, as necessary, and packaging) the wastes to be disposed of to meet the WIPP WAC (WIPP WAC Revision 5, including any future revisions as analyzed in SEIS–II, such as pipe overpacks used in waste packaging). This decision establishes only the minimum waste acceptance requirements that must be met for disposal of waste at WIPP. DOE has treated in the past (and based on site-specific circumstances, may decide to treat in the future) TRU waste at some sites more extensively than is required under the WIPP WAC. WIPP may accept for disposal grouted TRU waste, thermally treated TRU waste, or TRU waste treated by any other process that meets the WIPP WAC.

Under this decision, the wastes to be disposed of include both CH and RH defense TRU waste (except PCB commingled TRU waste) placed in retrievable storage after 1970, and TRU waste generated for approximately the next 35 years by plutonium stabilization and management activities, environmental restoration (including defense TRU waste from future remediation of sites where TRU waste was buried before 1970), decontamination and decommissioning, waste management, and defense testing and research. The amount of TRU waste that will be disposed of at WIPP will not exceed limits established by the WIPP Land Withdrawal Act and the C&C Agreement. Impacts of disposal at WIPP of this volume of defense TRU waste are analyzed in the SEIS–II under the Proposed Action (Preferred Alternative).

TRU waste will be transported to WIPP in containers certified by the Nuclear Regulatory Commission, as required by the WIPP Land Withdrawal Act. DOE will initially use trucks to transport waste. However, DOE reserves the option to use commercial rail service for TRU waste transportation in the future, because SEIS–II analyses show that, under normal operations, regular rail transportation would cause fewer fatalities and would cost less than truck transportation (although consequences of a low probability accident would be similar for all transportation options). In contrast, SEIS-II analyses show that dedicated rail shipments would cause the largest number of fatalities and would be the most costly transportation mode.

Basis for Decision

The decision described above minimizes, to the extent possible under current statutory restrictions contained in the WIPP Land Withdrawal Act, the impacts and costs of continued TRU waste management activities at DOE sites. Disposal of TRU waste at WIPP would effectively isolate the waste from human contact for more than 10,000 years if the repository remains undisturbed, and, under the Preferred Alternative, is not expected to adversely impact human health even if the repository were to be breached by drilling. For example, based on analyses in the WIPP SEIS–II, the probability that a member of a drilling crew that breached the repository would die of cancer from exposure to the waste is 4 in 10,000. If an intrusion occurred, radionuclides and heavy metals could reach the Culebra Dolomite (the principal water-bearing unit overlying WIPP). However, impacts would be negligible.

The Department has taken into consideration irreversible and irretrievable commitments of resources, impacts from retrieval of waste from the repository, and cumulative impacts in making this decision. There would be irreversible and irretrievable commitment of resources associated with the use of the WIPP site resulting from residual salt that remains after remediation of the salt storage pile. Although DOE has no plans to retrieve waste from WIPP, if the waste were retrieved prior to repository closure, the impacts would be the same as from emplacing the waste. If the waste were required to be recovered after repository closure, there could be several worker fatalities from recovering waste and any contaminated salt. The impacts from transporting waste back to the treatment sites would be higher than from transporting it to WIPP because of the additional volume of contaminated salt. In considering cumulative impacts, DOE recognizes that for all alternatives involving transportation of TRU waste, there would be cumulative impacts from past, present and reasonable foreseeable future activities involving transportation of other waste types (hazardous, low-level, low-level mixed, and high level waste). There would also be cumulative impacts at some of the treatment sites as a result of past, present, and reasonably foreseeable future activities.

DOE did not select the No Action Alternatives because they would not isolate TRU waste from humans and the environment, and could cause public harm if long-term institutional control were to be lost. (Although no deaths would be expected based on current population densities and distributions under No Action Alternative 1, intruders could receive doses that greatly exceed current regulatory limits; up to 800 deaths could occur over 10,000 years under No Action Alternative 2). Maintaining such controls indefinitely would require future generations to incur risks and costs that can be avoided by disposing of the waste in WIPP now. In addition, the No Action Alternatives could not be implemented without modification of agreements that DOE has reached with several states regarding the offsite disposition of TRU waste.

DOE did not select the Action Alternatives because disposal of the volumes and waste types involved in these alternatives would require modification of the WIPP Land Withdrawal Act and the C&C Agreement. DOE did not select either thermal or shred and grout treatment because the SEIS–II analyses show that these treatments do not materially improve the repository's performance, and also have greater costs and near-term impacts across the DOE complex.

This decision is consistent with the intent of Congress, as expressed in the WIPP Land Withdrawal Act, that DOE commence disposal operations at WIPP once all applicable health and safety standards and laws have been met. The decision will enable the Department to comply with the agreements that DOE has entered into with several states, particularly those agreements that set a schedule for removal of TRU waste from DOE sites.

Implementation of the decision to dispose of TRU waste at WIPP is contingent on obtaining a Compliance Certification from EPA. EPA recently proposed to certify compliance, subject to certain conditions (62 FR 58792, October 30, 1997). DOE has applied for a RCRA permit from the New Mexico Environment Department for disposal of mixed TRU waste; such a permit is not needed for disposal of other TRU waste at WIPP.

Mitigation Measures

DOE has a Mitigation Action Plan in effect for WIPP to reduce possible adverse environmental effects. DOE will continue to implement those actions and provide information on their status in its annual mitigation action reports.

DOE will comply with applicable Department of Transportation and Nuclear Regulatory Commission regulations governing the shipment of TRU waste. As described in SEIS–II, DOE will transport TRU waste to WIPP in such a manner as to alleviate, to the maximum extent possible, potential impacts from transportation of TRU waste over the highways. These measures include tracking shipments with the TRANSCOM satellite tracking system and maintaining constant communication with the driver to provide notice of adverse weather or road conditions along the route. Equipment will be inspected at the beginning of each shipment and periodically every 100 miles or every two hours while on route. If shipments are delayed on route, drivers will park at designated DOE or Department of Defense sites, or State designated parking areas if possible. If no such sites are available, drivers will park in areas away from population concentrations and notify the State Police of the shipment's location.

In addition to maintaining its own emergency response capabilities, DOE offers emergency response training to police, fire, and medical personnel located along the WIPP transportation routes. In the event of an accident involving a WIPP shipment, the driver would notify emergency responders by cellular phone and also the WIPP Central Monitoring Room using the TRANSCOM system. A DOE official would be dispatched to assist at the accident site. DOE resources would be available to support mitigation of the accident, including but not limited to package recovery and site cleanup.

The United States Department of the Interior suggested in comments on the draft SEIS–II that DOE should develop a spill contingency plan to address the potential impacts of a diesel fuel spill on fish and wildlife and their habitats. DOE already has plans in place to address the potential impacts of a truck accident; these plans address potential releases of TRU waste and other materials. Remediation efforts may include excavation and disposal of contaminated environmental media as appropriate.

A copy of SEIS–II and this Record of Decision are available from the Center for Environmental Management Information, telephone: 1–800–7EM–DATA (1–800–736–3282) (in Washington, D.C., call 202–863–5084).

Issued in Washington, D.C., this 16th day of January, 1998.

Elizabeth A. Moler,

Deputy Secretary of Energy.

BILLING CODE 6450–01–P

DEPARTMENT OF ENERGY

Record of Decision for the Department of Energy's Waste Management Program: Treatment and Storage of Transuranic Waste

AGENCY: Department of Energy.

ACTION: Record of decision.

SUMMARY: The Department of Energy (DOE) is issuing this Record of Decision on where, i.e., at which DOE sites, the Department will prepare and store its transuranic (TRU) waste prior to disposal. Each of the Department's sites that currently has or will generate TRU waste will prepare and store its TRU waste on site, except that the Sandia National Laboratory in New Mexico (SNL–NM) will transfer its TRU waste to the Los Alamos National Laboratory (LANL) in New Mexico. LANL will have facilities, not available or anticipated at SNL–NM, to prepare and store this waste prior to disposal.

DOE made this decision based on analyses in the Department of Energy Final Programmatic Waste Management Environmental Impact Statement (WM PEIS) (May 1997) and other information. This decision differs slightly from the Preferred Alternative in the WM PEIS. The Appendix to this Record of Decision lists the sites for which DOE analyzed the potential impacts of treating (which includes packaging) and storing TRU waste in the WM PEIS. The potential health and environmental impacts of this decision were identified and evaluated in the Decentralized Alternative of the WM PEIS.

In the future, the Department may decide to ship TRU wastes from sites where it may be impractical to prepare them for disposal to sites where DOE has or will have the necessary capability. The sites that could receive such shipments of TRU waste are the Idaho National Engineering and Environmental Laboratory (INEEL), the Oak Ridge Reservation (ORR), the Savannah River Site (SRS) and the Hanford Site. However, any future decisions regarding transfers of TRU wastes would be subject to appropriate review under the National Environmental Policy Act (NEPA), and

VOL 63 ISS 15 JA 23 1998 UMI

to agreements DOE has entered into, such as those with States, relating to the treatment and storage of TRU waste. Future NEPA review could include, but would not necessarily be limited to, analysis of the need to supplement existing environmental reviews. DOE would conduct all such TRU waste shipments between sites in accordance with applicable transportation requirements and would coordinate these shipments with appropriate State, Tribal and local authorities.

This Record of Decision was prepared in coordination with the Record of Decision issued on January 16, 1998, on disposal of DOE's TRU waste, which is based on the Waste Isolation Pilot Plant Disposal Phase Final Supplemental Environmental Impact Statement (WIPP SEIS–II), issued in September 1997. On the basis of the analyses in the WIPP SEIS–II, DOE decided to dispose of TRU waste generated by defense activities at the WIPP near Carlsbad, New Mexico, after preparation (i.e., treatment, as necessary, and packaging) to meet WIPP's waste acceptance criteria.

FOR FURTHER INFORMATION CONTACT: Copies of the WM PEIS and this Record of Decision are available in DOE public reading rooms and selected libraries located across the United States. A list of the public reading rooms at which the WM PEIS and this Record of Decision are available can also be accessed on the DOE Office of Environmental Management's World Wide Web site at http://www.em.doe.gov/em30/. To request copies of the WM PEIS, this Record of Decision, or a list of the reading rooms and public libraries, please write or call: The Center for Environmental Management Information, P.O. Box 23769, Washington, DC 20026–3769, Telephone: 1–800–736–3282 (in Washington, DC: 202–863–5084).

For further information on DOE's national Waste Management Program, the WM PEIS, or this Record of Decision, please write or call: Ms. Patrice Bubar, Director, Office of Planning and Analysis (EM–35), United States Department of Energy, Office of Environmental Management, 19901 Germantown Road, Germantown, MD 20874, Telephone: (301) 903–7204.

For general information on the U.S. Department of Energy National Environmental Policy Act process, please write or call: Ms. Carol M. Borgstrom, Director, Office of NEPA Policy and Assistance (EH–42), United States Department of Energy, Office of Environment, Safety, and Health, 1000 Independence Avenue, SW., Washington, DC 20585–0119, Telephone: (202) 586–4600, or leave a message at (800) 472–2756.

SUPPLEMENTARY INFORMATION:

Background

DOE prepared this Record of Decision pursuant to the Council on Environmental Quality's regulations for implementing NEPA (40 CFR parts 1500–1580) and DOE's NEPA Implementing Procedures (10 CFR part 1021). This Record of Decision is based on analyses contained in the Department of Energy's Final Waste Management Programmatic Environmental Impact Statement (DOE/EIS–0200–F). DOE published a notice of its intent to prepare the WM PEIS in the **Federal Register** on October 25, 1990. DOE issued a Draft WM PEIS on September 22, 1995, and hearings were held during the public comment period, which closed on February 19, 1996. All public comments were addressed in the Final WM PEIS, which DOE issued on May 30, 1997.

Purpose and Need for Agency Action

DOE needs facilities to manage its radioactive and hazardous wastes in order to maintain safe, efficient, and cost-effective control of these wastes; to comply with applicable Federal and state laws; and to protect public health, safety and the environment. The WM PEIS is a Department-wide study of the environmental impacts of managing five types of waste generated by defense and research activities at a variety of DOE sites around the United States. The five waste types are: low-level mixed waste, low-level waste, TRU waste, high-level waste, and hazardous waste. The WM PEIS examines, in an integrated fashion, the potential impacts of managing these waste types and the cumulative impacts of waste management, transportation and other ongoing and reasonably foreseeable activities.

The WM PEIS provides information on the potential impacts of alternatives for nationwide waste management that DOE will use to decide, on a programmatic basis, where, i.e., at which DOE sites, to locate particular waste management facilities. However, DOE will not decide the specific location of new facilities at sites selected to manage a particular type of waste, or a facility's capacity and design, until DOE completes appropriate site-wide or project-specific NEPA reviews, such as an environmental assessment or environmental impact statement. These subsequent analyses would rely, to the extent appropriate, on the analyses in the WM PEIS.

This Record of Decision applies only to the treatment (including packaging) and storage of TRU waste as analyzed in the WM PEIS. Records of Decision for the four other waste types analyzed in the WM PEIS will be issued in due course. An Appendix to this Record of Decision identifies the major sites evaluated in the WM PEIS as potential locations for waste management operations, and the sites analyzed that have TRU waste.

TRU Waste Treatment and Storage

TRU waste is waste containing more than 100 nanocuries of alpha-emitting transuranic isotopes per gram of waste, with half-lives greater than 20 years (a few exceptions to this definition are identified in the WM PEIS). Over 99% of the total volume of existing and anticipated TRU waste is located at the DOE sites listed in the Appendix. TRU waste is categorized as either contact-handled (CH) or remote-handled (RH), based on the radiation level at the surface of the waste container. CH–TRU waste constitutes more than 85% of the total existing and anticipated volume of TRU waste considered in the WM PEIS. CH containers can be safely handled by direct contact, with appropriate health and safety measures. RH–TRU waste contains a greater proportion of radionuclides that produce highly penetrating radiation, and thus RH containers require special handling and shielding during waste management operations.

Alternatives Considered

In the WM PEIS, the term "alternative" refers to a nationwide configuration of sites for treating, storing, or disposing of a waste type. The alternatives analyzed for each waste type fall within the four broad categories described below.

No Action Alternatives

These alternatives involve the use of currently existing or planned waste management facilities at DOE sites. In the NEPA process, a no action alternative or "status quo" alternative may not comply with applicable laws and regulations; however, analysis of such an alternative is required and provides an environmental baseline against which the impacts of other alternatives can be compared.

Decentralized Alternatives

These alternatives involve managing waste where it is or will be generated. Unlike the no action alternatives, the decentralized alternatives may require the siting, construction, and operation of new facilities or the modification of existing facilities. Under the decentralized alternatives, waste management facilities would be located at a larger number of sites than under regionalized or centralized alternatives.

Regionalized Alternatives

These alternatives involve consolidating waste management activities by transporting wastes to a limited number of sites (fewer than the number of sites considered for the decentralized alternatives but greater than the number of sites considered for the centralized alternatives). In general, sites with the largest volumes of a particular waste type were evaluated as potential regional sites for consolidating waste management activities.

Centralized Alternatives

These alternatives involve consolidating management of wastes at fewer locations than the regionalized alternatives (typically one to three locations). As was the case for the regionalized alternatives, generally those sites with the largest volumes of a particular waste type were evaluated as potential sites for centralized waste management.

There are many possible combinations of the number and locations of DOE sites for waste management facilities. To limit these combinations to a reasonable number for meaningful analysis, DOE selected alternatives that cover the full spectrum of reasonable alternatives under each category for each waste type. Table 1 summarizes the alternatives for TRU waste treatment storage that are analyzed in the WM PEIS, and the preferred alternative that DOE developed based on the analysis and other relevant criteria identified in the WM PEIS.

TABLE 1.—SUMMARY OF TRU WASTE ALTERNATIVES ANALYZED IN THE WM PEIS

Alternative Category	Description
No Action	Eleven sites* that anticipate generating TRU waste in the future would prepare TRU waste to meet planning-basis WIPP waste acceptance criteria**; existing TRU waste at 16 sites would be stored indefinitely; assumes TRU waste would not be transported among sites.
Decentralized	Either fixed or mobile characterization facilities would be operated at sites that would need to retrieve existing TRU waste, treat, repackage, and ship the waste. TRU waste would be shipped from the 6 sites with the smallest amounts to the nearest site of the 10 sites (ANL–E, NTS, Hanford, INEEL, LANL, LLNL, Mound, ORR, RFETS, SRS) with the largest amounts of TRU waste for storage prior to disposal; assumes for purposes of analysis that the waste would be prepared to meet waste acceptance criteria for WIPP and that disposal would occur at WIPP.
Regionalized (3 Subalternatives)	Three subalternatives differ in the level of treatment assumed for the purpose of impact analysis and the number of sites at which treatment would occur; RH–TRU waste would be treated and stored at Hanford and ORR; CH–TRU waste would be treated and stored at all sites considered in each alternative except ORR; all three subalternatives assume for purposes of analysis that disposal would occur at WIPP. Subalternatives: 1. TRU waste would be shipped from the 10 sites with the smallest amounts to the 6 sites with the largest amounts (together having 95% of current and anticipated TRU inventories) for treatment to reduce gas generation and storage prior to disposal. 2. TRU waste would be shipped as described for Regionalized Alternative 1; the waste would be treated to meet Land Disposal Restrictions (LDRs). 3. TRU waste would be consolidated at the 4 sites with approximately 80% of the current and anticipated inventories; treatment to meet LDRs would occur at these 4 sites.
Centralized	All CH–TRU waste would be treated at WIPP to meet LDRs; all RH–TRU waste would be treated at Hanford or ORR to meet LDRs and stored there until disposal; assumes for purposes of analysis that disposal would occur at WIPP.
Preferred	Combination of the Decentralized Alternative, under which most TRU waste would be treated and stored where it is located, and parts of the Regionalized Alternative, under which some TRU waste could be shipped to INEEL, LANL, ORR, and SRS for treatment and storage, pending disposal, with the level of treatment and whether to dispose of TRU wastes at WIPP to be decided on the basis of analyses in the WIPP SEIS–II.

* The Appendix to this Record of Decision lists the sites' names and their abbreviations.
** WIPP waste acceptance criteria Revision 5 as defined in the WIPP SEIS–II.

Environmentally Preferable Alternative

The WM PEIS analyzed a number of potential impacts, including those on human health, air and water resources, ecological resources, land use, and site infrastructures for each of the major sites at which waste management facilities might be located. Differences in impacts among all of the action alternatives were small. Nonetheless, all potential impacts identified in the WM PEIS were considered in DOE's selection of the preferred alternative, its identification of the environmentally preferable alternative, and its decision regarding treatment and storage of TRU waste.

For the 20-year period of waste management operations analyzed in the WM PEIS, the potential impacts under the No Action alternative for TRU waste management are smaller than those identified under the action alternatives, and on this basis, the No Action alternative could be considered to be the environmentally preferable alternative. However, the No Action alternative assumes indefinite storage, and therefore does not include preparing and shipping the waste for disposal, i.e., permanent isolation from the human environment. Although the No Action alternative could pose less risk to workers and communities surrounding DOE's sites for the first 20 years, the longer-term risks are likely to exceed those for the first 20 years, not only as a result of continuing routine storage operations, but also as a result of degradation of storage facilities and containers.

Taking these circumstances into account, the Department considers the environmentally preferable alternative to be the Decentralized Alternative under which DOE will prepare the TRU waste for disposal with minimal transportation. Transportation of TRU waste would occur only in situations where the sites at which the waste is

VOL 63 ISS 15 JA 23 1998 UMI

located lack the capability to prepare it for disposal.

Decision: DOE National Programmatic Configuration for Treatment and Storage of TRU Waste Prior to Disposal

The Department will develop and operate mobile and fixed facilities to characterize and prepare TRU waste for disposal at WIPP. Each of the DOE's sites that has, or will generate, TRU waste will, as needed, prepare and store its TRU waste on site, except that the SNL–NM will transfer its TRU waste to LANL in New Mexico. LANL will have facilities, not available or anticipated at SNL–NM, to prepare and store this waste prior to disposal.

Basis for the Decision

Although the No Action Alternative resulted in the lowest impacts among the alternatives analyzed in the WM PEIS over the next 20 years, DOE did not select this alternative because it does not meet the Department's needs for the continued, safe management of TRU waste. Under the No Action Alternative, health and environmental impacts would continue to occur beyond the 20-year period of analysis in the WM PEIS. In the WIPP SEIS–II Record of Decision (discussed further below), DOE decided to dispose of TRU waste at WIPP, after treatment to meet the planning basis waste acceptance criteria. The No Action alternative evaluates treatment to meet the WIPP waste acceptance criteria only for TRU waste to be generated in the future; i.e., existing retrievably stored TRU waste would not be prepared to meet WIPP waste acceptance criteria. Eventually, the stored waste as well as the newly generated and treated waste would have to be repackaged to maintain safe storage conditions.

Among the action alternatives, health and environmental impacts are generally similar over the 20-year period of analysis. DOE's decision seeks to limit environmental impacts and costs, while providing for the safe management of DOE's TRU waste. Among the action alternatives, the life cycle costs estimated in the WM PEIS are lowest for the Decentralized Alternative.

The level of treatment analyzed under the Decentralized Alternative in the WM PEIS corresponds to the level of treatment selected in the Record of Decision for the WIPP SEIS–II for preparing the TRU waste for disposal. Thus the potential health and environmental impacts of treating TRU waste in accordance with the WIPP waste acceptance criteria are identified and evaluated in the analysis of the Decentralized Alternative, which also identifies the potential impacts of treating and storing waste from SNL–NM at LANL.

Future Decisions

The Department may, in the future, decide to transfer TRU wastes from sites where it may be impractical to prepare them for disposal to sites where DOE has or will have the necessary capability. The sites that could receive such shipments of TRU waste are INEEL, ORR, SRS and Hanford. However, any future decisions regarding transfers of TRU waste would be subject to appropriate NEPA review, and to agreements, such as those between DOE and States, relating to the treatment and storage of TRU waste. Future NEPA review could include, but would not necessarily be limited to, analysis of the need to supplement existing environmental reviews.

DOE would conduct all such TRU waste shipments between sites in accordance with applicable transportation requirements and would coordinate these shipments with appropriate State, Tribal and local authorities.

As provided by 10 CFR § 1021.315, the DOE may revise this Record of Decision in the future as long as the revised decision is adequately supported by existing environmental impact statements. Revision of this Record of Decision could occur, for example, as new technology or information from ongoing studies becomes available, or as DOE identifies situations in which it would be appropriate to transfer TRU waste to INEEL, ORR, SRS or Hanford. Implementation of the Record of Decision is subject to compliance with all applicable Federal, State, and local requirements.

Differences From the Preferred Alternative in the WM PEIS

This decision differs from the preferred alternative identified in the WM PEIS in three respects. First, the preferred alternative in the WM PEIS included treatment and storage of ORR's RH–TRU waste on site, and treatment and storage of ORR's CH–TRU waste at SRS. Since publication of the WM PEIS, the Department has been considering treatment, as needed, of both ORR's CH–TRU and RH–TRU waste at ORR, because the radiation levels of ORR's CH–TRU waste are close to the levels of ORR's RH–TRU waste, and because the two waste forms share other physical characteristics. By including treatment of ORR's CH–TRU waste with its RH–TRU waste, DOE would reduce the need to transport CH–TRU waste and achieve economies of scale. The proposed action for a TRU waste facility at ORR that could treat, as needed, both its CH–TRU and RH–TRU wastes is subject to appropriate site-specific review under NEPA.

The second difference between this decision and the preferred alternative in the WM PEIS concerns RH–TRU waste at SRS. The preferred alternative called for transferring this waste to ORR for treatment and storage. The Department has now decided that it should defer any determination whether to transfer RH–TRU waste from SRS to ORR until DOE has the results of the NEPA review for the proposed ORR facility and additional information regarding its capability to meet transportation requirements for shipping the RH–TRU waste to ORR.

The third difference between this decision and the preferred alternative in the WM PEIS concerns the transfer of a portion of the TRU waste at the Rocky Flats Environmental Technology Site (RFETS) to INEEL. Since publication of the WM PEIS, additional information about the characteristics of the TRU waste at RFETS has become available indicating that existing or anticipated facilities at RFETS may be able to prepare this waste for disposal. If, in the future, RFETS needs to use another site's capability to prepare some of its TRU waste for disposal, DOE will complete any further review under NEPA that may be necessary, and will notify the appropriate State, Tribal and local authorities prior to making a final decision.

Coordinated Decision on Level of Treatment and Disposal of TRU Waste

This Record of Decision has been prepared in coordination with the WIPP SEIS–II Record of Decision (January 16, 1998), which specifies the level of treatment for, and the disposal location of, TRU waste generated by defense activities. The decisions on the level of treatment of TRU waste and where to dispose of it are based on analyses in the WIPP SEIS–II. In the WIPP SEIS–II Record of Decision, DOE has decided that TRU waste destined for disposal at WIPP will be treated to meet the planning basis waste acceptance criteria (Revision 5 of the waste acceptance criteria as defined in the WIPP SEIS–II), which establish the minimum requirements for preparing TRU waste for disposal at WIPP. DOE has treated in the past and based on site-specific circumstances, may decide in the future to treat TRU waste at some sites more extensively than is required under the WIPP waste acceptance criteria.

Mitigation

Chapter 12 of the WM PEIS describes measures that DOE takes in order to minimize the impacts of its waste management activities. Mitigation measures are an integral part of the Department's operations, so as to avoid, reduce, or eliminate potentially adverse environmental impacts. Some of the more important mitigation measures that DOE will continue during the treatment and storage of TRU waste are:

- Use of pollution prevention plans;
- Assistance to States, Tribes, local governments, and other public entities concerning human health, environmental, and economic impacts, including transportation planning and emergency response assistance;
- Use of "cleaner" waste treatment and storage technologies as they become available;
- Rigorous quality assurance programs for the characterization of TRU waste;
- Reuse of existing facilities wherever feasible rather than construction of new facilities;
- Occupational safety and health training to ensure that workers understand operational safety procedures.

Site-specific, non-routine mitigation measures may also be identified and implemented in the course of further decision making under site-specific NEPA reviews based on the WM PEIS.

Issued in Washington, D.C. this 20th day of January, 1998.

James M. Owendoff,

Acting Principal Deputy Assistant Secretary for Environmental Management.

APPENDIX—SITES EVALUATED IN THE WM PEIS AND SITES WITH TRU WASTE

Abbreviation	Full name	State	Major site [1]	TRU waste
ANL–E	Argonne National Laboratory—East	IL	Yes	Yes.
BNL	Brookhaven National Laboratory	NY	Yes	No.
ETEC	Energy Technology Engineering Center	CA	No	Yes.
FEMP	Fernald Environmental Management Project	OH	Yes	No.
Hanford	Hanford Site	WA	Yes	Yes.
INEEL	Idaho National Engineering and Environmental Laboratory	ID	Yes	Yes.
LBL	Lawrence Berkeley Laboratory	CA	No	Yes.
LLNL	Lawrence Livermore National Laboratory	CA	Yes	Yes.
LANL	Los Alamos National Laboratory	NM	Yes	Yes.
Mound	Mound Plant	OH	No	Yes.
NTS	Nevada Test Site	NV	Yes	Yes.
ORR	Oak Ridge Reservation	TN	Yes	Yes.
PGDP	Paducah Gaseous Diffusion Plant	KY	Yes	Yes.
Pantex	Pantex Plant	TX	Yes	No.
PORTS	Portsmouth Gaseous Diffusion Plant	OH	Yes	No.
RFETS	Rocky Flats Environmental Technology Site	CO	Yes	Yes.
SNL/NM	Sandia National Laboratories–New Mexico	NM	Yes	Yes.
SRS	Savannah River Site	SC	Yes	Yes.
UofMO	University of Missouri	MO	No	Yes.
WIPP	Waste Isolation Pilot Plant	NM	Yes	No.
WVDP	West Valley Demonstration Project	NY	Yes	Yes.

(1) Sites analyzed in the WM PEIS as potential locations for waste management facilities for one or more types of waste.

Public Laws

105th Congress, 2nd Session, 1998

Pamphlet prints of public laws, often referred to as slip laws, are the initial publication of Federal laws upon enactment and are printed as soon as possible after approval by the President. Legislative history references appear on each law. Subscription service includes all public laws, issued irregularly upon enactment, for the 105th Congress, 2nd Session, 1998.

Individual laws also may be purchased from the Superintendent of Documents, U.S. Government Printing Office. Prices vary. See Reader Aids Section of the Federal Register for announcements of newly enacted laws or access the online database at http://www.access.gpo.gov/nara/index.html

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

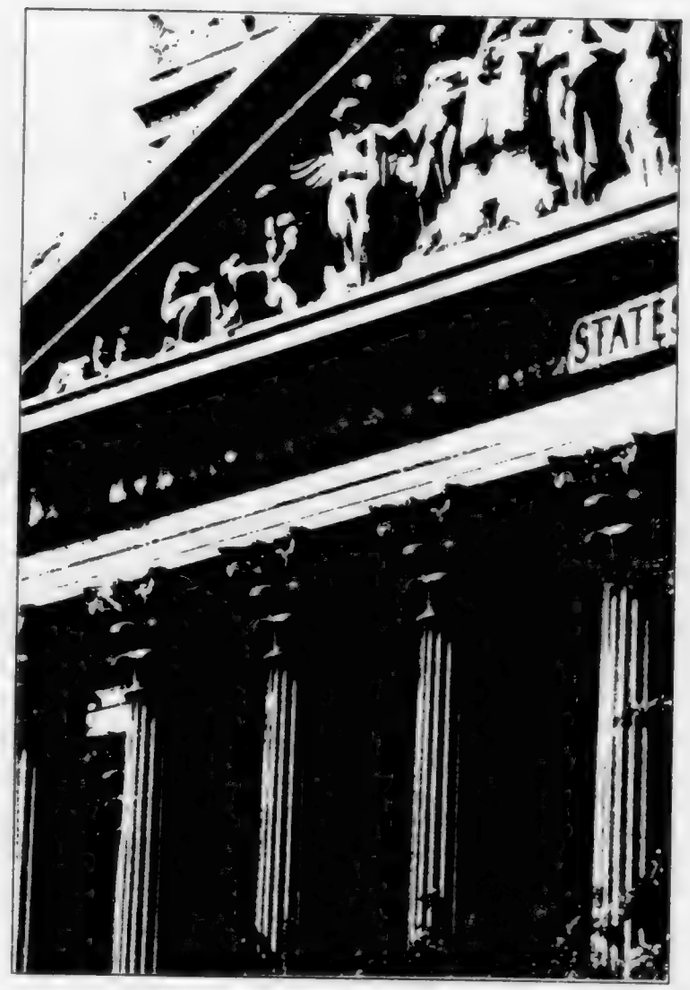
Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.



LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$27 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The Federal Register is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling toll free 1–888–293–6498 or (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.

WHO: Sponsored by the Office of the Federal Register.

WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.

WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

WASHINGTON, DC

WHEN: February 17, 1998 at 9:00 am.
WHERE: Office of the Federal Register
Conference Room

Rules and Regulations

Federal Register
Vol. 63, No. 16
Monday, January 26, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Rural Utilities Service

7 CFR Part 1703

Distance Learning and Telemedicine Loan and Grant Program; Correction

AGENCY: Rural Utilities Service, USDA.

ACTION: Correcting amendments.

SUMMARY: This document contains corrections to the final regulations which were published Friday, June 13, 1997 (62 FR 32434). The regulations related to RUS' policy and requirements for submitting an application for financial assistance, and the method of selecting projects to receive loans and grants and allocating the available funds for the Distance Learning and Telemedicine Loan and Grant Program.

EFFECTIVE DATE: January 26, 1998.

FOR FURTHER INFORMATION CONTACT: Ken B. Chandler, Acting Assistant Administrator-Telecommunications Program, Rural Utilities Service, STOP 1590, Room 4056, South Building, 1400 Independence Avenue, SW., Washington, DC 20250–1590. Telephone (202) 720–9554, Facsimile (202) 720–0810.

SUPPLEMENTARY INFORMATION:

Background

The final regulations that are the subject of these corrections affect persons applying for loans or grants under 7 CFR Part 1703, Subpart D.

Need for correction

As published, the final regulations contain errors which may prove to be misleading and are in need of clarification.

List of Subjects in 7 CFR Part 1703

Community development, Grant programs—education, Grant programs—health care, Grant programs—housing and community development, Loan programs—education, Loan programs—health care, Loan programs—housing and community development, Reporting and recordkeeping requirements, Rural areas.

Accordingly, 7 CFR part 1703, subpart D, is corrected by making the following correcting amendments:

PART 1703—RURAL DEVELOPMENT

1. The authority citation for Part 1703 continues to read as follows:

Authority: 7 U.S.C. 901 *et seq.* and 950aaa *et seq.*; Pub. L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

2. In § 1703.102, the definition of *Comprehensive rural telecommunications plan* is removed and the definition for *Telecommunications Systems Plan* is added in alphabetical order to read as follows:

§ 1703.102 Definitions.

* * * * *

Telecommunications Systems Plan means the plan submitted by an applicant in accordance with § 1703.109(f).

* * * * *

§ 1703.103 [Amended]

3. In § 1703.103, paragraph (a)(3) is amended by adding the words "or loan" after the word "grant".

4. In § 1703.107, paragraph (a)(5) is revised to read as follows:

§ 1703.107 Ineligible loan and grant purposes.

* * * * *

(5) To purchase equipment that will be owned by the local exchange carrier or another telecommunications service provider, unless such carrier or provider is the recipient of the financial assistance being provided under this subpart;

* * * * *

§ 1703.109 [Amended]

5. In § 1703.109, paragraph (h) introductory text is amended by removing the word "statues" in the first sentence and adding in its place the word "statutes".

6. In § 1703.113, the third sentence in paragraph (b), and the entire paragraph (c) are revised to read as follows:

§ 1703.113 Application filing dates, location, processing, and public notification.

* * * * *

(b) * * * To be considered for loan funds during the fiscal year (FY) that the application is submitted, any information needed to complete the application must be postmarked no later than August 14. * * *

(c) Applications requesting grant funds must be submitted to RUS and postmarked not later than June 1 if the applications are to be considered during the fiscal year the application is submitted. It is suggested that applications be submitted prior to the above deadline to ensure they can be reviewed and considered complete by the deadline. RUS will review each application for completeness in accordance with § 1703.109, and notify the applicant, within 15 working days of the results of this review, citing any information which is incomplete. To be considered for grant funds, the applicant must submit the information to complete the application by June 1. If the applicant fails to submit such information by the appropriate deadline, the application will be considered during the next fiscal year.

* * * * *

§ 1703.122 [Amended]

7. In § 1703.122, in paragraph (e) introductory text the word "that" is added after the phrase "if any,".

Dated: January 16, 1998.

Wally Beyer,

Administrator, Rural Utilities Service.

1998
UMI

that amended the brucellosis regulations concerning the interstate movement of cattle by changing the classification of California from Class A to Class Free. We have determined that California meets the standards for Class Free status. The interim rule was necessary to relieve certain restrictions on the interstate movement of cattle from California.

EFFECTIVE DATE: The interim rule was effective on October 15, 1997.

FOR FURTHER INFORMATION CONTACT: Dr. R. T. Rollo, Jr., Staff Veterinarian, National Animal Health Programs, VS, APHIS, Suite 3B08, 4700 River Road Unit 36, Riverdale, MD 20737–1231, (301) 734–7709; or e-mail: rrollo@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

In an interim rule effective and published in the **Federal Register** on October 15, 1997 (62 FR 53531–53532, Docket No. 97–082–1), we amended the brucellosis regulations in 9 CFR part 78 by removing California from the list of Class A States in § 78.41(b) and adding it to the list of Class Free States in § 78.41(a).

Comments on the interim rule were required to be received on or before December 15, 1997. We did not receive any comments. The facts presented in the interim rule still provide a basis for the rule.

This action also affirms the information contained in the interim rule concerning Executive Order 12866 and the Regulatory Flexibility Act, Executive Orders 12372 and 12988, and the Paperwork Reduction Act.

Further, for this action, the Office of Management and Budget has waived the review process required by Executive Order 12866.

List of Subjects in 9 CFR Part 78

Animal diseases, Bison, Cattle, Hogs, Quarantine, Reporting and recordkeeping requirements, Transportation.

PART 78—BRUCELLOSIS

Accordingly, we are adopting as a final rule, without change, the interim rule that amended 9 CFR part 78 and that was published at 62 FR 53531–53532 on October 15, 1997.

Authority: 21 U.S.C. 111–114a–1, 114g, 115, 117, 120, 121, 123–126, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.2(d).

Done in Washington, DC, this 20th day of January 1998.

Terry L. Medley,

Administrator, Animal and Plant Health Inspection Service.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

9 CFR Part 93

[Docket No. 96–052–3]

Horses from Mexico; Quarantine Requirements

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Final rule.

SUMMARY: We are amending the regulations regarding the importation of horses from Mexico to remove the requirement that such horses be quarantined for not less than 7 days in vector-proof quarantine facilities before being imported into the United States. This action is warranted because Mexico has reported no cases of Venezuelan equine encephalomyelitis (VEE) in more than a year, and we have determined that horses imported into the United States from Mexico without a 7-day quarantine will not pose a risk of transmitting VEE to horses in the United States.

EFFECTIVE DATE: February 10, 1998.

FOR FURTHER INFORMATION CONTACT: Dr. Gary Colgrove, Chief Staff Veterinarian, National Center for Import and Export, VS, APHIS, 4700 River Road, Unit 38, Riverdale, MD 20737–1231, (301) 734–3276.

SUPPLEMENTARY INFORMATION:

Background

The regulations in 9 CFR part 93 (referred to below as "the regulations") govern the importation into the United States of specified animals and animal products, including horses from Mexico, to prevent the introduction into the United States of various animal diseases.

On August 8, 1997, we published in the **Federal Register** (62 FR 42705–42707, Docket No. 96–052–2) a proposal to amend the regulations to remove the requirement that horses imported into the United States from Mexico be quarantined for not less than 7 days in a vector-free facility. With this change, horses imported into the United States from Mexico would only need to be quarantined for an average of 3 to 4 days.

We also proposed to remove the requirement that horses from Mexico intended for importation into the United States through land border ports be quarantined in Mexico at a facility approved by the Administrator of the Animal and Plant Health Inspection Service (APHIS) and constructed so as to prevent the entry of mosquitoes and other hematophagous insects.

At the time that we published our proposal, the requirements for horses imported into the United States from Mexico were in regulations designated as 9 CFR part 92. As a result of a final rule published in the **Federal Register** on October 28, 1997 (62 FR 56000–56026, Docket No. 94–106–9), and effective on November 28, 1997, the regulations for importing animals have been redesignated as 9 CFR part 93.

We solicited comments concerning the proposed rule for 60 days ending October 7, 1997. We received 4 comments by that date. They were from representatives of industry. Two of the commenters supported the proposed rule. The remaining commenters had concerns about the proposed rule. Those concerns are discussed below.

One commenter felt that a year of disease-free status is not long enough to ensure that Mexico is free from VEE. Accordingly, the commenter suggested that we retain the 7-day quarantine for horses entering the United States from Mexico.

The standing policy of Veterinary Services, APHIS, is to propose to reduce the quarantine required for horses from a region when that region's last confirmed case of VEE occurred at least 1 year ago. This policy was implemented during the last outbreak of VEE in the State of Chiapas, Mexico, in 1993. One year of disease free status provides us with confidence that the outbreak is under control, that the disease is not spreading, and that the region has implemented effective measures to contain the disease. At this time, the last confirmed case of VEE in Mexico was reported almost 18 months ago, and there appears to be no reason to continue requiring the 7-day quarantine for horses entering the United States from Mexico. Therefore, we are making no changes to the proposed rule in response to this comment.

Both commenters expressing concerns maintained that Mexico has less stringent criteria than the United States regarding the movement of horses into and out of the country and noted that, because the United States is expected to abide by the European Union's strict

criteria regarding the transportation of horses, removing the 7-day quarantine for horses from Mexico may negatively affect the disease-free status of the United States. Accordingly, both commenters asked that before the removal of the 7-day quarantine, the Government of Mexico establish specific guidelines for identifying, isolating, and tracking the location and progress of infectious diseases such as VEE.

As with U.S. regulations, Mexico's VEE requirements for horses moving into Mexico depend on the horses' region of origin. For example, Mexico has no restrictions concerning testing for VEE of horses from Europe because the disease does not occur, and never has been reported, in Europe. For horses from regions where VEE has occurred, but where the disease may not be routinely reported, Mexico requires certification that VEE has not been reported within a radius of 200 kilometers of the horses' premises of origin, and that the horses to be imported into Mexico test negative for VEE. In addition, Mexico prohibits the importation of horses from regions, such as the country of Venezuela, where cases of VEE are frequently reported. The 1996 VEE outbreak in Mexico resulted from a local strain of VEE, not a VEE strain that was inadvertently imported into the country.

Regarding Mexico's restrictions on horses moving from Mexico to another country, Mexico's handling of horses for export is dependent on the requirements imposed by the country of destination. Mexico does not determine these requirements. If Mexico wants to export its horses to a certain country, Mexico must comply with that country's requirements.

Further, Mexico responded to the 1996 outbreak, which occurred in the southern State of Oaxaca, by (1) Immediately restricting the movement of all horses from that State, (2) intensively vaccinating all horses in the area of the outbreak, (3) vaccinating horses in the neighboring States of Chiapas, Veracruz, and Guerrero, and (4) in collaboration with the Department of Public Health, fumigating against mosquitos, which are vectors for VEE. These actions prevented any further spread of the disease, as evidenced by no further detections of VEE cases in Mexico for the past 18 months.

In light of Mexico's import and export procedures, and the country's active control and eradication activities when outbreaks of VEE have occurred, we do not believe that reducing the minimum quarantine period for horses from Mexico will negatively affect the disease status of the United States, and we do not believe that it is necessary to establish specific guidelines on Mexico for identifying, isolating, or tracking VEE. Therefore, we are making no changes to the proposed rule in response to these comments.

Therefore, based on the rationale set forth in the proposed rule and in this document, we are adopting the provisions of the proposal as a final rule without change.

Although a 7-day quarantine will no longer be required, horses from Mexico intended for importation into the United States, except those imported for immediate slaughter, must continue to be quarantined at a designated port until they (1) test negative to an official test for dourine, glanders, equine pirplasmosis, and equine infectious anemia; and (2) test negative to any other tests that may be required by APHIS. Additionally, all horses intended for importation from Mexico must continue to be quarantined until they are inspected and found free from communicable disease and fever-tick infestation. On average, these tests and inspections take 3 to 4 days.

Effective Date

This is a substantive rule that relieves restrictions and, pursuant to the provisions of 5 U.S.C. 553, may be made effective less than 30 days after publication in the **Federal Register**.

This rule removes the requirement that horses imported from Mexico be quarantined for 7 days at vector-proof quarantine facilities. This requirement is no longer necessary, due to the elimination of VEE in Mexico. Therefore, the Administrator of the Animal and Plant Health Inspection Service has determined that this rule should be effective 15 days after the date of publication in the **Federal Register**.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. For this action, the Office of Management and Budget has waived its review process required by Executive Order 12866.

We are amending the regulations regarding the importation of horses from Mexico to remove the requirement that such horses be quarantined for not less than 7 days in vector-proof quarantine facilities before being imported into the United States. This action is warranted because Mexico has reported no cases of VEE in the past year, and horses imported into the United States from Mexico without a 7-day quarantine will not pose a risk of transmitting VEE to horses in the United States. Horses imported from Mexico will still be required to be held in quarantine until it has been determined that the animals are free of exotic pests and diseases.

Horses enter the United States from Mexico for a variety of reasons, including for breeding, competition, racing, research, and slaughter. During fiscal year 1996, about 7,359 horses were imported into the United States from Mexico. In fiscal year 1995, there were about 15,317 horses imported from Mexico.

Under the restrictions placed on imported Mexican horses due to an outbreak of VEE in that country in 1996, horses intended for importation into the United States from Mexico were held in a vector-proof quarantine facility for 7 days prior to entering the United States. Because Mexico has been determined to be free of VEE, this rule eliminates the requirement for a 7-day quarantine at a facility approved by the Administrator of APHIS and constructed so as to prevent the entry of mosquitoes and other hematophagous insects. Horses imported from Mexico will continue to be required to be held in quarantine until it has been determined that the animal is free of exotic pests and diseases. This quarantine period generally lasts 3 or 4 days, based on the turnaround time at the laboratory where blood tests are performed.

Horses intended for importation into the United States from Mexico are quarantined in Mexican facilities operated by the Mexican Cattleman's Association. Different fees are assessed by the six State chapters which operate facilities along the United States/Mexico border. We estimate that the quarantine charge at vector-proof facilities is between $5.00 and $35.00 per head per day for the 7-day quarantine, or $35 to $250 per animal imported. Quarantine charges at the other facilities, which are not vector-proof, that will again be eligible to quarantine horses intended for importation into the United States average $3.00 per head per day. A 4-day quarantine will cost importers $12.00 per animal imported. Therefore, importers could potentially save between $23 and $238 per animal imported in quarantine charges. Of course, there are other amenities at some of the vector-proof facilities that may still draw some importers to those facilities. At fiscal year 1996 import levels, the elimination of the VEE quarantine will decrease the quarantine costs of domestic importers by between $169,257 and $1.75 million annually.

In addition, the removal of the VEE restriction will eliminate the need for daily visits during the quarantine period to the quarantine facility by APHIS'

VOL
63
ISS
16
JA
26
1998
UMI

veterinary medical officers (VMOs) and animal health technicians (AHTs) to conduct temperature checks of the animals to be imported. APHIS charges hourly user fees for inspection services conducted outside the United States. The published hourly fee for VMOs and AHTs is $56.00. The agency estimates that it takes 3 hours for APHIS personnel to travel to Mexican quarantine facilities and complete the temperature checks. The elimination of these checks will save the importer about $1,176 per shipment. Since slaughter horse imports from Mexico average about 40 head per shipment, this is a savings of about $29.40 per head. Other types of imported horses from Mexico average about two head per shipment, for a savings of $588 per head. At fiscal year 1996 import levels, the elimination of the user fees for horse inspection for VEE in Mexico will decrease the cost of importation by about $2.5 million annually.

The Regulatory Flexibility Act requires that the Agency specifically consider the economic impact associated with rule changes on small entities. The Small Business Administration (SBA) has set forth size criteria by Standard Industrial Classification (SIC) which can be used as a guide in determining which economic entities meet the definition of a small business. The SBA's definition of a small business engaged in the wholesale trading of livestock is one that employs no more than 100 persons. Currently, there are 1,992 domestic entities that trade livestock wholesale. About 1,965 of these entities are classified as small by the SBA. The exact number of domestic wholesale livestock traders currently importing Mexican horses cannot be determined. However, entities, whether large or small, engaged in importing Mexican horses will be positively impacted by this rule change.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action will not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This rule has been reviewed under Executive Order 12988, Civil Justice Reform. This rule: (1) Preempts all State and local laws and regulations that are inconsistent with this rule; (2) has no retroactive effect; and (3) does not require administrative proceedings before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This rule contains no new information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*).

List of Subjects in 9 CFR Part 93

Animal disease, Imports, Livestock, Poultry and poultry products, Quarantine, Reporting and recordkeeping requirements.

Accordingly, 9 CFR part 93 is amended as follows:

PART 93—IMPORTATION OF CERTAIN ANIMALS, BIRDS, AND POULTRY, AND CERTAIN ANIMAL, BIRD, AND POULTRY PRODUCTS; REQUIREMENTS FOR MEANS OF CONVEYANCE AND SHIPPING CONTAINERS

1. The authority citation for part 93 continues to read as follows:

Authority: 7 U.S.C. 1622; 19 U.S.C. 1306; 21 U.S.C. 102–105, 111, 114a, 134a, 134b, 134c, 134d, 134f, 135, 136, and 136a; 31 U.S.C. 9701; 7 CFR 2.22, 2.80, and 371.2(d).

§ 93.308 [Amended]

2. In § 93.308, paragraph (a)(1) is amended by removing the reference to "§ 93.317" and adding in its place the reference to "§§ 93.317 and 93.324".

§ 93.324 [Amended]

3. Section 93.324 is amended by removing the words ", for not less than 7 days and" and by removing the words "approved by the Administrator and constructed so as to prevent the entry of mosquitoes and other hematophagous insects".

§ 93.326 [Amended]

4. In § 93.326, the first sentence is amended by removing the words "93.323, and 93.324" and adding in their place the words "and 93.323".

Done in Washington, DC, this 20th day of January 1998.

Terry L. Medley,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF THE TREASURY

31 CFR Part 103

Conditional Exceptions to Bank Secrecy Act Regulations Relating to Orders for Transmittals of Funds by Financial Institutions

AGENCY: Financial Crimes Enforcement Network, Treasury.

ACTION: Grant of conditional exceptions.

SUMMARY: This document contains two conditional exceptions to a provision of the Bank Secrecy Act regulations. The exceptions permit financial institutions to comply more efficiently with requirements for inclusion of certain information in transmittal orders for transmissions of funds.

EFFECTIVE DATE: January 26, 1998.

FOR FURTHER INFORMATION CONTACT: Peter Djinis, Associate Director, FinCEN, (703) 905–3920; Charles Klingman, Financial Institutions Policy Specialist, Office of Program Development, FinCEN, (703) 905–3920; Stephen R. Kroll, Legal Counsel, FinCEN, and Cynthia L. Clark, Acting Deputy Legal Counsel, Office of Legal Counsel, FinCEN, (703) 905–3590.

SUPPLEMENTARY INFORMATION:

I. Introduction

The statute generally referred to as the "Bank Secrecy Act," Titles I and II of Public Law 91–508, as amended, codified at 12 U.S.C. 1829b, 12 U.S.C. 1951–1959, and 31 U.S.C. 5311–5330, authorizes the Secretary of the Treasury, *inter alia*, require financial institutions to keep records and file reports that are determined to have a high degree of usefulness in criminal, tax, and regulatory matters, and to implement counter-money laundering programs and compliance procedures. Regulations implementing Title II of the Bank Secrecy Act (codified at 31 U.S.C. 5311–5330) appear at 31 CFR part 103. The authority of the Secretary to administer the Bank Secrecy Act has been delegated to the Director of FinCEN.[1]

II. FinCEN Issuance 98–1

This document, FinCEN Issuance 98–1, grants two conditional exceptions to the operation of the rules contained at 31 CFR 103.33(g). The background, purpose, and terms of the two exceptions are explained below.

Background

On January 3, 1995, the Financial Crimes Enforcement Network ("FinCEN") of the Department of the Treasury issued a rule, 31 CFR 103.33(g) (the "Travel Rule"), requiring financial institutions to include certain information in transmittal orders relating to transmittals of funds of $3,000 or more. The Travel Rule complements the rules jointly issued by the Board of Governors of the Federal Reserve System and FinCEN (the "Joint Rule") requiring the maintenance of

[1] Information relating to the Paperwork Reduction Act appears at the end of this Issuance.

records by insured depository institutions and other financial institutions with respect to domestic and international transmittal of funds transactions.[2] The Joint Rule defines the terms used in both that Rule and the Travel Rule.

Both the Joint Rule and the Travel Rule were amended on April 1, 1996, in response to a request for regulatory relief by affected financial institutions. The changes to the Travel Rule made at that time included addition of a "safe harbor" for Travel Rule compliance prior to the date of an institution's conversion to the expanded message format of the Fedwire funds transfer system of the Federal Reserve Banks.[3] The "safe harbor" permits an institution—prior to the completion of its Fedwire conversion—to omit from a transmittal order some of the information otherwise required by the Travel Rule, so long as the missing information is retrieved and supplied in a reasonable amount of time in response to a law enforcement request or a judicial order, or to a request by another financial institution that would otherwise have received the information to assist the latter institution in its own Bank Secrecy Act compliance efforts.

Use of Customer Information File Information

A group of banks and brokers and dealers in securities (the "Working Group")[4], has sought relief from the strict operation of the Travel Rule's requirement that each transmittor's financial institution and intermediary financial institution include in a transmittal order the transmittor's name and street address. *See* 31 CFR 103.33(g)(1) (i)–(ii) and (g)(2) (i)–(ii). Absent an exception or special rule of some kind, satisfaction of the terms of the Travel Rule require the use of true name and street address information. The Bank Secrecy Act rules for the maintenance of customer and transaction records (one of which is the Joint Rule), and for the reporting of various transactions or circumstances, require the use of true name and street address information, and prior guidance issued by FinCEN stated plainly that "[t]he use of a code name, or pseudonym is prohibited" under the Travel Rule. Question and Answer 19, Guidance for Financial Institutions on the Transmittal of Funds "Travel Regulations" (January 1997).[5]

The Working Group has represented that the present ability of many covered institutions to satisfy the Travel Rule at all depends upon the ability of those institutions to make use electronically of information contained in the institutions' automated customer information files, or "CIFs." CIFs, the Working Group has told FinCEN, will always contain each customer's actual account number. However, CIFs will often contain a post office box mailing address rather than the customer's street address, or (somewhat less frequently) a nominee or "special" or coded name rather than the customer's true name; in other cases CIFs may contain both true and nominee, "special" or coded name or Post Office Box address information, but will be programmed to use the latter for communications purposes outside the institution itself. The result is that, although the originating institution will know a customer's street address and true name, reliance on CIFs as presently programmed could produce "traveling information" other than actual names and street addresses. The banks and broker-dealers involved have further represented that reprogramming CIFs so that those files can produce true name and address information when necessary to satisfy the Travel Rule (if for some reason the files contain post office box addresses or nominee, "special," or coded names) will require significant resources and would likely involve diverting programming time away from more urgent programming needs, especially correction of the world-wide "Year 2000" problem.

Full Travel Rule Compliance Following Conversion to Expanded Fedwire Message Format

The "safe harbor" contained in 31 CFR 103.33(g) only applies prior to the date that an institution completes its conversion to the expanded message format of the Fedwire funds transfer system. Generally, that transformation is required to be completed by the end of 1997.

A number of financial institutions have represented to FinCEN that they have found it impossible to begin full compliance with the Travel Rule immediately upon conversion to the expanded Fedwire message format. The inability to meet the date for full compliance set out in the safe harbor arises because of delays in completing related programming tasks, for example the linking of inbound and outbound message systems.

Need for Flexibility in Administration of Travel Rule

Although the Travel Rule complements the Joint Rule, FinCEN has made clear in the past that the purposes of the Travel Rule are not incompatible with flexibility in applying the Rule's literal terms. The need for administrative flexibility is increased because Treasury intends, within the next 18 months, to review and consider making appropriate modifications to the Travel Rule. *See* 61 FR 14383, 14387–14388. Modifications are appropriate to meet particular operating problems, so long as complete information is available, at some point, in the domestic funds transfer chain and investigators are given adequate notice that the funds transmittal order itself must be supplemented by other information to provide a complete picture of the transmittal involved. *See* 31 CFR 103.33(g)(3).

Grant of Exceptions

By virtue of the authority contained in 31 CFR 103.45(a) and (b), which has been delegated to the Director of FinCEN, the following exceptions to the operation of the rules in 31 CFR 103.33(g) are approved:

1. A transmittor's financial institution that is otherwise subject to the terms of 31 CFR 103.33(g) with respect to transmittal of funds may satisfy (i) the requirement of 31 CFR 103.33(g)(1)(i) that the name of the transmittor be included in a transmittal order, and (ii) the requirement of 31 CFR 103.33(g)(1)(ii) that the transmittor's address be included in a transmittal order, with respect to a particular transmittal order, by including in the transmittal order the name and address information with respect to the transmittor contained in the financial institution's general automated CIFs, so long as:

[2] The provisions of 12 U.S.C. 1829b(b), amended the Bank Secrecy Act (i) to require the Secretary of the Treasury and the Federal Reserve Board jointly to promulgate recordkeeping requirements for international funds transfers by depository institutions and nonbank depository institutions, and (ii) to authorize the Secretary and the Board jointly to promulgate regulations for domestic funds transfers by depository institutions. The Secretary is authorized by 31 U.S.C. 5318(g) to require financial institutions to carry out anti-money laundering programs. Both 31 U.S.C. 5318(h) and 12 U.S.C. 1829b(b) were added to the Bank Secrecy Act by the Annunzio-Wylie Anti-Money Laundering Act of 1992 (Title XV of Pub. L. 102–550).

[3] The expanded Fedwire format was announced by the Federal Reserve Board on the same day as the Joint Rule and the Travel Rule. *See* 60 FR 220 and 60 FR 234 (January 3, 1995).

[4] The members of the Working Group are Bank of America, N.A.; The Bank of New York; Bankers Trust Company; The Chase Manhattan Bank; Citibank, N.A.; J.P. Morgan, Inc.; Marine Midland Bank; Merrill Lynch, Pierce, Fenner & Smith; MTB Bank; NationsBank, N.A.; Prudential Securities, Inc.; and Republic National Bank of New York.

[5] The January 1997 Guidance document was distributed to banks, thrift institutions, and credit unions by their respective federal regulators and was the subject of NASD–R Notice to Members 97–13, sent to members of the National Association of Securities Dealers.

VOL 63 ISS 16 JA 26 1998 UMI

(a) The CIFs are not specifically altered for the particular transmittal of funds in question.

(b) The CIFs are generally programmed and used by the institution for customer communications, not simply for transmittal of funds transactions, and as so programmed generate other than true name and street address information;

(c) The institution itself knows and can associate the CIF information used in the funds transmittal order with the true name and street address of the transmittor of the order;

(d) The transmittal order includes a question mark symbol ("?") immediately following any designation of the transmittor other than by a true name on the order; and

(e) Any report required to be made under 31 CFR 103.21 or 31 CFR 103.22 by the institution with respect to the funds transmittal to which the transmittal order relates contains true name and street address information for the transmittor and plainly associates the report with the particular funds transmittal in question.

This exception has no application to any funds transmittals for whose processing an institution does not automatically rely on preprogrammed and prespecified CIF name and address information. Moreover, institutions are reminded that the use of nominee, "special," or coded names is barred by the Travel Rule, in the absence of the foregoing exception with respect to CIFs only. Any new customer request for use of a nominee, or "special" or coded name in a CIF after the date of this Issuance should be carefully evaluated by depository institutions as a potentially suspicious transaction requiring reporting under 31 CFR 103.21, and reported unless an examination reveals that the request is made for an independent lawful business purpose and is the sort in which the customer involved would be expected to engage.

2. A financial institution will have complied with the terms of 31 CFR 103.33(g) for a transmittal order sent prior to April 1, 1998 and on or after the date of the conversion to the expanded Fedwire message format of the bank sending the transmittal order, if

(a) The transmittal order was an order to which the terms of 31 CFR 103.33(g)(3) would have applied if the order had been sent prior to the date of such conversion, and

(b) The terms of 31 CFR 103.33(g)(3) are satisfied with respect to such order as if such paragraph continued to apply by its terms to such transmittal order.

The foregoing exceptions do not in any way modify the obligations of financial institutions under any other provisions of 31 CFR part 103, including, without limitation, the obligation to maintain and retrieve information about transmittals of funds or the contents of orders for the transmittals of funds. Terms used in the foregoing exceptions and not defined in this document have the meaning given to such terms in 31 CFR part 103. The foregoing exceptions may be modified or revoked at any time in the sole discretion of the Department of the Treasury, by document published in the **Federal Register**. Exception 1, above, will expire on May 31, 1999, for transmittals of funds initiated after that date, if not revoked or modified with respect to such expiration date prior to that time.

III. Paperwork Reduction Act

The collection of information contained in this issuance has been reviewed and approved by the Office of Management and Budget in accordance with the Paperwork Reduction Act (44 U.S.C. 3507) under control number 1506–0008. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

The collection of information in this issuance is in the *Grant of Exceptions* section of this issuance, paragraph 1.(d). This information is required to comply with the Bank Secrecy Act. This information will be used to assure that a code or "special" name (*i.e.*, a name other than the transmittor's true name) on accounts at banks and with brokers and dealers in securities are not used to launder money or hide assets derived from illegal activities. The collection of information is mandatory. All information collected pursuant to the Bank Secrecy Act, including this information collection, is confidential pursuant to 31 U.S.C. 5316(c) and may be shared with regulatory and law enforcement authorities but its availability is strictly limited. All records required to be retained by 31 CFR part 103 must be retained for five years.

The likely respondents are banks and brokers and dealers in securities.

Frequency: Each time a transmittal order contains a code or special name, *i.e.*, a name other than the transmittor's true name.

Estimated Number of Such Transmittal Orders: 5,000.

Estimate of Total Annual Burden:

Reporting burden estimate = approximately 250 hours for reporting.

Recordkeeping burden estimate = approximately 1,250 hours for recordkeeping.

Estimate of Total Annual Cost for Hour Burdens: Based on $20 per hour, the total cost of compliance is estimated to be approximately $33,000.

Estimate of Total Other Annual Costs to Respondents: None.

FinCEN specifically invites comments on the following subjects: (a) Whether the proposed collection of information is necessary for the proper performance of the mission of FinCEN, including whether the information shall have practical utility; (b) the accuracy of FinCEN's estimate of the burden of the collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

In addition, the Paperwork Reduction Act of 1995 requires agencies to estimate the total annual cost burden to respondents or recordkeepers resulting from the collection of information. Thus, FinCEN also specifically requests comments to assist with this estimate. In this connection, FinCEN requests commenters to identify any additional costs associated with the collection of information. These comments on costs should be divided into two parts: (1) Any additional costs associated with reporting; and (2) any additional costs associated with recordkeeping.

Comments concerning the accuracy of the burden estimate and suggestions for reducing the burden should be directed to the Office of Management and Budget, Attention: Desk Officer for the Treasury Department, Office of Information and Regulatory Affairs, Washington, D.C., 20503.

Signed this 16th day of January 1998.

William F. Baity,

Acting Director—FinCEN, Department of the Treasury.

[FR Doc. 98–1671 Filed 1–23–98; 8:45 am]

BILLING CODE 4820–03–P

POSTAL SERVICE

39 CFR Part 20

International Surface Airlift

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: The Postal Service published for comment a proposed rule amending International Surface Air Lift Service in the **Federal Register** on September 9, 1997 (62 FR 47394). The Postal Service hereby gives notice that it is adopting the proposal with minor revision.

EFFECTIVE DATE: February 28, 1998.

FOR FURTHER INFORMATION CONTACT: [Robert Michelson], (202) 268–5731.

SUPPLEMENTARY INFORMATION: On September 9, 1997, the Postal Service published in the **Federal Register** (62 FR 47394) a notice of proposed changes in rates and conditions of service for International Surface Air Lift (ISAL) Service. ISAL is a bulk mailing service for international shipment of publications, advertising mail, catalogs, directories, books, other printed matter, and small packets. The service is available to approximately 125 countries. To use ISAL, a mailer must send at least 50 pounds of these items at one time, presorted by country of destination. Identical piece mailings are not required to qualify. Postage for ISAL is calculated according to a rate structure including both per-piece and per-pound elements with destination countries separated into four rate groups. A discount is given to ISAL mail tendered at the Dropship ISAL Service Centers (Dropship ISCs) (formerly, gateway airport mail facilities) at New York (JFK), San Francisco, Chicago, and Miami, or when direct shipment (750 pounds or more to a single destination) can be arranged from one of the acceptance cities. An additional discount is available for M-bags (printed matter to a single addressee).

The Postal Service reviewed the current ISAL service and is making changes to ISAL preparation requirements that will reduce operating costs. The Postal Service also proposed rate discounts based on the place of mailing, the availability of transportation, and the volume of mail. The Postal Service believes that these changes make the service available to more users at more convenient locations and still will cover the cost of providing the service with a reasonable contribution to institutional costs. The Postal Service proposed the change to ISAL as described below.

The Postal Service requested comments by October 9, 1997, and by that date received seven comments: five from international mail consolidators, one from a printing/mailing company, and one from an international mail order consulting firm.

Minimum Weight

Currently there is no required minimum amount of mail per sack prepared by the mailer. The mailer merely places the mail for a particular country in a mail sack and labels the sack to that country. This has resulted in an unacceptable number of sacks containing small amounts of mail. In some cases, the sack itself weighed more than the mail in the sack. This resulted in an excessive number of sacks, higher transportation costs, and complaints from other postal administrations. Therefore, the Postal Service proposed a minimum weight of 11 pounds for direct country sacks prepared by mailers. When there is less than 11 pounds, but 10 or more pieces (a package), the mailer will prepare this mail in a mixed country package rate group sack. This mail will be entitled to the ISAL rate as if it had been placed in the direct country sack. When there are fewer than 10 pieces to a country, this mail will be prepared in "residual" sacks by rate group. Residual mail cannot exceed 10 percent, by weight, of the rest of the mailing.

One commenter agreed with the need to establish a minimum weight for direct country sacks since it "would keep cost in line and increase the availability of equipment." Another commenter agreed with the need for change, but recommended that the 11 pound requirement be lowered and that smaller sacks be used.

The Postal Service does not believe that it is practical to procure and use smaller sacks for ISAL. The same sacks are used by the Postal Service for other types of mail. The expense of acquiring, stocking, and distributing another type of sack that would be used only for mailer-prepared ISAL is not economical or feasible. Therefore, the Postal Service will adopt the 11-pound minimum sack weight for direct country sacks.

One commenter thought the 10 percent residual mail rule was too restrictive and suggested a special rate for residual mail without a limit on the amount contained in the mailing. The Postal Service reviewed this suggestion and has decided to retain the 10 percent residual at the ISAL rate. Mailers can use the single piece rates, either air or surface, or make use of other international business products.

One commenter questioned the definition of a package and suggested that a package be considered either 10 or more pieces or 1 pound. This would allow mailers to place more mail in mixed country package sacks instead of in residual sacks. The Postal Service reviewed this and has decided to amend the definition of a package to be 10 or more pieces to the same country or separation or 1 pound or more regardless of the number of pieces. Accordingly, International Mail Manual (IMM) 246.2, 246.941a, 946.941b, and 246.942c are amended.

Acceptance Cities

Since the inception of ISAL, the Postal Service has limited the number of cities where ISAL mailings could be deposited. This was intended to reduce the cost of maintaining an extensive transportation network. Many customers not located near an acceptance point could not use ISAL. The Postal Service proposed a Full Service rate that will be available from all post offices where bulk mail is accepted and will make ISAL accessible to all customers. Mailers may still mail at the lower Dropship ISC rate by tendering their mail to a Dropship ISC.

One commenter opposed deposit of ISAL at all post offices because it would "overload the transportation system, adversely affect service, and create problems of recognizing the product and possible improper return." The Postal Service disagrees. The majority of ISAL volume is currently deposited at ISC facilities. The amounts mailed at post offices is so small compared with total mail volume that it could not possibly overload the Postal Service's transportation system. In addition, since all ISAL will be labeled to the ISC for handling, there is no reason to believe that this mail will be mishandled in the domestic network or that there will be any overall impact on service.

Volume Discount

The Postal Service proposed to institute volume discounts for large users of ISAL. The size of the discount would be based on the amount of postage paid during the previous postal fiscal year. Mailers would receive a discount of five percent if they paid $2 million in ISAL postage in a year, a discount of 10 percent if they paid $5 million in ISAL postage, and a discount of 15 percent if they paid $10 million or more in ISAL postage. Three comments expressed complete support for the discounts. One comment criticized the larger discounts as excessive, and suggested that the maximum discount be seven percent. One comment criticized the discounts because they were based on ISAL postage alone. This comment suggested that ISAL, International Priority Airmail (IPA), and Valuepost Canada services were alternative services that met similar, although different service needs and that postage paid for both should be

VOL 63 ISS 16 JA 26 1998 UMI

considered in qualifying for ISAL discounts. One comment criticized the discounts as violating the rate setting provisions of the Postal Reorganization Act. This comment argued that the discounts were rate reductions for large mailers which, in the case of consolidators, would make it difficult for smaller companies to compete. This comment also argued that there is no reason to give discounts on the basis of the previous year's volume. There was no reason to reward customers on the basis of how much ISAL postage was paid last fiscal year when the terms and conditions for mailing were different. There is no clear relationship between the amount of postage paid and the amount of contribution to institutional costs. That there is no reason to reward large customers who use both ISAL and remail, and that the rate differential between customers which qualify for no discounts and which choose not to take advantage of the International Service Center drop shipment rates is appropriate.

After considering all of the comments, the Postal Service has concluded that the discounts should be adopted as proposed considering ISAL and IPA mail to be included in the qualifying volume mail for ISAL discounts. International mail delivery is a competitive market. The Private Express Statutes, which generally limit competition with the Postal Service for the carriage of letters, have been suspended to allow international remail (39 CFR 320.8). The Postal Service, the postal administrations of other countries (*e.g.* the Netherlands and the United Kingdom), and private sector concerns all compete for the carriage of letters and other mailable matter. The international mail market is also one in which consolidators, which take international mail from many smaller mailers and merge it so as to take advantage of lower rates, are a significant factor in which delivery agent will handle the mail. Competitors of the Postal Service offer discounts to consolidators and large mailers; if the Postal Service does not act competitively, it will lose business to them.

The Postal Service is required to charge rates that apportion costs on a fair and equitable basis (39 U.S.C. § 101(d)), that are fair and reasonable, 39 U.S.C. § 403(a), and that do not make any undue or unreasonable discrimination or grant any undue or unreasonable preference, 39 U.S.C. § 403(c). What is fair, reasonable, and not unduly discriminatory or preferential is largely a question of fact in which all circumstances must be taken into account, including the reality of a competitive marketplace. At a minimum, similarly situated mailers must receive the same or comparable treatment and pay the same rates. However, as stated by the Court of Appeals in upholding the Postal Service's authority to negotiate rates and services with large mailers, "the reasons that may compel a uniform rate of postage in the United States no longer apply to large-volume international mailers" *(UPS Worldwide Forwarding, Inc.* v. *U.S. Postal Service*, 66 F.3d 621, 637–38 (3d Cir. 1995). Published volume discounts are another way to compete for large-volume international mailers, and a way to compete that involves greater certainty and less administrative effort than negotiating rates and services with them. Moreover, published volume discounts ensure that similarly situated mailers (*i.e.*, mailers of like quantities of similar mail) pay the same rates.

Increasing discounts based on increased usage does not make rates unfair, unreasonable, unduly discriminatory, or preferential. In general, the more a mailer mails the greater the number of full direct sacks that will be prepared, thereby reducing Postal Service handling costs. Moreover, the larger a mailer, the more aggressively competitors such as the postal services of the Netherlands and the United Kingdom will bid for their business. Although the Postal Service does not have definite knowledge of what rates these competitors offer at any given time since they are under no legal obligation to disclose rates or the customers to which those rates are offered, it is known that they offer significant discounts to large mailers. Unless the Postal Service prices its services competitively by offering discounts, it will lose the business of large mailers.

Basing discounts on the amount of postage paid in the previous year is not unfair, unreasonable, unduly discriminatory, or preferential. Experience shows that while mail volumes may fluctuate from year to year, past usage is generally a good indicator of present and future usage. Moreover, mailers need certainty to plan their budgets, set their prices, and otherwise conduct their businesses. Basing rates on past usage gives mailers that certainty, since they know how much they are mailing and can reasonably foresee which level of discount they will qualify for the next year. It is fair, reasonable, and not unduly discriminatory to base discounts on volumes that are highly likely to predict usage and which also make sense to customers in conducting their own businesses.

Differences in rates between what a smaller mailer pays to mail ISAL at any bulk mail acceptance unit and what a large mailer pays to mail at an International Service Center (ISC) with the maximum discounts are not unduly discriminatory because the large and small mailers are not situated similarly. The mail posted by the smaller mailer requires more handling and domestic transportation than the mail posted by the larger mailer, thereby increasing the Postal Service's cost. Moreover, there is more intense competition for the larger mailer's business. This is a competitive market, if the smaller mailers believe that rates are too high, then they have the option of using another service provider or a consolidator who can qualify for rate discounts. Ultimately, the market will determine which rates both the large and the small mailer will pay, whether it is to the Postal Service or to a competitor.

The Postal Service does not believe that volume discounts will affect competition between large and small consolidators. This is a competitive market in which significant discounts are already being offered to large consolidators by other providers. They already have, or can have, an advantage in the rates they pay for the mail they send. Whether discounts are offered, or not offered, by the Postal Service will not change that.

The Postal Service has concluded that the size of the discounts should not be reduced. As stated above, the Postal Service does not have definite knowledge of the rates being offered by the competitors. It appears, however, that the proposed discounts as proposed are necessary to hold the business it now has.

Several commenters requested clarification for the basis of the discount or requested that revenue for other products be included for determining the discounts. The Postal Service will count ISAL and IPA revenue to qualify for the volume discounts. If a permit holder has more than one account and/or in several cities, these revenues may be combined. Agents who prepare mail for the owner of the mail and tender it under the owner's permit during postal fiscal year 1997 will only be counted for a discount during postal fiscal year 1998. Agents must be prepared to submit postage statements that reflect their representation of the owners of the mail between September 14, 1996 through and September 12, 1997 to be included for discounts in postal fiscal year 1998 (September 13, 1997 through September 11, 1998). Each year after, the level of discount will be determined only by the postage paid by the permit holder.

To qualify for volume discounts, mailers must apply to the Manager, Mail-order, International Business Unit, 475 L'Enfant Plaza, SW, Room 370–IBU, Washington, DC 20260–6500. The Manager will evaluate all requests and inform the mailer and the post office(s) of mailing whether discounts are approved and the level of discount. The Manager, Mail-order will inform all applicants of the total qualifying revenue and the size of their discount within 30 days of receiving the application. Mailers may appeal this determination of the Manager of Mail-order by providing the necessary documentation supporting the discount for the initial postal fiscal year 1998. The Manager of Mail-order will make a final determination on the appeal of the discount level within 5 business days from receipt of the appeal letter. IMM 246.715, is added to describe how mailers can qualify for volume discounts.

Direct Shipment Rates

The Postal Service proposed that direct shipment rates continue to be available for mailers tendering 750 pounds or more to one country at any office from which the Postal Service can obtain direct transportation to the destination country. A new rate schedule has been developed for this service to reflect current costs.

One commenter agreed with having separate direct shipment but stated that the $0.25 per pound rate difference might be too low. Another commenter favored the current rate structure of having the same rates for Gateway (Dropship ISC) and Direct Shipment, at least in major markets, arguing that by having to pay a higher rate, the value of drop shipment option would be greatly decreased.

The cost of providing Direct Shipment service is higher than the cost of providing service from ISCs. The mailer also avoids having to transport mail to an ISC. The price difference of $0.25 per pound reflects the Postal Service's additional cost for providing Direct Shipment service.

Price Adjustments

Five commenters noted the general size of the rate increase. Depending on the method of analysis, the destination rate group, and the origin of the mail, commenters found that the rates applicable to these mailings might increase substantially (anywhere from 10 to 50 percent). One of the commenters stated that the Dropship ISC and volume rates were very good, but that the increase for the Western Hemisphere was excessive and suggested a separate rate group for Mexico. Several commenters suggested that some of the proposed rates would not be competitive with other alternatives.

The Postal Service has carefully reviewed the proposed rate structure to ensure that the proposed not only meets the requirements of postal rate making, but also offers the most competitive and economical rates possible. Changes in the rates reflect the need to cover costs, make a contribution to the institutional costs of the Postal Service, and exhibit the effects of customer worksharing and competitiveness. Based on these comments and criteria, the Postal Service has decided to reduce the proposed rates of Rate Group 2, South America, by 10 cents a pound. IMM 246.71 is revised to reflect this change. The comment suggesting a specific country rate to Mexico raises an interesting idea. However, the Postal Service needs sufficient time to evaluate the impact of this concept on ISAL mailers. It also needs sufficient time to conduct such a review without delaying implementation of the new ISAL rates in which all ISAL mailers benefit. The Postal Service will continue to study this concept. The analysis period will be at least 6 months.

Labeling Requirements

One commenter questioned the need for the mailer to use two sack labels (one label and Tag 155). The commenter stated that such preparation is cost prohibitive and suggested using palletized mail preparation. The commenter also suggested that mail for rate groups 1 and 4 be combined because both groups are labeled to the same dispatch point.

One of the main benefits of ISAL is that it allows the mailer to prepare mail to the finest point possible and avoid the cost of the Postal Service handling the mail. It is therefore necessary for the mailer to prepare sack labels and tags. In addition, under certain circumstances, the Postal Service accepts ISAL on pallets. This significantly reduces preparing large mailings to a single country destination.

Corrections

There were several errors in the original text of IMM part 246, published in 62 FR 47394–47399.

1. Exhibit 246.71, Footnote 3, is corrected to show the delivery zones for Osaka, Japan as 52–93.

2. In IMM 246.941, the maximum weight of a package is changed from 20 pounds to 11 pounds.

3. In section 246.943.a.1, Exhibit A is changed to Exhibit 246.71 and the information for Osaka is corrected to read: Osaka OSA (for postal codes 52–93).

4. Section 246.2 is changed to reflect that residual mail cannot exceed 10 percent of the combined weight of qualifying mail (consisting of Direct Country Sacks, M-Bags, Direct Country Package Sacks).

Conclusion

Accordingly, the Postal Service adopts the following amendments to the International Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 20.1.

List of Subjects in 39 CFR Part 20

Foreign relations, Incorporation by reference, International postal services.

PART 20—[AMENDED]

1. The authority citation for 39 CFR part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 401, 407, 408.

2. The IMM is amended to incorporate part 246, International Surface Air Lift Service, as follows:

246 International Surface Air Lift (ISAL) Service 246.1 Definition

International Surface Air Lift (ISAL) is a bulk mailing system that provides fast, economical international delivery of publications, advertising mail, catalogs, directories, books, other printed matter, and small packets. The cost is lower than airmail and the service is much faster than surface mail. ISAL shipments are flown to the foreign destinations and entered into that country's surface or non-priority mail system for delivery.

246.2 Qualifying Mail and Minimum Quantity Requirements

Only printed matter as defined in 241 and small packets as defined in 260 that meet all applicable mailing standards may be sent in this service. There is a minimum volume requirement of 50 pounds per mailing except for the Direct Shipment option, which requires a minimum 750 pounds to a single country destination. Small packets may not be enclosed in M-bags and do not qualify for the Full Service, Direct Shipment, or Dropship ISC M-bag rates. Mail is prepared as (1) direct country sacks when there are 11 pounds or more to a single country or required country separation; (2) mixed country package sacks when there are 10 or more pieces

VOL 63 ISS 16 JA 26 1998 UMI

or at least 1 pound of mail to a single country, but less than 11 pounds; and (3) residual mail when there are fewer than 10 pieces or less than 1 pound of mail to a single country. Residual mail may not exceed 10 percent, by weight, of the mail presented in direct country sacks, M-Bags, and mixed country package sacks. Qualifying residual mail is subject to the appropriate ISAL rate (Full Service, Direct Shipment, M-Bag, or Dropship ISC).

Note: A package is defined as 10 or more pieces of mail to the same country separation or 1 pound or more regardless of the number of pieces. Packages of letter-size pieces of mail should be no thicker than approximately a handful of mail (4 to 6 inches). Packages of flat size mail may be thicker than 6 inches but must not weigh more than 11 pounds.

246.3 Service Options 246.31 Availability

ISAL service is available to the foreign countries listed in exhibit 246.71 from all post offices where bulk mail is accepted and from the Dropship ISCs listed in 246.32.

246.32 Dropship ISAL International Service Centers

ISAL deposited at the following Dropship ISAL ISCs qualify for the Dropship ISC rates shown in 246.71:

AMC JFK BLDG 250, JFK International Airport, Jamaica, NY 11430–9998
San Francisco P&DC, 1300 Evans Ave, San Francisco, CA 94188
AMC San Francisco,* BLDG 660 Rd 6, San Francisco CA 94158–9998
Miami P&DC, 2200 NW 72 Ave, Miami FL 33152
AMC Miami,* Miami International Airport, Miami FL 33159–9998
Chicago O'Hare Dropship ISAL Service Center, International Processing Center Annex, 3333 N. Mount Prospect RD, Franklin Park IL 60131

246.4 Special Services

The special services described in Chapter 3 are not available for items sent by ISAL.

246.5 Customs Documentation

See 244.6 and 264.5 for the requirements for customs forms.

246.6 Permits

Mailers depositing mail at a Dropship ISC must maintain an advance deposit account at that city if postage is paid by advance deposit account.

246.7 Postage

246.71 Rates

Rate group	Per piece	Full service per lb.		Direct shipment per lb.		Dropship ISC per lb.	
		Regular	M-bag*	Regular	M-bag*	Regular	M-bag*
1	$.25	$3.10	$2.50	$2.35	$1.75	$2.10	$1.50
2	.10	4.00	2.60	3.25	1.85	3.00	1.60
3	.10	3.95	3.00	3.20	2.25	2.95	2.00
4	.10	6.25	4.25	5.50	3.50	5.25	3.25

See exhibit 246.71 for network countries and individual rates.
* Small packets may not be mailed at these rates.

246.711 Full Service Rates

ISAL mailings presented at any post office that accepts bulk mail, other than a Dropship ISC listed in 246.32, and not eligible for the direct shipment rate and are paid at the full-service rates. Postage for regular ISAL is paid on a per-piece and a per-pound basis. M-bags are subject to the M-bag pound rate only. Small packets are not eligible for the M-bag rates and may not be included in M-bags.

246.712 Direct Shipment Rates

Mailers are eligible for the direct shipment rates from the acceptance post office (except Dropship ISCs) when the Postal Service is able to arrange direct transportation from the origin office to the destination country. To qualify, mailers must present a minimum of 750 pounds to each destination country. Mailers must contact the post office of mailing at least 14 days before the first desired mailing date. A postal employee must complete PS Form 3655, International Surface Airlift (ISAL) Direct Shipment Option Advisement and Confirmation of Transactions, and fax it to the distribution network office (DNO) to obtain a contract for transportation. If the DNO cannot arrange direct transportation, the direct shipment rate does not apply. The Postal Service may cancel direct shipment rates and service when direct transportation is no longer available.

*Plant verified mail is transported to these facilities by the mailer.

246.713 Dropship ISC Rates

ISAL mailings transported by the mailer to the Dropship ISCs listed in 246.32 are eligible for the Dropship ISC rate.

246.714 Volume Discount

Mailers who spend $2 million or more combined on ISAL and IPA in the preceding postal fiscal year may receive discounts off the rates shown in 246.71:

a. over $2 million to $5 million: 5 percent discount

b. over $5 million to $10 million: 10 percent discount

c. over $10 million: 15 percent discount

Mailers entitled to these discounts must place the full per-piece rate on each piece of mail if payment is by postage meter or mailer-precanceled stamps. The discount is calculated on the postage statement.

246.715 Qualifying for Volume Discounts

To qualify for volume discounts, mailers must apply in writing to the Manager, Mail-order, International Business Unit, 475 L'Enfant Plaza, SW, Room 370–IBU, Washington, DC 20260–6500. The Manager evaluates all requests and informs the mailer and the post office(s) of mailing whether discounts are approved and the level of discount. Mailers must supply the following information:

The postal fiscal year for the qualifying mail.

The permit number(s) and post office(s) where the permits are held.

The total revenue for the postal fiscal year.

The post office(s) where the discount is to be claimed.

The combined ISAL and IPA revenue is counted toward the discounts. The Postal Service will count as revenue to qualify for the volume discounts postage paid by only a permit holder. If a permit holder has more than one account, or accounts in several cities, then these revenues may be combined to qualify for discounts. Agents who prepare mail for the owner of the mail and mail paid by the owner's permit may not include

in the revenue to qualify for the discounts, except for the initial year (Postal Fiscal Year 1997, which is September 14, 1996 through September 12, 1997).

Customers may be required to substantiate their request by providing copies of all mailing statements for the appropriate postal fiscal year. All decisions of the Manager, Mail-order are final. A new section (246.715) is added to describe how mailers can qualify for volume discounts.

246.72 Payment Methods

246.721 Postage Meter, Permit Imprint, or Precanceled Stamps

Postage must be paid by postage meter, permit imprint, or mailer-precanceled stamps. Postage is computed on Form 3650, Postage Statement—International Surface Air Lift. Form 3650 is required for all ISAL mailings.

246.722 Piece Rate

The applicable per piece postage must be affixed to each piece (except M-bags. See 246.723) by meter or mailer-precanceled stamps, unless postage is paid by permit imprint. Mailers may use a permit imprint only with identical weight pieces unless authorized under the postage mailing systems in DMM P710, P720, or P730. All of the permit imprints for printed matter shown in exhibit 152.3 are acceptable.

246.723 Pound Rate

Postage for the pound rate portion must be paid either by meter stamp(s) attached to the finance copy of the postage statement or from the mailer's advance deposit account.

246.8 Weight and Size Limits

Any item sent by ISAL must conform to the weight and size limits for the types of printed matter described in 243 or for small packets in 263.

246.9 Preparation Requirements

246.91 Addressing

See 122.

246.92 Marking

Items must be endorsed with the appropriate markings as shown in 244.2 for printed matter and in 264.2 for small packets. For publishers' periodicals (Periodicals Mail), the imprint authorized under 244.211c(2) or 244.211c(3) may be used in place of the "PRINTED MATTER—PERIODICALS" endorsement. Individual items paid by meter postage or mailer-precanceled stamps must be endorsed "International Surface Air Lift" or "ISAL."

246.93 Sealing and Packaging

Printed matter must be prepared to protect the contents and permit easy inspection. If not contained in envelopes or wrappers, folded items must have the open edges secured by tape, tabs, or wafer seals of sufficient quantity and strength to keep the items from opening during postal handling.

246.94 Makeup Requirements for ISAL

246.941 Packaging the Following Guidelines Apply

a. General: All ISAL mail must be prepared in packages within sacks as appropriate. A package is defined as 10 or more pieces of mail to the same country or separation or 1 pound or more regardless of the number of pieces. Packages of letter-size mail pieces should be no thicker than approximately a handful of mail (4–6 inches). Packages of flat size mail may be thicker than 6 inches but must not weigh more than 11 pounds. Packages and sacks must be prepared and labeled as described below. All mail pieces in a package must be "faced" in the same direction (*i.e.*, arranged so that the addresses read in the same direction, with an address visible on the top piece). Pieces that cannot be bundled because of their physical characteristics may be placed loose in the sack.

b. Thickness Packages of letter-size mail should be no thicker than approximately a handful of mail (4 to 6 inches). Packages of flat-size mail may be thicker than 6 inches but must not weigh more than 11 pounds. Each package must be securely tied. Placing rubber bands around the length and then the girth is the preferred method of securing packages of letter-size mail. Plastic strapping placed around the length and then the girth is the preferred method of securing packages of flat-size mail.

a. Direct Country Packages. When there are 10 or more pieces or 1 pound or more to the same country, then such pieces must be prepared as a direct country package. If there is less than 11 pounds of mail to the same country, then the direct country package must be labeled with a facing slip showing the destination country or country separation. The facing slip must be placed on the address side of the top piece of each package in such a manner that it will not become separated from the package. The pressure-sensitive labels and optional endorsement lines used domestically for presort mail are prohibited for International Surface Airlift Mail.

b. Residual Packages. If there is not enough mail to prepare a direct country package (fewer than 10 pieces or less than 1 pound), the mail is considered residual mail. When there are fewer than 10 pieces to the same country, then such pieces should be combined in packages with other mail for countries within the same rate group that similarly have fewer than 10 pieces. Such mixed country packages must be labeled with a facing slip marked "Residual, Rate Group ____. The designated rate group (#1, #2, #3, or #4) must be inserted as appropriate. The facing slip must be placed on the address side of the top piece of each package in such a manner that it will not become separated from the package. The pressure-sensitive labels and optional endorsement lines used domestically for presort mail are prohibited for International Surface Airlift Mail.

(Exception: The 10 piece criterion is when there are fewer than 10 pieces to the same country which weigh more than 11 pounds. Such mail pieces should be packaged together as a direct country package and placed in a direct country sack. Pieces that cannot be packaged because of their physical characteristics may be placed loose in the sack.)

946.942 Sacking

Once packages of ISAL mail are prepared, the packages are then placed into one of three types of designated sacks:

a. Direct Country Sack. Prepare a direct country sack if there are at least 11 pounds of mail to the same country. The mail must be packaged and enclosed in a gray plastic ISAL sack and labeled to the country with Tag 155, Surface Airlift Mail. The maximum weight of a direct country sack must not exceed 66 pounds.

b. Mixed Country Package Sack. Prepare a mixed country package sack for those direct country packages where there is less than 11 pounds of mail to the same country. The mail must be packaged as direct country packages, identified with a facing slip showing the destination country or country separation, and enclosed in a green pouch labeled to the dropship ISAL service center. Tag 155, also must be attached to the sack. Prepare a mixed country package sack for each of the respective rate groups for which there is a direct country package and label as follows:

Rate group 1—AMC Kennedy—JFK 003
Rate group 2—AMC Miami 33159
Rate group 3—AMC San Francisco 941

VOL 63 ISS 16 JA 26 1998

Rate group 4—AMC Kennedy—JFK 003

c. Residual Sack. Prepare a residual sack for those packages of mail that contain fewer than 10 pieces or less than 1 pound of mail to any one country (residual packages). The mail must be packaged as residual packages, appropriately identified with a facing slip, and enclosed in a green pouch labeled to the dropship ISAL service center. Tag 155 also must be attached to the sack. The mailer must prepare a residual sack for each of the respective rate groups for which there is a residual package and label it as follows:

Rate group 1—AMC Kennedy—JFK 003
Rate group 2—AMC Miami 33159
Rate group 3—AMC San Francisco 941
Rate group 4—AMC Kennedy—JFK 003

246.943 Sack Labeling

Depending on the type of sack, labels are prepared as follows:

a. Direct Country Sack. For a direct country sack, use a gray plastic ISAL sack. Use Tag 155 to label each sack with the destination country's name. Mailers must complete four blocks on Tag 155:

1. To (Pour) Block: enter the name of the ISAL country foreign exchange office, its three-letter exchange office code, and the country's name. See Exhibit 246.71 for the name of the foreign exchange office and its three-letter exchange office code. As an example, for Ireland, this block will be as follows:

Dublin DUB Ireland

2. Customer Permit No. Block: Enter permit number.

3. Kg. Block: Enter the combined weight of the sack and its contents in kilograms (1 pound = 0.4536 kilogram).

4. Date Block: Enter date as shown on PS Form 3650, Postage Statement—International Surface Air Lift.

After completing the above items on Tag 155, attach it to the neck of the sack.

b. Mixed Country Package Sack. For a mixed country package sack, use a domestic green nylon pouch and label it to the appropriate dropship ISAL service center as follows:

Rate group 1—AMC Kennedy—JFK 003

Rate group 2—AMC Miami 33159

Rate group 3—AMC San Francisco 941

Rate group 4—AMC Kennedy—JFK 003

Labels are prepared as follows:

Content:

Line 1: Dropship ISAL Service Center
Line 2: ISAL DRX
Line 3: Mailer, Mailer Location

Example:

AMC KENNEDY—JFK
003
ISAL DRX
ABC COMPANY, NEW YORK, NY

For the mixed country package sack label, use Content Identification Number (CIN) 753.

In addition, use Tag 155 to label each sack with the appropriate drop ship ISAL service center. Mailers must complete four blocks on Tag 155:

1. To (Pour) Block: enter the name of the dropship ISAL service center and rate group:

AMC Kennedy—JFK 003
Rate Group 1

AMC Miami 33159
Rate Group 2

AMC San Francisco 941
Rate Group 3

AMC Kennedy—JFK 003
Rate Group 4

2. Customer Permit No. Block: Enter your permit.

3. Kg. Block: Enter the combined weight of the sack and its contents in kilograms. (1 pound = 0.4536 kilogram).

4. Date Block: Enter date as shown on Form 3650.

After completing the above items on Tag 155, attach it to the sack.

c. Residual Sack. For a residual sack, use a domestic green nylon pouch and label it to the appropriate dropship ISAL service center as follows:

Rate group 1—AMC Kennedy—JFK 003
Rate group 2—AMC Miami 33159
Rate group 3—AMC San Francisco 941
Rate group 4—AMC Kennedy—JFK 003

Labels are prepared as follows:

Content:

Line 1: Drop ship ISAL Service Center
Line 2: ISAL WKG
Line 3: Mailer, Mailer Location

Example:

AMC KENNEDY—JFK
003
ISAL WKG
ABC COMPANY, NEW YORK, NY

For the residual sack label, use CIN 754.

In addition, use Tag 155 to label each sack with the appropriate dropship ISAL service center. Mailers must complete three blocks on Tag 155:

1. To (Pour) Block: Enter the name of the drop ship ISAL service center and rate group:

AMC Kennedy—JFK 003
Rate Group 1

AMC Miami 33159
Rate Group 2

AMC San Francisco 941
Rate Group 3

AMC Kennedy—JFK 003
Rate Group 4

2. Customer Permit No. Block: Enter your 10-digit ISAL permit or customer identification number.

3. Kg. Block: Enter the combined weight of the sack and its contents in kilograms. (1 pound = 0.4536 kilogram).

4. Date Block: Enter date as shown on Form 3650.

After completing the above items on Tag 155, attach it to the sack.

246.944 Sack Separation

When presenting an ISAL shipment to the Postal Service, the mailer must physically separate the sacks of mail by type (direct, mixed, residual) and rate group (1, 2, 3, 4) at time of mailing.

246.945 Direct Sacks to One Addressee (M-bags) for ISAL

M-bags may be sent in the ISAL service to all ISAL destination countries. Weight, makeup, sacking, and sorting requirements must conform to part 245. Tag 158 must show the complete address of the addressee and the sender. Tags 155 and 158 must be attached securely to the neck of each sack. M-bags may not contain small packets.

246.95 Mailer Notification

Mailers who wish to mail shipments that weigh over 750 pounds but who are not eligible for direct shipment rates must notify the ISAL coordinator at the office of mailing at least 14 days before the planned date of mailing. Specific country information and weight per country must be provided. No prior notification is required for mailers with 750 pounds or less.

BILLING CODE 7710–12–P

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[IL150–1a; FRL–5951–6]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: U.S. Environmental Protection Agency (USEPA).

ACTION: Direct Final Rule.

SUMMARY: On August 20, 1997, Illinois submitted a variance to allow Marathon Oil to emit particulate matter in increased quantities from June 14, 1996, to September 5, 1996, to allow the company to defer repairs of its control equipment until a scheduled system shutdown. The submittal included modeling to indicate that the temporary emissions increase would not be expected to cause a violation of air quality standards. USEPA is approving this variance because air quality standards continue to be protected.

DATES: This action is effective on March 27, 1998 unless USEPA receives written adverse or critical comments by February 25, 1998. If the effective date is delayed, timely notice will be published in the **Federal Register**.

ADDRESSES: Comments should be sent to: J. Elmer Bortzer, Chief, Regulation Development Section, Air Programs Branch (AR–18J), United States Environmental Protection Agency, 77 West Jackson Boulevard, Chicago, Illinois 60604.

Copies of the State's submittal are available for inspection at the following address: (It is recommended that you telephone John Summerhays at (312) 886–6067, before visiting the Region 5 Office.) U.S. Environmental Protection Agency, Region 5, Air and Radiation Division (AR–18J), 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: John Summerhays, Regulation Development Section, Air Programs Branch (AR–18J), U.S. Environmental Protection Agency, Region 5, Chicago, Illinois 60604, (312) 886–6067.

SUPPLEMENTARY INFORMATION:

I. Background

The State's submittal addresses emissions at the Fluid bed Catalytic Cracking Unit (FCCU) at Marathon Oil Company's refinery in Robinson, in Crawford County, Illinois. The FCCU uses catalyst in particle form to convert heavier petroleum materials into lighter, more valuable products. At issue are the quantity of particles that may be emitted from this unit. The normal emission limit for this unit, according to an equation based on the weight of material input to the process under normal capacity operation, is about 84 pounds per hour. The variance requested by the company and granted by the State authorizes emissions of 450 pounds per hour for the relevant 3-month period.

The circumstances leading to the company's variance request involved discovery of evidence that emissions from the FCCU were exceeding the unit's limit and suggesting problems with the cyclones at the unit. Repair of the cyclones requires a month-long shutdown of the FCCU, which would dramatically reduce production of gasoline. The company argued that allowance to defer remedying the problems was needed to avoid undue hardship on the company, because immediate repair would be less efficient (due to difficulties of working on hot equipment in hot weather and due to reduced preparation for repairs) and would eliminate gasoline production for much of the peak driving season. The company sought the variance until the maintenance shutdown that was already scheduled for October 1996 (subsequently rescheduled to commence September 5, 1996).

II. Review of Submittal

Crawford County is designated unclassifiable for PM_{10}. Consequently, given that the variance would be a temporary relaxation of the State Implementation Plan (SIP), the principal review criterion is whether the variance has been demonstrated not to threaten continued attainment of the national ambient air quality standards (NAAQS).

The company provided limited modeling to demonstrate the impact of the variance. This modeling used the Industrial Source Complex Model to simulate potential impacts of the FCCU, using relevant plume release characteristics and using meteorological data from Terre Haute, Indiana. This modeling estimated the impact of 450 pounds per hour of emissions of total suspended particulate matter, which was assumed to include 13.5 percent or 60.75 pounds per hour of PM_{10} emissions. The estimate impact of these emissions was a peak 24-hour average PM_{10} impact of 1.8 micrograms per cubic meter ($\mu g/m^3$) and a peak annual average PM_{10} impact of 0.13 $\mu g/m^3$. These impacts are well below the 24-hour PM_{10} standard of 150 $\mu g/m^3$ and the annual PM_{10} standard of 50 $\mu g/m^3$.

An important issue not adequately addressed by the company was whether the addition of the FCCU impact to the impacts of other relevant sources would cause concentrations above the NAAQS. The State addressed this issue in part by examining PM_{10} air quality data at its nearest monitoring site, approximately 50 miles northwest, in Charleston, Coles County, Illinois. No exceedances had been recorded at this site. The State indicated that no other facilities with significant emissions were present near the facility, but the State did not address the impacts of other emission points within the Marathon refinery. Also, unfortunately, neither the company nor the State provided a copy of the inputs or outputs of the modeling or otherwise provided full details of the analysis, most notably with respect to switches used (e.g. for stack tip downwash). Nevertheless, it is reasonable to presume that any deviations from recommended approaches to these unaddressed issues would not change the general magnitude of FCCU's estimated impact.

USEPA in its review considered other readily available information. USEPA examined the concentrations observed at the Coles County monitoring site from 1994 to 1996, which included a peak 24-hour average of 47 $\mu g/m^3$ and a 3-year average of 18 $\mu g/m^3$. USEPA also examined concentrations in Vigo County, Indiana, approximately 45 miles to the north-northeast, where the highest 24-hour average concentration in 1994 to 1996 among several sites was 75 $\mu g/m^3$, and the highest 3-year average was 29 $\mu g/m^3$. USEPA further examined emissions data submitted by Illinois to the national emissions data base. This data base shows estimated plant total emissions of particulate matter of about 700 tons per year, or about 160 pounds per hour. Much of these emissions are from combustion sources (e.g. heaters); thus, a high fraction of the total particulate matter emissions will be PM_{10}. Also, plumes for these other units are likely to be hotter and higher than the FCCU plume. Therefore, it is reasonable to assume that complete modeling of the emissions of this facility would show impacts in the same order of magnitude as those found for the FCCU. Since the addition of even ten times the modeled FCCU impact to concentrations monitored at available monitoring sites is well below the air quality standards, it is reasonable to conclude that the emissions allowed under the variance requested by Marathon would not cause violations of the NAAQS.

Ordinarily, USEPA would expect the source or the State to provide a more thorough analysis of whether a requested variance might cause a violation of the NAAQS. However, special circumstances in this case give USEPA adequate assurances that the NAAQS will not be violated. First, and most importantly, a substantial attainment margin exists, such that attainment would likely be shown even if a more complete analysis of various aspects of this issue were to show substantially greater concentrations. Second, although the nearest monitors are relatively distant, the various locations are expected to encounter similar air quality as would be found near the Marathon facility. Third, the temporary nature of the variance means that emissions are potentially elevated for a much shorter period than the five years modeled, such that the likelihood of violations is reduced, which in a qualitative way supports a conclusion that the variance will not threaten attainment.

III. Today's Action

USEPA is approving the variance adopted by the Illinois Pollution Control Board on November 21, 1996, for the Marathon Oil Company refinery near Robinson, Illinois. This variance provides a temporary emissions limit of 450 pounds per hour for the FCCU at this facility.

A noteworthy characteristic of this variance is that the period for which the variance applies is wholly in the past. Therefore, aside from judging whether the variance is approvable, USEPA must also judge whether the variance warrants inclusion as a codified element of the Illinois SIP. USEPA is undertaking an effort to revise its presentation of SIPs in a manner that more clearly identifies the enforceable elements of each SIP. Part of this effort is to eliminate referencing of variances that have expired long ago and thus are no longer of interest. The variance for Marathon alters the limitation to be enforced for approximately three months in 1996 but has no effect on the current regulations governing emissions at this facility. Consequently, USEPA is not codifying the variance for Marathon as part of the Illinois SIP. Nevertheless, for USEPA enforcement purposes, the emissions limitation that applies to

VOL
63

26
1998
UMI

Marathon's FCCU for the June 14 to September 5, 1996, period is the limitation given in the State's variance rather than the otherwise applicable limitation in the State's regulations.

Nothing in this action should be construed as permitting, allowing or establishing a precedent for any future request for revision to any SIP. Each request for revision to the SIP shall be considered separately in light of specific technical, economic, and environmental factors and in relation to relevant statutory and regulatory requirements.

IV. Administrative Requirements

The Office of Management and Budget has exempted this regulatory action from Executive Order 12866 review.

Under the Regulatory Flexibility Act, 5 U.S.C. 600 *et seq.*, USEPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, USEPA may certify that the rule will not have a significant impact on a substantial number of small entities. This action affects a only one source and therefore does not affect a substantial number of small entities.

Under section 202 of the Unfunded Mandates Reform Act of 1995, USEPA must undertake various actions in association with any proposed or final rule that includes a Federal mandate that may result in estimated costs to state, local, or tribal governments in the aggregate; or to the private sector, of $100 million or more. This Federal action approves pre-existing requirements under state or local law, and imposes no new requirements. Accordingly, no additional costs to state, local, or tribal governments, or the private sector, result from this action.

Under section 307(b)(1) of the Act, petitions for judicial review of this action must be filed in the United States Court of Appeals for the appropriate circuit by March 27, 1998. Filing a petition for reconsideration by the Administrator of this final rule does not affect the finality of this rule for the purposes of judicial review nor does it extend the time within which a petition for judicial review may be filed, and shall not postpone the effectiveness of such rule or action. This action may not be challenged later in proceedings to enforce its requirements. (See Section 307(b)(2)).

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

48 CFR Part 1842

Miscellaneous Revisions to the NASA FAR Supplement Coverage on Contract Administration

AGENCY: National Aeronautics and Space Administration (NASA).

ACTION: Final rule.

SUMMARY: This is a final rule amending the NASA FAR Supplement (NFS) contract administration policy to update references to OMB Circulars and NASA internal guidance documents and to provide revised guidance on audit followup procedures.

EFFECTIVE DATE: January 26, 1998.

FOR FURTHER INFORMATION CONTACT:

Jack Horvath, NASA, Office of Procurement, Analysis Division (Code HC), (202) 358–0456.

SUPPLEMENTARY INFORMATION:

Background

NFS sections 1842.101 and 1842.7301 reference OMB Circulars A–88 and A–128. Both of these have been cancelled and replaced by OMB Circular A–133, and the NFS references are updated accordingly. Section 1842.102–70(b) provides guidance for NASA Centers on advising NASA Headquarters of changes in contract administration activity. This section is further clarified to indicate that NASA Center reports to Headquarters are required semiannually. Finally, changes are made to section 1842.7301 to include references to new NASA guidance documents and to clarify audit followup activities.

Impact

NASA certifies that this regulation will not have a significant economic impact on a substantial number of small business entities under the Regulatory Flexibility Act (5 U.S.C. 601 et seq.). This final rule does not impose any reporting or recordkeeping requirements subject to the Paperwork Reduction Act.

List of Subjects in 48 CFR Part 1842

Government procurement.

Tom Luedtke,

Deputy Associate Administrator for Procurement.

Accordingly, 48 CFR part 1842 is amended as follows:

1. The authority citation for 48 CFR part 1842 continues to read as follows:

Authority: 42 U.S.C. 2473(c)(1).

PART 1842—CONTRACT ADMINISTRATION

1842.101 [Amended]

2. In paragraph (a)(i) to section 1842.101, the phrase "OMB Circular No. 88" is revised to read "OMB Circular No. A–133".

3. In paragraph (a)(ii) to section 1842.101, "(Code HS)" is revised to read "(Code HK)".

1842.102–70 [Amended]

4. In section 1842.102–70, paragraph (b) introductory text is revised to read as follows:

1842.102–70 Review of administration and audit services.

* * * * *

(b) A summary, including a negative summary, of the Center's assessment shall be submitted by the procurement officer to the Headquarters Office of Procurement (Code HK) by not later than January 15 and June 15 of the fiscal year. The summary shall include—

* * * * *

1842.7301 [Amended]

5. Section 1842.7301 is revised to read as follows:

1842.7301 NASA external audit follow-up system.

(a) This section implements OMB Circular No. A–50, NASA Policy Directive (NPD) 1200.1, and NASA Procedures and Guidelines (NPG) 1200.1, "Management Accountability and Control, Audit Liaison, and Audit Follow-up", which provide more detailed guidance. Recommendations for external audits (OMB Circular No. A–133, Audits of States, Local Governments, and Non-Profit Institutions) shall be resolved by formal review and approval procedures analogous to those at 1815.406–171.

(b) The external audit followup system tracks up contract and OMB Circular No. A–133 audits where NASA has resolution and disposition authority. The objective of the tracking system is to ensure that audit recommendations are resolved as expeditiously as possible, but at a

maximum, within 6 months of the date of the audit report.

(c)(1) The identification and tracking of contract audit reports under NASA cognizance are accomplished in cooperation with the DCAA.

(2) Identification and tracking of OMB Circular No. A–133 audit reports are accomplished in cooperation with the NASA Office of the Inspector General (OIG) by means of a transmittal memorandum. A transmittal memorandum is sent by the OIG to the procurement officer of each NASA Center having an award (contract, grant, or other agreement) covered by the audit report. The transmittal memorandum will identify any significant audit findings.

(d)(1) All reportable contract audit reports are defined by Part 15, Section 6, of the DCAA Contract Audit Manual (CAM) shall be reported quarterly to the Headquarters Office of Procurement (Code HC); and

(2) Only OMB Circular No. A–133 audit reports involving the following shall be reported quarterly to Code HC:

(i) A significant management control issue; or

(ii) Questioned costs of $10,000 or more due to an audit finding (see Subpart E-Auditor, paragraph 510 of OMB Circular No. A–133).

(3) NASA contracting officers will maintain a dialogue with DOD Administrative Contracting Officers (ACO) who have been delegated activities on NASA contracts. A review will be conducted no less frequently than semiannually, and the status and disposition of significant audit findings will be documented in the contract file.

(e)(1) The terms "resolution" and "disposition" are defined in Appendix A of NPG 1200.1.

(2) The resolution and disposition of OMB Circular No. A–133 audits are handled as follows:

(i) Audit findings pertaining to an individual NASA award are the responsibility of the procurement officer administering that award.

(ii) Audit findings having a Governmentwide impact are the responsibility of the cognizant Federal agency responsible for oversight. For organizations subject to OMB Circular No. A–133, there is either a cognizant agency or an oversight agency. The cognizant agency is the Federal agency that provides the predominant amount of direct funding to the recipient organization unless OMB makes a specific cognizant agency for audit assignment. To provide for the continuity of cognizance, the determination of the predominant amount of direct funding will be based on the direct Federal awards expended in the recipient's fiscal years ending in 1995, 2000, 2005, and every fifth year thereafter. When there is no direct funding, the Federal agency with the predominant indirect funding is to assume the oversight responsibilities. In cases where NASA is the cognizant or oversight Federal agency, audit resolution and disposition is the responsibility of the procurement officer for the Center having the largest amount of direct funding, or, if there is no direct funding, the largest amount of indirect funding for the audited period. A copy of the memorandum dispositioning the findings shall be provided by each Center having resolution responsibility for the particular report to the Headquarters OIG office and Code HC.

RIN 2137–AD 05

Pressure Testing Older Hazardous Liquid and Carbon Dioxide Pipelines

AGENCY: Research and Special Programs Administration (RSPA), DOT.

ACTION: Confirmation of effective date of Direct Final rule.

SUMMARY: This document confirms the effective date of the amendments of the direct final rule which extends the time for compliance with the requirements for pressure testing of older hazardous liquid and carbon dioxide pipelines.

EFFECTIVE DATES: This document confirms January 20, 1998 as the effective date of the direct final rule, published on October 21, 1997, at 62 FR 54591.

FOR FURTHER INFORMATION CONTACT: Mike Israni, (202) 366–4571, e-mail: mike.israni@rspa.dot.gov, regarding the subject matter of this document, or the Dockets Unit (202) 366–4453, for copies of this document or other information in the docket.

SUPPLEMENTARY INFORMATION:

Background

On October 21, 1997, RSPA published a direct final rule (62 FR 54591) titled "Pressure Testing Older Hazardous Liquid and Carbon Dioxide Pipelines." In that rule, RSPA stated that if no adverse comments were received by December 22, 1997, it would publish a confirmation notice in the **Federal Register** by January 5, 1998, and if an adverse comment was received, RSPA would issue a notice to confirm that fact and would withdraw the direct final rule in whole or in part. The rule also stated that RSPA might then incorporate the adverse comment(s) into a subsequent direct final rule or might publish a notice of proposed rulemaking.

The Technical Hazardous Liquid Pipeline Safety Standards Committee (THLPSSC) met on November 18, 1997, in Houston, TX, to consider the extension of the time for compliance discussed in the October direct final rule. (The THLPSSC was established by statute to evaluate the technical feasibility, reasonableness, and practicability of proposed regulations.) The consensus of the THLPSSC was to support the direct final rule.

RSPA received one industry comment supporting RSPA's action on extension of time for compliance. Therefore, this document confirms new compliance dates for pressure testing older hazardous liquid and carbon dioxide pipelines as amended in the direct final rule effective January 20, 1998.

The new compliance dates are as follows:

—Before December 7, 1998, plan and schedule testing; or establish the pipeline's maximum operating pressure under § 195.406 (a)(5).

—Before December 7, 2000, pressure test each pipeline containing more than 50 percent by mileage of electric resistance welded pipe manufactured before 1970; and at least 50 percent of the mileage of all other pipelines; and

—Before December 7, 2003, pressure test the remainder of the pipeline mileage.

Issued in Washington, D.C. on January 21, 1998.

Richard B. Felder,

Associate Administrator for Pipeline Safety.

[Docket NHTSA–98–3342, Notice 1]

RIN 2127–AA43

Federal Motor Vehicle Safety Standards Rear Impact Guards; Rear Impact Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), Department of Transportation (DOT).

ACTION: Final rule; response to petitions for reconsideration; technical amendment; denial of petition to extend the effective date.

SUMMARY: On January 24, 1996, NHTSA published a final rule establishing an equipment standard for underride guards and a vehicle standard which requires the installation of guards meeting the equipment standard on the rear end of heavy trailers and semitrailers. In response to petitions for reconsideration, NHTSA is amending that final rule to: clarify the 100 mm (4 inch) height requirement for the horizontal member of an underride guard, explicitly exclude from having to meet the energy absorption requirements all cargo tank motor vehicles manufactured with rear end protection complying with the high strength requirements of 49 CFR part 178 (to protect hazardous material) that occupies the area specified for NHTSA's underride guard, and increase the acceptable range of force application rates during testing. The agency is also excluding pulpwood trailers from the application of the vehicle standard and denying a petition from the Truck Trailer Manufacturer's Association (TTMA) for an extension of the effective date of the final rule.

DATES: The amendments made by this rule will become effective on January 26, 1998. Petitions for reconsideration of this rule must be received no later than March 12, 1998.

ADDRESSES: Any petitions for reconsideration should refer to the docket number and number of this notice and be submitted in writing to: Administrator, National Highway Traffic Safety Administration, Room 5220, 400 Seventh Street, SW, Washington DC, 20590.

FOR FURTHER INFORMATION CONTACT: The following persons at the National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC, 20590:

For non-legal issues:
Dr. George Mouchahoir (Telephone: 202–366–4919) or Mr. Michael Huntley (202–366–0029), Office of Crashworthiness Standards

For legal issues:
Mr. Paul Atelsek, Office of the Chief Counsel (202–366–2992), e-mail: patelsek@nhtsa.dot.gov

SUPPLEMENTARY INFORMATION:

I. Background

On January 24, 1996, the National Highway Traffic Safety Administration (NHTSA) published a final rule promulgating two new Federal Motor Vehicle Safety Standards (FMVSS) to require upgraded rear impact guards (underride guards) on trailers and semitrailers (61 FR 2004).[1] The first standard (No. 223, *Rear impact guards*) specifies performance requirements for strength and energy absorption for the underride guards themselves. This standard also contains a configuration requirement that the horizontal cross member of the guard be at least 100 mm (4 inches) high at any point across the guard width.

As issued in January 1996, the standard requires testing the guards for strength by pushing with a 203 mm by 203 mm (8 inch by 8 inch) force plate at specified points along the horizontal member of the guard. The test continues displacing the force plate at a constant rate of between 1.0 and 1.5 mm/sec (0.04 and 0.06 inches/sec) in a forward direction, as the guard is oriented on the trailer, until the guard resists a specified force, or until 125 mm (5 inches) of displacement occurs. To pass, the guard has to resist the specified force within the first 125 mm (5 inches) of displacement.

The standard's test for energy absorption is conducted by applying a force in the same way as in the test for strength, but only at one specified test point. The force is recorded at least ten times per 25 mm (1 inch) of displacement until the 125 mm (5 inch) displacement is reached and the force plate is completely withdrawn from the guard. The guard energy absorption is calculated from a force vs. deflection diagram plotted using the recorded measurements. Only plastic deformation (permanent deformation) is counted toward meeting the required amount of energy absorption—elastic rebound of the guard does not count.

The second standard (No. 224, *Rear impact protection*) requires most new trailers and semitrailers with a Gross Vehicle Weight Rating of at least 4,536 kg (10,000 pounds) to be equipped with a rear impact guard meeting the requirements of the equipment standard. This standard also specifies requirements for the location of the horizontal member of the guard relative to the rear end of the trailer or semitrailer, including a requirement that the rearmost surface of the member be located no more than 305 mm (12 inches) forward of the trailer's rear extremity. Certain types of trailers, including pole trailers and "wheels-back" vehicles, are excluded from the application of this rule.

The January 1996 final rule on truck underride protection specified an effective date of January 26, 1998 and a March 11, 1996 deadline for receiving petitions for reconsideration on this rule.

II. Petitions for Reconsideration

NHTSA received five petitions for reconsideration of the final rule from companies in the trailer and semitrailer equipment and manufacturing industries. In addition, one letter was received from an insurance group.

The Insurance Institute for Highway Safety (IIHS) did not request any change to the rule. IIHS's letter sought to clarify what IIHS considered a misunderstanding (i.e., undercounting) on NHTSA's part regarding the potential number of lives saved as a result of the final rule. IIHS stated that this clarification was needed if the agency is to decide on future rulemaking actions on rear underride for single-unit trucks or side underride for large trucks. NHTSA has met with IIHS staff to discuss their views on how best to estimate potential lives saved, and made adjustments in its data collection efforts to improve the quality of its data on underride crashes. The letter was not labeled as a petition and will not be addressed further.

One of the petitioners was Rite-Hite Corporation which manufactures "dock locks," safety restraint equipment that is mounted on loading docks to secure trailers to the docks during loading and unloading. Rite-Hite requested that the agency modify the configuration and strength specifications of the guard to be compatible with its dock locks. It stated that the requirements of the final rule directly affect the ability of its dock locks to safely engage and hold trailers to the loading docks. The Rite-Hite loading dock device uses a hook that wraps around and over the rear protection guard to help prevent guards from riding up and over the restraining barriers, and to help prevent incidents that can result from trailer tip-over and landing gear collapse. Rite-Hite estimates that 100,000 of these dock locks currently exist.

Rite-Hite asked NHTSA to comment on the role of its final rule with regard to limiting civil tort liability. Rite-Hite states that some vehicle manufacturers and others in the industry consider the final rule to be the sole factor to be considered in designing underride guards. It requested that the agency clarify that compliance with the final rule does not by itself insulate any manufacturer of rear impact guards from all civil tort liability. It also urged NHTSA to state that guard and trailer manufacturers must also take into account other safety issues, such as loading dock uses of rear impact guards, in making appropriate and reasonable design choices that are consistent with the final rule.

Rite-Hite also petitioned for several changes to specific provisions of the final rule. It requested NHTSA to change the minimum cross sectional vertical height requirement in S5.1 of Standard No. 223, which currently specifies that "[t]he horizontal member of each guard shall have a cross sectional vertical height of *at least* 100 mm [4 inches] at any point across the guard width" (emphasis added). Some manufacturers are manufacturing guards with horizontal members that are 100 mm (4 inches) high on *both* the front and back sides of the horizontal member. Rite-Hite is concerned because the vehicle restraint may not engage properly in certain circumstances (e.g., abnormally high horizontal member, guard located forward of the rear extremity, poor alignment of the vehicle with the dock, and bumpers affixed to the horizontal member). It is also concerned that the restraint's warning light may not indicate the failure to engage without being modified.

To address this potential problem, Rite-Hite petitioned NHTSA to either: (1) Specify 4 inches as the maximum height, (2) change the regulatory language to restrict the height specification to the rear-facing side of the horizontal member, or (3) insert an interpretation that the existing language applies only to the rear-facing side of the horizontal member and an advisory that some vehicle restraint manufacturers recommend forward-facing surfaces be about 1.25 inches high.

Rite-Hite also requested NHTSA to modify S5.2.1 of Standard No. 223 to increase the minimum guard strength at location P2 (in the center of the guard, where Rite-Hite's dock locks attach). It stated that, because many vehicle restraints will provide 2–3 times more holding power than the guard strength requirement of the rule (50,000 N, or 11,240 lb), guard strength is not sufficient to withstand the forces encountered during premature trailer pull-out from loading docks. Therefore, Rite-Hite petitioned the agency to increase the minimum force at test point P2 (where dock locks typically attach) to approximately 150,000 N (33,370 lb).

Rite-Hite requested that the test procedures of S6.6 of Standard No. 223 be amended so the guard would have to meet similar strength requirements when pushed in a rearward direction (i.e., in the opposite direction from the striking vehicle) as it has to meet when it is pushed forward.

Rite-Hite requested that NHTSA delete the exclusion from Standard No. 224 for "wheels-back vehicles." These are vehicles on which the rear tires are fixed at a position within 305 mm (12 inches) of the rear extremity of the trailer. Rite-Hite suggested that there will be an increase of loading dock incidents without an underride guard to secure the rear of the trailer to the dock. It also argued that wheels-back vehicles with wide-spaced single tires and no underride guard would increase the chance of passenger compartment intrusion, presumably by allowing the striking vehicle to penetrate between the tires.

Rite-Hite also requested that the horizontal member of the guard, and of hydraulic guards in particular, not be permitted, as it currently is, to extend rearward of the rear extremity of the vehicle. The company is concerned about damage to the dock locks, the dock walls, the underride guard itself, and with the dock lock not properly engaging. It is also concerned that rear-extending guards will prevent the trailer from backing up flush with the dock, creating a gap between the trailer bed and the loading dock, even with a dock lock engaged. Rite-Hite states that this gap could cause loss of "lip purchase" of loading dock levelers on the bed of the trailer, and personal injury to loading dock employees. Rite-Hite also asked that NHTSA clarify that hydraulic guards must meet the dimensional and guard strength requirements for non-hydraulic guards.

To ensure adequate engagement with dock locks, Rite-Hite also requested that the horizontal member be restricted to a position no more than 2 inches forward of the trailer rear extremity, rather than the currently permitted 305 mm (12 inches).

Rite Hite wants the agency to specify a minimum horizontal guard member height of 457 (18 inches) above the ground. It is concerned that lower heights might not adequately engage the dock locks and might increase the chances of the guards being damaged by road surfaces and falling off.

Finally, Rite Hite requested NHTSA to prohibit a sloped surface on the forward side of the rear impact guard and require a vertical surface there instead. Rite Hite states that the sloping surface will depress all kinds of vehicle restraints designed to hold on to the underride guard, thus causing disengagement.

TTMA petitioned the agency to define "cargo tank motor vehicle" and make it clear that any vehicle so constructed would not have to meet the energy absorption requirements of the rule. It stated that the "present definition of a special purpose vehicle defines a cargo tank motor vehicle excluded by Standard No. 224 by its operational characteristics, namely, hazardous material held in transit, instead of by its construction characteristics." It noted that cargo tank motor vehicles are required by 49 CFR 178.345–8(d)[2] to have very strong rear end protection to protect the cargo tank and its piping in the event that another vehicle impacts it from the rear. TTMA argued that a manufacturer cannot design a guard to meet both the extreme rigidity requirements of 49 CFR 178.345–8(d) and the energy absorption (yielding) requirements of S5.2.2 of Standard No. 223.

Great Dane Trailers, Inc. (Great Dane) petitioned the agency to increase the permissible range of force application during the strength and energy absorption tests. It stated that the current requirement to maintain a constant rate of between 1 mm and 1.5 mm per second (60 mm and 90 mm per minute) "may require expensive and sophisticated equipment" and that the rate of displacement is not a significant indicator of the performance of the guard. Great Dane suggested changing the requirement to specify a rate that "averages not less than 1 mm and not more than 25 mm per second over each 25 mm of displacement."

Great Dane also requested that the minimum energy absorption test be amended to double the displacement of the horizontal member of the guard. Great Dane stated that its current guards do not respond by plastic deformation until 75 mm (3 inches) of displacement has been achieved, and that stopping the test at 125 mm (5 inches) of displacement, as currently specified,

[1] Although both trailers and semitrailers are equally affected by the rule, they will sometimes be referred to simply as "trailers" in the remainder of this document.

[2] These rules are administered by the Department of Transportation's Research and Special Programs Administration (RSPA).

VOL 63 ISS 16 JA 26 1998 UMI

will require it to weaken the guards to meet the requirements. Great Dane petitioned to displace the guard to 250 mm (10 inches), thus ensuring more plastic deformation of the guards and increasing the energy absorption to 2–3 times the desired minimum. Great Dane subsequently forwarded test data that it believed supported its request.

STRICK Corporation (STRICK), a trailer manufacturer, also expressed concern over the need to purchase expensive precision testing equipment to replace their current devices. In its testing, STRICK found it "impossible to determine the exact displacement for each and every second over the time of the test." STRICK petitioned to change the requirement from maintaining a constant rate of displacement between 1 mm and 1.5 mm per second band to a requirement of "displacement rate of the force is approximately constant over a time of 1 to 5 minutes". STRICK is basically requesting a slower force application (i.e., more time, which would be required with a slower pump) to reach the 125 mm (5 inch) required displacement. STRICK also argued that the "displacement requirement" in the final rule was inserted without adequate notice and represents a major change from the proposal.

Finally, James King & Co. (King) petitioned the agency to amend the rule to require that rear truck underride guards protect from damage the reflective conspicuity markings required by Standard No. 108, *Lamps, reflective devices, and associated equipment.* King has observed that few manufacturers have provided the protective measures that NHTSA had suggested that manufacturers could take (e.g., mounting the reflective material in a steel channel or placing small metal beads above and below the reflective stripe). As a result, King believes that, contrary to the agency's assumptions, the majority of markings are damaged after a short time in use. King did not suggest a particular solution.

III. Response to Petitions

NHTSA agrees with Rite Hite that mere compliance with NHTSA's vehicle safety standards does not insulate any guard or trailer manufacturer from civil liability. 49 U.S.C. 30103(e) explicitly states "[c]ompliance with a motor vehicle safety standard * * * does not exempt a person from liability at common law." NHTSA's standards are minimum standards that specify a floor, not a ceiling, for performance. They are intended to allow manufacturers flexibility in the selection of means of compliance. Designers of underride guards and trailer manufacturers that install them are free to consider the non-highway safety implications of their designs, including the functioning of the guards with existing dock locks.

The agency also agrees with Rite Hite that the standard currently does not specify where, within its longitudinal cross section, the horizontal member of the guard must have a vertical height of 100 mm (4 inches). Some guard manufacturers are apparently misinterpreting that provision as requiring a 100 mm (4 inch) height across the entire longitudinal cross section, from front to back.

However, this reading is more design restrictive than the agency intended, and is not necessary for safety purposes. The 100 mm (4 inch) minimum height is intended to assure adequate engagement with and crushing of the frontal vehicle structure by preventing "knife-edging" by a guard that is too thin. In the final rule, the agency concluded that this objective would be achieved by any guard with a 100 mm (4 inch) cross sectional height that is forward of the rear extremity by not more than 305 mm (12 inches). The requirement in S5.1 of Standard No. 223 for a cross sectional vertical height of 100 mm (4 inches) does not need to be met in any specific transverse vertical plane. The important relationship is the distance between the trailer rear extremity and the forwardmost point at which at least 100 mm (4 inches) of guard height would be engaged by a colliding vehicle.

Given the preceding statement, Rite Hite's proposed changes to the regulation would unnecessarily restrict guard configuration. For example, it would be too design restrictive to require that the 100 mm (4 inch) cross section be measured at the rearmost point on the horizontal member, as Rite Hite suggests. This would be equivalent to saying that the guard must have a 100 mm (4 inch) vertical face at the rear. Although this design is common and probably the best at assuring immediate engagement, some manufacturers might prefer to use tubular designs for the horizontal member. Tubular designs would not comply with Rite Hite's suggested amendment, because the rearmost surface would be a line rather than a 100 mm (4 inch) high plane. Nevertheless, a tubular horizontal member would assure adequate engagement. It would also be too design restrictive to require that the cross section be vertical. Some shapes without vertical transverse cross sections of the required height might provide superior engagement or crash dynamics. For example, some guards might be shaped with sloped rear surfaces to account for the guard pivoting during a crash. As long as the horizontal projection of the horizontal member on a vertical plane presents a 4-inch high profile, then the desired objective will generally be achieved.

The agency is concerned about the development of certain untested guard shapes, however. As previously stated, most current guard designs have a vertical face with a 100 mm (4 inch) minimum height at the first point of contact for an underriding vehicle. This configuration provided good protection for passenger vehicle occupants in the NHTSA's tests. The non-design-restrictive requirements should not imply encouragement of the development of horizontal members with convex cross sections at the rear. For example, some manufacturers might want to design guards with angular, or lens-shaped, cross sections to achieve better aerodynamic properties. The quality of engagement of such guard shapes with the underriding vehicle has not been evaluated.

The agency is also concerned that portions of the horizontal member necessary for adequate engagement might be located more than 305 mm (12 inches) forward of the vehicle's rear extremity. For example, on a guard with a 100 mm (4 inch) high tubular horizontal cross member whose rearmost surface is located the full 305 mm (12 inches) forward of the trailer rear extremity, a full engagement of the guard's horizontal member will not occur until it has advanced 305 mm (12 inches), *plus* the 25 mm (2-inch) radius of the tube. In some cases, engagement might come too late to prevent passenger compartment intrusion. The purpose of the requirement in S5.1.3 of Standard No. 224 regarding the location of the guard's rearmost surface is to assure that full engagement is achieved as early in the crash event as possible, but in any case before the passenger vehicle has penetrated more than 305 mm (12 inches) under the trailer. Therefore, NHTSA is amending S5.1 to require that the vertical height requirement be met by the horizontally projected height of the horizontal member of the guard on a transverse vertical plane, and that the guard manufacturer's installation instructions or procedures specify that the forwardmost part of the horizontal member necessary to meet this requirement must be located no more than 305 mm (12 inches) forward of the rear extremity of the vehicle.

The agency denies Rite-Hite's request to eliminate the wheels back vehicle exclusion in S3 of Standard No. 224, as it applies to the single-tire wheels back

trailers, because the agency does not have enough information on these vehicles at this time. However, NHTSA is concerned with the possibility that some smaller passenger vehicles could fit between the tires of these trailers. In this case, the passenger vehicle might advance past the rear extremity of the trailer by 305 mm (12 inches) before reaching the rearmost point on the rear tires, and then advance an additional distance approximately equivalent to the radius of these large tires, before contacting the axle. This distance, combined with the subsequent crush of the front end of the passenger vehicle, might allow passenger compartment intrusion. The agency appreciates Rite-Hite's concern about the lack of guards leading to an inability to engage dock locks. NHTSA notes that the rule does not prohibit "partial" guards in between the wheels of wheels back trailers. Manufacturers of excluded vehicles may install partial or full underride guards if they consider it essential to engage loading dock restraint devices.

NHTSA requested data from TTMA on trailers and semitrailers with single rear tires. TTMA was able to confirm that these vehicles exist and provided a picture of one, but had no further information on hand. The agency also has little information on these vehicles, their tire-to-tire spacing, or their uses. Therefore, NHTSA currently has insufficient information to determine whether the wheels back exclusion should continue to apply to these vehicles or whether partial guards might be appropriate. The agency is planning to begin collecting data within the National Automotive Sampling System starting in the summer of 1998 to define the scope of this potential problem. When NHTSA has gathered the appropriate information, it will consider whether a rulemaking is warranted to address the issue of single-tire wheels back vehicles.

NHTSA denies the remainder of Rite-Hite's requests. These requests appear to be intended to ensure that guards are required to be compatible withRite-Hite's particular dock lock design. Although NHTSA is also interested in ensuring the safety of loading dock workers, the requested changes all tend to restrict underride guard design and reduce manufacturer flexibility that NHTSA considers essential to the practicability of the rule. Not all trailers and semitrailers use loading docks. Further, NHTSA understands that there are dock lock designs that do not require underride guard design restrictions. If trucking companies want maximum compatibility with all types of dock locks, including Rite-Hite's, there is nothing in NHTSA's rule to prevent them from ordering, or to prevent manufacturers from designing, underride guards exactly as Rite-Hite suggests.

For the same reason that NHTSA is granting Rite-Hite's request to clarify that the cross-sectional vertical height requirement need not be met at the forward-facing surface of the horizontal member of the guard, the agency denies Rite-Hite's request to prohibit sloping surfaces or to require a maximum height of 1.25 inches on that surface. Because there are no vehicle safety benefits related to the shape and size of the forward-facing surface, it would be unnecessarily design restrictive to impose certain geometries or height requirements on that surface. Regardless of the geometry, Rite-Hite's petition indicates that manufacturers can adapt the forward-facing surface to be compatible with dock locks by attaching a ¾ inch metal bar to the bottom of the forward-facing surface. Standard No. 223 does not prohibit this approach.

The agency also denies Rite-Hite's request to modify S5.2.1 of Standard No. 223 to require the guard's strength at location P2 be increased to approximately 150,000 N (33,370 lb). A guard strong enough to withstand the forces encountered when drivers attempt to pull out while still locked to the dock is not necessary for crashworthiness. This request pertains to the strength of the guard in the opposite direction (i.e., rearward) from the one specified in the final rule. The rule specifies a minimum strength to withstand forces in the forward direction, such as would result from an underriding vehicle. The rule does not regulate the requested aspect of performance, and regulating it would not serve the purpose of the rule. For the same reasons, the agency denies Rite-Hite's request that S6.6 of Standard No. 223 be amended so there is a rearward direction force application test in addition to the specified forward direction test. NHTSA again notes that there is nothing in the rule to prevent guard manufacturers from designing guards as Rite-Hite suggests, with 150,000 N (33,370 lb) strength in the rearward direction.

The agency denies Rite-Hite's request to amend the language of S5.1.3 of Standard No. 224 to prohibit the horizontal member of the guard from extending rearward of the transverse vertical plane tangent to the rear extremity of the vehicle. NHTSA expects that manufacturers will not design, and trucking companies will not order, underride guards for uses that will damage loading docks, dock locks, loading dock levelers, and the guards themselves. NHTSA is aware of some trailer and semitrailer applications for which a guard extending rearward of the trailer rear extremity is useful. These applications do not use loading docks. In addition, rearward mounting is useful in preventing underride and passenger compartment intrusion by the rear of the passenger vehicle. The agency does not want to prohibit these benefits for the sake of regulating the unlikely occurrence of excessively rearward guard location. For the same reasons, Rite-Hite's request that "hydraulic guards not hinge rearward of the transverse vertical plane tangent to the rear extremity of the vehicle" is denied. NHTSA notes that hydraulic guards are already required to meet the same dimensional and strength requirements as non-hydraulic guards.

NHTSA denies Rite-Hite's request to prohibit positioning the guard more than 2 inches forward of the trailer rear extremity. This would eliminate nearly all of the fore-aft flexibility that the agency believes that manufacturers need in positioning their guards, merely because a distance more than 50 mm (2 inches) will not be compatible with Rite-Hite's restraint. NHTSA emphasizes that the final rule specified mounting the guard within a range of 305 mm (12 inches) or less, and as close to the rear extremity as practical. This requirement is probably sufficient to ensure that the vast majority of trailers and semitrailers are compatible with Rite-Hite's needs. Nearly all guards are currently being mounted flush with the trailer rear extremity. NHTSA does not believe that the final rule will change that practice. If a certain kind of guard is needed for safely docking with dock locks, trucking companies will presumably specify such guards in their orders for new vehicles. This would be an additional factor making change unlikely.

NHTSA denies Rite-Hite's request that S5.1.2 of Standard No. 224 be amended to prohibit mounting guards with the horizontal member lower than 457 mm (18 inches) from the ground. The possibility of guard damage, along with the extensive comments received from the public on ground clearance, were discussed at length in the preamble of the January 1996 final rule. The comments indicated that it would be impractical to mount the guards much lower than the maximum clearance of 560 mm (22 inches) anyway. The agency does not expect vehicle manufacturers to mount guards at heights at which the guards or the vehicles would be damaged due to operational restrictions (e.g., railroad crossings). In addition,

VOL 63 ISS 16 JA 26 1998 UMI

higher costs of lower guards and the difficulty of meeting the strength requirements at lower heights are additional factors that will keep most manufacturers from producing guards that are lower than the maximum height. Therefore, setting a minimum clearance requirement is unnecessary. Assuming manufacturers did want to produce them for uses with fewer operational restrictions, lower guards would be safer in a crash. NHTSA has no evidence that loose guards are falling off and creating a highway hazard. Regulation is not necessary in this area.

The agency agrees with TTMA that the current language of Standard No. 224's definition of "special purpose vehicle" might be interpreted to exclude cargo tank motor vehicles due to their operational use, rather than their construction characteristics. The rule defines special purpose vehicles as having "work-performing equipment (including any pipe equipment that would hold hazardous materials in transit * * *) that, while the vehicle is in transit, resides in or moves through the area that could be occupied by the horizontal member of the rear impact guard * * *" The phrase "that would hold hazardous materials" might, in the case of a cargo tank motor vehicle, imply that the exclusion depends on the intentions or subsequent actions of the purchaser of the cargo tank motor vehicle. Although manufacturers generally know that trailer owners willing to pay for a trailer certified to RSPA's standards are planning to transport hazardous materials, the manufacturer of a cargo tank motor vehicle should not be charged with the responsibility for determining what its use will be after it is out of the manufacturer's control.

Therefore, as the TTMA requested, the agency is deleting the phrase in the definition of special purpose vehicle that explicitly recognized pipe equipment that would carry hazardous material as work performing equipment. Piping that carries hazardous materials would still be considered work-performing equipment, as would any other piping that needs to occupy the area of the guard while the vehicle is in transit. However, piping carrying hazardous materials would probably not be located in such an exposed location, because RSPA's regulations (e.g., 178.345–8, 178.338–10) generally require that such piping be protected by RSPA's vehicle rear end protection device or rear bumper.[3]

The standard still needs to be revised to prevent conflict with RSPA's rule. The high strength requirements for cargo tank motor vehicle rear end protection devices or rear bumpers in RSPA's regulations are incompatible with NHTSA's energy absorption requirement. NHTSA intended to apply only the configuration and strength requirements, but not the energy absorption requirements, to vehicles meeting RSPA's requirements with rear-end protection device or rear bumpers in the area specified by NHTSA for the underride guard. NHTSA's strength requirements are far lower than RSPA's, so meeting NHTSA's strength requirements will not be a problem for hazardous materials cargo tank motor vehicles. The agency stated in the final rule (at 61 FR 2023) that:

> RSPA's rule for underride guards on hazardous materials tankers (49 CFR Part 178.345–8) is generally compatible with this rule, and this rule applies to hazardous materials tankers. However, to prevent any confusion as to the relationship between RSPA's rule and NHTSA's rule, this rule explicitly recognizes that piping that carries hazardous materials while in transit needs the special protection that is provided by RSPA's rule.

Explicitly recognizing vehicles with the pipe equipment in the area of the guard as special purpose vehicles did not capture within the exclusion all the vehicles that must be excluded. Any tanker built to conform to RSPA's regulations with a rear-end protection device or rear bumper in the area specified for NHTSA's underride guard cannot practically comply with NHTSA's energy absorption requirement, regardless of whether it has pipe equipment in the area of the guard or whether the pipe equipment passes through the area where the guard could be located.

Therefore, NHTSA is adding a paragraph to the Application section of Standard No. 224 explicitly excluding all cargo tank motor vehicles built to RSPA's standards, including insulated cargo tanks and tanks that carry compressed gases, from the requirement to meet the energy absorption requirements of S5.2.2 of Standard No. 223, if the rear-end protection device or rear bumper is in the area specified for NHTSA's underride guard.

The agency is stating the exclusion more broadly than the TTMA suggested. The TTMA petitioned to add a definition for a cargo tank motor vehicle, which referenced some (but not all) of RSPA's tanker specifications. In NHTSA's view, the benefits of energy absorption for the striking vehicle are outweighed by the additional danger to that and other vehicles from spillage of hazardous cargo, so that all tankers that might be carrying hazardous materials should be excluded from the energy absorption requirement. RSPA occasionally adds cargo tank motor vehicle specifications and may also add vehicle rear end protection device or rear bumper specifications to its regulations. If the rule referenced RSPA's regulations for every specific tanker and guard type, every change to the RSPA regulations would necessitate a corresponding change to Standard No. 224's application section. Due to the difficulty of coordinating interagency rulemakings and effective dates, the rule simply references the part of RSPA's regulations that specifies cargo tank motor vehicles and rear end protection devices or rear bumper requirements, and excludes from the energy absorption requirements of this rule all cargo tank motor vehicles that comply with that part and have a rear end protection device or rear bumper in the area specified for the underride guard. Any future changes by RSPA to its tanker guard requirements will likely be made to this part, and would be automatically incorporated by reference in Standard No 224.

The agency notes that this exclusion from the energy absorption requirements for RSPA guards on cargo tank motor vehicles applies only when the RSPA rear end protection device or rear bumper occupies the space specified for the horizontal member of the NHTSA guard and meets the configuration and strength requirements specified for the NHTSA guard. For example, many cargo tank motor vehicles have a rear end protection device or rear bumper located several feet off the ground. The guards on these trailers are not excluded from NHTSA's energy absorption requirement of Standard No. 223.

The requests of Great Dane Trailers and STRICK Corporation regarding the rate of force application in the tests for strength and energy absorption can be treated together. NHTSA agrees that changing the displacement rate requirements in S6.6(a) of Standard No. 223 to accommodate concerns about the practicability of the test procedure would not affect the intent of the rule or the determination of the guard's strength. The objective of the requirement is to assure that the guard is being tested quasi-statically because the specified test procedure is not a dynamic test.

The specified rate of displacement during force application (1.0 to 1.5 mm/s) may be narrow and too restrictive to accommodate slow-pumping force application equipment. NHTSA accepts Great Dane's and STRICK's assertions that new and expensive equipment would be required for those companies to achieve this rate. More powerful hydraulic pumps are required to achieve higher rates of displacement during the test, especially with stronger guards. The agency has no information on how powerful STRICK's pumps are, but NHTSA chose the quasi-static test procedure at least in part to accommodate small trailer manufacturers that presumably have less sophisticated equipment. For steel, the most common guard material, the rate of force application, within reasonable bounds, should not make a significant difference in the test results.

For reasons that seem inconsistent with the basis for their requests, both companies asked for an increase in the permitted displacement rate. The agency denies these requests. Great Dane requested an increase in the upper limit of the specified range from 1.5 mm/sec to 25 mm/sec, and STRICK requested an increase to 2.08 mm/sec. At a displacement rate of 25 mm/sec, a 125 mm (5-inch) test displacement would be completed in a very short duration of about 5 seconds. This is a very fast force application and conflicts with the intent of the rule to specify a quasi-static, not a dynamic, test procedure. Moreover, Great Dane's proposed rate of 25 mm/s would require high precision and sophisticated computer-controlled test equipment as well as powerful and efficient pumps—potentially representing upgraded equipment that both companies state they want to avoid. The agency notes that NHTSA's Vehicle Research and Test Center (VRTC) successfully performed its testing program for the subject final rule using manually-controlled test equipment with no special instrumentation. Less sophisticated equipment with lower pump capacity requires more, not less, test duration. The current upper limit on the rate of displacement during force application of 1.5 mm/sec is being retained. This should not present a problem for Great Dane or STRICK, because lower displacement rates can also be selected on more capable equipment.

Regarding the lower bound for displacement rate, the agency believes that 6.3 minutes is adequate time to achieve the required displacement without the need for sophisticated control equipment and powerful pumps. No petitioner has requested a longer period and, unless the agency is presented with evidence of a problem with this rate, it will consider longer periods as unnecessarily prolonging certification and compliance testing. As explained earlier, reasonably slower displacement rates will probably not make a significant difference in test results anyway. Therefore, NHTSA is granting part of STRICK's request and widening the specified displacement rate range to allow displacement rates as low as 0.33 mm/sec. Testing at this rate will allow a 125 mm (5 inch) test displacement to be achieved in a period of about six minutes.

The range of force displacement rate will now be specified in centimeters and minutes rather than in millimeters and seconds, i.e., as 2.0 cm/minute to 9.0 cm/minute. This range replaces the currently specified range of 1.0 to 1.5 mm/sec (6.0 to 9.0 cm/minute). The larger distance per time period is easier for most people to visualize. It is NHTSA's understanding that the displacement rate on most modern test equipment (and on all the equipment NHTSA would use for compliance testing) is controlled by a computer with a feedback system capable of quickly and automatically adjusting the displacement rate. However, for purposes of certification testing on non-computer controlled equipment, precise adjustment is impractical. Specifying the distance on a per-minute time scale will allow for practical adjustments of the rate of displacement within each minute. This change would result in a more practical test procedure and should not compromise the performance requirements of the rule. The language of section 6.6(a) of Standard No. 223 is changed accordingly.

The word "constant" has been eliminated from the test procedure as a modifier of the displacement rate. As Great Dane pointed out, the term "constant" is confusing because it is so absolute. The concept of tolerance, for purposes of compliance testing, has been introduced as explained below.

Normally, when NHTSA specifies a range in the test conditions of its standards, the equipment being tested is expected to meet the specified performance requirements when testing at any point within the range. In this case, the agency is allowing a broader range of displacement rates (with a significantly slower rate of displacement at the lower end of the range) than was allowed originally, to accommodate the manufacturers' desire to conduct certification testing with their existing equipment. Applying the usual procedure, NHTSA could test and expect compliance at any rate within the wider displacement rate range. However, this would have the effect of making it more, not less, difficult for manufacturers to certify compliance, because the same requirements would have to be met under a wider range of conditions. The agency notes again that tests within the new range of displacement rates should yield similar results to tests within the old range because the performance of most current guard materials is not rate sensitive even over this broader range of load application rates.

Because merely granting the petitioner's request would not achieve the petitioner's objective of making certification testing easier, NHTSA will allow the guard manufacturer to designate the displacement rate, within the range of 2.0 to 9.0 cm/minute, on which it based its certification. If compliance tests are conducted by the agency, the manufacturer's designated rate, plus or minus 10 percent, will be used. The practical effect of this is that the guard must comply at the designated rate as well as any rate within 10 percent above or below that rate. As noted above, having to maintain a "constant" designated displacement rate would make it practically impossible for the agency to conduct compliance testing. For the same reason, NHTSA will not attempt to duplicate during compliance testing the deflection/time curve that the manufacturer experienced during certification testing. As long as the agency stays within the 10 percent tolerance during the entire test, the compliance test will be valid. If the manufacturer, for whatever reason, does not designate a displacement rate, NHTSA may pick any rate within the specified range.

NHTSA denies Great Dane's request to amend the energy requirement to require twice as much displacement for the purpose of the energy absorption test. The petitioner stated that the "current limit of 125 mm will require guards which are weaker (less stiffness) be installed merely to meet the energy absorption level of 5650 J." This amendment would have the effect of allowing stiffer guards by displacing the guard 250 mm (10 inches) instead of 125 mm (5 inches) before measuring to determine whether the guard absorbed the minimum 5,650 joules (4,170 ft-lbs) of energy. The greater displacement would make it easier for the required plastic deformation of the guard to occur. However, the point of the energy absorption requirement is to *prevent*

[3] Both terms are used to refer to underride guard-type devices in RSPA's regulation. "Rear-end protection device" is used in 49 CFR 178.345, while "rear bumper" is used in 49 CFR 178.337 and 178.338. These terms are used below when discussing cargo tank motor vehicles, both to avoid confusion and to emphasize the different primary purpose they serve—protecting hazardous material in the tank, rather than protecting colliding vehicle occupants with crash protection.

VOL 63 ISS 16 JA 26 1998 UMI

overly stiff guards. It would enhance crash safety if manufacturers weaken guards that are too stiff, because this will allow a softer "crash pulse" for the colliding passenger vehicle by "riding down" the speed over a short distance during the crash.

Moreover, NHTSA notes that the data that Great Dane submitted in support of this request does not indicate that any change is needed in the standard. The test data provided by Great Dane show that the guards they tested displayed more than twice the required energy absorption when tested according to the current requirement of 125 mm (5 inches) of displacement.

Finally, the agency denies King's request to amend the final rule to include requirements that rear underride guards protect conspicuity markings from damage. The Federal Highway Administration (FHWA) has jurisdiction over trailers after the first sale for purposes other than resale and regulates the maintenance of required safety equipment. Section 393.11 of the Federal Motor Carrier Safety Regulations (FMCSRs) requires that commercial motor vehicles meet the requirements of Standard No. 108 in effect at the time the vehicle was manufactured (49 CFR 393.11). Since December 1, 1993, Standard No. 108 has required new trailers to meet conspicuity requirements. Accordingly, motor carriers are currently required under FHWA regulations to maintain the conspicuity treatments on these trailers. This includes maintaining the conspicuity treatment on the horizontal member of the underride guard.

On April 14, 1997, FHWA issued an NPRM (62 FR 18170) that would amend the FMCSRs at 49 CFR 393.11, *Lighting Devices and Reflectors*, to make certain that all motor carriers operating trailers subject to the FMCSRs are aware of their responsibility to maintain the conspicuity treatments in all locations required by Standard No. 108. However, FHWA requested comment on whether an exemption from the maintenance requirement for the tape on the underride guard should be provided due to practicability problems.[4] NHTSA has forwarded King's comment to FHWA for consideration. Irrespective of whether FHWA continues to require motor carriers to maintain the conspicuity treatment on the guards, NHTSA encourages manufacturers to design the treatment to be as durable as practicable to ensure that the safety benefits of applying the treatment to that location are realized.

If FHWA requires the conspicuity treatment on the horizontal member of the guard to be maintained, and sufficiently durable conspicuity treatments are not available, NHTSA assumes that manufacturers would design guards with channels or other protective features for the conspicuity treatment. There is nothing in Standard No. 223 that would prevent such designs. NHTSA will consult with FHWA on whether NHTSA rulemaking to mandate physical protection for conspicuity treatment is needed after FHWA completes its rulemaking.

IV. Response to TTMA Petition on Extension of Effective Date

In an April 18, 1997 letter, TTMA petitioned NHTSA to commence rulemaking to extend the effective date from January 26, 1998 to a date at least nine months after this response to the petitions for reconsideration is issued. It stated only that trailer manufacturers were reluctant to complete the designs of their guards and test these guards until the petitions were answered.

TTMA's petition for an extension of the effective date is denied. NHTSA does not see any reason why manufacturers can not complete and test their guard designs in the allotted time. Except for a few of Rite Hite's requests, all the petitions dealt with relatively minor issues of testing and clarification. Manufacturers should have been planning to comply with the rule as it was published in January of 1996.

The guards that will be required on January 26, 1998 are very similar to guards currently being produced. NHTSA made no amendments requiring configuration changes in its responses to the petitions. The change to the regulatory text relating to vertical cross-sectional height is basically a clarification of the current requirements. There were only two minor changes to the test procedures (allowing a more flexible force application rate and allowing the manufacturer to designate the force application rate on which it based its certification). These changes will make it easier for manufacturers to test the guards and to comply with the requirements. The guards that manufacturers will be required to produce after this rule is issued will be essentially the same guards that NHTSA required in the January 1996 final rule. NHTSA notes that the TTMA's Recommended Practice, "Rear Impact Guard and Protection" is virtually identical to the NPRM, except for the energy absorption requirement of Standard No. 223. This Recommended Practice is designated RP No. 92–94, and was originally issued in April of 1994 and revised in November of 1994. Apparently it has been adopted as an industry standard, so little reengineering should be necessary to meet Standard No. 223. Therefore, NHTSA believes that the manufacturers have had sufficient time to complete their designs prior to the January 26, 1998 effective date. A general extension is not warranted.

However, the agency will consider petitions for temporary exemption from Standard No. 224. The agency has received a number of these petitions from small-volume trailer manufacturers within the past few months. Under 49 CFR 555.6(a), a manufacturer whose yearly production is not more than 10,000 units may ask for a temporary exemption from a Federal motor vehicle safety standard for up to three years on the basis that compliance would cause it substantial economic hardship and that it has attempted in good faith to comply with the standard from which it has asked to be excused. Part 555 requires the agency to publish a notice in the **Federal Register** seeking public comment on each exemption petition before a decision can be made on such a request, and then publish a second notice either granting or denying the petition. NHTSA expects to issue final decisions on these petitions approximately three to four months after the date of submission of the petition.

V. Technical Amendment on Logging Trailers

The Application section (S3) of Standard No. 224 currently excludes "pole trailers" from the application of the rule. Pole trailers are trailers with a single, longitudinal telescoping pole, rather than a normal trailer chassis, connecting the front wheels to the back wheels. Pole trailers are predominantly used by the logging industry to transport logs. They spend a great deal of their time off-road at logging sites and on rough logging roads. NHTSA proposed to exclude these vehicles in the January 8, 1981 NPRM (46 FR 2139), stating:

> the proposed rule does not apply to pole trailers. The agency believes that requiring underride guards on such vehicles would provide little benefit to car occupants. Since the poles carried by these trailers normally overhang the back end of the vehicles for a considerable distance, the danger of underride is due not to the structure of the trailer but to the structure of the cargo.

This was not a controversial exclusion and it was retained in the 1992 Supplemental Notice of Proposed Rulemaking (SNPRM) and the 1996 final rule without comment.

Changes in the trailer design and in the logging industry since 1981 have led to a decline in the popularity of pole trailers and the emergence of "pulpwood trailers" to take their place. Pulpwood trailers are similar in use and structure to pole trailers, but they have more structure (often two poles or beams) connecting the front wheels to the back wheels. NHTSA has recently become aware, through an April 25, 1997 letter from Mr. Buck Ford, that some manufacturers of pulpwood trailers are deciding how to install underride guards to comply with the January 1996 final rule, but that other manufacturers are completely unaware of the rule. Pulpwood trailers are not currently excluded because they are not technically pole trailers. According to Mr. Ford, there may be a shortage of pulpwood trailers in 1998 due to few manufacturers being able to meet the requirements.

NHTSA intended to exclude all trailers that, like pole trailers, lack structure for attaching guards and that would carry loads likely to overhang the rear of the trailer substantially when it published the January 1996 final rule. Pulpwood trailers do not differ significantly from pole trailers in their construction or use. They also carry overhanging logs that would negate the value of the underride guard and operate on rough logging roads on which an underride guard would be a serious impediment. Due to the lack of controversy regarding the exclusion of pole trailers, and due to the lack of comment from pulpwood trailer manufacturers, the agency assumed that the language of the exclusion covered all trailers of this type.

Because this appears to have been an incorrect assumption, NHTSA is adding pulpwood trailers to the list of excluded vehicle types. This is being done by technical amendment because the agency's intent to exclude vehicles that carry this kind of load was clear from the 1981 NPRM's rationale for the exclusion. This technical amendment will also avoid a shortage of pulpwood trailers needed by the logging industry in 1998. NHTSA is adopting the pertinent part of the language contained in Standard No. 121, *Air Brake Systems*, which defines "pulpwood trailer" as "a trailer that is designed exclusively for harvesting logs or pulpwood and constructed with a skeletal frame with no means for attachment of a solid bed, body, or container * * *".

VI. Effective Date

The agency finds that there is good cause to make this rule effective immediately. These amendments do not impose any new requirements. Instead, they relieve some of the testing burden imposed on the manufacturers by the January 24, 1996 final rule. It will be slightly easier for manufacturers to test using the new load application rates specified in these amendments. These amendments also make it clear that pulpwood trailers are an excluded category of vehicle, and that cargo tank motor vehicles built to RSPA's standards with a rear-end protection device or rear bumper in the area specified for NHTSA's underride guard do not have to meet the energy absorption requirements of Standard No. 223. A delayed effective date would impose a needless compliance burden on the trailer industry, including many small businesses that manufacture trailers.

VII. Rulemaking Analyses and Notices

A. Executive Order 12866 (Federal Regulation) and Regulatory Policies and Procedures

This rulemaking action was reviewed under Executive Order 12866. The action has been determined to be "not significant" under Executive Order 12866 and under the Department of Transportation regulatory policies and procedures. The Final Regulatory Evaluation (FRE) for the January 1996 final rule describes the economic and other effects of that rule in detail.

The responses to these petitions for reconsideration and this technical amendment do not alter the costs or benefits of that rule significantly. They merely clarify the intended application of the rule and provide more flexibility in the test procedures. They do not change the requirements enough to significantly alter the performance or the price of rear underride guards. Therefore, a regulatory analysis is not warranted.

B. Regulatory Flexibility Act

NHTSA analyzed the potential impacts of the January 1996 final rule on small entities under the Regulatory Flexibility Act and certified that it would have a significant economic impact on a substantial number of small entities. NHTSA has described those possible impacts in the FRE to the January 1996 final rule, which was, in part, a regulatory flexibility analysis.

The responses to these petitions for reconsideration and this technical amendment slightly increase manufacturer flexibility in testing, but NHTSA certifies that the changes made by today's rule do not have a significant economic impact on a substantial number of small entities. Most of the changes are interpretations and clarifications of the existing language, not changes in requirements that impose new burdens. The changes in requirements are designed to make the guards easier for manufacturers, especially small businesses, to test their guards, not to change the guard performance. As a result, some businesses that otherwise would have had to buy sophisticated testing equipment or change their guard designs unnecessarily will not need to do so. Therefore, there will be no new significant impact on small businesses.

C. Executive Order 12612 (Federalism)

NHTSA has analyzed this rule in accordance with the principles and criteria contained in E.O. 12612, and has determined that this rule will not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

This rule makes only minor changes to the January 1996 final rule which had only minimal federalism implications. Nearly all States require underride protection guards for heavy trailers and semitrailers. Further, most states require that the guards meet certain configuration requirements, or that they be positioned in a certain location relative to the rear and sides of the vehicle. The January 1996 final rule will preempt State requirements for rear impact protection. However, the agency believes that federalism implications will be minor because the guards required by that final rule are not fundamentally different from those required by State law. Several States, including Michigan, North Carolina, New York, and New Jersey, already require trailers longer than 15 m (50 ft) to have guards with the configuration required by that rule. For practical purposes, the only effect that that rule will have in these States is to require the guards to be tested and certified for strength and energy absorption.

NHTSA believes that effective rear impact protection measures can be implemented only at the national level. Only vehicle manufacturers can produce trailers and semitrailers with improved rear impact protection. The improvements required by the January 1996 final rule will cause vehicle manufacturers and operators to incur costs that could affect their competitive

[4] "The [FHWA Notice of Proposed Rulemaking] does not, however, include an exemption to the requirement that motor carriers maintain the conspicuity material on the rear underride device. The agency requests comments from motor carriers on the durability of the conspicuity material located on the horizontal member of the rear underride protection devices. Commenters are asked to identify the specific types of trailers and operating conditions that they believe are associated with the durability problems cited in addition to providing color photographs of the damaged conspicuity materials." 62 FR 18172–73.

VOL 63 ISS 16 JA 26 1998 UMI

position if compliance were voluntary and attempted by some, but not all manufacturers. That rule applies uniformly to all manufacturers and will ensure that the competitive position of the manufacturers will not be significantly affected by the required safety improvements.

D. Preemptive Effect and Judicial Review

Under 49 U.S.C. § 30103(b), whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard. 49 U.S.C. § 30161 sets forth a procedure for judicial review of final rulemaking establishing, amending, or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceeding before parties may file suit in court. This final rule does not have any retroactive effect.

E. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (P.L. 96–511), there are no new requirements for information collection associated with this response to petitions for reconsideration and technical amendment.

List of Subjects in 49 CFR Part 571

Imports, Incorporation by reference, Motor vehicle safety, Motor vehicles, Rubber and rubber products, Tires.

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

In consideration of the foregoing, 49 CFR part 571 is amended as follows:

1. The authority citation for part 571 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117 and 30166; delegation of authority at 49 CFR 1.50

2. Sections S5.1 and S6.6(a) of 49 CFR 571.223 are revised to read as follows:

§ 571.223 Standard No. 223; rear impact guards

* * * * *

S5.1 *Projected Vertical Height.* The horizontal member of each guard, when viewed from the rear as it would be installed on a trailer pursuant to the installation instructions or procedures required by S5.5 of this standard, shall have a vertical height of at least 100 mm at each point across the guard width, when projected horizontally on a transverse vertical plane. Those installation instructions or procedures shall specify that the guard is to be mounted so that all portions of the horizontal member necessary to achieve a 100 mm high projected vertical height are located not more than 305 mm forward of the vehicle's rear extremity, as defined in S4 of 49 CFR 571.224, Rear Impact Protection. See Figure 1 of this section.

* * * * *

S6.6 *Force Application.*

* * * * *

(a) Using the force application device, apply force to the guard in a forward direction such that the displacement rate of the force application device is the rate, plus or minus 10 percent, designated by the guard manufacturer within the range of 2.0 cm per minute to 9.0 cm per minute. If the guard manufacturer does not designate a rate, any rate within that range may be chosen.

* * * * *

3. In § 571.224 section S3 is revised and section S4 is amended by adding a definition of *pulpwood trailer* and revising the definition of *Special purpose vehicle* to read as follows:

§ 571.224 Standard No. 224; rear impact protection

* * * * *

S3. *Application.* This standard applies to trailers and semitrailers with a GVWR of 4,536 kg or more. The standard does not apply to pole trailers, pulpwood trailers, special purpose vehicles, wheels back vehicles, or temporary living quarters as defined in 49 CFR 529.2.

If a cargo tank motor vehicle, as defined in 49 CFR 171.8, is certified to carry hazardous materials and has a rear bumper or rear end protection device conforming with 49 CFR part 178 located in the area of the horizontal member of the rear underride guard required by this standard, the guard need not comply with the energy absorption requirement (S5.2.2) of 49 CFR 571.223.

S4. *Definitions.*

* * * * *

Pulpwood trailer means a trailer that is designed exclusively for harvesting logs or pulpwood and constructed with a skeletal frame with no means for attachment of a solid bed, body, or container.

* * * * *

Special purpose vehicle means a trailer or semitrailer having work-performing equipment that, while the vehicle is in transit, resides in or moves through the area that could be occupied by the horizontal member of the rear underride guard, as defined by S5.1.1 through S5.1.3.

National Highway Traffic Safety Administration

49 CFR Part 571

[Docket No. NHTSA–97–3191; Notice 2]

RIN 2127–AF66

Federal Motor Vehicle Safety Standards; Occupant Crash Protection

AGENCY: National Highway Traffic Safety Administration (NHTSA), DOT.

ACTION: Final rule.

SUMMARY: This document amends the requirements for seat belts at forward-facing rear outboard seating positions of police cars and other law enforcement vehicles to facilitate the transporting of prisoners. It does so by permitting those belts to be equipped with manual adjustment devices instead of emergency locking retractors, and excluding them from requirements for the accessibility of belt latch plates, the simultaneous release of the lap and shoulder belt portions of a lap and shoulder belt, and the release of the latch mechanism at a single point. This action was initiated in response to a petition for rulemaking submitted by Laguna Manufacturing, Inc.

DATES: Effective Date: The amendments made in this rule are effective February 25, 1998.

Any petitions for reconsideration must be received by NHTSA no later than March 12, 1998.

ADDRESSES: Any petitions for reconsideration should refer to the docket and notice number of this notice and be submitted to: Administrator, National Highway Traffic Safety Administration, 400 Seventh Street, SW, Washington, DC 20590.

FOR FURTHER INFORMATION CONTACT: For technical information: Mr. John Lee, Light Duty Vehicle Division, Office of Crashworthiness Standards, NPS–11, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Telephone: (202) 366–4924. FAX number (202) 366–4329, Mr. Lee's e-mail address is: jlee@nhtsa.dot.gov, For legal information: Mr. Otto Matheke, Office of Chief Counsel, NCC–20, National Highway Traffic Safety Administration, 400 Seventh Street, SW., Washington, DC 20590. Telephone: (202) 366–5263. FAX number (202) 366–3820, Mr. Matheke's e-mail address is: omatheke@nhtsa.dot.gov.

SUPPLEMENTARY INFORMATION:

I. Background

A. Standard No. 208

Standard No. 208, Occupant Crash Protection, requires an integral Type 2 (lap and shoulder) safety belt assembly to be installed at all forward-facing rear outboard seating positions in passenger cars and other light vehicles. The standard also requires that each of these safety belt assemblies be equipped with an emergency locking retractor (ELR). The ELR allows the belt webbing to unwind from the spool when the belt user leans forward or to the side and rewinds it when the user leans back against the seat. However, in the event of a sudden stop or crash, the retractor locks up to prevent the spooling out of any more webbing.

This type of retractor serves several purposes. By providing a comfortable belt fit and allowing the belt user some freedom of movement, this type of retractor makes it more likely that the typical vehicle occupant will use safety belts. This is important because although almost all states require the use of seat belts, the decision to use a belt still depends on each person's willingness to buckle up. The ELR also reduces the likelihood of excessive slack in safety belts during use.

Standard No. 208 also requires that a seat belt must have a latch that is accessible in two different circumstances: (1) When the seat belt is not being worn and is stowed, and (2) when it is being worn. The latch must also release the lap belt and shoulder belt at a single point by a pushbutton action.

Law enforcement agencies in the United States typically use modified versions of conventional passenger cars and light trucks for patrol and other duties. These vehicles are certified by their original manufacturers as meeting the requirements of all applicable Federal motor vehicle safety standards. Although these vehicles are modified to meet the general needs of use in law enforcement, they are often subject to further modifications after they are purchased and before they are put into service. Typical modifications include the installation of a partition or barrier between the front and rear seats and replacement of the original rear seats with seats specifically designed for prisoner transport. Seats for prisoner transport must be resistant to damage by the occupant and should be designed so that they may be easily cleaned and disinfected if they become soiled with bodily fluids or other human effluents. As a result, standard rear seats in police vehicles may be removed and replaced with seats made from hard, damage resistant materials such as molded plastic or fiberglass. These seats are not only more damage resistant and easily disinfected, they also use less space inside the vehicle. Since the installation of a barrier between the front and rear seats may reduce space in the rear seat, the installation of specialized prisoner seating may provide greater room for rear seat occupants.

The installation of barriers and specialized seating systems may also require replacement of the safety belts originally supplied with the vehicle. The safety belts originally installed may be incompatible with the design of the prisoner transport seats. This may be because the prisoner transport seat places the occupant in a different position relative to the belts and belt anchorages installed during manufacture. The prisoner transport seat itself may, because of its geometry and design, change occupant dynamics in the event of a crash. In addition, barriers, which place an unyielding surface between the front and rear seats, may place a rear seat occupant in close proximity to a structure not in place when the original restraint system was designed. Under these circumstances, modification or replacement of the original belt system may be both necessary and desirable.

B. Petition for Rulemaking

Believing that the considerations governing the design of safety belts for use by prisoners being transported in police cars and other law enforcement vehicles are different from those applicable to safety belts for use by the general public, Laguna Manufacturing, Inc. submitted to NHTSA a petition for rulemaking requesting that Standard No. 208 be amended. Laguna sought an amendment that would provide greater flexibility to design safety belt systems that are better suited to limiting the movement of prisoners being transported in forward-facing rear outboard seating positions in these vehicles. That company argued that the requirement for an ELR is inappropriate for safety belt systems used by prisoners, since it allows too much slack, and thus too much freedom of movement, in non-emergency situations. This is because these retractors freely spool out webbing in those situations. Laguna stated that concerns about ELRs have led some police departments to refrain altogether from safety belting a prisoner and instead use a "hog tie restraint" and lay the prisoner down on the rear seat. As a result, the prisoner does not have any safety belt protection.

More specifically, Laguna requested that Standard No. 208 be amended to permit the use of a manual tightening system, instead of an ELR, for safety belts intended for use by prisoners. That company stated that such an amendment would afford the prisoner all of the crash protection provided by the standard for other occupants and only eliminate the necessity for providing a feature intended to provide comfort and convenience. Laguna argued that a prisoner who is handcuffed behind his/her back would be unable to fasten the safety belts. Therefore, in such a situation, a feature intended to provide comfort and convenience would not make the occupant more likely to fasten the safety belt. Laguna also noted that existing requirements in Standard No. 208 make the use of belts which fasten adjacent to the side of the vehicle, rather than near the center, difficult. Laguna argued that such belts would be desirable for police use. The company indicated that belts that fasten on the outside may be connected by an officer without requiring that the officer lean over or across a prisoner, thereby reducing the risk of injury to that officer by a violent prisoner.

In support of its petition, Laguna provided information about a special rear seat and safety belt system it has designed for police cars. The design includes two outboard integral lap and shoulder belt systems which use the same anchor point locations as conventional belt systems in the forward-facing rear outboard seats in current cars.

However, there are several significant differences between the Laguna belt system and a conventional safety belt system. First, the Laguna system includes a manual belt tightening system instead of an ELR. Second, the Laguna system uses two buckles instead of one. Third, the Laguna system reverses the permanent attachment points and the buckling points. The Laguna system is permanently attached at the anchorage where a conventional system is buckled and is buckled at the anchorages where the conventional system is permanently attached. The ends of the lap and shoulder belt portions of the conventional safety belt system are permanently attached to the outboard anchorages. The end of the lap

VOL 63 ISS 16 JA 26 1998 UMI

belt portion is permanently attached to the lower outboard anchorage and the end of shoulder belt portion is permanently attached to the upper outboard anchorage. The buckle is mounted at the anchorage near the center of the vehicle. As noted above, the permanent attachment points and buckling points are reversed for the Laguna system. The middle of the Laguna belt is permanently anchored at the anchorage near the center of the vehicle. The end of the lap belt portion buckles at the lower outboard anchorage and the end of the shoulder belt buckles at the upper outboard anchorage. When the belt is not in use, magnets attached to the lap and the shoulder belt portions of the Laguna belt are used to attach them to the steel safety cage used to separate the front and rear seats in police vehicles.

C. Notice of Proposed Rulemaking

After considering the issues raised by Laguna, NHTSA published a Notice of Proposed Rulemaking (NPRM) on June 13, 1995 (60 FR 31132) proposing that Standard No. 208 be amended to provide more flexibility with respect to the design and performance of safety belts installed at forward-facing rear outboard seating positions of law enforcement vehicles. The agency proposed two amendments: (1) That a manual tightening system, instead of an ELR, be permitted for those belts in law enforcement vehicles and (2) that safety belts installed at forward-facing rear outboard seating positions of these vehicles be excluded from a requirement that lap and shoulder belts must release at a single point. The agency also requested comments on requiring a warning label advising users of the rear seats that the belts must be tightened manually to provide a proper fit.

D. Public Comments

Comments were received in response to the June 13, 1995 NPRM from one prisoner seating manufacturer (AEDEC), fourteen law enforcement organizations, the Wisconsin Department of Transportation, the Chrysler Corporation and the Automotive Occupant Restraints Council (AORC). All but one of these commenters agreed with the agency's proposal to modify safety belt requirements for forward-facing rear outboard seating positions in law enforcement vehicles. In response to the agency's request for comments on labels, six commenters recommended that some type of label should be visible to non-prisoner occupants in the rear seating positions to remind them to manually tighten safety belts that are not equipped with retractors. The remaining commenters either opposed labeling or offered no comment.

The affirmative commenters generally agreed with the modifications presented in the NPRM. Three law enforcement organizations indicated that they transport prisoners in the front seat. One of these organizations recommended extending the applicability of the amendments to the front outboard passenger seating position. The Wisconsin Department of Transportation stated that the law enforcement agency should assume control of requiring re-installation of the original belts when a used law enforcement vehicle is sold to the general public. However, the Tennessee Department of Safety disagrees with requiring re-installation of the original belts. That Department claimed that re-installation could create a tremendous expense.

One commenter, AEDEC International Inc. (a prisoner safety seat manufacturer) strongly opposed the NPRM. AEDEC stated its concern that proposed changes in the requirements would inadvertently and unnecessarily diminish existing protection for prisoners found in Standard No. 208. AEDEC argued that the idea of the restraint belt originating from the center of the seat and extending to the outboard side of the seating position is old technology and had been long discarded for more workable arrangements similar to its own system, which uses a shoulder belt, but not a lap belt. As is the case with the system described by Laguna in its petition, the AEDEC system does not meet Standard No. 208. AEDEC also indicated that the proposals in the NPRM were narrow in scope and could be construed to be product specific, exclude competitive products and endorse outdated technology. AEDEC also stated that the proposed changes overlooked hazards to handcuffed prisoners seated in a conventional fashion. The company noted that seated prisoner restrained in the manner proposed by the amendments would have the handcuff of the prisoner's rearwardly cuffed hands exposed to the hard fiberglass seat. Prisoners seated in this fashion have, according to AEDEC, regularly sustained damage to the wrist. AEDEC recommended a two-year innovation period that would grant greater latitude to the law enforcement community in their use of rear seat prisoner restraints as well as an in-depth study of prisoner seating and restraints. If such a study is not undertaken, AEDEC urged that amendments be adopted allowing use of a retractor or a manual adjusting device or a combination of the two. In addition, AEDEC advocated allowance of a belt assembly consisting of a shoulder belt only and stated that consideration be given to measures to retard lateral movement of prisoners and provide relief for the pressure of the handcuff against the wrist.

II. Analysis of Public Comments

As noted above, AEDEC offered several comments voicing concern about the proposal contained in the NPRM. The company argued that the proposed amendments both endorsed outdated technology and were design specific. While AEDEC did not provide specific information on how adoption of the proposed rule embraced the use of outdated technology, NHTSA has concluded that the benefits of allowing greater design flexibility for prisoner safety belts outweigh any disadvantages. Elimination of the requirement that safety belts have retractors and allowing the use of manual adjusters could be said to be a technological step backward in the context of ordinary passenger cars. However, in the case of prisoner transport, a handcuffed occupant is unable to fasten a belt and would have to have a safety belt fastened and adjusted by another person. The handcuffed occupant is not going to be deterred from using a safety belt because it must be manually adjusted or must be fastened in two places. Similarly, accessibility of the latch mechanism is of lesser concern than is the case in other vehicles because the latch location is not as critical to the occupant's use of the safety belt. AEDEC also contended that the proposed rule was unduly design specific and would limit competing products and systems. NHTSA notes that the proposal and the final rule both allow the use of either manual adjustment or retractors on safety belts for police vehicles. In addition, the final rule also allows different latch designs to be used. NHTSA has concluded that this provides manufacturers with greater flexibility, not less, and is certainly less design specific than previous requirements.

AEDEC also contends that the proposed amendments, which retain existing requirements for Type 2 belts rather than allowing the use of a shoulder belt without a lap belt (a design used in AEDEC's product), are also design specific, favor the Laguna design, and increase the risk of handcuff induced injuries to seated prisoners. NHTSA has concluded that employment of a shoulder belt alone, rather than a lap and shoulder belt, might very well increase the risk of injury to seated

prisoners in the event of a crash. Prisoner transport seats are generally hard and unyielding. In comparison to upholstered seats, these seats increase the chance that an occupant may move both laterally and forward (i.e., submarining) in the event of a crash. Given the fact that an occupant moving forward is likely to contact the hard and stiff barrier between the front and rear seats, NHTSA concludes that elimination of the lap belt requirement would result in an increased risk of injury. While retention of the lap belt requirement may favor designs employing such belts, the agency concludes that such designs decrease the risk of injuries in the event of crash.

AEDEC also raised concerns regarding an injury mechanism known as handcuff neuropathy. Handcuff neuropathy apparently occurs when handcuffs are tightened to an extent that the peripheral nerves of the wrist are damaged. AEDEC argued that safety belts that hold a prisoner tightly against a rigid seatback when the prisoner's hands are secured behind his back by handcuffs may result in an increased risk of handcuff neuropathy. The agency has concluded, however, that the risk of handcuff neuropathy may not be properly addressed by safety belt design. Review of medical literature submitted by AEDEC indicates that handcuff neuropathy results from over-tightening of handcuffs rather than the use of safety belts to restrain a handcuffed prisoner in a vehicle. The agency also concludes that countermeasures for any such risk may be employed without requiring or allowing loose fitting safety belts. AEDEC itself has attempted to address this concern by molding the hard plastic seat of its prisoner transport system with recesses for the prisoner's arms.

AEDEC also urged the agency to conduct a two year study of prisoner restraints and transport and consider the adoption of a separate safety standard for prisoner restraints. NHTSA notes that such a study and the promulgation of an entirely new safety standard, are well beyond the scope of the proposal contained in the NPRM. The agency does, however, agree with AEDEC's suggestion that in lieu of conducting a study of prisoner transport restraint systems that manufacturers be given an opportunity to evaluate new designs. The amendments NHTSA is adopting in this final rule will provide manufacturers with an opportunity to innovate.

Six commenters, (Rhode Island State Police, Missouri State Highway Patrol, Pennsylvania State Police, Washington State Patrol, Tennessee Department of Safety, and the Illinois State Police), advocated that the agency require a warning label advising users of a rear outboard seat equipped with a manually adjusted belt that the belts must be tightened after they are fastened. The agency concurs with any reasonable measure that will promote belt use. NHTSA has concluded in this instance, however, that such warning labels would be superfluous. Prisoners being transported are regularly restrained for their own protection and the protection of the officers transporting them. In the case of non-prisoners who use the seating systems, NHTSA observes that one commenter indicated that such labels would not be necessary since proper operation of the belt systems could be addressed through internal policies and training. NHTSA has concluded that in those cases where belts used for prisoner transport are not equipped with retractors, the characteristics of these belts, which will differ markedly from standard safety belts, will be obvious to non-prisoner occupants. In view of these circumstances, the agency concludes that requiring a warning label for rear seat passengers, advising them to manually tighten belts equipped with manual adjusters, is unnecessary.

Two commenters, the Wisconsin Department of Transportation (DOT) and the Tennessee Department of Safety, took differing positions on whether law enforcement agencies should be required to re-install the original equipment belts prior to sale of a law enforcement vehicle. Wisconsin DOT argued that such re-installation should be required, while the Tennessee Department of Safety disagrees with requiring re-installation of the original belts. NHTSA strongly believes that any law enforcement vehicle should have its original restraint system re-installed prior to sale for civilian use. However, the agency does not have the authority to require law enforcement agencies to re-install the original restraint system.

III. Final Rule

As noted above, with the adoption of this final rule, NHTSA is amending Standard No. 208 as it applies to law enforcement vehicles to permit safety belts in such vehicles to be equipped with manual adjustment devices instead of emergency locking retractors, and excluding them from requirements for the accessibility of belt latch plates, the simultaneous release of the lap and shoulder belt portions of a lap and shoulder belt, and the release of the latch mechanism at a single point. The amendments will enhance safety for both law enforcement officers and prisoners. NHTSA believes that a restrained prisoner should be afforded the same or similar crash protection as non-prisoners. Modified seating and belt systems can increase law enforcement officer safety by reducing the need to reach across the prisoner to fasten the safety belt. These seating and belt systems will increase belt usage for prisoners.

Rulemaking Analyses and Notices

A. Executive Order 12866 and DOT Regulatory Policies and Procedures

NHTSA has considered the impact of this rulemaking action under E.O. 12866 and the Department of Transportation's regulatory policies and procedures. This rulemaking document was not reviewed under E.O. 12866, "Regulatory Planning and Review." This action has been determined to be "non-significant" under the Department of Transportation's regulatory policies and procedures. The amendments will not impose any new requirements but simply remove a restriction. There would be slight cost savings, on the order of $5.00 or less per belt system, associated with not being required to provide an emergency locking retractor. For the Laguna system, these cost savings would be offset by the costs associated with some of the special features of its belt system, i.e., the extra buckle and the magnets. NHTSA notes, however, that these special features would not be required by the standard. Therefore, the impacts of the amendments will be so minor that a full regulatory evaluation is not required.

B. Regulatory Flexibility Act

NHTSA has considered the effects of this final rule under the Regulatory Flexibility Act. I hereby certify that it will not have a significant economic impact on a substantial number of small entities. The final rule primarily affects motor vehicle manufacturers, since the majority of NHTSA Federal Motor Vehicle Safety Standards apply to motor vehicles rather than to motor vehicle equipment. Almost all motor vehicle manufacturers do not qualify as small businesses.

The Small Business Administration's regulations define a small business, in part, as a business entity "which operates primarily within the United States." (13 CFR 121.105(a)) SBA's size standards are organized according to Standard Industrial Classification Codes (SIC). SIC Code 3714 "Motor Vehicle Parts and Accessories" has a small business size standard of 750 employees or fewer.

VOL 63 ISS 16 JA 26 1998 UMI

The agency notes that there are several manufacturers of equipment for police and emergency vehicles with fewer than 750 employees. The principal impact of the amendments contained in this final rule is to allow the installation of specialized prisoner restraint systems in emergency vehicles prior to the sale of the vehicle to the first purchaser for purposes other than resale. This provides the opportunity for the manufacturers to sell these systems to vehicle manufacturers or dealers rather than directly to end users. As the rule does not impose any new burdens on manufacturers of prisoner restraint systems and allows greater opportunities, the economic effect for these small businesses would be beneficial.

C. Paperwork Reduction Act

In accordance with the Paperwork Reduction Act of 1980 (Pub. L. 96–511), there are no requirements for information collection associated with this rule.

D. National Environmental Policy Act

NHTSA has also analyzed this rule under the National Environmental Policy Act and determined that it does not have a significant impact on the human environment.

E. Executive Order 12612 (Federalism)

NHTSA has analyzed this rule in accordance with the principles and criteria contained in E.O. 12612, and has determined that the rule does not have significant federalism implications to warrant the preparation of a Federalism Assessment.

F. Civil Justice Reform

This rule will not have any retroactive effect. Under 49 U.S.C. 30103, whenever a Federal motor vehicle safety standard is in effect, a State may not adopt or maintain a safety standard applicable to the same aspect of performance which is not identical to the Federal standard, except to the extent that the state requirement imposes a higher level of performance and applies only to vehicles procured for the State's use. 49 U.S.C. 30161 sets forth a procedure for judicial review of final rules establishing, amending or revoking Federal motor vehicle safety standards. That section does not require submission of a petition for reconsideration or other administrative proceedings before parties may file suit in court.

List of Subjects in 49 CFR Part 571

Imports, Motor vehicle safety, Motor vehicles.

In consideration of the foregoing, 49 CFR part 571 is amended as follows:

PART 571—FEDERAL MOTOR VEHICLE SAFETY STANDARDS

1. The authority citation for part 571 of title 49 continues to read as follows:

Authority: 49 U.S.C. 322, 30111, 30115, 30117, and 30166; delegation of authority at 49 CFR 1.50.

2. Section 571.208 is amended by revising sections S7, S7.1.1.2, S7.1.1.3 and S7.2 to read as follows:

§ 571.208 Standard No. 208, Occupant Crash Protection.

* * * * *

S7. Seat belt assembly requirements. As used in this section, a law enforcement vehicle means any vehicle manufactured primarily for use by the United States or by a State or local government for police or other law enforcement purposes.

* * * * *

S7.1.1.2 (a) A seat belt assembly installed in a motor vehicle other than a forward control vehicle at any designated seating position other than the outboard positions of the front and second seats shall adjust either by a retractor as specified in S7.1.1 or by a manual adjusting device that conforms to § 571.209.

(b) A seat belt assembly installed in a forward control vehicle at any designated seating position other than the front outboard seating positions shall adjust either by a retractor as specified in S7.1.1 or by a manual adjusting device that conforms to § 571.209.

(c) A seat belt assembly installed in a forward-facing rear outboard seating position in a law enforcement vehicle shall adjust either by a retractor as specified in S7.1.1 or by a manual adjusting device that conforms to § 571.209.

S7.1.1.3 A Type 1 lap belt or the lap belt portion of any Type 2 seat belt assembly installed at any forward-facing outboard designated seating position of a vehicle with a gross vehicle weight rating of 10,000 pounds or less to comply with a requirement of this standard, except walk-in van-type vehicles and school buses, and except in rear seating positions in law enforcement vehicles, shall meet the requirements of S7.1 by means of an emergency locking retractor that conforms to Standard No. 209 (49 CFR 571.209).

* * * * *

S7.2 Latch mechanism. Except as provided in S7.2(e), each seat belt assembly installed in any vehicle shall have a latch mechanism that complies with the requirements specified in S7.2(a) through (d).

(a) The components of the latch mechanism shall be accessible to a seated occupant in both the stowed and operational positions;

(b) The latch mechanism shall release both the upper torso restraint and the lap belt simultaneously, if the assembly has a lap belt and an upper torso restraint that require unlatching for release of the occupant;

(c) The latch mechanism shall release at a single point; and;

(d) The latch mechanism shall release by a pushbutton action.

(e) The requirements of S7.2 do not apply to any automatic belt assembly. The requirements specified in S7.2(a) through (c) do not apply to any safety belt assembly installed at a forward-facing rear outboard seating position in a law enforcement vehicle.

* * * * *

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Notice of public hearing on proposed rulemaking.

SUMMARY: A public hearing is being held in response to industry requests to consider flooring the level of the basic formula price for the purpose of determining Class I and Class II prices through December 1998. Mid-America Dairymen, Inc., the proponent of the proposed amendment, has requested

VOL 63 ISS 16 JA 26 1998 UMI

that this issue be handled on an emergency basis.

DATES: The hearing will convene at 9:30 a.m. on February 17, 1998.

ADDRESSES: The hearing will be held at the Jefferson Auditorium, South Agriculture Building, 1400 Independence Avenue, S.W., Washington, D.C. 20250.

FOR FURTHER INFORMATION CONTACT: Constance M. Brenner, Marketing Specialist, Order Formulation Branch, USDA/AMS/Dairy Division, Room 2971, South Building, P.O. Box 96456, Washington, D.C. 20090–6456, (202) 720–2357, e-mail address Connie_M_Brenner@usda.gov.

SUPPLEMENTARY INFORMATION: This administrative action is governed by the provisions of sections 556 and 557 of Title 5 of the United States Code and, therefore, is excluded from the requirements of Executive Order 12866.

Notice is hereby given of a public hearing to be held at the Jefferson Auditorium, South Agriculture Building, 1400 Independence Avenue S.W., Washington, D.C. 20250, beginning at 9:30 a.m., on Tuesday, February 17, 1998, with respect to proposed amendments to the tentative marketing agreements and to the orders regulating the handling of milk in the New England and other marketing areas.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed flooring of the basic formula price, with the proposed amendments set forth hereinafter, and any appropriate modifications thereof, to the tentative marketing agreements and to the orders. In addition to considering the specific proposal submitted by Mid-America Dairymen, Inc. (now part of Dairy Farmers of America), testimony should be addressed as to whether the $13.50 level proposed or some alternative level would be more appropriate.

The proposed amendment, if adopted through December 1998, should be considered an interim action because the entire pricing structure of the Federal milk order program is under consideration as part of the Federal order reform process required by the 1996 Farm Bill.

Evidence also will be taken to determine whether emergency marketing conditions exist that would warrant omission of a recommended decision under the rules of practice and procedure (7 CFR 900.12(d)) with respect to the proposal. Since this proposal will be heard on an urgent basis, it is necessary to provide interested parties with less than 15 days notice of the public hearing to ensure that the proposed amendments, if found to be appropriate, will be effective as soon as possible.

Initial Regulatory Flexibility Analysis

Pursuant to the requirements set forth in the Regulatory Flexibility Act (RFA) (5 U.S.C. 601 *et seq.*), the Agricultural Marketing Service (AMS) has considered the economic impact of the proposed amendment on small entities and has prepared this initial regulatory flexibility analysis. The RFA provides that when preparing such analysis an agency shall address: the reasons, objectives, and legal basis for the anticipated proposed rule; the kind and number of small entities which would be affected; the projected recordkeeping, reporting, and other requirements; and federal rules which may duplicate, overlap, or conflict with the proposed rule. Finally, any significant alternatives to the proposal should be addressed. This initial regulatory flexibility analysis considers these points and the impact of this proposed regulation on small entities.

The cooperative association requesting the hearing observes that per capita milk production is declining in many states with the greatest declines in areas with high Class I utilization, that the number of dairy farms continues to decline at a rapid rate, and the milk-feed price relationships have dropped dramatically. The cooperative states that the price floor is needed to maintain productive capacity sufficient to meet current and anticipated future needs of milk for Class I and Class II uses.

After receiving a hearing request and determining that the proposed amendment would not violate the provisions of the Act and that the issues raised for consideration warrant a public hearing, AMS is authorized to hold a public hearing to consider adoption of the proposed amendment.

This Act seeks to ensure that, within the statutory authority of a program, the regulatory and informational requirements are tailored to the size and nature of small businesses. For the purpose of the Act, a dairy farm is a "small business" if it has an annual gross revenue of less than $500,000, and a dairy products manufacturer is a "small business" if it has fewer than 500 employees. For the purposes of determining which dairy farms are "small businesses," the $500,000 per year criterion was used to establish a production guideline of 326,000 pounds per month. Although this guideline does not factor in additional monies that may be received by dairy producers, it should be an inclusive standard for most "small" dairy farmers. For purposes of determining a handler's size, if the plant is part of a larger company operating multiple plants that collectively exceed the 500-employee limit, the plant will be considered a large business even if the local plant has fewer than 500 employees.

USDA has identified as small businesses approximately 80,000 of the 83,000 dairy producers (farmers) that have their milk pooled under a Federal order. Thus, small businesses represent approximately 96 percent of the dairy farmers in the United States. On the processing side, there are over 1,200 plants associated with Federal orders, and of these plants, approximately 700 qualify as "small businesses," representing about 55 percent of the total.

During August 1997, there were 524 fully regulated handlers, 134 partially regulated handlers and 111 producer-handlers submitting reports under the Federal milk marketing order program. This volume of milk pooled under Federal orders represents 69 percent of all milk marketed in the U.S. and 72 percent of the milk of bottling quality (Grade A) sold in the country. Producer deliveries of milk used in Class I products (mainly fluid milk products) totaled 45.5 billion pounds—43.5 percent of total Federal order producer deliveries. More than 200 million Americans reside in Federal order marketing areas—77 percent of the total U.S. population.

In order to accomplish the goal of imposing no additional regulatory burdens on the industry, a review of the current reporting requirements was completed pursuant to the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35). In light of this review, it was determined that this proposed amendment would have little or no impact on reporting, recordkeeping, or other compliance requirements because these would remain identical to the current Federal order program. No new forms have been proposed, and no additional reporting would be necessary.

This notice does not require additional information collection that requires clearance by the OMB beyond the currently approved information collection. The primary sources of data used to complete the forms are routinely used in most business transactions. Forms require only a minimal amount of information which can be supplied without data processing equipment or a trained statistical staff. Thus, the information collection and reporting burden is relatively small. Requiring the same reports for all handlers does not significantly disadvantage any handler that is smaller than industry average.

No other burdens are expected to fall upon the dairy industry as a result of overlapping Federal rules. This proposed rulemaking does not duplicate, overlap or conflict with any existing Federal rules.

To ensure that small businesses are not unduly or disproportionately burdened based on this proposed amendment, consideration was given to mitigating negative impacts. Flooring the BFP should not have any special impact on small handler entities. Handlers similarly located would be subject to the same minimum Class I prices, regardless of the size of their operations, and all handlers would be subject to the same minimum prices for Class II milk. Such handlers would also be subject to the same minimum prices to be paid to producers. These features of minimum pricing should not raise barriers to the ability of small handlers to compete in the marketplace. It is similarly expected that small producers would not experience any particular disadvantage to larger producers as a result of this proposed amendment.

Interested parties are invited to present evidence on the probable regulatory and informational impact of the hearing proposals on small businesses. Also, parties may suggest modifications of these proposals for the purpose of tailoring their applicability to small businesses.

Preliminary Cost-Benefit Analysis

To help fulfill the objectives of a Regulatory Impact Analysis, a preliminary cost-benefit analysis follows:

The BFP is used as the basis for establishing class prices paid by handlers for milk in all Federal order markets and varies month-to-month depending on market conditions for milk and milk products. The BFP is the average price paid for manufacturing grade (Grade B) milk in Minnesota and Wisconsin in the base month updated to the current month with a cheese-butter-nonfat dry milk product price formula. The Class I price is the BFP plus a Class I price differential that reflects the added value needed to attract milk to fluid milk processing plants, as well as the additional costs of producing and marketing milk for fluid use. As a result, Class I prices vary among markets, being generally higher in southern markets and lower in midwestern markets. The Class II price, like the Class I price, is based on the BFP with a differential of only thirty cents in all orders. The result of establishing a floor under the BFP for purposes of computing the Class I and II prices would be to maintain these prices at a level they otherwise might not reach.

Dairy producers are expected to fare about the same in 1998 as they did in 1997, according to recent estimates of the Dairy Interagency Commodity Estimates Committee (ICEC). The 1998 all-milk price was projected in November 1997 to be slightly lower than the 1997 all-milk price; $13.10 per hundredweight in 1998 compared with $13.35 in 1997. This preliminary analysis was based on the $13.10 estimate. However, the 1998 estimate was updated in January 1998 to $13.35. As a result, the actual impact of a floor under the BFP could be expected to be less than shown in this preliminary analysis. Further analysis will be based on more recent price estimates.

A BFP floor for computing Class I and II prices would apply only to the 70 percent of the milk marketed in the United States that is marketed under Federal milk orders. USDA's preliminary analysis indicated that flooring Class I and Class II prices with a $13.50 minimum BFP would increase the U.S. all-milk price by $0.40 to $0.50 per hundredweight. Prices to producers delivering to Federal order markets could increase by an average of $0.60 to $0.75 per hundredweight.

Producers delivering to markets with higher Class I use, such as the three Florida markets and the Southeast market, would benefit more (as much as $1.10–$1.30 per hundredweight) than those delivering to markets with lower Class I utilization. The attached table provides estimates of change in the all-milk prices for all Federal order markets, assuming BFP floors of $13.50 and $12.83 per hundredweight (the October 1997 BFP).

CHANGE IN THE ALL-MILK PRICE.—ALTERNATIVES FLOORING BFP AT $13.50 OR $12.83 FOR CLASS I AND CLASS II PRICING CALENDAR YEAR 1998

Marketing area	Change in all-milk price per hundredweight	
	$13.50 Floor	$12.83 Floor
New England	$0.20	$0.11
New York-New Jersey	.74	.40
Middle Atlantic	.81	.45
Carolina	1.28	.70
Louis.-Lex.-Evans	1.22	.67
Southeast	1.21	.66
Upper Florida	1.18	.64
Tampa Bay	1.28	.70
Southeastern Florida	1.30	.71
Michigan Upper Peninsula	1.13	.62
Southern Michigan	.90	.49
E. Ohio—W. Pennsylvania	.88	.48
Ohio Valley	1.14	.63
Indiana	1.20	.66
Chicago Regional	.29	.16
Upper Midwest	.26	.14
Iowa	.50	.27
Nebraska-Western Iowa	.64	.35
Eastern South Dakota	.93	.51
Central Illinois	1.09	.60
S. Illinois-E. Missouri	1.05	.57

VOL 63 ISS 16 JA 26 1998 UMI

CHANGE IN THE ALL-MILK PRICE.—ALTERNATIVES FLOORING BFP AT $13.50 OR $12.83 FOR CLASS I AND CLASS II PRICING CALENDAR YEAR 1998—Continued

Marketing area	Change in all-milk price per hundredweight	
	$13.50 Floor	$12.83 Floor
Southwest Plains	.75	.41
Eastern Colorado	.72	.39
Greater Kansas City	1.10	.60
Texas	.89	.48
New Mexico-West Texas	.42	.23
Southwestern Idaho-E. Oregon	.11	.06
Great Basin	.60	.33
Western Colorado	1.23	.67
Central Arizona	.65	.35
Pacific Northwest	.42	.23
Federal Order Average	.65–.75	.35–.45

In addition to increasing income to dairy producers, adoption of a BFP floor would also result in increased prices of fluid milk products to consumers. Increased Class I milk prices would be reflected in retail prices for fluid milk, which may result in reduced per capita consumption and an increase in total consumer expenditures for dairy products.

Legislative and Background Requirements

The amendments to the rules proposed herein have been reviewed under Executive Order 12988, Civil Justice Reform. They are not intended to have a retroactive effect. If adopted, the proposed amendments would not preempt any state or local laws, regulations, or policies, unless they present an irreconcilable conflict with this rule.

The Agricultural Marketing Agreement Act provides that administrative proceedings must be exhausted before parties may file suit in court. Under section 8c(15)(A) of the Act, any handler subject to an order may request modification or exemption from such order by filing with the Secretary a petition stating that the order, any provision of the order, or any obligation imposed in connection with the order is not in accordance with the law. A handler is afforded the opportunity for a hearing on the petition. After a hearing, the Secretary would rule on the petition. The Act provides that the district court of the United States in any district in which the handler is an inhabitant, or has its principal place of business, has jurisdiction in equity to review the Secretary's ruling on the petition, provided a bill in equity is filed not later than 20 days after the date of the entry of the ruling.

Request for Public Input

Interested parties who wish to introduce exhibits should provide the Presiding Officer at the hearing with 6 copies of such exhibits for the Official Record. Also, it would be helpful if additional copies are available for the use of other participants at the hearing.

List of Subjects in 7 CFR Parts 1001 through 1139

Milk marketing orders.

The authority citation for 7 CFR Parts 1001 through 1139 continues to read as follows:

Authority: 7 U.S.C. 601–674.

The proposed amendments, as set forth below, have not received the approval of the Secretary of Agriculture.

Proposed by Mid-America Dairymen, Inc.:

Proposal No. 1: Through December 1998, amend the introductory text of § ____.51 of 7 CFR Parts 1001 through 1139 to read as follows:

§ ____.51 Basic formula price.

* * * For the purpose of computing the Class I and Class II prices, the resulting price shall be not less than $13.50.

* * * * *

Proposed by Dairy Programs, Agricultural Marketing Service:

Proposal No. 2: Make such changes as may be necessary to make the entire marketing agreements and the orders conform with any amendments thereto, that may result from this hearing.

Copies of this notice of hearing and the orders may be procured from the Market Administrator of each of the aforesaid marketing areas, or from the Hearing Clerk, Room 1083, South Building, United States Department of Agriculture, Washington, D.C. 20250, or may be inspected there.

Copies of the transcript of testimony taken at the hearing will not be available for distribution through the Hearing Clerk's Office. If you wish to purchase a copy, arrangements may be made with the reporter at the hearing.

From the time that a hearing notice is issued and until the issuance of a final decision in a proceeding, Department employees involved in the decisionmaking process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For this particular proceeding, the prohibition applies to employees in the following organizational units:

Office of the Secretary of Agriculture

Office of the Administrator, Agricultural Marketing Service

Office of the General Counsel

Dairy Programs, Agricultural Marketing Service (Washington office) and the Offices of all Market Administrators.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Dated: January 21, 1998.

Enrique E. Figueroa,

Acting Administrator, Agricultural Marketing Service.

[Docket No. 97–093–1]

RIN 0579–AA90

Interstate Movement of Sheep and Goats From States That Do Not Quarantine Scrapie Infected and Source Flocks

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: We are soliciting public comment to help us develop options for potential changes to our regulations for the interstate movement of sheep and goats. We believe changes may be necessary to improve control and limit the spread of scrapie, a serious disease of sheep and goats. After evaluating public comment on the issues presented in this notice, we will determine whether proposing changes to our regulations is necessary.

DATES: Consideration will be given only to comments received on or before March 27, 1998.

ADDRESSES: Comments may be submitted as paper copies or through the World Wide Web. If you submit paper copies, please send an original and three copies of your comments to Docket No. 97–093–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 97–093–1. We encourage the submission of copies through the World Wide Web, since this both facilitates our analysis of the comments and allows us to make the text of comments available to the public via the Internet. The Web page address for comments on this proposed rule is http://www.aphis.usda.gov/ppd/scrapie. This Web page also contains copies of the proposed rule in several formats and links to related information. Please be sure to include your full name and organization in any comments you submit via the Web. If your Web comment is a duplicate of a paper copy you have submitted, please state this in the first line of your Web message. Both paper and Web comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. Joseph VanTiem, Senior Staff Veterinarian, National Animal Health Programs, VS, APHIS, 4700 River Road Unit 46, Riverdale, MD 20737–1231, (301) 734–7716.

SUPPLEMENTARY INFORMATION:

Background

Scrapie is a degenerative and eventually fatal disease affecting the central nervous systems of sheep and goats. Its control is complicated because the disease often has an extremely long incubation period without clinical signs of disease, and because there is no validated live-animal test for the disease.

Scrapie is the prototype of the group of diseases known as the transmissible spongiform encephalopathies (TSEs). These diseases are caused by a transmissible agent which is yet to be fully characterized. TSEs share the following common characteristics:

- A prolonged incubation period of months or years;
- A progressive debilitating neurological illness that is always fatal;
- When examined by electron microscopy, detergent treated extracts of brain tissue from animals or humans affected by these diseases reveal the presence of scrapie associated fibrils;
- Pathological changes are confined to the central nervous system and include vacuolation, astrocytosis, and glyosis. Amyloid plaques may be seen, especially in mice and hamsters; and
- The transmissible agent elicits no detectable specific immune response in the host.

Several recent scientific findings are relevant to the understanding and control of scrapie. While there is still no validated live animal test for scrapie, a recent study conducted in The Netherlands (Schreuder *et al.*, 1996) indicates that immunohistochemical analysis of tonsil samples may be useful in detecting scrapie in sheep prior to the onset of clinical signs. The Animal and Plant Health Inspection Service (APHIS) is currently completing a pilot study to harvest various tissues (tonsil, head lymph nodes, and brain) from mature sheep at slaughter and then test them using immunohistochemistry to ascertain if the partially protease-resistant form of the prion protein (PrPsc—the protein associated with scrapie) may be routinely detected in the preclinical animal. If this proves to be an effective method of surveillance, it may prove useful as a screening tool and facilitate tracebacks to infected flocks.

In addition to the possibility that a validated live-animal test for scrapie may be developed, genetic studies have yielded a greater understanding of the role of specific genes in determining the incubation period of scrapie in sheep. However, there is still much to be determined about the role of genetics in scrapie susceptibility. A key question is whether certain genotypes fully prevent scrapie infection, or merely protect against clinical manifestation in an animal while possibly allowing the animal to serve as a carrier of scrapie.

While these advances may come to significantly affect the control of scrapie, current control programs rely largely on postmortem diagnosis of scrapie, traceback of animal movements, and certification of flocks' scrapie status based on monitoring the flock for scrapie over a period of years.

Current APHIS initiatives concerning scrapie include interstate movement regulations in 9 CFR part 79, which restrict the interstate movement of certain sheep and goats in order to help control the spread of scrapie, and the Voluntary Scrapie Flock Certification Program (the Voluntary Program), described in regulations in 9 CFR part 54 and in a program standards document entitled "Uniform Methods and Rules—Voluntary Scrapie Flock Certification" (UM&R), which is available at http://www.aphis.usda.gov/vs/scrapie/umr. A hard-copy of the UM&R may be obtained by contacting the individual listed under **FOR FURTHER INFORMATION CONTACT.**

APHIS worked with industry to develop the Voluntary Program, under which participating flocks follow strict identification, recordkeeping and other requirements and may eventually be certified free from scrapie. If a flock that is participating in the Voluntary Program is identified as an infected flock or source flock, it is removed from the program until the flock completes a flock plan. The flock plan calls for an epidemiologic investigation to remove high-risk animals from the flock and includes other conditions, such as cleaning and disinfection of flock premises, educating flock personnel in techniques to recognize clinical signs of scrapie and control its spread, and maintaining records of animals in the flock.

The regulations in part 79 also restrict the interstate movement of scrapie-positive sheep and goats, and sheep and goats from scrapie infected and source flocks. The regulations impose minimal restrictions on the interstate movement

VOL 63 ISS 16 JA 26 1998 UMI

of animals [1] under 1 year of age destined for slaughter and animals marked on the jaw with a 1-inch letter "S." Other animals from scrapie infected and source flocks may be moved interstate under requirements that limit the further spread of scrapie and make it feasible to trace back the movements of animals that are later diagnosed with scrapie. These requirements include:

- The owner of the flock or his or her agent has signed an agreement with the Administrator in which the owner of the flock or his or her agent agrees to comply with the requirements of 9 CFR 79.2 until the time the flock is no longer an infected flock or source flock.
- The owner of the flock or his or her agent shall immediately report to a State representative, APHIS representative, or an accredited veterinarian any animals in the flock exhibiting the following: weight loss despite retention of appetite; behavioral abnormalities; pruritus (itching); wool pulling; biting at legs or side; lip smacking; motor abnormalities such as incoordination, high stepping gait of forelimbs, bunny hop movement of rear legs, swaying of back end; increased sensitivity to noise and sudden movement; tremor, "star gazing," head pressing, recumbency, or other signs of neurological disease or chronic wasting illness. Such animals must not be removed from the flock without written permission of an APHIS representative or State representative.
- The owner of the flock or his or her agent shall identify all animals 1 year of age or over within the flock. All animals less than 1 year of age will be identified when a change of ownership occurs, with the exception of those moving within slaughter channels. The form of identification shall be an electronic implant, flank tattoo, or ear tattoo, providing a unique identification number that may be applied by the owner of the flock or his or her agent in accordance with instructions by an APHIS representative, State representative, or an accredited veterinarian.
- The owner of the flock or his or her agent shall maintain, and keep for a minimum of 5 years after an animal dies or is otherwise removed from a flock, the following records for each animal in the flock: The animal's individual identification number from its electronic implant, flank tattoo, or ear tattoo, and any secondary form of identification the owner of the flock may choose to maintain; sex; breed; date of acquisition and source (previous flock), if the animal was not born in the flock; and disposition, including the date and cause of death, if known, or date of removal from the flock.
- The owner of the flock or his or her agent shall allow breed associations and registries, livestock markets, and packers to disclose records to APHIS representatives or State representatives, to be used to trace source flocks and expose animals.
- The owner of the flock or his or her agent shall make animals in the flock and records required to be kept under paragraph (a)(2)(iv) of 9 CFR 79.2 available for inspection by APHIS representatives and State representatives, given reasonable prior notice.
- Upon request of an APHIS representative, the owner of the flock or his or her agent will have an accredited veterinarian collect and submit tissues from animals reported in accordance with paragraph (a)(2)(ii) of 9 CFR 79.2 to a laboratory designated by an APHIS representative.

However, part 79 applies only when flock owners wish to move sheep interstate. Part 79 does not restrict the *intrastate* movement of animals from infected and source flocks, and such movement may spread scrapie to other animals in a State. If these other animals, which are not subject to the restrictions in part 79, then move interstate, scrapie could be spread interstate.

Therefore, there is a risk that scrapie infection that originated in an infected or source flock could spread interstate despite part 79. This risk is very low where State authorities have imposed quarantines on infected and source flocks that keep animals in these flocks from contact with other animals. The risk is higher in States that do not quarantine scrapie infected and source flocks.

APHIS does not have statutory authority to require intrastate movement restrictions for sheep and goats (unless the Secretary has declared an extraordinary emergency). However, APHIS does have statutory authority to restrict the interstate movement of animals from a State if intrastate movement practices result in a threat of spreading disease interstate. We are seeking public input on whether and how APHIS should restrict the interstate movement of animals from States that do not quarantine infected and source flocks.

We are examining current interstate movement restrictions both to ensure effective domestic control of scrapie and to ensure that our domestic interstate restrictions are consistent with our requirements for importing sheep and goats. The World Trade Organization principles of "national treatment" and "transparency" state that regulations shall be applied without discrimination between domestic and imported consignments, and that countries shall make available to trading partners the rationale of their requirements. Our current regulations for importing sheep and goats use equivalency with the Voluntary Program to qualify certain animals for import (see 9 CFR 93.435), and we wish to ensure consistency between our import requirements and our interstate movement requirements.

We believe the interstate movement restrictions and the definition of "flock plan" in part 79 provide a good model for how an infected or source flock may be effectively quarantined and managed until release from quarantine is justified. One possible approach to controlling the intrastate contact risks described above would be to amend part 79 to prohibit or restrict movement of animals from a State unless the State quarantines infected and source flocks in a manner that is equivalent to the methods employed by part 79. However, commenters may well suggest other approaches to revising part 79 to address the risks of intrastate movements from infected and source flocks.

In particular, we ask commenters to address the following areas that apply to possible State quarantine standards, the alignment of Federal interstate movement restrictions with State standards, and Voluntary Program standards:

- Should APHIS further restrict interstate movement of animals from States that do not consider scrapie a reportable disease or do not quarantine infected flocks or source flocks? If so, should restrictions focus on high-risk animals or on broader classes of animals? (A high-risk animal is defined in 9 CFR 79.1. In short, a high-risk animal is: (1) An animal that is the progeny of a scrapie-positive dam; (2) an animal born in the same flock during the same lambing season as progeny of a scrapie-positive dam, with certain exceptions outlined in the definition; or (3) an animal born during the same lambing season as a scrapie-positive ewe or ram in a source flock or trace flock.)
- Currently, part 79 does not restrict interstate movement of high-risk animals from flocks that are not infected flocks or are not source flocks. Should APHIS restrict such movements, and if so, how?
- Should APHIS define how a State must conduct a quarantine in order to avoid further restrictions on interstate movement of animals from that State? If so, how should APHIS describe the necessary quarantine conditions (e.g., imposition of the quarantine; movement of animals into and from quarantined flocks; duration of the quarantine; identification requirements for quarantined animals, development and use of a flock plan; procedures for release from quarantine and follow-up monitoring)?
- Should any of the definitions in the interstate movement regulations in part 79 or the Voluntary Program in part 54 be revised to better address this problem (e.g., the definitions of source flock, trace flock, and high-risk animal)?
- Should there be additional permit or official identification requirements for the interstate movement of any classes of sheep and goats to allow for a more effective national program for surveillance for scrapie and traceback of scrapie-positive animals?
- Currently APHIS makes the following information available on its World Wide Web site: The identity of scrapie infected flocks and source flocks designated under part 79, and the identity and certification status of flocks participating in the Voluntary Program. Should APHIS continue to provide this information on the Web?
- To assess the impacts of options regarding the interstate movement of sheep and goats, baseline estimates of costs and benefits are needed. What are the costs and benefits of the current system of part 79, State quarantine standards, and the Voluntary Program? For example, what costs are involved in complying with State quarantine programs and how large are these costs? Similarly, what are the costs to a flock owner who participates in the Voluntary Program?

We invite comments on these topics. We also welcome ideas as to different approaches we might take to improve our scrapie programs. In responding to the questions posed in this notice, commenters are urged to include economic reasons and data supporting their positions.

Whenever possible, please refer to specific terms, definitions, or procedures contained in the current regulations in 9 CFR parts 54 and 79, and in the program standards UM&R (available at http://www.aphis.usda.gov/vs/scrapie/umr). A hard-copy of the program standards UM&R may be obtained by contacting the individual listed under **FOR FURTHER INFORMATION CONTACT**. These resources should provide a common context for discussing suggested changes. You may also wish to refer to the Scrapie Flock Status Report on the APHIS Web, which lists the certification status of flocks in the Voluntary Program and identifies known infected and source flocks nationwide. This report is at http://www.aphis.usda.gov/vs/scrapie/status.html.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 50

RIN 3150–AE26

Industry Codes and Standards: Amended Requirements

AGENCY: Nuclear Regulatory Commission.

ACTION: Extension of public comment period on proposed rule.

SUMMARY: On December 3, 1997, (62 FR 63892) the NRC published for public comment a proposed rule to amend its regulations to incorporate by reference later editions and addenda of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code. The comment period for this proposed rule was to have expired on March 3, 1998. The Nuclear Energy Institute (NEI), on behalf of the nuclear energy industry, requested an extension of the comment period for the proposed revision. NEI stated that the comprehensive nature of this proposed rule will require a significant effort to collect and review comments from members of the industry. The NRC agrees that the proposed rule constitutes a significant revision to 10 CFR 50.55a. In order to ensure that the NRC receives comments from the parties most likely to be affected by the revision, the NRC has decided to extend the public comment period for an additional 30 days. The extended comment period now expires on April 3, 1998.

DATES: The comment period has been extended and now expires April 3, 1998. Comments received after this date will be considered if it is practical to do so, but the Commission is able to ensure consideration only for comments received on or before this date.

ADDRESSES: Comments may be sent to: Secretary, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001. ATTN: Rulemaking and Adjudications Staff. Hand deliver comments to 11545 Rockville Pike, Rockville, Maryland, 20852, between 7:30 am and 4:15 pm on Federal workdays.

You may also provide comments via the NRC's interactive rulemaking website through the NRC home page (http://www.nrc.gov). This site provides the availability to upload comments as files (any format), if your web browser supports that function. For information about the interactive website, contact Ms. Carol Gallagher, (301) 415–5905; e-mail CAG@nrc.gov.

Single copies of this proposed rulemaking may be obtained by written request or telefax to 301–415–2260 or from Frank C. Cherny, Division of Engineering Technology, Office of Nuclear Regulatory Research, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Telephone: 301–415–6786, or Wallace E. Norris, Division of Engineering Technology, U.S. Nuclear Regulatory Commission, Washington, DC 20555–0001, Telephone: 301–415–6796.

Certain documents related to this rulemaking, including comments received, may be examined at the NRC Public Document Room, 2120 L Street NW. (Lower Level), Washington, DC. These same documents may also be viewed and downloaded via the interactive rulemaking website as established by NRC for this rulemaking.

FOR FURTHER INFORMATION CONTACT: Frank C. Cherny, 301–415–6786.

Dated at Rockville, Maryland, this 14th day of January, 1998.

For the Nuclear Regulatory Commission.

L. Joseph Callan,

Executive Director for Operations.

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 97–ASO–31]

Proposed Amendment to Class E Airspace; Daytona Beach, FL

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend Class E airspace at Daytona beach, FL. A Global Positioning System (GPS) Runway (RWY) 6 (Special) Standard Instrument Approach Procedure (SIAP) has been developed for Spruce Creek Airport. As a result, additional controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to accommodate the SIAP and for Instrument Flight Rules (IFR) operations at Spruce Creek Airport. The operating status of the airport will change from Visual Flight Rules (VFR) to include IFR operations concurrent with the publication of the SIAP.

DATES: Comments must be received on or before February 25, 1998.

ADDRESSES: Send comments on the proposal in triplicate to: Federal Aviation Administration, Docket No. 97–ASO–31, Manager, Airspace Branch, ASO–520, P.O. Box 20636, Atlanta, Georgia 30320.

The official docket may be examined in the Office of the Assistant Chief Counsel for Southern Region, Room 550, 1701 Columbia Avenue, College Park, Georgia 30337; telephone (404) 305–5586.

FOR FURTHER INFORMATION CONTACT: Nancy B. Shelton, Airspace Branch, Air

VOL 63 ISS 16 JA 26 1998 UMI

Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Georgia 30320; telephone (404) 305–5586.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–ASO–31." The postcard will be date/time stamped and returned to the commenter. All communications received before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of the comments received. All comments submitted will be available for examination in the Office of the Assistant Chief Counsel for Southern Region, Room 550, 1701 Columbia Avenue, College Park, Georgia 30337, both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Manager, Airspace Branch, ASO–520, Air Traffic Division, P.O. Box 20636, Atlanta, Georgia 30320. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to amend Class E airspace at Daytona Beach, FL. A GPS RWY 6 (Special) SIAP has been developed for Spruce Creek Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAP and for IFR operations at Spruce Creek Airport. The operating status of the airport will change from VFR to include IFR operations concurrent with the publication of the SIAP. This amendment would also reflect the current name of the Daytona Beach Airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS, AIRWAYS, ROUTES, AND REPORTING POINTS

1. The authority citation for part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g); 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

Proposed Amendment to Class E Airspace; McCall, ID

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This proposed rule would amend the McCall, ID, Class E airspace. If amended, the proposal would provide the additional airspace necessary to fully encompass two new Standard Instrument Approach Procedures (SIAP) at McCall Airport, McCall, ID.

DATES: Comments must be received on or before March 12, 1998.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, ANM–520, Federal Aviation Administration, Docket No. 97–ANM–16, 1601 Lind Avenue S.W., Renton, Washington 98055–4056.

The official docket may be examined in the Office of the Regional Counsel for the Northwest Mountain Region at the same address.

An informal docket may also be examined during normal business hours in the office of the Manager, Air Traffic Division, Airspace Branch at the address listed above.

FOR FURTHER INFORMATION CONTACT: Dennis Ripley, ANM–520.6, Federal Aviation Administration, Docket No. 97–ANM–16, 1601 Lind Avenue S.W., Renton, Washington 98055–4056; telephone number: (425) 227–2527.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal.

Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–ANM–16." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available for examination at the address listed above both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Airspace Branch, ANM–520, 1601 Lind Avenue S.W., Renton, Washington 98055–4056. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations, part 71 (14 CFR part 71) to amend Class E airspace at McCall, ID. This amendment is necessary in order to fully contain a Global Positioning System (GPS) and a Non-directional Radio Beacon (NDB) SIAP within controlled airspace. The existing Class E airspace requires modification to fully incorporate the holding procedures for the new SIAP's. The modifications will add Class E airspace of approximately a 45 mile extension to the west, a 17 mile extension to the south, and smaller extensions to the north and east.

The area would be depicted on aeronautical charts for pilot reference The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified small entities under the criteria of the Regulatory Flexibility Act, that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for 14 CFR part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of the Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

ANM ID E5 McCall, ID [Revised]

McCall Airport, ID
(Lat. 44°53′20″ N, long. 116°06′05″ W)
McCall NDB
(Lat. 44°48′20″ N, long. 116°06′08″ W)

That airspace extending upward from 700 feet above the surface within 4 miles west and 8 miles east of the 169° and 349° bearings from the McCall NDB extending from 16 miles south to 11 miles north of the NDB; that airspace extending upward from 1,200 feet above the surface within a line from lat. 44°12′00″ N, long. 116°06′00″ W; to lat. 45°05′00″ N, long. 117°28′00″ W; to lat. 45°15′00″ N, long. 117°19′00″ W; to lat. 45°05′30″ N, long. 115°52′00″ W; to lat. 44°16′00″ N, long. 115°40′00″ W; thence to the point of beginning, excluding Federal airways, La Grande and Baker City, OR, and Boise, ID, Class E airspace areas.

[Airspace Docket No. 97–ANM–15]

Proposed Revocation of Class E Airspace; Blue Mesa, CO; and Establishment of Class E Airspace; Gunnison, CO

AGENCY: Federal Aviation Administration (FAA), DOT.

VOL 63 ISS 16 JA 26 1998 UMI

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to revoke the Class E airspace area at Blue Mesa, CO, and to establish a larger Class E airspace area in its place which would be designated the Gunnison, CO, Class E airspace area. A recent airspace review disclosed that the Blue Mesa Class E airspace area is incorrectly named for a navigational aid rather than for the airport served by the airspace. This is contrary to FAA policy. This proposal would, in effect, rename the Class E airspace area. This proposal, if adopted, would also increase the size of the Class E airspace area. The additional controlled airspace is necessary to accommodate a new Global Positioning System (GPS) standard instrument approach procedure (SIAP) serving the Gunnison County Airport, Gunnison, CO.

DATES: Comments must be received on or before March 12, 1998.

ADDRESSES: Send comments on the proposal to: Manager, Airspace Branch, ANM–520, Federal Aviation Administration, Docket No. 97–ANM–15, 1601 Lind Avenue SW., Renton, Washington 98055–4056.

The official docket may be examined in the office of the Assistant Chief Counsel for the Northwest Mountain Region at the same address.

An informal docket may also be examined during normal business hours in the office of the Manager, Air Traffic Division, Airspace Branch, at the address listed above.

FOR FURTHER INFORMATION CONTACT: Dennis Ripley, ANM–520.6, Federal Aviation Administration, Docket No. 97–ANM–15, 1601 Lind Avenue SW., Renton, Washington 98055–4056; telephone number: (425) 227–2527.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–ANM–15." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the specified closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination at the address listed above both before and after the closing date for comments. A report summarizing each substantive public contact with FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRM's

Any person may obtain a copy of this NPRM by submitting a request to the Federal Aviation Administration, Airspace Branch, ANM–520, 1601 Lind Avenue SW, Renton, Washington 98055–4056. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRM's should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to Title 14, Code of Federal Regulations, part 71 (14 CFR part 71) to establish Class E airspace at Gunnison, CO. This amendment proposes to remove the existing Blue Mesa, CO, Class E airspace while establishing a larger and correctly named Gunnison, CO, Class E airspace. The establishment of the Gunnison, CO, airspace would add a 2 nautical mile 700-foot Class E area extension to the northeast, and modify 1200-foot Class E airspace to the south and the east of the existing Blue Mesa, CO, airspace. The extensions are necessary to meet the airspace criteria for aircraft transitioning between the terminal and en route environments, and to fully encompass a new GPS–B SIAP to the Gunnison County Airport. The FAA establishes Class E airspace extending upward from 700 feet above ground level (AGL) where necessary to contain aircraft transitioning between the terminal and en route environments. The intended effect of this proposal is to provide safe and efficient use of the navigable airspace and to promote safe flight operations under IFR at the Gunnison County Airport, and between the terminal and en route transition stages.

The area would be depicted on aeronautical charts for pilot reference. The coordinates for this airspace docket are based on North American Datum 83. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a Regulatory Evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule, when promulgated, will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

DEPARTMENT OF THE TREASURY

Internal Revenue Service

26 CFR Part 1

[REG–209322–82]

RIN 1545–AU99

Return of Partnership Income

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Withdrawal of notice of proposed rulemaking; notice of proposed rulemaking and notice of public hearing.

SUMMARY: This document withdraws the notice of proposed rulemaking relating to partnership returns. The proposed regulations were published in the **Federal Register** on January 23, 1986. These regulations revise the partnership filing requirement to reflect changes to the law made by the Taxpayer Relief Act of 1997 (TRA). All partnerships required to file partnership returns, including certain foreign partnerships, are affected by these regulations. This document also contains a notice of a public hearing on the proposed regulations.

DATES: Written comments must be received by April 27, 1998. Requests to speak and outlines of oral comments to be discussed at the public hearing scheduled for May 19, 1998, at 10 a.m. must be received by April 28, 1998.

ADDRESSES: Send submissions to: CC:DOM:CORP:R (REG–209322–82), room 5226, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:DOM:CORP:R (REG–209322–82), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option of the IRS Home Page, or by submitting comments directly to the IRS Internet site at: http://www.irs.ustreas.gov/prod/tax_regs/comments.html. The public hearing will be held in the IRS Auditorium, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Martin Schaffer or Christopher Kelley, 202–622–3080; concerning foreign partnerships, Ronald Gootzeit, 202–622–3860; concerning submissions and the hearing, Michael Slaughter, 202–622–7190 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC, 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224. Comments on the collection of information must be received by March 27, 1998. Comments are specifically requested on:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of the capital or start-up costs and costs of operation, maintenance, and purchase of services to provide information.

The collection of information in this proposed regulation is in § 1.6031(a)–1. This information is required to enable the IRS to verify that a taxpayer is reporting the correct amount of income or gain or claiming the correct amount of losses, deductions, or credits from that taxpayer's interest in the partnership. The collection of information is mandatory. The likely respondents are businesses and other for-profit institutions.

The burden is reflected in the burden of Form 1065.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) under sections 6031 and 6063 of the Internal Revenue Code of 1986 (Code). These amendments are designed, in part, to reflect changes made to section 6031 by section 1141 of TRA, Public Law 105–34, 111 Stat. 788 (1997). Section 6031 contains rules regarding the filing of returns of partnership income (partnership returns).

On January 23, 1986, the IRS published in the **Federal Register** (51 FR 3075) proposed regulations under section 6031 of the Internal Revenue Code (existing proposed regulations). Section 1.6031–1 of the existing proposed regulations provides rules that, if finalized, would implement the partnership filing requirements of section 404 of the Tax Equity and Fiscal Responsibility Act of 1982 (TEFRA), Public Law 97–248, 96 Stat. 669 (1982). Because section 1141 of TRA supersedes the partnership filing requirements of

VOL 63 ISS 16 JA 26 1998 UMI

section 404 of TEFRA, the IRS and Treasury consider it appropriate to reissue proposed regulations reflecting recent changes to the law, while giving taxpayers another opportunity to comment. Accordingly, this document withdraws § 1.6031–1 of the existing proposed regulations published in the **Federal Register** on January 23, 1986 (51 FR 3075). A partnership that has followed the rules contained in § 1.6031–1 of the existing final regulations for all taxable years prior to the taxable year for which these new regulations will become effective will be treated as fully complying with the partnership filing requirements with respect to such taxable years.

Section 6063 provides that a partnership return shall be signed by any one of the partners. The proposed regulations clarify who must sign a partnership return filed solely for the purpose of making certain partnership-level elections.

Explanation of Provisions

Filing Requirement

Section 6031(a) requires every partnership to file a partnership return. New section 6031(e), as added by section 1141 of TRA, exempts certain foreign partnerships from the filing requirement of section 6031(a). Section 6031(e) provides that a foreign partnership is not required to file a return for a tax year unless during that year it derives gross income from sources within the United States or has gross income that is effectively connected with the conduct of a trade or business within the United States. Further exceptions to the filing requirement for foreign partnerships may be provided by regulation.

The proposed regulations separately describe the filing requirements for domestic and foreign partnerships. In accordance with section 6031(a), the proposed regulations provide that, except in certain limited circumstances, every domestic partnership must file a partnership return.

Under section 6031 and the proposed regulations, a foreign partnership generally must file a partnership return only if it has either United States source income or income effectively connected (or treated as effectively connected) with the conduct of a trade or business within the United States. However, under the proposed regulations, a foreign partnership that has no gross income that is effectively connected with the conduct of a trade or business within the United States, and that would be required to file a partnership return only because it has gross income derived from sources within the United States, will be exempt from the requirement to file a partnership return if (i) no United States person has a direct or indirect interest in the partnership; (ii) the gross income derived from sources within the United States is either fixed or determinable annual or periodical income described in § 1.1441–2(b) or other amounts subject to withholding described in § 1.1441–2(c); (iii) Forms 1042 and 1042–S are filed with respect to all such gross income in accordance with § 1.1461–1 (b) and (c); and (iv) the tax liability of the partners with respect to such gross income has been fully satisfied by the withholding of tax at the source, if applicable, under chapter 3. The foreign partnership's obligation to file Forms 1042 and 1042–S is generally eliminated by the regulations under section 1461 published in the **Federal Register** on October 14, 1997 (62 FR 53387) if those returns are filed by the withholding agent (or agents) making the payments of United States source income to the partnership and the partners' tax liability with respect to United States source income has been fully satisfied by withholding. See § 1.1461–1 (b)(2) and (c)(4). The IRS and Treasury invite comments addressing other ways to reduce duplicative information filing.

Any domestic or foreign partnership that elects to be excluded from subchapter K of Chapter 1 of the Code under section 761(a) will not be required to file a partnership return, except that where a partnership makes an election under § 1.761–2(b)(2)(i), the partnership must timely file a partnership return that contains the information required by § 1.761–2(b)(2)(i) for the taxable year for which the election is made.

Failure to Meet Filing Requirement

If a partnership that is not a small partnership under section 6231(a)(1)(B) is required to file a partnership return under section 6031 but fails to do so, the period of limitations on assessment of tax attributable to items of that partnership remains open indefinitely under section 6229(a). The failure of a partnership to file a return required by section 6031 might also result in disallowance under section 6231(f) of the deductions, losses, and credits flowing through to the partners and could subject the partnership to penalties under section 6698 and/or section 7203.

Information To Be Furnished to Partners

Under section 6031(b), every partnership that is required by section 6031(a) to file a partnership return must furnish information to its partners as required by regulations. The rules governing partnership statements to partners and nominees are in § 1.6031(b)–1T.

Partnership Elections

A foreign partnership otherwise exempt from the filing requirement that wants to make a partnership-level election under section 703(b) must file a partnership return for the year of the election. The proposed regulations provide rules similar to those contained in § 1.7701–3(c)(2) of the entity classification regulations with respect to who has the authority to file such returns. Generally, the return must be signed by all partners or by an authorized partner.

Proposed Effective Dates

These regulations are proposed to be applicable to partnership tax years ending on or after the 90th day after final regulations on this subject are published in the **Federal Register**. However, the exceptions for certain foreign partnerships contained in § 1.6031(a)–1(b)(2) will not be applicable to any partnership taxable years beginning before January 1, 1999.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these proposed regulations. It is hereby certified that the collection of information contained in these proposed regulations will not have a significant economic impact on a substantial number of small entities. This certification is based on the fact that the regulations would reduce (rather than increase) the number of small entities that are required to file a partnership return. Specifically, the proposed regulations would eliminate the filing requirements for certain foreign partnerships that are fully subject to withholding in order to prevent duplicative filing requirements. In addition to eliminating the filing requirements in these circumstances, for ease of reference the proposed regulations update and restate the general requirements to file a partnership return as set forth in existing regulations. Because the proposed regulations would not impose any new reporting requirements that are not imposed by the existing regulations, and the only significant modification of the existing regulations is to eliminate the filing requirement for certain foreign partnerships, the regulations will not have a significant economic impact on a substantial number of small entities. Accordingly, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required. Pursuant to section 7805(f) of the Code, these proposed regulations will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on their impact on small business.

Comments and Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (preferably a signed original and eight (8) copies) that are submitted timely to the IRS. All comments will be available for public inspection and copying.

A public hearing has been scheduled for Tuesday, May 19, 998, at 10 a.m., in the IRS Auditorium, 7400 Corridor, Internal Revenue Building, 1111 Constitution Avenue NW., Washington, DC. Because of access restrictions, visitors will not be admitted beyond the building lobby more than 15 minutes before the hearing starts.

The rules of 26 CFR 601.601(a)(3) apply to the hearing.

Persons that wish to present oral comments at the hearing must submit written comments by April 27, 1998 and submit an outline of the topics to be discussed and the time to be devoted to each topic (signed original and eight (8) copies) by April 28, 1998.

A period of 10 minutes will be allotted to each person for making comments.

An agenda showing the scheduling of the speakers will be prepared after the deadline for receiving outlines has passed. Copies of the agenda will be available free of charge at the hearing.

Drafting Information

The principal authors of these regulations are Martin Schäffer and Christopher Kelley, Office of Assistant Chief Counsel (Passthroughs and Special Industries), and Ronald Gootzeit, Office of the Associate Chief Counsel (International). However, other personnel from the IRS and Treasury Department participated in their development.

Withdrawal of Proposed Amendments to the Regulations

Accordingly, under the authority of 26 U.S.C. 7805, the notice of proposed rulemaking that was published in the **Federal Register** on January 23, 1986 (51 FR 3075) is withdrawn.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 1 is proposed to be amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for part 1 is amended by adding an entry in numerical order to read as follows:

Authority: 26 U.S.C. 7805. * * *

Section 1.6031(a)–1 also issued under 26 U.S.C. 6031. * * *

§ 1.6031–1 [Removed]

Par. 1a. Section 1.6031–1 is removed.

Par. 2. Section 1.6031(a)–1 is added to read as follows:

§ 1.6031(a)–1 Return of partnership income.

(a) *Domestic partnerships*—(1) *Return required.* Except as provided in paragraphs (a)(3) and (c) of this section, every domestic organization that is a partnership must file a return of partnership income under section 6031 (partnership return) for each taxable year on the form prescribed for the partnership return. The partnership return must be filed for the taxable year of the partnership regardless of the taxable years of the partners. For taxable years of a partnership and of a partner, see section 706 and § 1.706–1. For the rules governing partnership statements to partners and nominees, see § 1.6031(b)–1T.

(2) *Content of return.* The partnership return must contain the information required by the prescribed form and the accompanying instructions.

(3) *Special rule.* A partnership that has no income, deductions, or credits for federal income tax purposes for a taxable year is not required to file a partnership return for that year.

(4) *Failure to file.* For the consequences of a failure to comply with the requirements of section 6031(a) and this paragraph (a), see sections 6229(a), 6231(f), 6698, and 7203.

(b) *Foreign partnerships*—(1) *Return required.* A foreign partnership must file a partnership return for a partnership taxable year only if it has gross income derived from sources within the United States or it has gross income that is (or is treated as) effectively connected with the conduct of a trade or business within the United States for the taxable year. Certain exceptions to this requirement are provided in paragraphs (b)(2) and (c) of this section. A foreign partnership that is required to file a partnership return must file the partnership return in accordance with the rules provided for domestic partnerships in paragraph (a) of this section.

(2) *Exception to partnership return requirement for certain foreign partnerships investing in the United States.* A foreign partnership that has no gross income that is effectively connected with the conduct of a trade or business within the United States, and that would be required to file a partnership return only because it has gross income derived from sources within the United States, is not required to file a partnership return under section 6031 if—

(i) No United States person has a direct or indirect interest in the partnership;

(ii) The gross income derived from sources within the United States is either fixed or determinable annual or periodical income described in § 1.1441–2(b) or other amounts subject to withholding described in § 1.1441–2(c);

(iii) Forms 1042 and 1042–S are filed with respect to all such gross income in accordance with § 1.1461–1 (b) and (c). In order to satisfy this requirement, Forms 1042 and 1042–S must be filed by the partnership unless the partnership is not required to file such returns under § 1.1461–1 (b)(2) and (c)(4), in which case, Forms 1042 and 1042–S must be filed by another withholding agent (or agents); and

(iv) The tax liability of the partners with respect to such gross income has been fully satisfied by the withholding of tax at the source, if applicable, under chapter 3 of the Internal Revenue Code.

(3) *Partnership information or returns required of partners who are United States persons*—(i) *In general.* If a United States person is a partner in a partnership that is not required to file a partnership return, the district director or director of the service center may require that person to render the statements or provide the information necessary to verify the accuracy of the reporting by that person of any items of partnership income, gain, loss, deduction, or credit.

(ii) *Certain partnership elections.* For a partnership that is not otherwise required to file a partnership return, if an election that can only be made by the partnership under section 703 (affecting the computation of taxable income derived from a partnership) is to be made by or for the partnership, a return

VOL 63 ISS 16 JA 26 1998 UMI

on the form prescribed for the partnership return must be filed for the partnership. The return must be signed by—

(A) Each partner that is a partner in the partnership at the time the election is made; or

(B) Any partner of the partnership who is authorized (under local law or the partnership's organizational documents) to make the election and who represents to having such authorization under penalties of perjury.

(iii) *Controlled foreign partnerships.* Certain United States persons who are partners in a foreign partnership controlled (within the meaning of section 6038(e)(1)) by United States persons may be required to provide information with respect to the partnership under section 6038.

(4) *Exclusion for certain organizations.* The return requirement of section 6031 and this section does not apply to the International Telecommunications Satellite Organization, the International Maritime Satellite Organization, or any organization that is a successor of either.

(c) *Partnerships excluded from the application of subchapter K—(1) Wholly excluded*—(i) *Year of election.* An eligible partnership as described in § 1.761–2(a) that elects to be excluded from all the provisions of subchapter K of chapter 1 of the Internal Revenue Code in the manner specified by § 1.761–2(b)(2)(i) must timely file the form prescribed for the partnership return for the taxable year for which the election is made. In lieu of the information otherwise required, the return must contain or be accompanied by the information required by § 1.761–2(b)(2)(i).

(ii) *Subsequent years.* Except as otherwise provided in paragraph (c)(1)(i) of this section, an eligible partnership that elects to be wholly excluded from the application of subchapter K is not required to file a partnership return.

(2) *Deemed excluded.* An eligible partnership that is deemed to have elected exclusion from the application of subchapter K beginning with its first taxable year, as specified in § 1.761–2(b)(2)(ii), is not required to file a partnership return.

(d) *Definitions*—(1) *Partnership.* For the meaning of the term *partnership*, see § 1.761–1(a).

(2) *United States person.* In applying this section, *United States person* means a person described in section 7701(a)(30); the government of the United States, a State, or the District of Columbia (including an agency or instrumentality thereof); or a corporation created or organized in Guam, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, and American Samoa, if the requirements of sections 881(b)(1)(A), (B), and (C) are met for such corporation. The term does not include an alien individual who is a resident of Puerto Rico, Guam, the Commonwealth of the Northern Mariana Islands, the U.S. Virgin Islands, or American Samoa, as determined under § 301.7701(b)–1(d) of this chapter.

(e) *Procedural requirements*—(1) *Place for filing*—(i) *Domestic partnerships.* The return of a domestic partnership that is required to file under paragraph (a) of this section must be filed with the service center for the internal revenue district in which the partnership has its principal office or principal place of business in the United States.

(ii) *Foreign partnerships with United States business or income.* The return of a foreign partnership that is required to file under paragraph (b)(1) of this section must be filed—

(A) With the service center for the internal revenue district in which the partnership has its principal office or principal place of business in the United States; or

(B) With the Internal Revenue Service Center, Philadelphia, PA 19255–0011 if the partnership has no office or place of business in the United States.

(iii) *Foreign partnerships without United States business or income.* The return of a foreign partnership filed under paragraph (b)(3)(ii) of this section (regarding partnerships for which an election under section 703 is made) must be filed with the Internal Revenue Service Center, Philadelphia, PA 19255–0011. A statement must be attached to the partnership return indicating that the return is being filed pursuant to paragraph (b)(3)(ii) of this section solely to make one or more elections under section 703.

(2) *Time for filing.* The return of a partnership must be filed on or before the fifteenth day of the fourth month following the close of the taxable year of the partnership.

(3) *Magnetic media filing.* For magnetic media filing requirements with respect to partnerships, see section 6011(e)(2) and the regulations thereunder.

(f) *Effective date.* This section applies to taxable years of a partnership ending on or after the 90th day after the date final regulations on this subject are published in the **Federal Register.** However, in no event will paragraph (b)(2) of this section apply to taxable years of a partnership that begin before January 1, 1999.

Par. 3. Section 1.6063–1 is amended by adding paragraph (c) to read as follows:

§ 1.6063–1 Signing of returns, statements, and other documents made by partnerships.

* * * * *

(c) *Certain partnership elections*—(1) *In general.* For rules regarding the authority of a partner to sign a partnership return filed solely for the purpose of making certain partnership-level elections, see § 1.6031(a)–1(b)(3)(ii).

(2) *Effective date.* The provisions of paragraph (c) of this section apply to taxable years of a partnership ending on or after the 90th day after the date final regulations on this subject are published in the **Federal Register.**

Electronic Tip Reports

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Notice of proposed rulemaking.

SUMMARY: This document proposes to amend the regulations dealing with the requirement that tipped employees report their tips to their employer. The proposed regulations permit employers to establish electronic systems for use by their tipped employees in reporting tips to the employer. The proposed regulations also address substantiation requirements for employees using the electronic system.

DATES: Written comments and requests for a public hearing must be received by April 27, 1998.

ADDRESSES: Send submissions to: CC:DOM:CORP:R (REG–104691–97), room 5228, Internal Revenue Service, POB 7604, Ben Franklin Station, Washington, DC 20044. Submissions may be hand delivered between the hours of 8 a.m. and 5 p.m. to: CC:DOM:CORP:R (REG–104691–97), Courier's Desk, Internal Revenue Service, 1111 Constitution Avenue, NW., Washington, DC. Alternatively, taxpayers may submit comments electronically via the Internet by selecting the "Tax Regs" option on the IRS Home Page, or by submitting comments directly to the IRS Internet site at http://www.irs.ustreas.gov/prod/tax_regs/comments.html.

FOR FURTHER INFORMATION CONTACT: Concerning the regulations, Karin Loverud, 202–622–6060; concerning submissions, Evangelista Lee, 202–622–8452 (not toll-free numbers).

SUPPLEMENTARY INFORMATION:

Paperwork Reduction Act

The collection of information contained in this notice of proposed rulemaking has been submitted to the Office of Management and Budget for review in accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3507(d)). Comments on the collection of information should be sent to the Office of Management and Budget, Attn: Desk Officer for the Department of the Treasury, Office of Information and Regulatory Affairs, Washington, DC 20503, with copies to the Internal Revenue Service, Attn: IRS Reports Clearance Officer, T:FP, Washington, DC 20224. Comments on the collection of information should be received by March 27, 1998. Comments are specifically requested concerning:

Whether the proposed collection of information is necessary for the proper performance of the functions of the Internal Revenue Service, including whether the information will have practical utility;

The accuracy of the estimated burden associated with the proposed collection of information (see below);

How the quality, utility, and clarity of the information to be collected may be enhanced;

How the burden of complying with the proposed collection of information may be minimized, including through the application of automated collection techniques or other forms of information technology; and

Estimates of capital or start-up costs and costs of operation, maintenance, and purchase of service to provide information.

The collections of information in this proposed regulation are in § 31.6053–1 and § 31.6053–4. This information is required to conform with the statute and to assist employers and employees in fulfilling their responsibilities. This information will be used by employers to establish the amount of income and FICA (or RRTA) taxes to withhold from the employee reporting the tips. This information will be used by employees in meeting the substantiation requirements. The collections of information are mandatory. The likely respondents are individuals.

Estimated total annual reporting burden: 600,000 hours.

Estimated average annual burden hours per respondent: 2 hours.

Estimated number of respondents: 300,000.

Estimated annual frequency of responses: varies.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a valid control number assigned by the Office of Management and Budget.

Books or records relating to a collection of information must be retained as long as their contents may become material in the administration of any internal revenue law. Generally, tax returns and tax return information are confidential, as required by 26 U.S.C. 6103.

Background

This document contains proposed amendments to the Employment Tax Regulations (26 CFR part 31) under section 6053(a) of the Internal Revenue Code (Code). The proposed regulations provide rules permitting employers to establish electronic systems for use by their tipped employees in reporting tips to the employer.

In general, under section 6053(a) of the Code, every employee who receives tips must report the tips to the employer. The tips that must be reported are those that are wages for purposes of federal income tax withholding and the Federal Insurance Contributions Act (FICA) and compensation for purposes of the Railroad Retirement Tax Act (RRTA). The tips must be reported in a written statement or statements furnished to the employer on or before the 10th day following the month in which the tips are received. The Secretary is authorized to prescribe rules necessary to implement this provision, including the form and manner of furnishing the statements.

Generally, all cash tips (which include tips that are charged) are wages (or compensation), with one exception. If the amount of cash tips received in a calendar month by an employee in the course of any one employment is less than $20, the cash tips received in that employment during that month are not wages subject to income tax withholding, FICA taxes, or RRTA taxes.

For example, A is a full-time tipped employee of X and a part-time tipped employee of Y. During the month, A received $1,000 in tips in A's employment with X and $10 in tips in A's employment with Y. The $1,000 in tips received in the course of employment with X are wages for income tax withholding and FICA (or RRTA) tax purposes. A must report the $1,000 in tips to X no later than the 10th day of the following month. The $10 in tips received in the course of employment with Y are not wages for those purposes. The $10 are, however, subject to federal income tax and must be reported as wages by the employee on Form 4137, *Social Security and Medicare Tax on Unreported Tip Income*, which the employee must file with Form 1040, *U.S. Individual Income Tax Return.*

Section 31.6053–1(b)(1) prescribes rules for tip statements. The statement furnished by the employee to the employer must be in writing and must be signed by the employee. The statement must disclose (1) the employee's name, address, and social security number; (2) the employer's name and address; (3) the period for which and the date on which the statement is furnished; and (4) the total amount of tips received by the employee during the period that are required to be reported to the employer.

Under § 31.6053–1(b)(2), no particular form is prescribed for use in furnishing the tip statement. If the employer does not provide a form for use by the employee in reporting tips received by the employee, the employee may use Form 4070, *Employee's Report of Tips to Employer.* Twelve blank Forms 4070 and 12 blank Forms 4070A, *Employee's Daily Record of Tips* are reproduced in Publication 1244, *Employee's Daily Record of Tips and Report to Employer.* (Daily completion of Form 4070A constitutes sufficient evidence of tip income under the substantiation requirements of § 31.6053–4.) Pub. 1244 is a convenient pocket-sized document that also includes the basic rules for reporting tips. Copies of Pub. 1244 are available from the IRS by calling 1–800–829–3676.

The regulations specifically permit employers to design their own forms for use by employees in reporting tips. A form used solely to report tips must include (1) The employee's name, address, and social security number; (2) the employer's name and address; (3) the period for which and the date on which the statement is furnished; and (4) the total amount of tips received by the employee during the period that are required to be reported to the employer.

In lieu of a special tip reporting form that is used solely for the purpose of reporting tips, employers may provide for reporting of tips on regularly used

VOL
63
ISS
16
JA
26
1998
UMI

forms, such as time cards. The regularly used forms need not include the employer information, but they must accurately identify the employee, identify the reporting period, and specify the amount of tips received. If a regularly used form is used to report tips, the employer must furnish the employee a statement showing the amount of tips reported by the employee for the period. This statement must be furnished no later than shortly after the first wage payment following the employee's tip report. A payroll check stub or other similar payroll document may be used for this purpose.

The period covered by a tip statement may not exceed one calendar month. An employer may require tip statements more frequently, such as daily, weekly or every pay period, but not less frequently than monthly. In no event, however, may an employer permit tips received in one month to be reported after the 10th of the following month. See section 6053(a). For example, X has a weekly payroll period, beginning on Sunday and ending on Saturday. X requires that all tip statements be submitted to X no later than the Monday following each payroll period. For the payroll period beginning on Sunday, March 30, and ending on Saturday, April 5, the statements must be furnished on or before Monday, April 7. If this occurs, the 10th-of-the-month requirement for March is met. If X's payroll period were biweekly and began on March 30 and ended on April 16 and if X required that all tip statements be submitted to X no later than the Monday following each payroll period, the 10th-of-the-month requirement for March would not be met.

A tip statement furnished after this deadline does not meet the requirements of section 6053(a). The employer is not required to withhold income, FICA, or RRTA taxes on tips reported after the 10th of the following month and is not responsible for reporting those tips to the IRS. The responsibility for reporting and paying the employee portion of the FICA tax shifts to the employee. The employee must complete and attach Form 4137, *Social Security and Medicare Tax on Unreported Tip Income*, to the employee's federal income tax return. Moreover, an employee who fails to report tips as required by section 6053(a) is subject to an addition to the FICA tax or the RRTA tax, whichever is applicable, equal to 50 percent of the employee portion of the FICA or RRTA tax on those tips.

Section 31.6053–4(a)(1) provides that an employee must maintain sufficient evidence to establish the amount of tip income received during a taxable year. Sufficient evidence consists of either a daily record or, if the employee does not maintain a daily record, other evidence (such as documentary evidence) that is as credible and as reliable as a daily record. Nevertheless, if the facts or circumstances indicate that the employee received a larger amount of tip income, a daily record or other evidence may not be sufficient evidence.

Section 31.6053–4(a)(2) describes the requirements for a daily record. In general, the daily record must show the amount of cash and charge tips received directly from customers or other employees and the amount of tips, if any, that the employee paid out to other employees through tip sharing, tip pooling, or other arrangements and the names of the employees. The daily record must show the date on which each entry is made. Each entry must be made on or near the date the tip income is received. An entry made when the employee has full present knowledge of those receipts and payments satisfies this requirement.

Section 31.6053–4(a)(3) describes documentary evidence. Documentary evidence consists of copies of any documents that contain amounts added as a tip to a check by a customer or amounts paid by a customer for food or beverages with respect to which tips generally would be received. Examples of documentary evidence are copies of restaurant bills, credit card charges, or charges under any other arrangement containing amounts added by the customer as a tip.

Explanation of Provisions

Electronic Tip Statements

No provision currently exists for employees to furnish tip statements to employers in a form other than on paper. The proposed regulations would permit an employer to adopt a system under which some or all of the tipped employees of the employer would furnish their tip statements electronically. Therefore, the employer could include in its electronic system any tipped employee or employees working in any location or locations.

The proposed regulations set forth requirements for employers who wish to establish electronic systems for employees to use to furnish tip statements to their employers. The proposed regulations apply only to tip statements required by section 6053(a) and not with respect to any other Code sections.

An employer that chooses to establish an electronic tip reporting system may select the type or types of electronic systems (such as telephone or computer) to be used by its employees. The system must, however, ensure that the information received is the information transmitted by the employee and must document all occasions of access that result in the transmission of a tip statement. The design and operation of the electronic system, including access procedures, must make it reasonably certain that the person accessing the system and transmitting the tip statement is the employee identified in the transmission. In the event of an examination, the employer must supply a hard copy of the electronic statement to the IRS upon request.

The electronic tip statement must contain exactly the same information that is required to be reported on a paper tip statement and must contain the employee's electronic signature. The electronic signature must identify the employee furnishing the electronic tip statement and authenticate and verify the transmission. An electronic signature can be in any form that satisfies the foregoing requirements. An electronic signature has the same effect as a signature written on a paper tip statement. See sections 6061, 6064, and 6065 of the Code.

Pursuant to Rev. Rul. 71–20 (1971–1 C.B. 392), all machine-sensible data media used for recording, consolidating, and summarizing accounting transactions and records within a taxpayer's ADP system are records within the meaning of section 6001 and § 1.6001–1. The record retention requirements contained in Rev. Proc. 91–59 (1991–2 C.B. 841) (or any revenue procedure updating Rev. Proc. 91–59), dealing with automatic data processing systems, apply to electronic tip reporting systems.

The proposed regulations provide that an employee maintains sufficient evidence to establish the amount of tip income received by the employee during a calendar month through a daily record (as described in § 31.6053–4(a)(2)) if the employee both reports tips on a daily basis through an electronic system that otherwise meets the substantiation requirements of the regulations and receives from the employer a hard copy of a daily record based on those entries for the period.

Employee Substantiation Requirements

Because the proposed regulations expand the permissible array of employer-designed reporting systems to include electronic methods, employers will be providing a statement to employees of the tips reported consistent with the existing requirements of § 31.6053–1(b). The Treasury and the IRS recognize that many of these systems may capture tip reporting on a very current basis (e.g., point-of-sale or end-of-shift). Thus, the information in these systems offers a reasonable substitute for a daily record maintained by the employee if the employer's system provides the employee with a printout that would satisfy the current substantiation requirements of § 31.6053–4.

Thus, these proposed regulations provide that, if the employer, at its option, provides employees with a copy of the daily record based on entries made by the employee in the system and otherwise satisfying the substantiation requirement of § 31.6053–4, the entry in the electronic system on a daily (or more frequent) basis by the employee, together with the daily record based on these entries provided by the employer, will satisfy the substantiation requirements of § 31.6053–4. For example, assume an employee enters tips in the employer's electronic system at the end of each shift, but does not provide the employer with a signed paper record of these tips. After the end of each weekly payroll period, the employer provides the employee with a paper record that includes all the information specified in § 31.6053–4(a)(2) and that shows the total amount of tips reported for each day during the period based on the employee's entries. If the employee maintains this employer generated paper record, the substantiation requirements of § 31.6053–4 are satisfied.

The Treasury and the IRS particularly invite comment on whether the proposed regulations should be modified to reflect ways in which these systems may permit further reduction in paper reporting for either the employer or employee while retaining provisions for appropriate and timely substantiation of income.

Railroad Retirement Tax Act Provisions

The tip reporting provisions of section 6053(a) apply to tips that are either wages for income tax withholding and Federal Insurance Contributions Act (FICA) purposes or compensation for Railroad Retirement Tax Act (RRTA) purposes. The proposed regulations would clarify that the regulations under section 6053(a) apply to tips that are compensation as well as to tips that are wages.

Proposed Effective Date

The revisions and additions in the proposed regulations apply to tips required to be reported to the employer after these regulations are published as final regulations in the **Federal Register**. However, taxpayers may rely on the guidance in these proposed regulations for prior periods.

Special Analyses

It has been determined that this notice of proposed rulemaking is not a significant regulatory action as defined in EO 12866. Therefore, a regulatory assessment is not required. It also has been determined that section 553(b) of the Administrative Procedure Act (5 U.S.C. chapter 5) does not apply to these regulations.

It is hereby certified that the collections of information in these regulations will not have a significant economic impact on a substantial number of small entities. The collection of information in § 31.6053–1 is imposed solely on individuals, not on any small entities, and the regulations provide flexibility to employees who must provide the information required by statute, thereby reducing burden. With respect to the collection of information in § 31.6053–4, the certification is based on the expectation of the IRS that most businesses that choose to implement the electronic tip reporting provisions will be larger businesses with many employees and sophisticated computer systems. Moreover, because the provision is wholly elective, any small business that would be adversely impacted may choose not to use electronic tip reporting. Finally, the Service expects that for those small entities that choose to implement the provision, the use of electronic tip reporting will reduce overall burden by reducing paper collections. Therefore, a Regulatory Flexibility Analysis under the Regulatory Flexibility Act (5 U.S.C. chapter 6) is not required.

Pursuant to section 7805(f) of the Code, this notice of proposed rulemaking will be submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Comments and Requests for a Public Hearing

Before these proposed regulations are adopted as final regulations, consideration will be given to any written comments (a signed original and eight copies) that are submitted timely (in the manner described in the **ADDRESSES** portion of this preamble) to the IRS. All comments will be available for public inspection and copying.

A public hearing may be scheduled if requested in writing by any person that timely submits written comments. The IRS will also consider requests for remote teleconference sites as part of the public hearing. If a public hearing is scheduled, notice of the date, time, and place (including teleconference, if any) for the hearing will be published in the **Federal Register**.

Drafting Information

The principal author of these proposed regulations is Karin Loverud, Office of the Associate Chief Counsel (Employee Benefits and Exempt Organizations), IRS. However, other personnel from the IRS and the Treasury Department participated in their development.

List of Subjects in 26 CFR Part 31

Employment taxes, Income taxes, Penalties, Pensions, Railroad retirement, Reporting and recordkeeping requirements, Social security, Unemployment compensation.

Proposed Amendments to the Regulations

Accordingly, 26 CFR part 31 is proposed to be amended as follows:

PART 31—EMPLOYMENT TAXES AND COLLECTION OF INCOME TAX AT SOURCE

Paragraph 1. The authority citation for part 31 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 31.6053–1 is amended as follows:

1. Paragraph (a) is revised.
2. The introductory text of paragraph (b)(1) is revised.
3. The last sentence of paragraph (b)(1)(iii) is revised.
4. Paragraph (b)(2) is revised.
5. Paragraph (c) is revised.
6. Paragraph (d) is added.

The revisions and additions read as follows:

§ 31.6053–1 Report of tips by employee to employer.

(a) *Requirement that tips be reported*—(1) *In general.* An employee who receives, in the course of employment by an employer, tips that constitute wages as defined in section 3121(a) or section 3401, or compensation as defined in section 3231(e), must furnish to the employer a statement, or statements, disclosing the total amount of the tips received by the employee in the course of employment by the employer. Tips received by an employee in a calendar month in the course of employment by an employer that are required to be reported to the employer must be reported on or before the 10th day of the following month.

VOL
63
ISS
16
JA
26
1998
UMI

Thus, for example, tips received by an employee in January 1998 are required to be reported by the employee to the employer on or before February 10, 1998.

(2) *Cross references.* For provisions relating to the treatment of tips as wages for purposes of the Federal Insurance Contributions Act (FICA) tax under sections 3101 and 3111, see sections 3102(c), 3121(a)(12), and 3121(q) and §§ 31.3102–3 and 31.3121(a)(12)–1. For provisions relating to the treatment of tips as wages for purposes of the tax under section 3402 (income tax withholding), see sections 3401(a)(16), 3401(f), and 3402(k) and §§ 31.3401(a)(16)–1, 31.3401(f)–1, and 31.3402(k)–1. For provisions relating to the treatment of tips as compensation for purposes of the Railroad Retirement Tax Act (RRTA) tax under sections 3201 and 3221, see section 3231(e) and § 31.3231(e)–1(a).

(b) * * * (1) *In general.* The statement described in paragraph (a) of this section can be provided on paper or transmitted electronically. The statement must be signed by the employee and must disclose:

* * * * *

(iii) * * * If the statement is for a period of less than 1 calendar month, the beginning and ending dates of the period must be included (for example, January 1 through January 8, 1998).

* * * * *

(2) *Form of statement*—(i) *In general.* No particular form is prescribed for use in furnishing the statement required by this section. The statement may be furnished on paper or transmitted electronically. An electronic system and all tip statements generated by that system must meet the requirements of paragraph (d) of this section. If the employer does not provide any other means for the employee to report tips, the employee may use Form 4070, *Employee's Report of Tips to Employer.*

(ii) *Single-purpose forms.* A statement may be furnished on an employer-provided form. The form may be on paper or in electronic form. An employer that provides a paper form must make blank copies of the form readily available to all tipped employees. Any form, whether paper or electronic, provided by an employer for use by its tipped employees solely to report tips must meet all the requirements of paragraph (b)(1) of this section.

(iii) *Regularly used forms.* Instead of requiring that tips be reported as described in paragraph (b)(2)(ii) of this section on a special form used solely for tip reporting, an employer may prescribe regularly used forms for use by employees in reporting tips. A regularly used form may be on paper (such as a time card or report) or in electronic form, must meet the requirements of paragraph (b)(1)(iii) and (iv) of this section, must contain identifying information that will ensure accurate identification of the employee by the employer, and is permitted to be used only if the employer furnishes the employee a statement suitable for retention showing the amount of tips reported by the employee for the period. The employer statement may be furnished when the employee reports the tips, when wages are first paid following the reporting of tips by the employee, or within a short time after the wages are paid. The employer may meet this requirement, for example, through the use of a payroll check stub or other payroll document regularly furnished by the employer to the employee showing gross pay and deductions. In the case of electronic tip reports, the employer statement may be furnished on a daily, weekly, monthly or on a regular payroll basis (if not less frequent than monthly).

(c) *Period covered by, and due date of, tip statement*—(1) *In general.* A tip statement furnished by an employee to an employer may not cover a period greater than 1 calendar month. An employer may, however, require the submission of a statement in respect of a specified period of time, for example, on a weekly or biweekly basis, regular payroll period, etc. An employer may specify, subject to the limitation in paragraph (a) of this section, the time within which, or the date on which, the statement for a specified period of time should be submitted by the employee. For example, a statement covering a payroll period may be required to be submitted on the first (or second) day following the close of the payroll period. A statement submitted by an employee after the date specified by the employer for its submission nevertheless will be considered as a statement furnished pursuant to section 6053(a) and this section if it is submitted to the employer on or before the 10th day following the month in which the tips were received.

(2) *Termination of employment.* If an employee's employment is terminating, the employee must furnish a tip statement to the employer when the employee ceases to perform services for the employer. A statement submitted by an employee after the date on which the employee ceases to perform services for the employer will be considered as a statement furnished pursuant to section 6053(a) and this section if the statement is submitted to the employer on or before the earlier of the day on which the final wage payment is made by the employer to the employee or the 10th day following the month in which the tips were received.

(d) *Requirements for electronic systems*—(1) *In general.* The electronic system must ensure that the information received is the information transmitted by the employee and must document all occasions of access that result in the transmission of a tip statement. In addition, the design and operation of the electronic system, including access procedures, must make it reasonably certain that the person accessing the system and transmitting the statement is the employee identified in the statement transmitted.

(2) *Same information as on paper statement.* The electronic tip statement must provide the employer with all the information required by paragraph (b)(1) of this section.

(3) *Signature.* The electronic tip statement must be signed by the employee. The electronic signature must identify the employee transmitting the electronic tip statement and must authenticate and verify the transmission. For this purpose, the terms "authenticate" and "verify" have the same meanings as they do when applied to a written signature on a paper tip statement. An electronic signature can be in any form that satisfies the foregoing requirements.

(4) *Copies of electronic tip statements.* Upon request by the Internal Revenue Service (IRS), the employer must supply the IRS with a hard copy of the electronic tip statement and a statement that, to the best of the employer's knowledge, the electronic tip statement was filed by the named employee. The hard copy of the electronic tip statement must provide the information required by paragraph (b)(1) of this section, but need not be a facsimile of Form 4070 or any employer-designed form.

(5) *Record retention.* The record retention requirements dealing with automatic data processing systems apply to electronic tip reporting systems.

Par. 3. Section 31.6053–4 is amended as follows:

1. A sentence is added to paragraph (a)(1) after the third sentence.

2. A sentence is added to paragraph (a)(2) after the fourth sentence. The additions read as follows:

§ 31.6053–4 Substantiation requirements for tipped employees.

(a) * * *

(1) * * * The Commissioner may by revenue ruling, procedure or other guidance of general applicability provide for other methods of demonstrating evidence of tip income.

* * *

(2) * * * In addition, an electronic system maintained by the employer that collects substantially similar information as Form 4070A may be used to maintain such daily record, provided the employee receives and maintains a paper copy of the daily record. * * *

* * * * *

Michael P. Dolan,

Deputy Commissioner of Internal Revenue.

BILLING CODE 4830–01–U

LIBRARY OF CONGRESS

Copyright Office

37 CFR Part 201

[Docket No. RM 96–1]

Satellite Carrier Compulsory License; Definition of Unserved Household

AGENCY: Copyright Office, Library of Congress.

ACTION: Notice of inquiry.

SUMMARY: The Copyright Office of the Library of Congress is opening a rulemaking proceeding to determine the permissibility, under the satellite compulsory license, of satellite carriers retransmitting over-the-air broadcast network stations to subscribers who reside within the local markets of those stations.

DATES: Initial comments should be received no later than February 25, 1998. Reply comments are due March 27, 1998.

ADDRESSES: If sent by mail, an original and ten copies of comments and reply comments should be addressed to: David O. Carson, General Counsel, Copyright Arbitration Royalty Panel (CARP), P.O. Box 70977, Southwest Station, Washington, DC 20024. If hand delivered, an original and ten copies of comments and reply comments should be brought to: Office of the Copyright General Counsel, James Madison Memorial Building, Room LM–403, First and Independence Avenue, SE., Washington, DC 20559–6000.

FOR FURTHER INFORMATION CONTACT: David O. Carson, General Counsel, or William Roberts, Senior Attorney, Copyright Arbitration Royalty Panel (CARP), P.O. Box 70977, Southwest Station, Washington, DC 20024. Telephone: (202) 707–8380. Fax: (202) 707–8366.

SUPPLEMENTARY INFORMATION: On December 23, 1997, the Copyright Office received a petition for rulemaking from EchoStar Communications Corporation ("EchoStar") requesting that the Office confirm that a satellite carrier's local retransmission of network stations to subscribers who reside in those station's local markets is permissible under the compulsory license granted by 17 U.S.C. 119. Three organizations, the Association of Local Television Stations ("ALTV"), Network Affiliated Stations Alliance ("NASA"), and the National Association of Broadcasters ("NAB"), filed oppositions to EchoStar's request for a rulemaking. The petition and oppositions are available for inspection and copying at the Copyright Office in Room LM 458, James Madison Memorial Building, 101 Independence Avenue, SE., Washington, DC.

Opening of This Proceeding

EchoStar's petition is not the first time that the Copyright Office has been called upon to decide whether it is permissible under section 119 for satellite carriers to retransmit network stations to subscribers who reside within the local markets of those stations. In the summer of 1996, the Office received a letter from American Sky Broadcasting ("ASkyB") requesting the Office issue a declaratory ruling that such local-into-local retransmissions were permissible under section 119. By letter dated August 15, 1996, the Office informed ASkyB that it would not issue a declaratory ruling or formally resolve the matter. The Office did state that if ASkyB filed a Statement of Account and royalty fee for local-into-local retransmissions of network signals, the Office would not question the sufficiency of the filing or return it. See Letter of the Acting General Counsel to William Reyner, August 15, 1996. ASkyB did not petition the Office for a rulemaking proceeding.

One year later, the issue of local-into-local retransmissions of network signals arose again in the context of the adjustment of the section 119 royalty rates. In Docket No. 96–3 CARP SRA, ASkyB argued to the Copyright Arbitration Royalty Panel (CARP) charged with the task of adjusting the section 119 rates that local-into-local retransmissions were permissible under the terms of the statute, and that the royalty rate for such retransmissions should be zero. The CARP declined to adopt ASkyB's zero royalty request because it determined that it lacked subject matter jurisdiction to do so. Report of the CARP at 48 (August 29, 1997). The CARP considered section 119(a)(2)(B), which provides that the satellite compulsory license is "limited to secondary transmissions to persons who reside in unserved households," and examined the section 119(d)(10) definition of an "unserved household." The CARP concluded that:

> [N]etwork signals generally may not be retransmitted to the local coverage area of local network signals. The separate rate request of ASkyB is explicitly intended to apply to retransmission of network signals to served households. Section 119 does not provide a compulsory license for those retransmissions. Hence, we lack subject matter jurisdiction to set a rate for local retransmissions of local network signals.

CARP Report at 48. The CARP did acknowledge, however, that there could be subscribers who resided within a network station's local market that fell within the CARP's interpretation of an "unserved household," but the CARP identified these as being "rare instances." *Id.*

The Librarian of Congress, reviewing the CARP's decision under an arbitrary or contrary to the Copyright Act standard, accepted the CARP's determination stating that he could not "unequivocally say that the Panel's decision is arbitrary or contrary to law." 62 FR 55742, 55753 (October 28, 1997). The Librarian reached this decision because he found the statute to be silent on the issue of local-into-local retransmissions. *Id.* The Librarian did state, however, that although the statute was silent, the Copyright Office "retain[ed] the authority to conduct a rulemaking proceeding to determine the permissibility of local retransmission of network signals to served households, regardless of the Panel's determination in this proceeding." *Id.*[1]

Authority for a Rulemaking Proceeding

As stated in the Librarian's review of the CARP decision, the Copyright Office believes that it has the authority to gather information and conduct a rulemaking to resolve whether local-into-local retransmission of network signals is permissible under section 119. The Office has determined in the past, in the context of the section 111 cable compulsory license, whether certain retransmissions were subject to statutory licensing. See 57 FR 3284 (January 29, 1992) (determining that retransmissions of broadcast signals by satellite carriers and Multichannel Multipoint Distribution Services were not eligible for the section 111 license); 62 FR 18705 (April 17, 1997) (determining that retransmissions of

[1] The Librarian did adopt a zero rate for retransmission of network signals to unserved households located within the local markets of network stations. *Id.*

VOL 63 ISS 16 JA 26 1998 UMI

broadcast signals by Satellite Master Antenna Television systems were eligible for section 111 licensing). The authority to issue a determination in this proceeding is derived from the Office's rulemaking authority under 17 U.S.C. 702.

The objections to EchoStar's petition filed by ALTV, NASA and NAB all counsel against the Copyright Office opening a rulemaking proceeding at this time, preferring instead to resolve the matter through legislation. There is no question that legislative resolution of the issue of local-into-local retransmissions of network stations under section 119 is the best solution. The Office has recommended to Congress that section 119 be clarified to allow local-into-local retransmission. Library of Congress, U.S. Copyright Office, A Review of the Copyright Licensing Regimes Covering Retransmission of Broadcast Signals 119–120 (August 1, 1997). In the meantime, however, the Office believes that it should exercise its duties and responsibilities under section 702 of the Copyright Act and open this rulemaking.

Issues for Public Comment

As presented by Echostar's petition, the question of whether local-into-local retransmissions of network signals is permissible turns on the interpretation to be afforded the definition of an "unserved household." Section 119(a)(2)(B) provides that the satellite compulsory license for retransmission of network signals is "limited to secondary transmissions to persons who reside in unserved households." Section 119(d)(10) defines an "unserved household" as:

> a household that—
>
> (A) cannot receive through the use of a conventional outdoor rooftop receiving antenna, an over-the-air signal of grade B intensity (as defined by the Federal Communications Commission) of a primary network station affiliated with that network, and
>
> (B) has not, within 90 days before the date on which that household subscribes, either initially or on renewal, to receive secondary transmissions by a satellite carrier of a network station affiliated with that network, subscribed to a cable system that provides the signal of a primary network station affiliated with that network.
>
> 17 U.S.C. 119(d)(10).

In interpreting the "unserved household" definition, the primary question is: Was it the intention of Congress to prevent all satellite retransmissions of a network station when a subscriber can receive an off-the-air grade B intensity signal of the local network station, or was Congress attempting to exclude only distant network stations of the same network that might be imported by a satellite carrier into the local affiliate's market? Is there anything in the legislative history that offers guidance on this question? If not, does subsection (B)'s prevention of satellite retransmission when a subscriber is receiving the local network station via cable have any bearing on this issue?

If local-into-local retransmissions of network stations are permissible under section 119, how should a network station's local market be defined? Is the local market definition in section 119(d)(11) appropriate, or should some other measure be used?

In addition, the Copyright office is interested in receiving comment as to what impact, if any, local-into-local retransmissions of network stations by satellite would have on retransmission consent and other provisions and requirements of the Communications Act, 47 U.S.C. ch. 5.

The Copyright Office welcomes and encourages comments as to these questions, and well as any other matters that commenting parties may deem relevant.

Dated: January 21, 1998.

BILLING CODE 1410–31–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Chapter I

[OPP–00473C; FRL–5767–3]

Antimicrobial Rule Development; Stakeholder Meetings

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of Meetings.

SUMMARY: The Antimicrobials Division (AD) of the Office of Pesticide Programs of EPA is continuing its series of stakeholder meetings to obtain views about the antimicrobial rule that is being developed. The rule is being revised in accordance with principles set forth in the Food Quality Protection Act of 1996 (Pub. L. 104–170). To ensure that all interested parties can obtain information about activities related to developing this rule, EPA, in its discretion, has opened a docket in advance of the rule's proposal. This docket includes, but is not limited to, a summary of major discussions at stakeholder meetings, as well as copies of any documents distributed at these meetings.

DATES: The next stakeholder meetings will take place on Tuesday, February 3, 1998, from 2 p.m. to 5 p.m.; and Thursday, March 26, 1998, from 2 p.m. to 5 p.m.

ADDRESSES: The meetings will be held at 1921 Jefferson Davis Highway (Crystal Mall #2) in Room 1126 ("Fishbowl"), Arlington, VA.

FOR FURTHER INFORMATION CONTACT: By mail: Barbara Mandula (7510W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Crystal Drive, Arlington, VA, (703) 308–7378, fax: (703) 308–8481; e-mail: mandula.barbara@epamail.epa.gov.

SUPPLEMENTARY INFORMATION: This notice announces a series of public meetings to ensure that all parties interested in policies, issues, and regulatory actions affecting antimicrobial pesticides can obtain information about ongoing activities. Additionally, a public record has been established for these meetings under docket number "OPP–00473." The docket is available for inspection from 8:30 a.m. to 4 p.m., Monday through Friday, excluding legal holidays. The public record is located in Rm. 119 of the Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA. Copies of EPA documents may be obtained by contacting: Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW, Washington, DC 20460.

List of Subjects

Environmental protection, Antimicrobial pesticides.

Dated: January 15, 1998.

Frank Sanders,

[AZ–005–ROP FRL–5953–4]

Approval and Promulgation of Implementation Plans; Phoenix, Arizona Ozone Nonattainment Area, 15 Percent Rate of Progress Plan and 1990 Base Year Emission Inventory

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA proposes to determine that the Phoenix, Arizona ozone nonattainment area has in place sufficient control measures to meet the 15 percent rate of progress (ROP) requirement in Clean Air Act section 182(b)(2). This proposal is based on EPA's reanalysis of Arizona's 15 percent plan submitted for the Phoenix area. This reanalysis takes into account current information on the implementation of the State's vehicle inspection and maintenance program, additional controls recently adopted by the State, and national rules either proposed or promulgated by EPA that affect emissions in the Phoenix area. EPA is also proposing to approve the area's 1990 base year emissions inventory.

DATES: Comments on this proposal must be received in writing by March 27, 1998. Commenters may also request the opportunity to submit oral comments pursuant to Clean Air Act section 307(d)(5). Requests for a public hearing must be received by February 5, 1998.

ADDRESSES: Written comments should be addressed to Frances Wicher at the Region 9 address.

Copies of the State's submittals, EPA's draft technical support document (TSD) for this rulemaking, EPA's policies governing 15 percent plan approvals and emission inventories, and other supporting documentation are contained in the docket for this rulemaking. Copies of this document and the TSD are also available in the air programs section of EPA Region 9's website, http://www.epa.gov/region09. The docket is available for inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region 9, Office of Air Planning, Air Division, 17th Floor, 75 Hawthorne Street, San Francisco, California 94105. (415) 744–1248.

Arizona Department of Environmental Quality, Library, 3033 N. Central Avenue, Phoenix, Arizona 85012. (602) 207–2217.

FOR FURTHER INFORMATION CONTACT: Frances Wicher, Office of Air Planning (AIR–2), U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, California 94105. (415) 744–1248.

SUPPLEMENTARY INFORMATION:

I. Background

A. Clean Air Act Requirements

1. Base Year Emission Inventories

The Phoenix metropolitan area was originally classified as a moderate ozone nonattainment on November 6, 1991.[1] Section 182(b) of the Clean Air Act (CAA or Act) requires that each state in which all or part of a moderate ozone nonattainment area is located submit, by November 15, 1992, an inventory of actual emissions from all sources, as described in sections 172(c)(3) and 182(a)(1), in accordance with guidance provided by the Administrator. EPA provided preliminary guidance on this base year inventory in the General Preamble for the Implementation of Title I of the Clean Air Act Amendments of 1990, April 16, 1992, 57 FR 13498, 13502, indicating that the inventory should be for calendar year 1990 and should include both anthropogenic and biogenic sources of volatile organic compounds (VOCs), nitrogen oxides (NOX), and carbon monoxide (CO). The inventory should address actual emissions of these pollutants during the peak ozone season in the nonattainment area as well as emissions from sources emitting greater than 100 tons per year in a 25-mile buffer zone around the nonattainment area. The inventory should include all point and area sources, as well as all highway and non-highway (non-road) mobile sources.

2. 15 Percent ROP Plans

Section 182(b)(1)(A) of the CAA requires State's with ozone nonattainment areas classified as moderate and above to develop plans to reduce VOC emissions by 15 percent, net of growth, from the 1990 baseline. The 15 percent rate of progress (ROP) plans were to be submitted by November 15, 1993, and the reductions were required to be achieved by November 15, 1996.

For the 15 percent ROP plans, the CAA sets limitations on the creditability of certain types of reductions. Specifically, a state cannot take credit for reductions achieved by Federal Motor Vehicle Control Program (FMVCP) measures promulgated prior to 1990, or for reductions resulting from requirements to lower the volatility (Reid Vapor Pressure (RVP)) of gasoline promulgated prior to 1990 or required under section 211(h) of the CAA, which restricts gasoline RVP. Furthermore, the CAA does not allow credit for corrections to vehicle inspection and maintenance (I/M) programs or corrections to Reasonably Available Control Technology (RACT) rules as these programs were required prior to 1990.

Although the November 15, 1996 deadline has now passed, the 15 percent ROP requirement remains. Once a statutory deadline has passed and has not been replaced by a later one, the deadline then becomes as soon as possible. *Delaney* v. *EPA*, 898 F.2d 687, 691 (9th Cir. 1990). EPA has interpreted this requirement to be "as soon as practicable" (55 FR 36458, 36505 (September 9, 1990)); therefore, to demonstrate that the Phoenix area has met the CAA section 182(b)(1) requirement, it must be demonstrated that the 15 percent reduction will be achieved as soon as practicable by showing that the applicable implementation plan contains all VOC control measures that are practicable for the Phoenix area and that meaningfully accelerate the date by which the 15 percent level is achieved.

EPA has developed guidance that specifically addresses the crediting of post-1996 emission reductions in 15 percent ROP demonstrations. Under EPA policy, reliance on post-1996 emission reductions in the 15 percent plan necessitates that the 1996 target level of emission reductions be revised to remove the additional emission reductions from the FMVCP and federal RVP regulations between 1996 and the year 15 percent is actually to be demonstrated. References 2, 3 and 4.

EPA's policy regarding 15 percent ROP plans can be found in the General Preamble (57 FR 13498, 13507) and other EPA guidance documents referenced in this document and found in the docket for this rulemaking.

B. Phoenix's 15 Percent ROP Plan

The State of Arizona submitted the initial 15 percent rate of progress plan for the metropolitan Phoenix area (The Maricopa Association of Governments 1993 Ozone Plan for the Maricopa County Area, November 1993 (1993 MAG Plan)) on November 15, 1993 and an Addendum (March 1994) to that plan on April 8, 1994. On April 13, 1994 EPA found the initial plan incomplete because it failed to include, in fully

[1] The Phoenix metropolitan area was recently reclassified from moderate to serious for ozone. 62 FR 60001 (November 6, 1997). This reclassification does not affect the requirement for a 1990 base year inventory or a 15 percent ROP demonstration.

VOL 63 ISS 16 JA 26 1998 UMI

adopted and enforceable form, all of the measures relied upon in the 15 percent demonstration. This incompleteness finding started the 18-month sanction "clock" in CAA section 179 and the two-year clock under section 110(c) for EPA to promulgate a federal implementation plan (FIP) covering the 15 percent ROP requirement. Subsequently in November 1994 and April 1995, Arizona submitted an attainment plan for the Phoenix area which updated the 15 percent ROP demonstrations.[2] On May 12, 1995, EPA found the revised 15 percent plan and the attainment plan complete, turning off the sanctions clock; however, under section 110(c), the FIP clock continues until EPA approves the 15 percent plan. Since 1995, EPA has acted to approve many of the control measures contained in these plans but has not yet acted on the overall 15 percent plan.

The 15 percent ROP demonstration in the MAG 1993 Plan relied primarily on improvements to the State's vehicle emissions inspection and maintenance program (I/M), a summertime gasoline volatility (RVP) limitation of 7.00 pounds per square inch (psi), numerous stationary and area source control measures, and a number of transportation control measures.

Improvements to the State's I/M program (known as the Vehicle Emissions Inspection Program (VEIP)) included biennial IM240 transient testing for model year 1981 and newer vehicles, more stringent testing cut points (the tailpipe emissions levels at which cars are failed), pressure and purge testing, increased waiver limits, improvements to the anti-tampering program, and a remote sensing program. These I/M improvements accounted for 50 percent of the emission reductions necessary to show the required ROP. See 1993 Ozone Plan Addendum, page 3–6. In designing its enhanced VEIP, Arizona relied in good faith on the technical specifications and associated emission reductions in EPA's enhanced I/M regulations, 40 CFR part 51, subpart S as promulgated on November 5, 1992 (57 FR 52950).

Arizona began to implement the improvements to its I/M program in early 1995 and quickly determined that EPA's pressure and purge test could not be implemented in practice in I/M testing lanes, and consequently suspended the tests. The State subsequently redesigned the pressure test and began implementing it in 1996. No effective purge test, however, is currently available. EPA continues to work to develop such a test and Arizona remains committed to implementing a test when it becomes available.

Early testing of the final cut points assumed in the State's 15 percent plan also indicated that they would not work in practice because of unacceptably high false failure rates (i.e., failing cars that should have passed) of up to 50 percent. Arizona is currently working to develop alternatives to the final cut points and intends to begin implementing those alternatives as early as 1999.

The purge test and the final cut points accounted for roughly 60 percent of the total emission reductions expected from the VEIP and 30 percent of the emission reductions necessary to show 15 percent ROP. In part to replace these lost emission reductions and in part to ensure continued progress toward attainment of the ozone standard in the Phoenix area, the State opted into EPA's federal reformulated gasoline program in 1997 (60 FR 30260 (June 3, 1997)) and has recently adopted its own, more stringent Cleaner Burning Gasoline (CBG) program as well as other control measures. EPA proposed to approve the State's CBG program on November 20, 1997. 62 FR 61942.

C. EPA's 15 Percent ROP Plan Obligation

In August 1996, EPA was sued by the American Lung Association of Arizona, *ALAA* v. *Browner*, No. CIV 96–1856 PHX ROS (D.Ariz.). This case sought to enforce EPA's obligation under CAA section 110(c) to promulgate a federal plan for the 15 percent ROP requirement. On July 8, 1997 a consent decree was filed with the U.S. District Court for the District of Arizona establishing a schedule of January 20, 1998 for proposing and May 18, 1998 for promulgating a 15 percent ROP plan. Under the consent decree, EPA's obligation to promulgate a plan is relieved to the extent that it has approved State measures.

The State's 15 percent plan as revised and submitted in 1993 through 1995 does not reflect the changes to the control strategy necessitated by the problems with enhanced I/M and the implementation of the federal RFG program. In addition, EPA guidance requires a recalculation of the 15 percent target emission level if post-1996 emissions reductions (such as those from the RFG program) are to be credited to the 15 percent plan. As a result, EPA does not have in front of it a complete state submittal containing a revised 15 percent ROP demonstration that it could act on without additional analysis, public hearing and adoption by the State. Consequently in this document, EPA is proposing to find, based on its own analysis of the available emission reductions, that the State has sufficient measures to provide for the 15 percent reduction.

II. EPA's Evaluation

A. 1990 Base Year Emission Inventory

EPA is proposing to approve the State's 1990 base year emissions inventory for the Phoenix metropolitan area and to use it, with minor modifications, as the basis for the 15 percent ROP demonstration.

As specified in EPA guidance (Reference 1, p. 13502), the 1990 base year inventory is composed of annual and seasonal inventories of actual (as opposed to permitted or potential) VOC, NO_x, and CO emissions in the Phoenix ozone nonattainment area as well as actual emissions from all large point sources within a 25-mile buffer zone around the nonattainment area.

EPA proposes to approve the base year inventory because it is (1) accurate in that it uses established estimation and measurement methods approved by EPA; (2) comprehensive in that it estimates emissions from all categories of sources for the three ozone precursors; and (3) current in that it provides estimates of actual emissions for the 1990 base year as required.

Table 1 provides a summary of the baseline emissions inventory.

TABLE 1.—METROPOLITAN PHOENIX 1990 BASELINE EMISSIONS INVENTORY

(Metric tons per day)

Source type	VOC	NO_x	CO
Point Sources	25.6	70.9	13.8
Area Sources	111.8	7.4	3.9
On-Road Mobile	136.2	130.1	911.5
Non-Road Mobile	57.9	85.2	521.1
Biogenic	37.3	.....	.....
Total	368.8	293.6	1450.3

Source: 1993 Ozone Plan, Appendix B, Exhibit 1.

For use in its 15 percent ROP analysis, EPA has slightly modified the State's 1990 base year inventory to reflect the Agency's delisting of perchloroethylene (used primarily as a drycleaning solvent) as a VOC (61 FR 4588 (February 7, 1996)), a revised version of EPA's MOBILE5a on-road motor vehicle emission estimation model, and slightly revised inputs to that model to be consistent with base year and future year analyses.[3] These modifications decreased the submitted base year area source inventory by 1.2 metric tons per day and the on-road mobile source inventory by 0.6 metric tons per day for a total decrease of 1.8 metric tons per day.

B. Calculation of the 15 Percent ROP Target

A number of steps are necessary to calculate the 15 percent ROP VOC target emission level. First, the 1990 base year inventory must be revised to exclude sources outside the nonattainment area, biogenic emissions, and any VOC emission reductions that will accrue from the FMVCP and federal RVP standards during the 1990–1996 period. The resulting inventory is referred to as the "adjusted base year inventory." For 15 percent ROP plans that rely on post-1996 emissions reductions, the adjusted base year inventory must also exclude any VOC emission reductions resulting from the FMVCP and federal RVP standards from 1996 until the projected date by which the 15 percent ROP will be demonstrated (henceforth referred to as the demonstration year). See Reference 4. Procedures for calculating emission reductions from the FMVCP and federal RVP standards are discussed in Reference 1 (page 13507) and Reference 6. Table 2 presents the adjusted base year inventory.

TABLE 2.—ADJUSTED BASE YEAR INVENTORIES

	Adjustment (mt VOC/d)	Adjusted base year inventory (mt VOC/d)
1990 Base year inventory	.....	367.0
Stationary sources outside of the nonattainment area	−1.8	.....
Biogenic emissions	−37.3	.....
1990 nonattainment area base year anthropogenic inventory	.....	327.9
FMVCP/RVP 1990–1996	−47.4	.....
Adjusted base year inventory (1996)	.....	280.5

The target level of VOC emissions for demonstrating 15 percent ROP is then calculated by multiplying the adjusted base year inventory by 0.15, adding the VOC reductions from any RACT and/or I/M corrections and from the FMVCP and federal RVP regulations, then subtracting this total from the 1990 nonattainment area base year anthropogenic inventory.

TABLE 3.—15 Percent Rate of Progress Target Levels

(Metric tons of VOC/day)

July 1, year	(A) 1990 ROP base year EI	(B) Red. from FMVCP/ RVP (90–96)	(C) 1990 adj. base year EI (A–B)	(D) 15% target (0.15 x C)	(E) Red. from FMVCP/ RVP (96–99)	(F) RACT & I/M corrections	(G) Needed Red (B + D + E + F)	(H) 1996 target emission level (A–G)
1996	327.9	47.4	280.5	42.1	.....	2.3	91.8	236.1
1998	327.9	47.4	280.5	42.1	3.4	2.3	95.2	232.7
1/1/1999	327.9	47.4	280.5	42.1	4.2	2.3	96.0	231.9
4/1/1999	327.9	47.2	280.5	42.1	4.6	2.3	96.4	231.5
1999	327.9	47.4	280.5	42.1	5.0	2.3	96.8	231.1

NOTE: January 1, 1999 and April 1, 1999 values are interpolated between 1998 and 1999 values.

To demonstrate a 15 percent rate of progress, projected 1996 emissions, accounting for growth after 1990 and including any adjustments for FMVCP/RVP emission reduction occurring after 1996, must be at or below the target emission level.

C. 15 Percent Demonstration

EPA proposes to determine that the Phoenix area will have sufficient controls in place by no later than April 1, 1999 to meet the 15 percent rate of progress requirement and that this date is the most expeditious date practicable for achieving the 15 percent target based on the set of controls EPA has proposed for crediting in the 15 percent demonstration and the unavailability of any other practicable controls that could advance the date.

Table 4 presents the projected controlled 1996 inventory and Table 5 lists the control measures that make up the 15 percent demonstration. EPA notes that the State included a number of adopted and implemented control measures in its 15 percent plan and Voluntary Early Ozone Plan that have not been credited in this 15 percent demonstration because they are not yet in the SIP. These measures remain creditable in future ROP demonstrations to the extent they are SIP approvable.

TABLE 4.—1996 PROJECTED INVENTORY FOR APRIL 1, 1999 DEMONSTRATION

Source Category	Emissions (mt VOC/ day)
On-Road	76.7
Non-Road	43.0
Point	18.2
Area	93.3
Total	231.2
Target Level	231.5
Surplus emission reductions	0.3

[2] The State also submitted its Voluntary Early Ozone Plan for the Metropolitan Phoenix Area (VEOP) on April 21, 1997. This plan contains several additional VOC control measures but does not include any revisions to the demonstration in the previously submitted 15 percent plan.

[3] The modifications that EPA used in its analysis do not affect the approvability of the State's 1990 base year emissions inventory. The delisting of perchloroethylene occurred after the statutory due date for the inventory. In addition, states were not required to upgrade to the later version of MOBILE5a for their base year inventories. Reference 5. Finally, the principle MOBILE5a modification was to use minimum and maximum daily temperatures to calculate temperature corrections to VOC exhaust emissions, hot soak evaporative emissions, and resting loss and running loss emissions instead of a single ambient temperature as was done by Arizona. Although EPA does not recommend the use of a single ambient temperature to calculate these emissions, the impact on the base year inventory in this case is so slight (less than 0.6 metric tons per day out of an inventory of 136 metric tons per day or less than 0.5 percent) as to not constitute grounds for disapproval.

VOL 63 ISS 16 JA 26 1998 UMI

TABLE 5.—CONTROL MEASURES MAKING UP THE 15 PERCENT DEMONSTRATION

Category	Approval status	Adjusted 1996 reduction (mt VOC/d)
Arizona Vehicle Emissions Inspection Program	Approved 60 FR 22518 (May 8, 1995)	3.3
Arizona Summertime Gasoline Volatility Limitation (7.00 psi RVP) (on-road and nonroad).	Approved 62 FR 31734 (June 11, 1997)	13.0
Federal RFG—Phase I (on-road and nonroad)	Approved June 3, 1997 (62 FR 30260)	6.0
National Phase I Non-Road Engines Standards	Promulgated July 3, 1995 (60 FR 34582)	9.1

Total		59.8

Arizona Vehicle Emissions Inspection Program

Enhancements to Arizona's vehicle emission inspection program were approved by EPA in 1995 and included IM240 testing for 1981 and newer vehicles, pressure and purge testing, and tighter cut points. Enhancements to the program were implemented beginning in January, 1995. Emission reductions credited in the 15 percent demonstration reflect the program as actually implemented in 1996 (that is, without the final cut points or the purge test) and assume no further improvements.

Arizona's enhanced I/M program also includes a remote sensing program (RSP). The EPA's proposed 15 percent ROP demonstration, however, does not currently include any reductions from this program. The State has estimated reductions from the RSP of 3.7 metric tons of VOC per day in 1996 based on the analysis in the 1993 MAG plan[4] (Reference 7); however, EPA does not currently have sufficient information to determine an appropriate credit for use in its own analysis. EPA proposes to credit the non-enhanced RSP with up to 3.7 metric tons per day if it obtains sufficient information to determine the appropriate credit.

Summertime Gasoline Volatility Limit (7 psi RVP)

The State's 7 psi summertime gasoline volatility limit was fully implemented in 1996. Emission reduction credit proposed for the 15 percent plan assumes a decrease in the RVP limit from the federally-required 7.8 psi to 7 psi and is calculated for both on-road motor vehicles and non-road gasoline-powered vehicles.

Federal Reformulated Gasoline Program—Phase I

The Federal reformulated gasoline program became effective in the Phoenix area at the retail level on August 4, 1997. 62 FR 30260 (June 3, 1997). As with RVP, the program affects both on-road motor vehicle emissions and non-road gasoline-powered engine emissions. The proposed emission reduction credit for RFG includes emission reductions from both categories.

Arizona has adopted its own Clean Burning Gasoline (CBG) Program to replace the federal RFG program beginning in June, 1998. EPA has recently proposed to approve that program and Arizona has requested to opt-out of the Federal RFG program should EPA grant final approval to its CBG program. Since the State's program has been designed to achieve more emission reductions than available under EPA's RFG regulations, there will be no loss of emission reductions as the Phoenix area transitions from the federal to the state program; therefore, for the purposes of this 15 percent demonstration, EPA proposes to grant emission reductions equivalent to those proposed above for the federal RFG program. If EPA approves the CBG program, the Agency will give it the same credit as federal RFG for the purposes of the 15 percent demonstration. Emissions reductions from the CBG program, if approved by EPA, that are in excess of those proposed for credit above may be used by the State in any future rate-of-progress demonstrations.

Phase I Non-road Engine Standards

On July 3, 1995, EPA promulgated Phase I emission standards for new spark-ignition (gasoline) engines of 25 horsepower or less. These engines include those typically used in lawnmowers and other residential gardening equipment, commercial lawn and garden equipment, and small pumps and compressors, and some other industrial/construction equipment. The Phase I standards were effective with model year 1997 engines and are expected to reduce VOC emissions from the impacted equipment types by 22.9 percent in 1999. See Reference 8.

Stage II Vapor Recovery

EPA approved Arizona's Stage II Vapor Recovery rules (Arizona Revised Statutes §§ 41–2131 through 2133 and Arizona Administrative Code R4–31–901 through R4–31–910) in 1994. This program required the installation of California Air Resources Board (CARB) certified stage II vapor recovery equipment at service stations by November 15, 1994.[5]

[4] Since EPA's approval of the State's VEIP, the State has enhanced the implementation of the RSP. This measure is not currently in the SIP. The State's reduction estimate is for the non-enhanced program.

[5] In its 15 percent plan, the State did not explicitly identify several measures that had been implemented after 1990 but prior to the development of the plan even though these measures are fully creditable in 15 percent plans. These measures include the Stage II vapor recovery program and the final limits in Maricopa County's architectural coating rule. The State, however, did incorporate reductions from these measures into the projected 1996 inventory. For the purposes of EPA's analysis, these measures and their associated reductions (which are identical to the ones calculated by the State) have been explicitly identified.

MCESD Rules

Concurrently with this proposal, EPA has approved MCESD Rules 331, 336, 337, 342, 346, and 351 into the SIP. Rule 331 limits the emissions of VOCs from surface cleaning and degreasing operations. Rule 336 limits emissions from surface coating operations. Rule 337 limits emissions of VOCs from screen, gravure, letterpress, flexographic and lithographic printing processes, including related coating and laminating processes. Rule 342 controls the emissions of VOCs emanating from applying coatings of finishing materials to furniture or fixtures made of wood or wood derived materials. Rule 346 limits VOC emissions from the surface preparation and coating of wood millwork such as shutters, doors, windows and their associated woodwork, and Rule 351 controls emissions of VOCs from organic liquid loading operations at bulk plants and bulk terminals. These rules, which affect emissions from both point and area sources, result in a total reduction of 9.2 metric tons per day from point sources and 2.1 metric ton per day from area sources.

Architectural Coatings

EPA approved MCESD's Rule 335 Architectural Coatings in 1992. This rule had a number of compliance deadlines in 1991 and reductions from these final deadlines are fully creditable to the 15 percent plan. See also Footnote 5.

Consumer Products

On April 2, 1996, EPA proposed national VOC emission standards for 24 categories of consumer products requiring compliance with the standards by 1997. Under EPA policy, 15 percent demonstrations may credit an overall 20 percent reduction in emissions from the consumer products categories covered by this rule. Reference 9. For Maricopa County, this rule will reduce VOC emissions from consumer products by an estimated 2.4 metric tons per day.

This measure, as well as the national autobody refinishing rule and the national architectural and industrial maintenance coating rule discussed in the following sections are statutorily required. See CAA section 183(e) and "Consumer and Commercial Products: Schedule for Regulation," 60 FR 15264 (March 23, 1995). The Agency anticipates at this time that rules will be finalized by mid-1998. EPA has recently been sued to enforce the requirement to promulgate these rules and is currently discussing a schedule for their promulgation. *Sierra Club* v. *Browner*, CIV No. 97–984 PLF (D.D.C.).

The fact that these rules are required federal rules, and will likely soon have court-ordered deadlines, creates circumstances that allow EPA to consider them as part of 15 percent plans. Taking credit for reductions from proposed required federal measures is consistent with the overall scheme of the Clean Air Act ozone nonattainment provisions, as well as the relevant provisions by their terms. Congress anticipated that these federal measures would contribute to both progress toward attainment and attainment of the ozone standard and thus these measures are an integral part of Congress' blueprint for ozone attainment. Therefore, EPA concludes that implementation plans should be allowed to account for those reductions in both attainment and rate-of-progress plans. See Reference 10 and 61 FR 10920, 10936 (March 18, 1996).

Among the categories covered by the national rule for consumer products is windshield wiper fluids. MCESD has also adopted Rule 344 to control emissions from windshield wiper fluids. EPA is currently discussing the enforceability of the rule with the County and has not approved the measure into the SIP, hence the emission reductions from this category are based on the national rule and not Rule 344.

Autobody Refinishing

On April 30, 1996 and December 30, 1997, EPA proposed a national rule governing emissions from autobody refinishing coatings. Under EPA policy (Reference 11), a 37 percent reduction in emissions from autobody refinishing may be credited to this national rule. For Maricopa County, this rule will reduce VOC emissions from autobody refinishing by an estimated 1.4 metric tons per day.

MCESD has also adopted Rule 345 to control emissions from autobody refinishing. EPA is currently discussing the enforceability of this rule with the County and has not approved the measures into the SIP, hence the emission reductions from this category are based on the national rule and not Rule 345.

Architectural and Industrial Maintenance Coatings

On June 25, 1996 EPA proposed a national rule limiting the VOC content of numerous categories of architectural and industrial maintenance (AIM) coatings. Under EPA policy (Reference 12), a 20 percent reduction in emissions from the AIM coatings rule may be credited to this national rule for areas without architectural coating rules. As discussed above, Maricopa County already has in place Rule 335 that limits VOC content of architectural coatings. The national rule, as proposed, includes new or tighter limits than are currently in Rule 335 for a number of coating categories (e.g., traffic marking); therefore, the Phoenix area will realize additional emission reductions from the national rule of 0.6 metric tons per day by mid-1999.

D. "As Soon As Practicable" Demonstration

As discussed above, CAA section 182(b)(1) requires that all moderate and above ozone nonattainment areas prepare plans that provide for a 15 percent VOC emission reduction by November 15, 1996. Since this deadline has passed, in order to demonstrate that the Phoenix area has met the CAA section 182(b)(1) requirement, it must be demonstrated that the 15 percent reduction will be achieved as soon as practicable by showing that the applicable implementation plan contains all VOC control measures that are practicable for the Phoenix area and that meaningfully accelerate the date by which the 15 percent level is achieved. Measures that provide only an insignificant additional amount of reductions or could not be implemented soon enough to meaningfully advance the date by which the 15 percent is demonstrated are not required to be implemented to meet this test.

For the purposes of this 15 percent demonstration only, EPA is proposing to interpret "significant emission reduction" to be equal to or more than one-half of one percent (0.5 percent) of the total emission reduction needed to meet the 15 percent ROP requirement in 1999 for the Phoenix nonattainment area. One-half of one percent is 0.5 metric tons per day.

For the purposes of this 15 percent demonstration only, EPA is also proposing to interpret "to meaningfully accelerate the date by which the 15 percent is demonstrated" to mean three or more months. Because April 1 is before the June 1 start of the Phoenix ozone season, the ambient air quality benefit that would be gained by advancing the demonstration date by less than three months in advance of April 1 would not justify the implementation of additional federal measures in the Phoenix area for the purposes of demonstrating 15 percent. On the other hand, to advance the benchmark demonstration date for the "as soon as practicable" test much more than three months (that is, before

VOL 63 ISS 16 JA 26 1998 UMI

January 1, 1999) would leave so little time between the projected effective date of this action (July 1, 1998) and the benchmark demonstration date that no measure could be reasonably implemented in that short time period. Based on this reasoning, EPA believes that three months is an appropriate benchmark for this "as soon as practicable" test in this case.

Based on its analysis and the set of SIP-approved and federal measures proposed for credit above, EPA is projecting that the Phoenix area will meet the required 15 percent reduction no later than April 1, 1999. An additional emission reduction totaling at least 0.6 metric tons per day would be needed by January 1, 1999 to advance the demonstration date to January 1, 1999. See TSD, Section III.D. Therefore, to show that April 1, 1999 is the "as soon as practicable date" to demonstrate a 15 percent ROP for the Phoenix area, it must be shown that there are no measures that achieve a 0.6 metric tons per day reduction by January 1, 1999.

EPA analyzed a number of control measures that could potentially advance the date by which the 15 percent reduction is demonstrated in the Phoenix area and has found that there are no measures or combination of measures that would advance the date by more than a de minimis amount. These measures included ones recommended by EPA (see "Sample City Analysis Comparison of Enhanced I/M Reductions Versus Other 15 Percent ROP Plan Measures," which is an attachment to Reference 2), by the State and Territorial Air Pollution Program Administrators/Association of Local Air Pollution Control Officials (see "Meeting the 15-Percent Rate-of-Progress Requirement Under the Clean Air Act: A Menu of Options," STAPPA/ALAPCO, September 1993), and in the Report of the Governor's Air Quality Strategies Task Force (December 2, 1996), and the "Reanalysis of the Metropolitan Voluntary Early Ozone Plan," ADEQ *et al.* October 1997.

Most of the measures EPA analyzed generated very small additional emission reductions by January 1, 1999 (e.g., a complete ban on open burning) or could not be implemented to achieve emission reduction before January 1, 1999 (e.g., I/M improvements). In many cases, the State is already developing (e.g., industrial cleaning solvents) or had already adopted a similar measure (e.g., graphic arts) so that little, if any, additional reductions would be achieved by a federal measure. The complete analysis of potential measures is contained in the TSD for this proposal.

Based on this analysis, EPA has concluded that there are no reasonable measures or combination of reasonable measures that could meaningfully advance the demonstration date; therefore, the Agency proposes to find that April 1, 1999 is the most expeditious date practicable to demonstrate the 15 percent reduction.

III. Conclusion

Pursuant to its authority under CAA section 110(c) and for the reasons discussed above, EPA is proposing to determine that the Phoenix metropolitan area has in place or will have in place sufficient control measures to meet the 15 percent ROP requirement for VOCs in CAA section 182(b)(1)(A) as soon as practicable. This proposed determination is predicated on EPA's reanalysis of the State's 15 percent ROP plan to reflect the realities of the VEIP, reductions from additional controls adopted by the State, and additional federal regulations.

EPA is also proposing to approve the State's 1990 base year inventory under CAA sections 110(k)(2) and 182(a)(1).

IV. Administrative Requirements

A. Executive Order (E.O.) 12866

The Office of Management and Budget has exempted this action from E.O. 12866 review.

B. Regulatory Flexibility Act

Under the Regulatory Flexibility Act, 5 U.S.C. 601 et seq., EPA must prepare a regulatory flexibility analysis assessing the impact of any proposed or final rule on small entities. 5 U.S.C. 603 and 604. Alternatively, EPA may certify that the rule will not have a significant economic impact on a substantial number of small entities. Small entities include small businesses, small not-for-profit enterprises, and government entities with jurisdiction over populations of less than 50,000.

This proposal simply presents the analysis of the emission impacts on the Phoenix metropolitan area of already adopted or proposed State and federal rules. This action neither proposes the promulgation of additional measures nor requires Arizona or its local jurisdictions to adopt or implement additional measures beyond those that they currently have adopted and implemented or have been proposed or implemented at the federal level. As such, it does not propose to regulate any entities. Therefore, pursuant to 5 U.S.C. 605(b), EPA certifies that today's proposed action does not have a significant impact on a substantial number of small entities within the meaning of those terms for RFA purposes.

C. Unfunded Mandates Reform Act

Title II of the Unfunded Mandates Reform Act of 1995 (UMRA), P.L. 104–4, establishes requirements for Federal agencies to assess the effects of their regulatory actions on State, local, and tribal governments and the private sector. Under section 202 of the UMRA, EPA generally must prepare a written statement, including a cost-benefit analysis, when EPA promulgates "any general notice of proposed rulemaking that is likely to result in promulgation of any rule that includes any Federal mandate that may result in the expenditures by State, local, and tribal governments, in the aggregate, or by the private sector, of $100 million or more" in any one year. A "Federal mandate" is defined, under section 101 of UMRA, as a provision that "would impose an enforceable duty" upon the private sector or State, local, or tribal governments", with certain exceptions not here relevant. Under section 203 of UMRA, EPA must develop a small government agency plan before EPA "establish[es] any regulatory requirements that might significantly or uniquely affect small governments". Under section 204 of UMRA, EPA is required to develop a process to facilitate input by elected officers of State, local, and tribal governments for EPA's "regulatory proposals" that contain significant Federal intergovernmental mandates. Under section 205 of UMRA, before EPA promulgates "any rule for which a written statement is required under [UMRA section] 202", EPA must identify and consider a reasonable number of regulatory alternatives and either adopt the least costly, most cost-effective or least burdensome alternative that achieves the objectives of the rule, or explain why a different alternative was selected.

As explained above, sections 202, 203, 204, and 205 of UMRA do not apply to today's action because it does not impose an enforceable duty on or otherwise affect any entity. Therefore, EPA is not required and has not taken any actions under UMRA.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[IL160–1b; AD–FRL–5951–7]

Approval and Promulgation of Implementation Plans; Illinois

AGENCY: Environmental Protection Agency (USEPA).

ACTION: Proposed rule.

SUMMARY: The USEPA proposes to approve a variance allowing a temporary increase in particulate matter emissions from the Marathon Oil refinery in Robinson, Illinois, to allow deferral of repairs of control equipment until the time of a scheduled maintenance period. In the Final Rules section of this **Federal Register**, USEPA is fully approving the State Implementation Plan revision as a direct final rule without prior proposal, because the USEPA views this as a noncontroversial revision and anticipates no adverse comments. A detailed rationale for the approval is set forth in the direct final rule. If no adverse written comments are received in response to these actions, no further activity is contemplated in relation to this proposed rule. If USEPA receives adverse written comments, the direct final rule will be withdrawn and all public comments will be addressed in a subsequent final rule based on this proposed rule. Any parties interested in commenting on this action should do so at this time.

DATES: Written comments must be received on or before February 25, 1998.

ADDRESSES: Written comments should be mailed to: J. Elmer Bortzer, Chief, Regulation Development Section, Air Programs Branch (AR–18J), United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.

A copy of the State submittal is available for inspection at: Regulation Development Section, Air Programs Branch (AR–18J), United States Environmental Protection Agency, Region 5, 77 West Jackson Boulevard, Chicago, Illinois 60604.

FOR FURTHER INFORMATION CONTACT: John Summerhays, at (312) 886–6067.

SUPPLEMENTARY INFORMATION: For additional information see the direct final rule published in the rules section of this **Federal Register**.

Authority: 42 U.S.C. 7401 et seq.

Dated: January 8, 1998.

Pacific Halibut Fisheries; Catch Sharing Plan

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Proposed changes to catch sharing plan and sport fishing management; availability of draft environmental assessment and regulatory impact review.

SUMMARY: NMFS proposes to approve and implement changes to the Area 2A Pacific halibut Catch Sharing Plan (Plan): (1) To adjust the Washington sport allocation; (2) to provide for an incidental catch of halibut in the commercial sablefish fishery off Washington under certain circumstances; and (3) to adjust management of the sport fisheries off Oregon and Washington under authority of the Northern Pacific Halibut Act of 1982 (Halibut Act). NMFS also proposes

1998
UMI

sport fishery regulations to implement the Plan in 1998. A draft environmental assessment and regulatory impact review (EA/RIR) on this action also is available for public comment.

DATES: Comments must be received by February 17, 1998.

ADDRESSES: Send comments or requests for a copy of the Plan to William Stelle, Jr., Regional Administrator, Northwest Region, NMFS, 7600 Sand Point Way NE, Seattle, WA 98115.

FOR FURTHER INFORMATION CONTACT: Joe Scordino, 206–526–6143.

SUPPLEMENTARY INFORMATION: The Halibut Act of 1982 at 16 U.S.C. 773c provides that the Secretary of Commerce (Secretary) shall have general responsibility to carry out the Halibut Convention between the United States and Canada and that the Secretary shall adopt such regulations as may be necessary to carry out the purposes and objectives of the Convention and the Halibut Act. Section 773c(c) also authorizes the Regional Fishery Management Council having authority for the geographic area concerned to develop regulations governing the Pacific halibut catch in U.S. Convention waters that are in addition to, but not in conflict with, regulations of the International Pacific Halibut Commission (IPHC). Accordingly, catch sharing plans to allocate the total allowable catch (TAC) of Pacific halibut between treaty Indian and non-Indian harvesters, and among non-Indian commercial and sport fisheries in IPHC statistical Area 2A (off Washington, Oregon, and California) have been developed each year since 1988 by the Pacific Fishery Management Council (Council) in accordance with the Halibut Act. In 1995, NMFS implemented a Council-recommended long-term Plan (60 FR 14651, March 20, 1995) which was revised in 1996 (61 FR 11337, March 20, 1996) and 1997 (62 FR 12759, March 16, 1997). The Plan allocates 35 percent of the Area 2A TAC to Washington treaty Indian tribes in Subarea 2A–1 and 65 percent to non-Indian fisheries in Area 2A. The allocation to non-Indian fisheries is divided into three shares, with the Washington sport fishery (north of the Columbia River) receiving 36.6 percent, the Oregon/California sport fishery receiving 31.7 percent, and the commercial fishery receiving 31.7 percent. The commercial fishery is further divided into two sectors; a directed commercial fishery that is allocated 85 percent, and an incidental catch in the salmon troll fishery that is allocated 15 percent of the commercial allocation. The directed commercial fishery in Area 2A is confined to southern Washington (south of 46°53'18" N. lat.), Oregon and California. The Plan also divides the sport fisheries into seven geographic areas each with separate allocations, seasons, and bag limits.

Council Recommended Changes to the Plan

At its September 1997 public meeting, the Council adopted proposing for public comment, the following changes to the Plan: (1) Modifying the Washington sport subarea allocations and seasons at TACs in excess of recent years TACs and providing an allocation to an incidental catch commercial fishery off Washington at TACs greater than 900,000 lb (408.2 mt); and, (2) re-structuring the Oregon sport fisheries to framework the opening dates for the May and August all-depth seasons, and modifying the management of the south coast subarea to provide a fixed season or to combine the central and south coast subareas into one subarea.

At its November 1997 public meeting, the Council considered the results of State sponsored workshops on the proposed changes to the Plan and public comment, and made final recommendations for eight modifications to the Plan as follows:

(1) Revise the distribution of the Washington sport allocation among the Washington sport fishery subareas when the Area 2A TAC is above 550,000 lb (249.5 mt) to facilitate expanded season lengths. When the Washington sport allocation is between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt), 32 percent of the amount between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt) is distributed each to the Washington Inside Waters (Puget Sound) subarea, the Washington North Coast subarea, and the Washington South Coast subarea. The Columbia River subarea receives the remaining 4 percent of the Washington sport allocation between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt). When the Washington sport allocation is above 224,110 lb (101.7 mt), 32 percent of the amount between 130,845 lb (59.4 mt) and 214,110 lb (97.1 mt) is distributed to each of the 3 Washington sport subareas described above and the remaining 4 percent is allocated to the Columbia River subarea.

(2) Revise the distribution of the Washington sport allocation when the Area 2A TAC is above 942,040 lb (427.3 mt) to provide for retention of incidentally caught halibut in the primary directed sablefish fishery north of Point Chehalis, WA. When the Washington sport allocation is above 224,110 lb (101.7 mt), any amount of that allocation above 214,110 lb (97.1 mt) is allocated to this fishery. The area north of Point Chehalis has been closed to the directed commercial fishery in recent years and this revision allows commercial sablefish fishers operating in this area an opportunity to retain incidentally caught halibut in years when the Area 2A TAC is high.

(3) Revise the sport season structure priorities for the Washington north coast subarea to extend the season for 5 days per week through June after achieving priorities for a 5 day per week season in May and a July 1–4 opening.

(4) Revise the sport season structure for the Washington south coast subarea to have a 5 day per week season with closures on Friday and Saturday to extend the season and increase fishing opportunity.

(5) Establish a framework opening date for the May and August sport fisheries in Oregon south of Cape Falcon, OR to allow fishers to know in advance what day the fishery will open each year and allow fishers to better plan and schedule fishing trips.

(6) Establish a fixed season for the Oregon south coast subarea sport fishery in May (similar to the fixed season in the Oregon central coast sport fishery) to allow fishers to better plan and schedule fishing trips. Fixed season open dates would be established preseason based on projected catch per day and number of days to achievement of each subarea season subquota for the May and August fisheries in Oregon south of Cape Falcon.

(7) Revise the structuring of the August sport fishery off Oregon (Cape Falcon, OR to the Oregon/California border) to provide for a restricted fishery inside 30 fathoms if the remaining quota is insufficient to allow for one day of an all-depth fishery.

(8) Revise the inseason management measures to allow the transfer of allocations between sport fishery subareas north of Cape Falcon, OR that are projected to be unused as of September 30 of each year. This would allow unused allocations to be utilized by Washington sport subareas with short seasons.

NMFS is proposing to implement the eight changes to the Plan recommended by the Council as well as one addition to the Plan to better implement the Council's intent and several minor corrections to the Plan. The implementation provisions for the incidental catch of halibut in the salmon troll fishery would be clarified, as proposed below, to stipulate that the August season is closed unless notice of an opening is provided on the NMFS hotline. The term "Regional Director" would be changed to "Regional Administrator" in several places in the Plan. The word "approximately" would be added to references to the percentages of the Area 2A TAC in the Plan where the percentage is rounded to the nearest tenth.

In addition, NMFS is proposing several changes to the Plan to eliminate reference to IPHC charterboat licenses because the IPHC is proposing to eliminate its license requirements for charterboats. The proposed changes to the Plan on charterboat licenses would not change the effect of the Plan of preventing commercial fishers from accessing the sport allocation (i.e., operating in the sport fisheries) and conversely preventing sport fishers from participating in the commercial fishery because the remaining commercial license requirements provide an adequate regulatory mechanism.

Proposed Changes to the Catch Sharing Plan

Accordingly, NMFS is proposing to approve the Council recommendations and proposes the following changes to the Plan:

Section (b) of the Plan would be modified to read as follows:

This Plan allocates 35 percent of the Area 2A TAC to U.S. treaty Indian tribes in the State of Washington in subarea 2A–1, and 65 percent to non-Indian fisheries in Area 2A. The allocation to non-Indian fisheries is divided into three shares, with the Washington sport fishery (north of the Columbia River) receiving 36.6 percent, the Oregon/California sport fishery receiving 31.7 percent, and the commercial fishery receiving 31.7 percent. Allocations within the non-Indian commercial and sport fisheries are described in sections (e) and (f) of this Plan. These allocations may be changed if new information becomes available that indicates a change is necessary and/or the Pacific Fishery Management Council takes action to reconsider its allocation recommendations. Such changes will be made after appropriate rulemaking is completed and published in the **Federal Register**.

In section (e) Non-Indian Commercial Fisheries, the first paragraph would be revised to read as follows:

The non-Indian commercial fishery is allocated 31.7 percent of the non-Indian allocation for a directed halibut fishery and an incidental catch fishery during the salmon troll fishery. The non-Indian commercial allocation is approximately 20.6 percent of the Area 2A TAC. Incidental catch of halibut in the primary directed sablefish fishery north of Point Chehalis, WA will be authorized if the Washington sport allocation exceeds 224,110 lb (101.7 mt) as described in section (e)(3) of this Plan. The structuring and management of these three fisheries is as follows."

In section (e) Non-Indian Commercial Fisheries, paragraph (3) would be renumbered (4), and would be revised to read as follows:

Commercial license restrictions/ declarations. Commercial fishers must choose either (1) to operate in the directed halibut commercial fishery in Area 2A and/or retain halibut caught incidentally in the primary directed sablefish fishery north of Point Chehalis, WA or (2) to retain halibut caught incidentally during the salmon troll fishery. Commercial fishers operating in the directed halibut fishery and/or retaining halibut incidentally caught in the primary directed sablefish fishery must send their license application to the IPHC postmarked no later than April 30, or the first weekday in May, if April 30 falls on a weekend, in order to obtain a license to fish for halibut in Area 2A. Commercial fishers operating in the salmon troll fishery who seek to retain incidentally caught halibut must send their application for a license to the IPHC for the incidental catch of halibut in Area 2A postmarked no later than March 31, or the first weekday in April, if March 31 falls on a weekend. Fishing vessels licensed by IPHC to fish commercially in Area 2A are prohibited from operating in the sport fisheries in Area 2A.

In section (e) Non-Indian Commercial Fisheries, a new paragraph (3) would be added to read as follows:

Incidental catch in the sablefish fishery north of Point Chehalis. If the Area 2A TAC is greater than 900,000 lb (408.2 mt), the primary directed sablefish fishery north of Point Chehalis will be allocated the Washington sport allocation that is in excess of 214,110 lb (97.1 mt), provided a minimum of 10,000 lb (4.5 mt) is available (i.e., the Washington sport allocation is 224,110 lb (101.7 mt) or greater). If the amount above 214,110 lb (97.1 mt) is less than 10,000 lb (4.5 mt), then the excess will be allocated to the Washington sport subareas according to section (f) of this Plan. The Council will recommend landing restrictions at its spring public meeting each year to control the amount of halibut caught incidentally in this fishery. The landing restrictions will be based on the amount of the allocation and other pertinent factors, and may include catch or landing ratios, landing limits, or other means to control the rate of halibut landings. NMFS will publish the landing restrictions annually in the **Federal Register**.

In section (f) Sport Fisheries, the first paragraph would be revised to read as follows:

The non-Indian sport fisheries are allocated 68.3 percent of the non-Indian share, which is approximately 44.4 percent of the Area 2A TAC. The allocation is further divided as subquotas among seven geographic subareas.

In section (f) Sport Fisheries, paragraphs (1)(i) through (vi) for each sport fishery subarea would be revised as follows:

The first sentence of paragraph (i) would be revised to read as follows:

Washington inside waters (Puget Sound) subarea. This sport fishery subarea is allocated 28.0 percent of the first 130,845 lb (59.4 mt) allocated to the Washington sport fishery, and 32 percent of the Washington sport allocation between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt) (except as provided in section (e)(3) of this Plan).

The first sentence of paragraph (ii) would be revised to read as follows:

Washington north coast subarea. This sport fishery subarea is allocated 57.7 percent of the first 130,845 lb (59.4 mt) allocated to the Washington sport fishery, and 32 percent of the Washington sport allocation between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt) (except as provided in section (e)(3) of this Plan)." Also, the third priority for the structuring of the season would be revised to read as follows:

If the preseason prediction indicates that these two goals can be met without utilizing the quota for this subarea, then the next priority is to extend the fishery into June and continue for 5 days per week (Tuesday through Saturday) for as long a period as possible.

The first sentence of paragraph (iii) would be revised to read as follows:

Washington south coast subarea. This sport fishery is allocated 12.3 percent of the first 130,845 lb (59.4 mt) allocated to the Washington sport fishery, and 32 percent of the Washington sport allocation between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt) (except as provided in section (e)(3) of this Plan)." Also, the opening of the fishery would be revised to read as follows: "The fishery will open on May 1 and continue five days per week (Sunday through Thursday) until 1,000 lb (0.45 mt) are projected to remain in the subarea quota. If May 1 falls on a Friday or Saturday, the fishery will open on the following Sunday.

The first sentence of paragraph (iv) would be revised to read as follows:

Columbia River subarea. This sport fishery subarea is allocated 2.0 percent

VOL 63 ISS 16 JA 26 1998 UMI

of the first 130,845 lb (59.4 mt) allocated to the Washington sport fishery, and 4 percent of the Washington sport allocation between 130,845 lb (59.4 mt) and 224,110 lb (101.7 mt) (except as provided in section (e)(3) of this Plan). This subarea also is allocated 2.0 percent of the Oregon/California sport allocation.

Paragraphs (v), (v)(A), (v)(B) and (v)(C) of the Plan for the Oregon central coast subarea are revised to read as follows:

Oregon central coast subarea. If the Area 2A TAC is 388,350 lb (176.2 mt) and above, this subarea extends from Cape Falcon to the Siuslaw River at the Florence north jetty (44°01'08" N. lat.) and is allocated 88.4 percent of the Oregon/California sport allocation, which is approximately 18.21 percent of the Area 2A TAC. If the Area 2A TAC is less than 388,350 lb (176.2 mt), this subarea extends from Cape Falcon to the California border and is allocated 95.4 percent of the Oregon/California sport allocation. The structuring objectives for this subarea are to provide two periods of fishing opportunity in May and in August in productive deeper water areas along the coast, principally for charterboat and larger private boat anglers, and provide a period of fishing opportunity in the summer for nearshore waters for small boat anglers. Fixed season dates will be established preseason for the May and August openings and will not be modified inseason except that the August openings may be modified inseason if the combined Oregon subarea quota is estimated to be achieved. Recent year catch rates will be used as a guideline for estimating the catch rate for the May and August fishery each year. The number of fixed season days established will be based on the projected catch per day with the intent of not exceeding the subarea season subquotas. ODFW will monitor landings and provide a post-season estimate of catch within 2 weeks of the end of the fixed season. If sufficient catch remains for an additional day of fishing after the May season or the August season, openings will be provided if possible in May and August respectively. Potential additional open dates for both the May and August seasons will be announced preseason. If a decision is made inseason to allow fishing on one or more of these additional dates, notice of the opening will be announced on the NMFS hotline (206) 526–6667 or (800) 662–9825. No all-depth halibut fishing will be allowed on the additional dates unless the opening date has been announced on the NMFS hotline. Any poundage remaining unharvested in the subquotas from earlier seasons will be added to the next season. The daily bag limit for all seasons is two halibut per person, one with a minimum 32–inch (81.3–cm) size limit and the second with a minimum 50–inch (127.0 cm) size limit. ODFW will sponsor a public workshop shortly after the IPHC annual meeting to develop recommendations to NMFS on the open dates for each season each year. The three seasons for this subarea are as follows.

(A) The first season is an all-depth fishery that begins on the second Thursday in May and is allocated 68 percent of the subarea quota. Fixed season dates will be established preseason based on projected catch per day and number of days to achievement of the subquota for this first season. No inseason adjustments will be made, except that additional opening days (established preseason) may be allowed if any quota for this season remains unharvested. The fishery will be structured for 2 days per week (Friday and Saturday) if the season is for 4 or fewer fishing days. The fishery will be structured for 3 days per week (Thursday through Saturday) if the season is for 5 or more fishing days.

(B) The second season opens the day following closure of the first season, only in waters inside the 30–fathom (55 m) curve, and continues daily until 7 percent of the subarea quota is taken, or until the day before the first Friday in August, whichever is earlier.

(C) The last season is a coastwide (Cape Falcon, OR to Oregon/California border) all-depth fishery that begins on the first Friday in August and is allocated 25 percent of the subarea quota. Fixed season dates will be established preseason based on projected catch per day and number of days to achievement of the combined Oregon subarea quotas south of Cape Falcon, OR. The all-depth fishery will be structured for 2 days per week (Friday and Saturday). No inseason adjustments will be made unless the combined Oregon subarea quota is estimated to be achieved. Additional openings of the all-depth fishery (established preseason) may be allowed if quota remains unharvested. If quota remains unharvested, but is insufficient for one day of an all-depth fishery, the sport fishery from Cape Falcon, OR to the Oregon/California border will be reopened in the area inside the 30–fathom (55 m) curve and will continue each day until the combined Oregon subarea quotas (south of Cape Falcon) are estimated to have been taken, or September 30, whichever is earlier.

Paragraphs (vi), (vi)(A), (vi)(B) and (vi)(C) of the Plan for the Oregon south coast subarea would be revised to read as follows:

Oregon south coast subarea. If the Area 2A TAC is 388,350 lb (176.2 mt) and greater, this subarea extends from the Siuslaw River at the Florence north jetty (44°01'08" N. lat.) to the California border (42°00'00" N. lat.) and is allocated 7.0 percent of the Oregon/California sport allocation, which is approximately 1.44 percent of the Area 2A TAC. If the Area 2A TAC is less than 388,350 lb (176.2 mt), this subarea will be included in the Oregon central coast subarea. The structuring objective for this subarea is to create a south coast management zone that has the same objectives as the Oregon central coast subarea and is designed to accommodate the needs of both charterboat and private boat anglers in the south coast subarea where weather and bar crossing conditions very often do not allow scheduled fishing trips. Fixed season dates will be established preseason for the May and August openings and will not be modified inseason except that the August openings may be modified inseason if the combined Oregon subarea quota is estimated to be achieved. Recent year catch rates will be used as a guideline for estimating the catch rate for the May and August fishery each year. The number of fixed season days established will be based on the projected catch per day with the intent of not exceeding the subarea season subquotas. ODFW will monitor landings and provide a post-season estimate of catch within 2 weeks of the end of the fixed season. If sufficient quota remains for an additional day of fishing after the May season or the August season, openings will be provided in May and August respectively. Potential additional open dates for both the May and August seasons will be announced preseason. If a decision is made inseason to allow fishing on one or more of these additional dates, notice of the opening will be announced on the NMFS hotline (206) 526–6667 or (800) 662–9825. No all-depth halibut fishing will be allowed on the additional dates unless the opening date has been announced on the NMFS hotline. Any poundage remaining unharvested in the subquotas from earlier seasons will be added to the next season. The daily bag limit for all seasons is two halibut per person, one with a minimum 32–inch (81.3–cm) size limit and the second with a minimum 50–inch (127.0 cm) size limit. ODFW will sponsor a public workshop shortly after the IPHC annual meeting to develop recommendations to NMFS on the open dates for each season each

year. The three seasons for this subarea are as follows.

(A) The first season is an all-depth fishery that begins on the second Thursday in May and is allocated 80 percent of the subarea quota. Fixed season dates will be established preseason based on projected catch per day and number of days to achievement of the subquota for this first season. No inseason adjustments will be made, except that additional opening days (established preseason) may be allowed if any quota for this season remains unharvested. The fishery will be structured for 2 days per week (Friday and Saturday) if the season is for 4 or fewer fishing days. The fishery will be structured for 3 days per week (Thursday through Saturday) if the season is for 5 or more fishing days.

(B) The second season is a restricted area fishery that is allocated 20 percent of the subarea quota. The restricted season opens the day following closure of the first season, only in waters inside the 30–fathom (55 m) curve, and continues daily until the subarea quota is estimated to have been taken, or until the day before the first Friday in August, whichever is earlier.

(C) The last season is a coastwide (Cape Falcon, OR to Oregon/California border) all-depth fishery that begins on the first Friday in August. Fixed season dates will be established preseason based on projected catch per day and number of days to achievement of the combined Oregon subarea quotas south of Cape Falcon, OR. The all-depth fishery will be structured for 2 days per week (Friday and Saturday). No inseason adjustments will be made unless the combined Oregon subarea quota is estimated to be achieved. Additional openings of the all-depth fishery (established preseason) may be allowed if quota remains unharvested. If quota remains unharvested, but is insufficient for one day of an all-depth fishery, the sport fishery from Cape Falcon, OR to the Oregon/California border will be reopened in the area inside the 30–fathom (55 m) curve and will continue each day until the combined Oregon subarea quotas is estimated to have been taken, or September 30, whichever is earlier.

Paragraph (f)(5)(i) on flexible inseason management provisions would be revised to read as follows:

The Regional Administrator, NMFS Northwest Region, after consultation with the Chairman of the Pacific Fishery Management Council, the IPHC Executive Director, and the Fisheries Director(s) of the affected state(s), is authorized to modify regulations during the season after making the following determinations: (A) The action is necessary to allow allocation objectives to be met. (B) The action will not result in exceeding the catch limit for the area. (C) If any of the sport fishery subareas north of Cape Falcon, OR are not projected to utilize their respective quotas by September 30, NMFS may take inseason action to transfer any projected unused quota to a Washington sport subarea projected to have the fewest number of sport fishing days in the calendar year.

In section (f)(5)(ii) on flexible inseason management, a new paragraph (E) is added to read as follows:

Modification of subarea quotas north of Cape Falcon, OR consistent with the standards in section (f)(5)(i)(C) of this Plan.

Proposed 1998 Sport Fishery Management Measures

NMFS also proposes sport fishery management measures necessary to implement the Plan in 1998. It is unknown at this time what the 1998 TAC will be, but information available from the IPHC indicates the TAC may be similar to 1997. The final TAC will be determined by the IPHC at its annual meeting in January 1998. The proposed 1998 sport fishery regulations based on the 1997 Area 2A TAC of 700,000 lb (317.5 mt) are as follows:

Washington Inside Waters Subarea (Puget Sound and Straits)

This subarea would be allocated 48,056 lb (21.8 mt) at an Area 2A TAC of 700,000 lb (317.5 mt) in accordance with the revised Plan. Although the allocation is 3 percent greater than 1997, the season length would be reduced from 59 days open in 1997 because of increased catch per day open (1,470 lb (0.7 mt) per day in 1997 compared to 844 lb (0.4 mt) per day in 1996). In accordance with the procedure developed with IPHC to project the catch in this subarea based on past catch per "fishing day equivalent" (FED), where a weekday is equal to 1 FED and a weekend/holiday is equal to 2.5 FEDs, a total of 76 FEDs were calculated (for a subarea quota of 48,056 lb (21.8 mt)) based on an average catch of 626 lb (0.3 mt) per FED in the past 3 years. The proposed number of open days for 1998 was then based on setting a season that opens in May and continues at least through July 4 in accordance with the Plan. If the season structuring is similar to 1997, then there would be a 47 day season that would open on May 21 (Thursday) and continue for 5 days per week (Thursday through Monday) through July 24 (Friday) when the season would close. The final determination of the season dates that will be open would be based on the allowable harvest level, projected 1998 catch rates, and recommendations developed in a public workshop sponsored by Washington Department of Fish and Wildlife after the 1998 TAC is set by the IPHC. The daily bag limit would be one halibut of any size per day per person.

Washington North Coast Subarea (north of the Queets River)

This subarea would be allocated 86,917 lb (39.4 mt) at an Area 2A TAC of 700,000 lb (317.5 mt) in accordance with the revised Plan. The season would open on May 1 and continue for 5 days per week (Tuesday through Saturday) until the quota is taken. Based on the 1997 catch of 1,468 lb (0.7 mt) per day, it is anticipated that the season would extend past July 4 thereby achieving the three priorities for this subarea in the Plan. The daily bag limit would be one halibut of any size per day per person. A portion of this subarea located about 19 nm (35 km) southwest of Cape Flattery would be closed to sport fishing for halibut. The size of this closed area is described in the Plan, but may be modified preseason by NMFS to maximize the season length.

Washington South Coast Subarea

This subarea would be allocated 27,513 lb (12.5 mt) at an Area 2A TAC of 700,000 lb (317.5 mt) in accordance with the revised Plan. The fishery would open on May 3 (Sunday) and continue 5 days per week (Sunday through Thursday) until 1,000 lb (0.45 mt) remain in the quota, and then would reopen as a nearshore fishery for 7 days per week until the remaining subarea quota is taken, or September 30, whichever occurs first. The daily bag limit would be one halibut of any size per day per person. The northern offshore portion of this area west of 124°40'00" W. long. and north of 47°10'00" N. lat. would be closed to sport fishing for halibut.

Columbia River Subarea

This subarea would be allocated 6,929 lb (3.1 mt) at an Area 2A TAC of 700,000 lb (317.5 mt) in accordance with the revised Plan. The fishery would open on May 1 and continue 7-days per week until the quota is reached or September 30, whichever occurs first. The daily bag limit would be one halibut with a minimum overall size limit of 32 inches (81.3 cm).

Oregon Central Coast Subarea

This subarea would be allocated 127,504 lb (57.8 mt) at an Area 2A TAC

VOL 63 ISS 16 JA 26 1998 UMI

of 700,000 lb (317.5 mt) in accordance with the revised Plan. The May all-depth season would be allocated 86,703 lb (39.3 mt) and based on an observed increasing catch per day trend in this fishery, an estimated 15,600 lb to 18,400 lb (7.1 - 8.3 mt) would be caught per day in 1998 resulting in a 5 day fixed season. In accordance with the Plan, the season dates would be May 14, 15, 16, 21, and 22. Additional fishing days, if the quota is not taken, would be scheduled for early June. The restricted depth fishery inside 30–fathoms would be allocated 8,925 lb (4.1 mt) and would open on May 23 and continue until August 6 or attainment of quota for this season. The August coastwide all-depth fishery (Cape Falcon to Oregon/California border) would be allocated 31,876 lb (14.5 mt) which is only sufficient for a 1-day opening on August 7 based on past catch rates observed in this fishery. If sufficient quota remains after this season for additional days fishing, the dates for an all-depth fishery would be mid-August. The restricted depth fishery inside 30–fathoms would then re-open on August 8 and continue until September 30 or attainment of the quota. The final determination of the season dates will be based on the allowable harvest level, projected catch rates, and recommendations developed in a public workshop sponsored by ODFW after the 1998 TAC is set by the IPHC. The daily bag limit would be two halibut, one with a minimum overall size limit of 32 inches (81.3 cm) and the second with a minimum overall size limit of 50 inches (127.0 cm).

Oregon South Coast Subarea

This subarea would be allocated 10,096 lb (4.6 mt) at an Area 2A TAC of 700,000 lb (317.5 mt) in accordance with the revised Plan. The May all-depth season would be allocated 8,077 lb (3.7 mt) and based on an observed increasing catch per day trend in this fishery, an estimated 1,630 lb (0.7 mt) would be caught per day in 1998 resulting in a 5 day fixed season. In accordance with the Plan, the season dates would be May 14, 15, 16, 21, and 22. Additional fishing days, if the quota is not taken, would be scheduled for early June. The restricted depth fishery inside 30–fathoms would be allocated 2,019 lb (0.9 mt) and would open on May 23 and continue until August 6 or attainment of quota for this season. The August coastwide all-depth fishery (Cape Falcon to Oregon/California border) would be open for 1-day on August 7. If sufficient quota remains after this season for additional days fishing, the dates for an all-depth fishery would be mid-August. The restricted depth fishery inside 30–fathoms would open on August 8 and continue until September 30 or attainment of the quota. The final determination of the season dates would be based on the allowable harvest level, projected catch rates, and recommendations developed in a public workshop sponsored by ODFW after the 1998 TAC is set by the IPHC. The daily bag limit would be two halibut, one with a minimum overall size limit of 32 inches (81.3 cm) and the second with a minimum overall size limit of 50 inches (127.0 cm).

California Subarea

The proposed sport regulations for this subarea are the same as 1997 with a May 1 opening and continuing 7 days per week until September 30. The daily bag limit would be one halibut with a minimum overall size limit of 32 inches (81.3 cm).

NMFS requests public comments on the Council's recommended modifications to the Plan and the proposed sport fishing regulations. The Area 2A TAC will be set by the IPHC at its annual meeting on January 26–29, 1998 in Anchorage, AK. Comments are requested by February 17, 1998, after the IPHC annual meeting, so that the public will have the opportunity to consider the final Area 2A TAC before submitting comments on the proposed sport fishing regulations. The States of Washington and Oregon will conduct public workshops shortly after the IPHC meeting to obtain input on the sport season dates. After the Area 2A TAC is known, and after NMFS reviews public comments and comments from the States, NMFS will issue final rules for the Area 2A Pacific halibut sport fishery concurrent with the IPHC regulations for the 1998 Pacific halibut fisheries.

NMFS and the Council have prepared a draft environmental assessment and regulatory impact review on the proposed changes to the Plan. Copies of the "Draft Environmental Assessment and Regulatory Impact Review of Changes to the Catch Sharing Plan for Pacific Halibut in Area 2A" are available from NMFS (see **ADDRESSES**). Comments on the EA/RIR are requested by February 17, 1998.

The Assistant General Counsel for Legislation and Regulation of the Department of Commerce certified to the Chief Counsel for Advocacy of the Small Business Administration that the changes to the Plan would not have a significant economic impact on a substantial number of small entities.

In accordance with the Regulatory Flexibility Act, an assessment of the economic impacts of proposed changes to the Plan on small entities is presented in the EA/RIR. The Regulatory Flexibility Act (RFA), 5 U.S.C. 603 *et seq.*, requires agencies to assess impacts of proposed regulatory actions on small entities and determine whether there will be a significant economic impact on a substantial number of small entities. There are various criteria used to determine whether a proposed action would have a significant economic impact on a substantial number of small entities, the only one that may be relevant here is whether the proposed action would result in a reduction in annual gross revenues of more than 5 percent, for 20 percent or more of the affected small entities. For the purposes of the RFA, NMFS has adopted a standard that a "substantial number" of small entities is more than 20 percent of those small entities affected by the proposed action. In determining the scope or universe of the entities to be considered in making the significance determination, the general approach used is to consider only those entities that can reasonably be expected to be directly or indirectly impacted by the proposed action. For the fishing industry, a small entity is a small business with receipts of up to $3 million annually. Charterboats operating in Washington sport fisheries are viewed as small entities affected by the proposed changes to the Plan.

The proposed action involves three changes to the Plan that affect small businesses:

(1) establishment of fixed opening dates and fixed seasons for Oregon sport fisheries;

(2) a provision that at Area 2A TACs above 942,040 lbs (427.3 mt), the Washington sport fishery is capped at an allocation of 214,110 lb (97.1 mt) with the excess allocated to Washington commercial sablefish fishers to retain and sell incidentally caught halibut; and

(3) a revision of the distribution of the Washington sport allocation among the Washington sport fishery subareas when the Area 2A TAC is above 550,000 lb (249.5 mt) to facilitate expanded season lengths. At TACs below 550,000 lb (249.5 mt), the proposed Plan does not differ from the Plan currently in place.

The first two changes yield, if anything, only positive economic impacts; and therefore, they are not a source of significant economic impacts on small entities. The establishment of fixed opening dates and fixed seasons in the Oregon sport fisheries will allow anglers and businesses to better plan for halibut fishery seasons with resulting benefits from more orderly fisheries, but otherwise does not change the allocations or conduct of the sport fishery. The reallocation of Washington sport allocation at high Area 2A TAC levels to commercial fishers in the Washington sablefish fishery provides direct benefits in allowing incidentally caught halibut, which otherwise must be discarded, to be retained and sold by commercial fishers. This measure will also have the effect of limiting future growth in the sports fishery. However, this impact is not considered significant because it will not result in losses as compared to the status quo (i.e., sport fishers will not suffer any reduction in their annual gross revenue as a result of this measure).

The third change to the Plan, revising the distribution of sport allocation among subareas when TAC reaches a certain level, may yield negative impacts upon some small entities. The proposed changes to the Plan on the distribution by subarea of the Washington sport allocation at Area 2A TACs at or above 550,000 lb (249.5 mt) will directly affect charterboats that operate in Washington and indirectly affect small businesses, such as motels, restaurants, and tackle shops in the ports and nearby areas utilized by halibut anglers. In regard to direct effects of the proposed action, a total of 177 charterboats have been licensed by the International Pacific Halibut Commission over the past 3 years for halibut fishing, and only 13 to 15 of them (less than 9 percent) have operated out of ports affected by the proposed reduced allocation at higher Area 2A TAC levels.

Data on the actual number and type of small businesses utilized by halibut anglers (thereby indirectly affected by the proposed action) is not available. However, there are about 15 ports/access sites that are used by halibut anglers to access the halibut sport fishery subareas in Washington and most, if not all, of the affected small businesses are located in the ports from which halibut anglers depart for sport fishing trips. Therefore any reduction in halibut fishing opportunity in a given "halibut access" port, would be expected to affect small businesses that provide services to halibut anglers in those ports. NMFS considers the effects on ports used by halibut anglers as a proxy for determining whether the proposed action will have significant economic impacts on a substantial number of small entities. Of the 15 ports used by halibut anglers, 13 (87 percent) will have an increase or no changes in halibut sport fishing opportunity as a result of the proposed action. Only 2 ports (13 percent of affected ports and small entities supporting sport angling) would have a reduced allocation at higher Area 2A TACs. At a TAC of 700,000 lb (317.5 mt), the proposed change would result in a reduction of halibut fishing opportunity of 6 days (9 percent reduction in halibut fishing days), but would not affect sport fishing opportunity for bottomfish, salmon and other species that account for a much greater proportion of the sport fishing opportunity in Washington (for example, bottomfish sport fishing opportunity is available year-round from most ports). The proposed action has no effect on subarea sport allocations when the Area 2A TAC is 550,000 lb (249.5 mt) or less - the average TAC in recent past years (i.e., no effect on the status quo through 1996).

Overall, the net change in the reallocation of halibut quotas among the subareas at greater Area 2A TACs results in a small net increase in the number of sport halibut fishing days in Washington ports. At an Area 2A TAC of 700,000 lb (317.5 mt), which is the assumed TAC for 1998, the net increase based on 1997 catches would be 3 days overall (0.5 percent increase in all Washington subareas) with the WA Inside Waters and WA South Coast subareas increasing by 3 days (5 percent increase) and 6 days (26 percent increase) respectively, and the WA North Coast subarea decreasing by 6 days (9 percent decrease); the number of fishing days in the other subareas is not affected. In summary, the proposed changes to the Washington sport halibut fishery will provide positive benefits to most charterboat operators in Washington and the sport fishery support businesses in most of the Washington ports used to access the halibut sport fishery, and should not cause a reduction in revenues for 20 percent or more of the small entities affected directly (charterboats) or indirectly (sport fishery support services in halibut access ports) by this action.

The proposed changes to the Plan will not have a significant economic impact on a substantial number of small entities because they will not result in a reduction in annual gross revenues of more than 5 percent, for 20 percent or more of the affected small entities. The proposed sport management measures for 1998 merely implement the Plan at the appropriate level of TAC; their impacts are within the scope of the impacts analyzed for the Plan. Therefore, a regulatory flexibility analysis was not prepared.

This action has been determined to be not significant for purposes of E.O. 12866.

Dated: January 20, 1998.

Gary C. Matlock,

Acting Assistant Administrator for Fisheries, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Rural Utilities Service

Distance Learning and Telemedicine Loan and Grant Program

AGENCY: Rural Utilities Service, USDA.

ACTION: Notice of application filing deadline.

SUMMARY: The Rural Utilities Service (RUS) announces the deadline for submitting applications for the Distance Learning and Telemedicine Loan and Grant program for fiscal year (FY) 1998 funding.

DATES: Applications for loans to be considered for FY 1998 funding must be postmarked no later than August 14, 1998, and applications for grants and combination loans and grants to be considered for FY 1998 funding must be postmarked no later than June 1, 1998.

ADDRESSES: Applications are to be submitted to the Rural Utilities Service, U.S. Department of Agriculture, 1400 Independence Avenue, SW., STOP 1590, Washington, DC 20250–1590. Applications should be marked "Attention: Assistant Administrator, Telecommunications Program".

FOR FURTHER INFORMATION CONTACT: Ken B. Chandler, Acting Assistant Administrator-Telecommunications Program, Rural Utilities Service, STOP 1590, Room 4056, South Building, 1400 Independence Avenue, SW., Washington, DC 20250–1590. Telephone (202) 720–9554, Facsimile (202) 720–0810.

SUPPLEMENTARY INFORMATION: For FY 1998, $12.5 million in grants and $150 million in loans will be made available for distance learning and telemedicine projects. Notice is hereby given that under 7 CFR 1703.108, RUS has determined the maximum amount of an application for a grant that will be considered for funding in FY 1998 as $350,000, and the maximum amount for a loan that will be considered for funding in FY 1998 as $6,000,000.

Further, in accordance with 7 CFR 1703.113, RUS has determined that for FY 1998 the minimum number of points required for a loan application to be immediately processed is 94 points. Only completed loan applications meeting the minimum points requirement and determined by RUS to be feasible will be immediately processed.

Applications for financial assistance must be submitted in accordance with 7 CFR 1703, Subpart D, which establishes the policies and procedures for submitting an application for financial assistance. This document is available on the Internet at the following address: http://www.usda.gov/rus/dlt/dlml.htm.

In addition, a new Application Guide to assist applicants in the preparation of applications for financing will be available shortly, at the same Internet address as above. Application guides may also be requested from RUS by contacting one of the following Area Offices:

Northeast Area, USDA–RUS, Phone: (202) 720–0715
Southeast Area, USDA–RUS, Phone: (202) 690–4673
Northwest Area, USDA–RUS, Phone: (202) 720–1025
Southwest Area, USDA–RUS, Phone: (202) 720–0800

Applications for loans to be considered for FY 1998 funding must be postmarked no later than August 14, 1998, and applications for grants and combination loans and grants to be considered for FY 1998 funding must be postmarked no later than June 1, 1998. RUS will review each application for completeness in accordance with 7 CFR 1703.109, and notify the applicant, within 15 working days of the results of this review, citing any information which is incomplete. It is suggested that applications be submitted prior to the above deadline to ensure they can be reviewed and considered complete by the deadline.

Authority: 7 U.S.C. et seq. and 950aaa *et seq.*; Pub. L. 103–354, 108 Stat. 3178 (7 U.S.C. 6941 *et seq.*).

Wally Beyer,
Administrator, Rural Utilities Service.

COMMISSION ON CIVIL RIGHTS

Agenda and Notice of Public Meeting of the Oklahoma Advisory Committee

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a meeting of the Oklahoma Advisory Committee to the Commission will convene at 6:00 p.m. and adjourn at 8:00 p.m. on Thursday, February 19, 1998, at the Clarion Hotel/Comfort Inn Conference Center, 4345 North Lincoln Boulevard, Oklahoma City, Oklahoma 73105. The purpose of the meeting is to plan future activities.

Persons desiring additional information, or planning a presentation to the Committee, should contact Melvin L. Jenkins, Director of the Central Regional Office, 913–551–1400 (TDD 913–551–1414). Hearing-impaired persons who will attend the meeting and require the services of a sign language interpreter should contact the Regional Office at least ten (10) working days before the scheduled date of the meeting.

The meeting will be conducted pursuant to the provisions of the rules and regulations of the Commission.

Dated at Washington, DC, January 16, 1998.

Carol-Lee Hurley,
Chief, Regional Programs Coordination Unit.

DEPARTMENT OF COMMERCE

Bureau of the Census

National Employers Survey (NES)—Follow-up

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on proposed and/or continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506(c)(2)(A)).

DATES: Written comments must be submitted on or before March 27, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW., Washington, DC 20230.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument(s) and instructions should be directed to Michael Hartz, U.S. Bureau of the Census, Room 2538, FB 3, EPCD, Washington, DC 20233–6100; (301–457–2633).

SUPPLEMENTARY INFORMATION:

I. Abstract

The Census Bureau conducted three National Employers Surveys (1994, 1995, and 1997) for the National Center on the Educational Quality of the Workforce, a nonprofit research group. This group's focus is discovering relationships among employment, hiring, training, education, and business success. This information collection seeks to build upon the results of the previous surveys.

This information collection seeks to gather information specifically on employers' school-to-work programs. The collection will relate these findings to similar information collected from employers in the 1997 National Employers Survey (NES–3). The purpose is to measure change, or lack of it, in the scope and prevalence of these programs. We will use the follow-up data to assess changes from the 1997 NES on three major measures: the number of businesses participating in school-to-work that offer work-based learning slots; the number of school-to-work businesses that provide remedial education; and recruitment costs of school-to-work businesses.

This new survey will be a telephone survey of approximately 1,000 establishments that participated in the NES–3.

II. Method of Collection

The Bureau of the Census will conduct the NES Follow-up survey via telephone. The information will be recorded on paper and later coded into a computer database. The interview will include about 40 questions, most of which will not require the respondent to refer to any records, and will require about 10 minutes to complete.

The survey will be conducted of approximately 1,000 establishments with more than 20 employees, chosen through a stratified, random-sampling method. Confidentiality of the survey data is guaranteed by Title 13, United States Code. After the Census Bureau performs data keying and consistency editing, the data set will be provided to sworn Census agents representing the survey sponsor.

A high participation rate for employers is usually crucial for statistically reliable data in this type of survey. The survey sponsor has discussed the survey issues with selected respondents from the NES–3. It is the sponsor's opinion that the business establishments they contacted were quite interested in the survey issues and that most will strongly consider participating in the survey. The businesses indicated that their decision to participate in a survey was primarily based on their perception of the usefulness of the requested information and the businesses are very interested in the issues of the survey. Several respondents (employers) told the sponsor that they wanted the results of the survey. Based on these factors (and especially the employers concerns about these workplace issues), we expect a high rate of the employers from the NES–3 to participate in the Follow-up.

III. Data

OMB Number: 0607–0787.
Form Number: NES Follow-up telephone interview.
Type of Review: Regular.
Affected Public: Business establishments with 20 or more employees.
Estimated Number of Respondents: 1,000.
Estimated Time Per Response: 10 minutes.
Estimated Total Annual Burden Hours: 167.
Estimated Total Annual Cost: There is no cost to the respondent other than the time required to complete the interview.
Respondent's Obligation: Voluntary.
Legal Authority: United States Code, Title 13, sections 8 and 9.

IV. Request for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: January 20, 1998.

Linda Engelmeier,
Departmental Forms Clearance Officer, Office of Management and Organization.

DEPARTMENT OF COMMERCE

Foreign-Trade Zones Board

[Order No. 949]

Grant of Authority for Subzone Status Sargento Foods, Inc., (Cheese Processing), Plymouth, Wisconsin

Pursuant to its authority under the Foreign-Trade Zones Act of June 18, 1934, as amended (19 U.S.C. 81a–81u), the Foreign-Trade Zones Board (the Board) adopts the following Order:

Whereas, by an Act of Congress approved June 18, 1934, an Act "To provide for the establishment . . . of foreign-trade zones in ports of entry of the United States, to expedite and encourage foreign commerce, and for other purposes," as amended (19 U.S.C. 81a–81u) (the Act), the Foreign-Trade Zones Board (the Board) is authorized to grant to qualified corporations the privilege of establishing foreign-trade zones in or adjacent to U.S. Customs ports of entry;

Whereas, the Board's regulations (15 CFR part 400) provide for the establishment of special-purpose subzones when existing zone facilities cannot serve the specific use involved;

Whereas, an application from Brown County, Wisconsin, grantee of Foreign-Trade Zone 167, for authority to establish special-purpose subzone status for export activity at the cheese processing plant of Sargento Foods, Inc., in Plymouth, Wisconsin, was filed by the Board on June 10, 1997, and notice inviting public comment was given in the **Federal Register** (FTZ Docket 48–97, 62 FR 33830, 6–23–97); and,

Whereas, the Board adopts the findings and recommendations of the examiner's report, and finds that the requirements of the FTZ Act and Board's regulations are satisfied, and that approval of the application for export processing is in the public interest;

Now, therefore, the Board hereby grants authority for subzone status for export activity at the Sargento Foods, Inc., plant in Plymouth, Wisconsin (Subzone 167C), at the location

VOL 63 ISS 16 JA 26 1998 UMI

described in the application, subject to the FTZ Act and the Board's regulations, including § 400.28, and subject to the further requirement that all foreign origin cheese products admitted to the subzone shall be reexported.

Signed at Washington, DC, this 16th day of January 1998.

Robert S. LaRussa,

Assistant Secretary of Commerce for Import Administration, Alternate Chairman, Foreign-Trade Zones Board.

Dennis Puccinelli,

Acting Executive Secretary.

BILLING CODE 3510–DS–P

DEPARTMENT OF COMMERCE

International Trade Administration

Agency Information Collection Activities: Proposed Collection; Comment Request

BUREAU: International Trade Administration, U.S. and Foreign Commercial Service.

TITLE: The President's "E" Award and The President's "E" Certificate of Service.

ACTION: Proposed collection; comment request.

SUMMARY: The Department of Commerce, as part of its continuing effort to reduce paperwork and respondent burden, invites the general public and other Federal agencies to take this opportunity to comment on the continuing information collections, as required by the Paperwork Reduction Act of 1995, Pub. L. 104–13 (44 U.S.C. 3506 (c)(2)(A)).

DATES: Written comments must be submitted on or before March 27, 1998.

ADDRESSES: Direct all written comments to Linda Engelmeier, Departmental Forms Clearance Officer, Department of Commerce, Room 5327, 14th and Constitution Avenue, NW, Washington, DC 20230. Phone number (202) 482–3272.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of the information collection instrument and instructions should be directed to: Evelyn Scott, Room 3810, Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230; phone (202) 482–1289, fax (202) 482–0729.

SUPPLEMENTARY INFORMATION:

I. Abstract

The President's "E" Award for Excellence in Exporting is our nation's highest award to honor American exporters. "E" Awards recognize firms and organizations for their competitive achievements in world markets, as well as the benefits of their success to the U.S. economy. The President's "E Star" Award recognizes the sustained superior international marketing performance of "E" Award winners.

II. Method of Collection

An application form is the vehicle designed to determine eligibility for the award within established criteria. The completed application is submitted to the appropriate U.S. Department of Commerce Export Assistance Center for review and endorsement, and then forwarded to the Office of Domestic Operations in the U.S. and Foreign Commercial Service, International Trade Administration, U.S. Department of Commerce, Washington, D.C., for processing.

III. Data

OMB Number: 0625–0065.

Form Number: ITA 725P.

Type of Review: Regular submission.

Affected Public: U.S. firms and organizations and American subsidiaries of foreign-owned or controlled corporations.

Estimated Number of Respondents: 60.

Estimated Time per Response: 27.4 hours.

Estimated Total Annual Burden Hours: 1,644.

Estimated Total Annual Cost: $68,000.

IV. Requested for Comments

Comments are invited on: (a) Whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information shall have practical utility; (b) the accuracy of the agency's estimate of the burden (including hours and cost) of the proposed collection of information; (c) ways to enhance the quality, utility, and clarity of the information to be collected; and (d) ways to minimize the burden of the collection of information on respondents, including through the use of automated collection techniques or other forms of information technology.

Comments submitted in response to this notice will be summarized and/or included in the request for OMB approval of this information collection; they also will become a matter of public record.

Dated: January 20, 1998.

Linda Engelmeier,

Departmental Forms Clearance Officer, Office of Management and Organization.

Initiation of Antidumping and Countervailing Duty Administrative Reviews and Requests for Revocation in Part

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Initiation of Antidumping and Countervailing Duty Administrative Reviews and Request for Revocation in Part.

SUMMARY: The Department of Commerce has received requests to conduct administrative reviews of various antidumping and countervailing duty orders and findings with December anniversary dates. In accordance with our regulations, we are initiating those administrative reviews. The Department of Commerce also received a request to revoke one antidumping duty order in part.

EFFECTIVE DATE: January 26, 1998.

FOR FURTHER INFORMATION CONTACT: Holly A. Kuga, Office of AD/CVD Enforcement, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW, Washington, DC 20230, telephone: (202) 482–4737.

SUPPLEMENTARY INFORMATION:

Background

The Department of Commerce (the Department) has received timely requests, in accordance with 19 CFR 351.213(b) (1997), for administrative reviews of various antidumping and countervailing duty orders and findings with December anniversary dates. The Department also received a timely request to revoke in part the antidumping duty order on welded ASTM A–312 stainless steel pipe from Taiwan.

Initiation of Reviews

In accordance with section 19 CFR 351.221(c)(1)(i), we are initiating administrative reviews of the following antidumping and countervailing duty orders and findings. We intend to issue the final results of these reviews not later than December 31, 1998.

	Period to be reviewed
Antidumping Duty Proceedings	
Canada: Elemental Sulphur, A–122–047	12/1/96–11/30/97
Husky Oil Limited

[1] Inadvertently omitted from previous notice.

[2] If one of the above named companies does not qualify for a separate rate, all other exporters of cased pencils from the People's Republic of China who have not qualified for a separate rate are deemed to be covered by this review as part of the single PRC entity of which the named exporters are a part.

[3] If one of the above named companies does not qualify for a separate rate, all other exporters of porcelain-on-steel cooking ware from the People's Republic of China who have not qualified for a separate rate are deemed to be covered by this review as part of the single PRC entity of which the named exporters are a part.

During any administrative review covering all or part of a period falling between the first and second or third and fourth anniversary of the publication of an antidumping duty order under § 351.211 or a determination under § 351.218(d) (sunset review), the Secretary, if requested by a domestic interested party within 30 days of the date of publication of the notice of initiation of the review, will determine whether antidumping duties have been absorbed by an exporter or producer subject to the review if the subject merchandise is sold in the United States through an importer that is affiliated with such exporter or producer. The request must include the name(s) of the exporter or producer for which the inquiry is requested.

For transition orders defined in section 751(c)(6) of the Act, the Secretary will apply paragraph (j)(1) of this section to any administrative review initiated in 1996 or 1998 (19 CFR 351.213(j)(1–2)).

Interested parties must submit applications for disclosure under administrative protective orders in accordance with 19 CFR 353.34(b) and 355.34(b).

These initiations and this notice are in accordance with section 751(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(a)), and 19 CFR 351.221(c)(1)(i).

Dated: January 16, 1998.

Richard W. Moreland,

Acting Deputy Assistant Secretary, Group II, Import Administration.

Polyethylene Terephthalate Film, Sheet and Strip From the Republic of Korea, Final Results of Changed Circumstances Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Final Results of Changed Circumstances Antidumping Duty Administrative Review.

SUMMARY: On November 19, 1997, the Department of Commerce (the Department) published the notice of initiation and preliminary results of its changed circumstances administrative review concerning whether Saehan Industries, Inc. (Saehan) is the successor

VOL 63 ISS 16 JA 26 1998 UMI

firm to Cheil Synthetics Inc., (Cheil) and whether the revocation issued or Cheil should apply to Saehan. We have now completed that review. We have determined that Saehan is the successor firm to Cheil. As such, the revocation issued for Cheil applies to Saehan.

EFFECTIVE DATE: January 26, 1998.

FOR FURTHER INFORMATION CONTACT: Michael J. Heaney at (202) 482–4475 or Linda Ludwig at (202) 482–3833, AD/CVD Enforcement Office Eight, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, DC 20230.

THE APPLICABLE STATUTE AND REGULATIONS: Unless otherwise indicated, all citations to the statute are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Tariff Act by the Uruguay Round Agreement Act. In addition, unless otherwise indicated, all citations to the Department's regulations are to the regulations codified at 19 CFR part 351 (62 FR 27296).

SUPPLEMENTARY INFORMATION:

Background

On September 29, 1997, Saehan requested that the Department conduct a changed circumstances administrative review pursuant to section 751(b) of the Tariff Act to determine whether Saehan should properly be considered the successor firm to Cheil and if, as such, the revocation issued for Cheil should apply to Saehan. Saehan also requested the Department to publish the preliminary results concurrently with the notice of initiation, pursuant to 19 CFR 351.221(c)(3)(ii). In its request, Saehan notified the Department that on February 28, 1997, Cheil officially changed its corporate name to Saehan, and despite this change in corporate name, the management, production facilities, supplier relationships, and customer base of Saehan are virtually identical to those of the former Cheil. In support of its claim, Saehan submitted documentary evidence demonstrating that Saehan maintained essentially the same management, production facilities, supplier, and customer relationships as Cheil. Citing the Department's determinations in *Sugars and Syrups from Canada; Initiation and Preliminary Results of Changed Circumstances Review*, 61 FR 48885 (Sept. 17, 1996) and *Industrial Phosphoric Acid from Israel; Preliminary Results of Antidumping Duty Changed Circumstances Review*, 58 FR 59010 (Nov. 5, 1993), Saehan claimed that the Department should determine that it is the successor-in-interest to Cheil.

On November 19, 1997, the Department published in the **Federal Register** (62 FR 61801) the notice of initiation and preliminary results of its antidumping duty administrative review of the antidumping duty order of polyethylene terephthalate film, sheet, and strip from the Republic of Korea. We have now completed this changed circumstances review in accordance with section 751(b) of the Tariff Act, as amended (the Act).

Scope of the Review

The merchandise subject to this antidumping duty order are shipments of all gauges of raw, pretreated, or primed polyethylene terephthalate, film, sheet, and strip, whether extruded or coextruded. The films excluded from this review are metallized films, and other finished films that have had at least one of their surfaces modified by the application of a performance-enhancing resinous or inorganic layer of more than 0.00001 inches (0.254 micrometers) thick. Roller transport cleaning film which has at least one of its surfaces modified by the application of SBR latex has also been ruled as not within the scope of the order.

PET film is currently classifiable under Harmonized Tariff Schedule of the United States subheading 3920.62.00.00. The HTS subheading is provided for convenience and customs purposes. The written description of the scope of this order is dispositive.

This changed circumstances administrative review covers Saehan.

Successorship

In considering questions involving successorship, the Department examines several factors including, but not limited to, changes in (1) management, (2) production facilities, (3) supplier relationships, and (4) customer base. See e.g., Brass Sheet and Strip from Canada; Final Results of Antidumping Duty Administrative Review, 57 FR 20460 (May 13, 1992). While no one or several of these factors will necessarily provide a dispositive indication, the Department will generally consider the new company to be the successor to the previous company if its resulting operation is essentially the same as its predecessor. See e.g., Industrial Phosphoric Acid from Israel, Final Results of Changed Circumstances Review, 59 FR 6944 (February 14, 1994). Thus, if evidence demonstrates that, with respect to the production and sale of the subject merchandise, the new company operates as the same entity as the former company, the Department will treat the successor company the same as the predecessor for purposes of antidumping liability, e.g., assign the same cash deposit rate, revocation, etc.

We have examined the information provided by Saehan in its September 29, 1997 letter and determined that Saehan is the successor-in-interest to Cheil. The management and organizational structure of the former Cheil has remained intact under Saehan, and there have been no changes in the production facilities, supplier relationships, or customer base. Therefore, we determine that Saehan has maintained the same management, production facilities, supplier relationships, and customer bases as did Cheil. Based upon the foregoing, we determine that the July 5, 1996 revocation issued for Cheil applies to Saehan.

Comments

Although we gave interested parties an opportunity to comment on the preliminary results, none were submitted.

Final Results of Changed Circumstances Review

We determine that Saehan is the successor-in-interest Cheil, and accordingly, the revocation issued for Cheil applies to Saehan. We will notify the U.S. Customs Service of our decision and instruct Customs to liquidate without regard to antidumping duties, merchandise produced by Saehan on or after February 28, 1997, the date on which the corporate name change was legally effected.

This changed circumstances review and notice are in accordance with section 751(b) of the Act, as amended (19 U.S.C. 1675(b)), and 19 CFR 351.216.

Dated: January 16, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

[A–427–811]

Certain Stainless Steel Wire Rods From France: Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of Preliminary Results of Antidumping Duty Administrative Review.

SUMMARY: In response to a request by Imphy S.A. and Ugine-Savoie (respondents), the Department of Commerce (the Department) is conducting an administrative review of the antidumping duty order on certain stainless steel wire rods from France. This review covers the above manufacturers/exporters of the subject merchandise to the United States. The period of review (POR) is January 1, 1996 through December 31, 1996.

We preliminarily determine that respondents sold subject merchandise at less than normal value (NV) during the POR. If these preliminary results are adopted in our final results of this administrative review, we will instruct U.S. Customs to assess antidumping duties based on the difference between the export price ("EP") or constructed export price ("CEP") and the NV.

We invite interested parties to comment on these preliminary results. Parties who submit arguments in this proceeding should also submit with the argument (1) A statement of the issue, and (2) a brief (no longer than five pages, including footnotes) summary of the argument.

EFFECTIVE DATE: January 26, 1998.

FOR FURTHER INFORMATION CONTACT: Robert Bolling or Stephen Jacques, AD/CVD Enforcement Group III, Office 9, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone: (202) 482–3434 or (202) 482–1391, respectively.

SUPPLEMENTARY INFORMATION:

The Applicable Statute

Unless otherwise indicated, all citations to the Tariff Act of 1930, as amended (the Act), are references to the provisions effective January 1, 1995, the effective date of the amendments made to the Act by the Uruguay Round Agreements Act (URAA). In addition, unless otherwise indicated, all citations to the Department's regulations are to 19 CFR part 353 (1997).

Background

On December 29, 1993, the Department published in the **Federal Register** (58 FR 68865) the final affirmative antidumping duty determination on certain stainless steel wire rods from France, and published an amended final determination and antidumping duty order on January 28, 1994. On January 14, 1997, the Department published the Opportunity to Request an Administrative Review of this order for the period January 1, 1996–December 31, 1996 (62 FR 1874). The Department received a request for an administrative review from Imphy, S.A. ("Imphy") and Ugine-Savoie ("Ugine"), affiliated producers/exporters of the subject merchandise, on January 29, 1997. We published a notice of initiation of the review on March 3, 1997 (62 FR 9413).

The Department is now conducting this review in accordance with section 751 of the Act. The review covers sales of certain stainless steel wire rods by Imphy, Ugine, and their affiliated companies, Metalimphy Alloys Corp. ("MAC"), and Techalloy Company, Inc. ("Techalloy").

Scope of the Review

The products covered by this administrative review are certain stainless steel wire rod (SSWR) products which are hot-rolled or hot-rolled annealed, and/or pickled rounds, squares, octagons, hexagons, or other shapes, in coils. SSWR are made of alloy steels containing, by weight, 1.2 percent or less of carbon and 10.5 percent or more of chromium, with or without other elements. These products are only manufactured by hot-rolling, are normally sold in coiled form, and are of solid cross section. The majority of SSWR sold in the United States is round in cross-sectional shape, annealed, and pickled. The most common size is 5.5 millimeters in diameter.

The SSWR subject to this review is currently classifiable under subheadings 7221.00.0005, 7221.00.0015, 7221.00.0020, 7221.00.0030, 7221.00.0040, 7221.00.0045, 7221.00.0060, 7221.00.0075, and 7221.00.0080 of the Harmonized Tariff Schedule of the United States (HTSUS). Although the HTSUS subheadings are provided for convenience and Customs purposes, our written description of the scope of the order is dispositive.

Product Comparisons

In accordance with section 771(16) of the Act, we considered all products produced by the respondents, covered by the description in the Scope of the Review section, above, and sold in the home market during the POR, to be foreign like products for purposes of determining appropriate product comparisons to U.S. sales. Where there were no sales of identical merchandise in the home market to compare to U.S. sales, we compared U.S. sales to the most similar foreign like product on the basis of the characteristics listed in Appendix III of the Department's March 24, 1997 antidumping questionnaire. In making the product comparisons, we matched foreign like products based on the physical characteristics reported by the respondents.

Fair Value Comparisons

To determine whether sales of subject merchandise to the United States were made at less than fair value, we compared the EP or CEP to the NV, as described in the "Export Price and Constructed Export Price" and "Normal Value" sections of this notice. In accordance with section 777A(d)(2), we calculated monthly weighted-average prices for NV and compared these to individual U.S. transactions.

Export Price and Constructed Export Price

We used EP, in accordance with subsections 772 (a) and (c) of the Act, where the subject merchandise was sold directly or indirectly to the first unaffiliated purchaser in the United States prior to importation because CEP was not otherwise warranted based on the facts of record. In addition, we used CEP in accordance with subsections 772 (b), (c) and (d) of the Act, for those sales to the first unaffiliated purchaser that took place after importation into the United States.

We made adjustments as follows:

We calculated EP based on packed prices to unaffiliated customers in the United States. Where appropriate, we made deductions from the starting price for discounts, foreign inland freight, foreign brokerage and handling, international freight, U.S. inland freight, U.S. brokerage and handling, marine insurance and U.S. Customs duties. We also adjusted the starting price for billing adjustments to the invoice price.

We calculated CEP based on packed prices to unaffiliated customers. Where appropriate, we made deductions for early payment discounts, credit expenses, warranty expenses, other direct selling expenses and commissions. We deducted those indirect selling expenses, including inventory carrying costs and product liability premiums, that related to commercial activity in the United States. We also made deductions for foreign brokerage and handling, foreign inland freight, international freight, U.S. inland freight, U.S. brokerage and handling, marine insurance, U.S. repacking expenses and U.S. Customs duties. We also adjusted the starting price for billing adjustments to the invoice price and for interest revenue. Finally, we made an adjustment for CEP profit in accordance with section 772(d)(3) of the Act.

VOL 63 ISS 16 JA 26 1998 UMI

The Department has recalculated credit expenses for those sales with missing payment dates. For sales with missing payment dates, the Department set the date of payment to the projected final results date.

Further Manufacturing

For products that were further manufactured after importation, we adjusted for all costs of further manufacturing in the United States, and the proportional amount of profit allocated to such costs. In accordance with section 772(f) of the Act, we computed profit based on total revenues realized on sales in both the U.S. and home markets, less all expenses associated with those sales. We then allocated profit to expenses incurred with respect to U.S. economic activity (including further manufacturing costs), based on the ratio of total U.S. expenses to total expenses for both the U.S. and home market.

Normal Value

In order to determine whether there was a sufficient volume of sales in the home market to serve as a viable basis for calculating NV, we compared respondents' volume of home market sales of the foreign like product to the volume of U.S. sales of the subject merchandise, in accordance with section 773(a)(1) of the Act. Since respondents' aggregate volume of home market sales of the foreign like product was greater than five percent of its aggregate volume of U.S. sales for the subject merchandise, we determined that the home market was viable. Therefore, we have based NV on home market sales.

Where appropriate, we deducted discounts, credit expenses, warranty expenses, inland freight and inland insurance. We also adjusted the starting price for billing adjustments to the invoice price and interest revenue. We did not adjust the starting price for commissions in the home market (please see the Concurrence Memorandum for a discussion of this issue).

For reasons discussed below in the "Level of Trade" section, we allowed a CEP offset for comparisons made at different levels of trade. To calculate the CEP offset, we deducted the home market indirect selling expenses from normal value, on home market sales which were compared to U.S. CEP sales. We limited the home market indirect selling expense deduction by the amount of the indirect selling expenses deducted in calculating the CEP under section 772(d)(1)(D) of the Act.

We made adjustments, where appropriate, for physical differences in the merchandise in accordance with section 773(a)(6)(C)(ii) of the Act. In addition, in accordance with section 773(a)(6) (A) and (B), we deducted home market packing costs and added U.S. packing costs.

We also made adjustments, where applicable, for home market indirect selling expenses to offset U.S. commissions in EP and CEP comparisons.

The Department has recalculated credit expenses for those home market sales with missing payment and shipment dates. For sales with missing payment dates, the Department calculated payment date based on the average time period between invoice date and shipment date for those sales where both invoice date and shipment date appeared in the database. For sales with missing shipment dates, the Department calculated shipment date based on the average time period between invoice date and shipment date for those sales where both invoice date and shipment date appeared in the database.

Price to CV Comparisons

When we based NV on CV, we calculated CV in the manner described below. *See* "Cost of Production Analysis" section. Where we compared CV to EP, we deducted from CV the weighted-average home market direct selling expenses and added the U.S. direct selling expenses.

Cost of Production Analysis

We had reasonable grounds to believe or suspect that sales of the foreign like product under consideration for the determination of NV in this review may have been made at prices below the COP because the Department disregarded sales below the cost of production (COP) in the second administrative review (see *Final Results of Antidumping Duty Administrative Review: Certain Stainless Steel Wire Rods from France*, 62 FR 7206 (February 18, 1997)). Therefore, pursuant to section 773(b)(1) of the Act, we initiated a COP investigation of sales by respondents in the home market.

In accordance with section 773(b)(3) of the Act, we calculated the COP based on the sum of the costs of materials and fabrication employed in producing the foreign like product plus selling, general and administrative (SG&A) expenses and all costs and expenses incidental to placing the foreign like product in condition packed ready for shipment. In our COP analysis, we used the home market sales and COP information provided by respondents in their questionnaire responses.

After calculating COP, we tested whether home market sales of SSWR were made at prices below COP within an extended period of time in substantial quantities and whether such prices permit recovery of all costs within a reasonable period of time. We compared model-specific COPs to the reported home market prices less any applicable movement charges, discounts, and rebates.

Pursuant to section 773(b)(2)(C) of the Act, where less than 20 percent of respondents' sales of a given product were at prices less than COP, we did not disregard any below-cost sales of that product because the below-cost sales were not made in substantial quantities within an extended period of time. Where 20 percent or more of respondents' sales of a given product during the POR were at prices less than the COP, we disregarded the below-cost sales because they (1) were made within an extended period of time in substantial quantities in accordance with sections 773(b)(2)(B) and (C) of the Act, and (2) based on comparisons of prices to weighted-average COPs for the POR, were at prices which would not permit recovery of all costs within a reasonable period of time in accordance with section 773(b)(2)(D) of the Act. Based on this test, we disregarded certain below-cost sales in these preliminary results.

In accordance with section 773(a)(4) of the Act, we used CV as the basis for NV when there were no usable sales of the foreign like product in the comparison market. We calculated CV in accordance with section 773(e) of the Act. We included the cost of materials and fabrication, SG&A expenses, and profit. In accordance with section 773(e)(2)(A) of the Act, we based SG&A expenses and profit on the amounts incurred and realized by the respondents in connection with the production and sale of the foreign like product in the ordinary course of trade for consumption in the foreign country. For selling expenses, we used the weighted-average home market selling expenses.

Arm's-Length Sales

Sales to affiliated customers in the home market not made at arm's length were excluded from our analysis. To test whether these sales were made at arm's length, we compared the starting prices of sales to affiliated and unaffiliated customers net of all movement charges, direct selling expenses, discounts and packing. Where prices to the related party were on average 99.5 percent or more of the price to the unrelated party, we determined that sales made to the related party were at arm's-length. Where no related customer ratio could be constructed because identical merchandise was not sold to unrelated customers, we were unable to determine that these sales were made at arm's length and, therefore, excluded them from our analysis. *See Final Determination of Sales at Less Than Fair Value: Certain Cold-Rolled Carbon Steel Flat Products from Argentina*, (58 FR 37062, 37077 (July 9, 1993)). Where the exclusion of such sales eliminated all sales of the most appropriate comparison product, we made comparison to the next most similar model.

Currency Conversion

For purposes of the preliminary results, we made currency conversions based on the official exchange rates in effect on the dates of the U.S. sales as certified by the Federal Reserve Bank of New York. Section 773A(a) of the Act directs the Department to use a daily exchange rate in order to convert foreign currencies into U.S. dollars, unless the daily rate involves a "fluctuation." For these preliminary results of review, we have determined that a fluctuation exists when the daily exchange rate differs from a benchmark by 2.25 percent. The benchmark is defined as the rolling average of rates for the past 40 business days. Therefore, when we determine a fluctuation exists, we substitute the benchmark for the daily rate. (For a detailed explanation, see Policy Bulletin 96–1: Currency Conversions, 61 FR 9434, March 8, 1996).

Level of Trade ("LOT")

In accordance with section 773(a)(1)(b) of the Act, to extent practicable, we determine NV based on sales in the comparison market at the same level of trade ("LOT") as the EP or CEP transaction. The NV LOT is that of the starting price sales in the comparison market or, when NV is based on constructed value ("CV"), that of the sales from which we derive selling, general and administrative expenses and profit. For EP, the U.S. LOT is also the level of the starting-price sale, which is usually from exporter to importer. For CEP, it is the level of the constructed sale from the exporter to the importer.

To determine whether NV sales are at a different LOT than EP or CEP, we examine stages in the marketing process and selling functions along the chain of distribution between the producer and the unaffiliated customer. If the comparison-market sales are at a different LOT, and the difference affects price comparability, as manifested in a pattern of consistent price differences between the sales on which NV is based and comparison-market sales at the LOT of the export transaction, we make an LOT adjustment under section 773(a)(7)(A) of the Act. Finally, for CEP sales, if the NV level is more remote from the factory than the CEP level and there is no basis for determining whether the difference in the levels between NV and CEP affects price comparability, we adjust NV under section 773(a)(7)(B) of the Act (the CEP offset provision). *See Notice of Final Determination of Sales at Less Than Fair Value: Certain Cut-to-Length Carbon Steel Plate from South Africa*, 62 FR 61731 (November 19, 1997).

In implementing these principles in this review, we obtained information about the selling activities of the producers/exporters associated with each phase of marketing or the equivalent. We asked respondents to identify the specific differences and similarities in selling functions and/or support services between all phases of marketing in the home market and the United States.

In reviewing the selling functions reported by the respondents, we examined all types of selling functions and activities reported in respondents' questionnaire response on LOT. In analyzing whether separate LOT existed in this review, we found that no single selling function was sufficient to warrant a separate LOT in the home market (see *Antidumping Duties; Countervailing Duties; Proposed Rule, (Proposed Regulations)*, 61 FR 7308, 7348).

In determining whether separate levels of trade existed in or between the U.S. and home market, the Department considered the LOT claims of respondents. To test the claimed LOT, we analyzed, *inter alia*, the selling activities associated with the phases of marketing respondents reported. For the home market, respondents reported one LOT, sales to end-users. Also, respondents stated that they make their home market sales through two channels of distribution: (1) Indirect sales through Ugine-Service and its local field offices; and (2) direct sales made through the commercial departments of Imphy and Ugine-Savoie. We examined record evidence from this review and have determined that there is only one LOT in the home market, regardless of channel of distribution.

For the U.S. market, respondents reported two LOTs: (1) Sales to end-users through MAC (EP sales); and (2) sales to distributors, *e.g.*, MAC, Techalloy (CEP sales). The Department examined the selling functions performed for both LOT. We found that the selling functions were sufficiently different in customer sales contacts (*i.e.*, visiting customers/potential customers, receiving orders, promotion of new products and following-up on unpaid invoices), technical services, computer systems and administrative functions to warrant two levels of trade in the United States.

In order to determine whether separate LOT actually existed between the U.S. and home markets, we reviewed the selling activities associated with each channel of distribution. When we compared EP sales to home market sales, we determined that sales were made at the same LOT (*i.e.*, to end-users) in both markets. However, for CEP sales, we determined that fewer and different selling functions were performed for CEP sales to MAC and Techalloy than for home market sales to end-users. We also found that the selling functions were sufficiently different in customer sales contacts, technical services, inventory maintenance, computer systems and administrative functions to warrant treating CEP sales and home market sales to end-users as different LOT. In addition, we found that the home market sales involved a more advanced stage of distribution (to end-users) as compared to respondents' CEP sales in the United States (distributor).

To the extent practicable, we compared normal value at the same LOT as the U.S. sale. In this review, there were no sales of the foreign like product in the home market at the same LOT as that of the CEP sales. Because we compared CEP sales to home market sales at a different LOT, we examined whether a level of trade adjustment may be appropriate. In this case, respondents only sold at one LOT in the home market; therefore, there is no basis upon which respondents can demonstrate a pattern of consistent price differences between LOTs with respect to the foreign like product. Further, we do not have information which would allow us to examine pricing patterns based on respondents' sales of other products and there are no other respondents or other record information on which such an analysis could be based.

Because the data available do not provide an appropriate basis for making a LOT adjustment, but the LOT in the home market is at a more advanced stage of distribution than the LOT of the CEP sale, a CEP offset is appropriate. Respondents claimed a CEP offset for

VOL 63 ISS 16 JA 26 1998 UMI

those U.S. CEP and CEP/Further Manufactured (CEP/FM) sales compared to sales in France through Ugine Service. We included a CEP offset for all sales in France which are compared with CEP and CEP/FM sales in the United States since the comparison of home market sales to CEP sales is at a different level of trade. We applied the CEP offset to normal value or constructed value, as appropriate.

Preliminary Results of Review

As a result of our review, we preliminarily determine the weighted-average dumping margins (in percent) for the period January 1, 1996, through December 31, 1996, to be as follows:

Manufacturer/exporter	Margin (percent)
Imphy/Ugine-Savoie	10.51

Parties to the proceeding may request disclosure within five days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the date of publication or the first business day thereafter. Case briefs and/or other written comments from interested parties may be submitted not later than 30 days after the date of publication. Rebuttal briefs and rebuttals to written comments, limited to issues raised in those comments, may be filed not later than 37 days after the date of publication of this notice. The Department will publish the final results of this administrative review, including its analysis of issues raised in any written comments or at a hearing, not later than 120 days after the date of publication of this notice.

The Department shall determine, and the U.S. Customs Service shall assess, antidumping duties on all appropriate entries. We have calculated importer-specific ad valorem duty assessment rates based on the ratio of the total amount of dumping margins calculated for the examined sales made during the POR to the total customs value of the sales used to calculate those duties. These rates will be assessed uniformly on all entries of each particular importer made during the POR. (This is equivalent to dividing the total amount of antidumping duties, which are calculated by taking the difference between statutory NV and statutory EP or CEP, by the total statutory EP or CEP value of the sales compared, and adjusting the result by the average difference between EP or CEP and customs value for all merchandise examined during the POR).

Furthermore, the following deposit requirements will be effective for all shipments of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the publication date of the final results of these administrative reviews, as provided by section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed companies will be the rate established in the final results of this review (except that no deposit will be required for firms with zero or *de minimis* margins, *i.e.*, margins less than 0.5 percent); (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review, or the original LTFV investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) the cash deposit rate for all other manufacturers or exporters will continue to be 24.51 percent, the "All Others" rate made effective by the LTFV investigation. These deposit requirements, when imposed, shall remain in effect until publication of the final results of the next administrative reviews.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

These administrative reviews and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22(c)(5).

Dated: January 16, 1998.

Robert S. LaRussa,

Assistant Secretary for Import Administration.

[FR Doc. 98–1806 Filed 1–23–98; 8:45 am]

BILLING CODE 3510–DS–P

COMMODITY FUTURES TRADING COMMISSION

Regulation of Noncompetitive Transactions Executed on or Subject to the Rules of a Contract Market

AGENCY: Commodity Futures Trading Commission.

ACTION: Concept release.

SUMMARY: The Commodity Futures Trading Commission ("CFTC" or "Commission") is reevaluating its approach to the regulation of noncompetitive transactions executed on or subject to the rules of a contract market. Accordingly, the Commission is soliciting comments on a broad range of questions concerning the oversight of transactions involving (i) the exchange of futures contracts for, or in connection with, cash commodities, (ii) other noncompetitive transactions, and (iii) the use of execution facilities for noncompetitive transactions. Following the receipt of public comments, the Commission will determine whether rulemaking is appropriate.

DATES: Comments must be received on or before March 27, 1998.

ADDRESSES: Interested persons should submit their written data, views, and opinions to Jean A. Webb, Secretary of the Commission, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street N.W., Washington, D.C. 20581. In addition, comments may be sent by facsimile transmission to facsimile number (202) 418–5221 or by electronic mail to secretary@cftc.gov. Reference should be made to "Regulation of Noncompetitive Transactions Executed on or Subject to the Rules of a Contract Market." Certain related materials described herein are available for inspection at the Office of the Secretariat at the above address. Copies of these materials also may be obtained through the Office of the Secretariat at the above address or by telephoning (202) 418–5100.

FOR FURTHER INFORMATION CONTACT: Rebecca Creed, Attorney, at (202) 418–5493, Division of Trading and Markets, Commodity Futures Trading Commission, Three Lafayette Centre, 1155 21st Street N.W., Washington, D.C. 20581.

I. Introduction

A. Statutory and Regulatory Provisions

Section 4(a) of the Commodity Exchange Act ("Act") makes it unlawful for any person to enter into a contract for the purchase or sale of a commodity for future delivery "unless such transaction is conducted on or subject to the rules of a board of trade which has been designated by the Commission as a 'contract market' for such commodity." [1] Although Congress has indicated that trading on contract markets be conducted generally in an open and competitive manner, it also has recognized the need for certain, limited exceptions to that requirement. Section 4c(a) of the Act prohibits various types of noncompetitively executed transactions but provides an exception for transfer trades, office trades, and exchanges of futures for physicals ("EFPs") that are executed in accordance with contract market rules that have been approved by the Commission. [2] With reference to these statutory provisions, the Senate Committee on Agriculture and Forestry stated:

> Both the Commodity Exchange Act and the rules and regulations of the commodity exchanges require that futures transactions be executed openly in a competitive manner.
>
> * * * * *
>
> Certain carefully prescribed exceptions to competitive trading are allowed, but they do not nullify the general requirement of open and competitive trading.
>
> The purpose of this requirement is to ensure that all trades are executed at competitive prices and that all trades are focused into the centralized marketplace to participate in the competitive determination of the price of futures contracts. This system also provides ready access to the market for all orders and results in a continuous flow of price information. [3]

Consistent with this policy, Commission Regulation 1.38(a) requires that contract market rules providing for the execution of noncompetitive transactions must be submitted to the Commission for approval. Commission Regulation 1.38(b) requires all noncompetitive transactions as well as all related orders, records, and memoranda to be identified and marked. Regulation 1.38 was adopted pursuant to Sections 4b and 8a(5) of the Act. [4] Section 8a(5) authorizes the Commission to "make and promulgate such rules and regulations as, in the judgment of the Commission, are reasonably necessary to effectuate any of the provisions or to accomplish any of the purposes of this Act."

B. Purpose of This Release

The purpose of this release is to solicit comments on whether the regulatory structure governing noncompetitive transactions executed on or subject to the rules of a contract market should be modified in light of recent developments in the marketplace. The impetus for this action comes from several sources, including the following.

First, ten years have passed since the Division of Trading and Markets ("Division") conducted a comprehensive study of EFPs. [5] During this time, the use of EFPs has continued to grow and evolve.

Second, several organizations have developed computerized systems for basis trading of U.S. Treasury securities. Essentially, a basis trade involves the simultaneous acquisition of positions in actual Treasury securities and in offsetting futures contracts. Venues for basis trading simplify the trading process by enabling traders to obtain both cash and futures positions in a single transaction which is reported to a contract market as an EFP.

Third, the New York Mercantile Exchange ("NYMEX") has sought Commission approval for a proposed rule that would permit the exchange of futures contracts for, or in connection with, swap agreements ("EFS transactions"). [6] This proposal would establish provisions for EFS transactions that are parallel to, but separate from, those governing EFP transactions. Thus, an EFS transaction would follow the form of an EFP except that a swap agreement would be substituted for the physical component.

Fourth, the Chicago Board of Trade ("CBT"), through counsel, requested the Division of Economic Analysis to agree not to recommend that the Commission take any enforcement action against the CBT, its members or market participants in connection with the CBT's proposed implementation of a one-year pilot program facilitating the off-exchange transfer of futures contracts in agricultural products in exchange for related over-the-counter agricultural options. [7]

[5] *Report of the Division of Trading and Markets: Exchanges of Futures for Physicals* (October 1987) ("EFP Report"). This document provides a detailed discussion on the history, use and regulation of EFPs. Interested parties may obtain a copy of the EFP Report by contacting the Commission's Office of the Secretariat at the address noted above.

[6] Interested parties may obtain a copy of the NYMEX proposal permitting EFS transactions by contacting the Commission's Office of the Secretariat at the address noted above.

[7] The Division of Economic Analysis staff advised counsel that, in light of the Commission's ongoing consideration of agricultural trade options in connection with its advance notice of proposed rulemaking, 62 FR 31375 (June 9, 1997), it was not currently appropriate to consider this request. The Commission has subsequently proposed removing

Continued

VOL 63 ISS 16 JA 26 1998 UMI

Finally, recent legislative proposals contemplate the establishment of separate, professional markets.[8] The Commission wishes to explore whether it is possible to achieve some of the objectives of these proposals by expanding the boundaries of permissible noncompetitive trading on existing contract markets. In contrast to the legislative proposals, a revised structure governing noncompetitive transactions could act as an adjunct rather than as an alternative to existing regulated markets. Such an approach might improve the usefulness and efficiency of existing markets for institutional or professional users but with a reduced risk of market fragmentation. Thus, carefully designed revisions to the regulatory structure governing noncompetitive transactions could have a procompetitive effect.

C. Overview

For the foregoing reasons, the Commission has determined to seek comments on whether the existing regulatory structure should be revised to provide additional guidance concerning standards governing noncompetitive transactions executed on or subject to the rules of a contract market. In scope, the Commission's request includes transactions that currently are permitted, such as EFPs, as well as transactions that are not currently permitted, such as EFS transactions or block trades. Of course, if the Commission were to revise its regulatory structure relating to noncompetitive transactions, the choice of whether to permit these types of transactions on a particular contract market would remain, in the first instance, with that contract market.

In general, the Commission is soliciting comments on the following questions:

(1) Should the standards articulated in the EFP Report be codified in the Commission's regulations and/or refined in any way?

(2) Should other types of noncompetitive transactions, such as EFS transactions or block trades, be permitted to be executed on or subject to the rules of a contract market and, if so, what standards should apply to these transactions?

(3) What standards should be applicable to execution facilities for noncompetitive transactions executed on or subject to the rules of a contract market?

More specific questions addressing particular aspects of these topics are posed in the relevant sections of this release. A consolidated list of questions is set forth at the conclusion. The Commission recognizes, however, that its identification of the issues may not be exhaustive and therefore invites comments on other aspects of these topics even if not expressly set out below.

The Commission is asking these questions for the dual purpose of giving notice of its consideration of these issues and of obtaining input before proceeding with any specific initiatives. Commenters should set forth with particularity the bases for their views. After receiving input, the Commission will endeavor to strike an appropriate balance among the relevant concerns.

II. Standards Governing EFP Transactions

A. Background

1. Historic Uses of EFPs

An EFP involves simultaneous transactions in the futures and cash commodity markets. The futures market transaction consists of a noncompetitive transfer of a futures position between the parties to the EFP. Thus, one party buys the physical commodity and simultaneously sells (or gives up long) futures contracts while the other party sells the physical commodity and simultaneously buys (or receives long) futures contracts. Subject to applicable contract market rules, the quantity and price of the futures and cash commodity to be exchanged as well as other terms are negotiated privately by the parties rather than being executed openly and competitively on a contract market. Depending on the pre-existing market positions of EFP counterparties, an EFP transaction can create, transfer, or extinguish futures positions.

The EFP exception currently contained in Section 4c(a) of the Act first appeared in H.R. 12287, which was introduced in 1932. The report of the House Committee on Agriculture accompanying that bill indicates that this exception was intended to permit the continuation of what was described as an accepted commercial practice:

> Transactions involving the exchange of cash commodities for futures in accordance with exchange rules applying to such exchanges are exempted, even though they take the form of office trades, it being understood that the exchange of cash commodities for futures is a common and necessary practice.[9]

The EFP exception was ultimately adopted with the enactment of the Commodity Exchange Act in 1936. None of the amendments to Section 4c(a) since that time provides further guidance as to the scope of permissible EFP transactions.[10]

As discussed in detail in the EFP Report, the use of EFPs has evolved to include practices not contemplated at the time Section 4c(a) originally was enacted. Indeed, financial futures contracts, which now dominate futures trading at some exchanges, did not exist at the time the EFP exception was adopted. In the EFP Report, the Division concluded that it appeared appropriate to interpret Section 4c(a) to accommodate some of these practices, many of which arise out of trading practices in various cash markets and which accomplish a variety of commercial purposes.[11] However, the Division also stated that the historical context in which the EFP exception first was enacted and the statutory language of Section 4c(a) itself necessarily imply certain limits on the permissible scope of EFP transactions as an exception to the general requirement of competitive execution.[12]

2. Current EFP Volume

A comparison of statistical data regarding the level of EFP activity between the late 1980s (when the EFP Report was published) and recent years shows that EFP activity, in many major markets, has continued to grow. The following table summarizes such data for selected contracts between 1986 and 1996.

---

the prohibition against off-exchange trade options on the enumerated agricultural commodities pursuant to a three-year pilot program. *Trade Options on the Enumerated Agricultural Commodities*, 62 FR 59624 (Nov. 4, 1997).

[8] *See, e.g.*, S. 257, 105th Cong., 1st Sess. § 6 (1997).

Part 36 of the Commission's regulations adopts certain exemptions under a pilot program for separate, professional markets. Included among the exemptions is a provision exempting certain noncompetitive trading subject to the rules of a professional market. However, no contract market has filed a proposal with the Commission pursuant to Part 36.

[9] *Commodity Short Selling*, H.R. Rep. No. 1551, 72d Cong., 1st Sess. 3 (1932).

[10] *See* Commodity Futures Trading Commission Act of 1974, Pub. L. No. 93–463, 88 Stat. 1389 (substituted the Commission for the Secretary of Agriculture and deleted state law preservation clause); Futures Trading Act of 1978, Pub. L. No. 95–405, 92 Stat. 865 (required contract market rules permitting EFPs to be approved by the Commission); Futures Trading Act of 1982, Pub. L. No. 97–444, 96 Stat. 2294 (exempted transactions in foreign currency options traded on a national securities exchange from coverage of the Commodity Exchange Act).

[11] EFP Report at 144–145.

[12] *Id.* at 26. For example, the Division has expressed its opinion that the EFP "exemption was not designed to create an avenue for traders to use EFP transactions to accomplish what they could not otherwise legitimately do, that is, wash trades, accommodation trades, fictitious sales, or illegal off-exchange transactions." *Report of the Division of Trading and Markets: Volume Investors Corporation* 59 n. 54 (July 1985).

NYMEX Crude Oil	3.60	2.67
NYMEX Heating Oil #2	1.90	6.66

[13] The data shown in Table 1 is for calendar year 1986 and 1996.

As the table shows, EFP activity as a share of trading volume has been relatively stable in traditional agricultural markets and has declined in some cases. The trend for financial futures contracts has been just the opposite, with EFP activity continuing to increase, in some cases dramatically.

3. Current Oversight of EFPs

EFP transactions are currently subject to oversight through a variety of sources, including: (i) the Commission's review of contract market rules governing such transactions; (ii) the Commission's reporting and recordkeeping requirements; (iii) contract markets' enforcement of their own rules; (iv) the Commission's rule enforcement review program; and (v) the Commission's own enforcement program.

B. Elements of a Bona Fide EFP

The EFP Report described EFP practices in selected markets, analyzed the legislative and regulatory framework surrounding EFPs, and reviewed the contract market rules and interpretations that govern them. The EFP Report suggested possible criteria to be examined by contract markets in evaluating whether a particular EFP transaction is eligible for the Section 4c(a) exception. In particular, the Division enumerated three essential elements of a bona fide EFP as follows: (i) a futures transaction and a cash transaction which are integrally related; (ii) an "exchange" of futures contracts for cash commodity, where the cash commodity contract provides for the transfer of ownership of the cash commodity to the cash buyer upon performance of the terms of the contract, with delivery to take place within a reasonable time thereafter in accordance with prevailing cash market practice; and (iii) separate parties to the EFP, where the accounts involved have different beneficial ownership or are under separate control.[14]

In addition, the Division developed a non-exclusive list of other indicia to assist contract markets in determining whether the essential elements of a bona fide EFP have been satisfied. These include: (i) the degree of price correlation between the futures and cash legs of the EFP; (ii) the prices of the futures and cash legs of the EFP and their relationship to the prevailing prices in their respective markets; (iii) whether the cash seller has possession, the right to possession, or the right to future possession of the cash commodity prior to the execution of the EFP; (iv) the cash seller's ability to perform on his delivery obligation in the absence of prior possession of the cash commodity, *i.e.*, the cash seller's access to the cash market; and (v) whether the cash buyer acquires title to the cash commodity.[15]

These elements can be analyzed in terms of four categories: (i) the relationship of the instruments; (ii) the relationship of the parties; (iii) the nature of the transaction; and (iv) the price of the transaction. The following discussion summarizes the elements and indicia of a bona fide EFP as set forth by the Division in the EFP Report. As noted above, the Commission is soliciting comments on whether these standards should be codified in the Commission's regulations and/or refined in any way.

1. Relationship of the Instruments

(a) Qualitative Correlation. In the EFP Report, the Division determined that the futures and cash legs of a bona fide EFP should be correlated with each other, both qualitatively and quantitatively.[16] Qualitative correlation clearly exists when the cash commodity satisfies the delivery specifications of the associated futures contract. However, when the cash commodity is not deliverable against the relevant futures contract, questions arise as to its acceptability as the cash leg. While some contract markets focus on whether the cash commodity is the economic equivalent of, or is derived from, the particular commodity specified in the futures contract, others also consider the price relationship between the cash and futures legs of the transaction.

In the EFP Report, the Division concluded that the cash commodity should have a reliable and demonstrable price relationship with the futures contract involved in the EFP.[17] The cash leg should exhibit price movement that historically has paralleled the price movement of the futures contract, with the cash and futures prices typically moving in the same direction and at consistent relative rates of change. Although perfect price correlation is not required, a "strong correlation" should exist. Otherwise, the parties are at risk that the basis or price differential between the cash and futures legs will change significantly prior to the conclusion of the EFP, thus adversely affecting the utility of the transaction itself. The lack of a strong correlation may indicate that the parties' motive for the EFP was to circumvent the regulatory requirements of the Act or the Commission's regulations, such as the requirement of open and competitive execution, rather than to conduct a commercially appropriate transaction. The Division also concluded that hedgeable commodities are appropriate cash legs for EFPs.[18]

In the EFP Report, the Division noted that statistical correlation coefficients[19] have been used to justify specific EFPs involving stock index futures contracts either before or after the transaction was consummated.[20] The Division also recommended that contract markets publicize their determinations regarding the acceptability of particular commodities as the cash leg of an EFP in order to provide more guidance to the market users of these transactions.[21]

(b) Quantitative Correlation.

For quantitative correlation to exist, the Division determined that the cash commodity position should be approximately equal in quantity or dollar value to the futures position and that appropriate hedge ratios may be

---

[14] EFP Report at 146–150.

[15] *Id.* at 150–151.

[16] *Id.* at 152–160.

[17] *Id.* at 155.

[18] *Id.* at 157.

The Division referred to Administrative Determination 239, issued by the Commodity Exchange Authority on December 16, 1974, which advised that, "[i]f a commodity, product or by-product is hedgeable under the Act, it may be exchanged for futures. If it is not hedgeable, it may not be exchanged." *See generally* 17 CFR 1.3(z) (defines bona fide hedging transactions and positions); *Clarification of Certain Aspects of the Hedging Definition*, 52 FR 27195 (July 20, 1987).

[19] A correlation coefficient measures the degree to which the movements of two variables are related. Here the variables consist of the price of the futures contracts and the price of the cash commodity.

[20] EFP Report at 158.

[21] *Id.* at 159.

VOL 63 ISS 16 JA 26 1998 UMI

used to create such dollar equivalency.[22] Again, the absence of such equivalency may indicate a motive to circumvent some requirement of the Act or the Commission's regulations rather than to conduct a commercially appropriate transaction.

(c) Request for Comments. The Commission is soliciting comments on the following questions:

(4) How should the "strong price correlation" standard articulated in the EFP Report be implemented?

(5) Should the Commission require contract markets to adopt a minimum statistical correlation coefficient to be used in assessing the acceptability of a particular cash commodity for use as the cash leg of an EFP?

(6) If a minimum correlation coefficient is required, should this coefficient apply to all EFPs, or should it be adjusted to account for the different commodities involved in EFPs?

(7) What is the appropriate type and scope of guidance contract markets should be required to provide to the general public concerning the acceptability of particular commodities as the cash leg of an EFP?

2. Relationship of the Parties

(a) Separate Parties. In the EFP Report, the Division concluded that a bona fide EFP must be executed between separate parties.[23] Determining if separate parties are involved in a particular transaction in turn depends upon whether the accounts have different beneficial owners or are under separate control. This standard permits separate profit centers of a futures commission merchant ("FCM") to engage in EFPs with each other in order to accomplish their trading strategies and to fulfill their business needs.

(b) String Trades. In the EFP Report, the Division discussed a method of effecting an EFP transaction in the grain markets called a "pass-through" or "string trade."[24] Under this method, the two parties to the EFP each have cash commodity contracts with a different party or parties which require them to buy/sell the cash commodity and sell/buy the corresponding futures contract in order to set the price for the cash transaction. All of the parties in the string have complementary cash commitments and corresponding obligations to buy or sell futures contracts to the next party in the string. Instead of executing a series of EFP transactions in which the intermediate futures positions transferred among the parties would net out for the common parties, the first and last parties in the string execute a single EFP and the other mutually exclusive futures obligations are canceled.[25]

(c) Request for Comments. The Commission is soliciting comments on the following questions:

(8) What is the appropriate scope of the separate parties requirement?

(9) Should the Commission address string trades as that practice is described in the EFP Report and, if so, how?

3. Nature of the Transaction

(a) Exchanges of Futures Contracts for Cash Commodities. As discussed previously, Section 4c(a) of the Act excepts EFPs from the prohibition against various types of noncompetitively executed transactions. A bona fide EFP must involve an "exchange" of futures contracts for cash commodity in which both legs of the transaction entail actual economic risk.

(b) Futures Leg Requirements. The futures leg of the EFP must be reported to and cleared by a contract market clearing organization. Therefore, it is subject to the same margin obligations, both original and variation, as any other exchange-traded futures transaction. If the futures leg were netted off-exchange, this conduct might constitute bucketing in violation of Section 4b(a) of the Act.[26]

(c) Cash Leg Requirements. In the EFP Report, the Division concluded that the cash commodity contract must impose a real obligation to transfer ownership of the cash commodity from the cash seller to the cash buyer upon performance of the terms of the contract, with delivery taking place within a reasonable time thereafter in accordance with prevailing cash market practice.[27] The Division further asserted that, although the cash commodity contract must contemplate the making and taking of delivery of the cash commodity, the parties may, subject to the terms of the contract and the principles of contract law, individually transfer their contractual rights or obligations with respect to the cash commodity to a third party or may offset these positions or obligations prior to delivery.[28]

In the EFP Report, the Division discussed several factors to be considered in analyzing the parties' intent with respect to the transfer of cash commodity, including: (i) the ability of the cash seller to make delivery and of the cash buyer to take delivery of the cash commodity; (ii) the level of creditworthiness required of the cash seller and buyer; (iii) the form and terms of the cash commodity contract; (iv) the documentation underlying the transfer of cash commodity from the cash seller to the cash buyer; and (v) whether the cash buyer acquires an enforceable claim on the title to the cash commodity.[29]

The Division expressed the view that the cash seller is not required to have possession, or the right to possession, of the cash commodity in order to undertake a contractual obligation to deliver it in the future by way of an EFP.[30] Nevertheless, the lack of: (i) possession, (ii) the right to possession, or (iii) access to the cash market may indicate that the parties lacked the requisite intent to execute a cash transaction in the first place. This would raise doubts about the legitimacy of the EFP. Similarly, evidence that the cash buyer was unable to accept delivery of the cash commodity may indicate that the parties never intended to execute the cash leg of the EFP. An examination of the documents underlying the cash transaction, including the form and the terms of the cash commodity contract, confirmation statements, and documents evidencing title, in light of the state law governing transfers of ownership is especially useful in determining the parties' intent.

In determining whether there has been, or will be, an actual transfer of ownership of the cash commodity, the critical inquiry is whether the buyer of the cash commodity has acquired or will acquire, upon completion of performance under the contract, title to the cash commodity associated with the EFP.[31] In this regard, the Division stated that the cash commodity contract may contemplate an immediate transfer of title or a transfer of title at some subsequent time.[32] Regardless of when title passes, however, delivery of the cash commodity should occur within a reasonable period of time in accordance with normal industry practice involving comparable cash market transactions. If delivery did not occur, the transaction would need to be scrutinized, the reasons for failure identified, and a determination made as to whether the EFP is bona fide.

(d) Transitory EFPs. In the EFP Report, the Division expressed concern about a practice, then occurring frequently in the gold and foreign currency markets, involving both an EFP and an offsetting cash commodity transfer.[33] For example, party A purchases the cash commodity from party B and then engages in an EFP whereby A sells the cash commodity back to B and receives a long futures position. As a result of this integrated transaction, the parties acquire futures positions but end up with the same cash market position as they had before the transaction. These transactions are sometimes referred to as transitory EFPs. In such cases, questions arise as to whether there has been a bona fide "exchange" of the cash commodity as is required by Section 4c(a) of the Act.

The Division concluded that, in reviewing transitory EFPs, the EFP and the cash commodity transfer should be examined both separately and as an integrated transaction.[34] The parties must incur actual economic risk in both legs of the EFP and in the cash commodity transfer, and the EFP itself must otherwise be bona fide.

The predominant consideration is whether the cash commodity transfer can stand on its own as a commercially appropriate transaction, with no obligation on either party to carry out the EFP.[35] One indication is whether the terms and structure of the cash commodity transfer are substantially the same in all material respects as other cash transactions in that market or more specifically for those particular participants. For example, if the price of the cash commodity is determined differently or if a lower level of capitalization is required of the buyer than would otherwise be the case, then the cash commodity transfer may not be genuine. Another indication is whether the buyer acquires title to the cash commodity in accordance with customary cash market practices.

Additional issues to be considered in evaluating whether the integrated transaction is bona fide include: (i) The timing of the cash commodity transfer and the EFP; (ii) whether the same parties have executed a number of integrated transactions in which the cash commodity transfer never occurs independently of the EFP; (iii) whether there have been a series of transactions in which the same cash commodity is transferred repeatedly between the same parties, resulting in the liquidation of a futures position much larger than the exchanged cash commodity which ultimately remains with the original owner; and (iv) the relationship between the parties and their patterns of dealings, including evidence of money passes between them.[36]

(e) Contingent EFPs. Contingent EFPs are an impermissible subset of transitory EFPs. The existence of conditions tying the cash commodity transfer and the EFP together may indicate that the transactions are not severable but are contingent upon each other.[37] A cash commodity transfer which cannot stand on its own may indicate that there was no actual economic risk in the initial cash transfer and may raise concerns about whether the EFP involved an "exchange" of futures contracts for cash commodity as is required by Section 4c(a) of the Act.

(f) Request for Comments. The Commission is soliciting comments on the following questions:

(10) What criteria are appropriate for judging whether the futures leg of an EFP is bona fide?

(11) What criteria are appropriate for judging whether the cash leg of an EFP is bona fide?

(12) What criteria are appropriate for determining whether a transitory EFP is bona fide?

(13) What criteria are appropriate for determining whether an EFP is contingent?

4. Price of the Transaction

(a) Current Requirements. As discussed previously, because EFPs are executed noncompetitively off-exchange, the prices of both the futures and cash legs are determined by mutual agreement of the parties. In the EFP Report, the Division concluded that the price differential between the futures and cash legs should reflect commercial realities and that at least one leg of the transaction should be priced at the prevailing market.[38] Although pricing one leg of the EFP significantly away from the market may be justified by commercial necessity,[39] the Division expressed its concern that such aberrant pricing can be used to shift substantial sums of cash from one party to another or to allocate gains and losses between the futures and cash sides of the EFP.[40] Moreover, when both legs of an EFP are priced away from the market, the transaction may not be commercially appropriate, particularly when one party could obtain better prices for the futures and cash legs in another available market. In the EFP Report, the Division urged contract markets to determine whether the pricing of a particular EFP is supported by a business purpose.[41]

(b) Request for Comments. The Commission is soliciting comments on the following questions:

(14) Should the Commission require both the futures and cash legs of an EFP to be priced within the daily range of their current respective markets, should it require only one leg of an EFP to be priced within its daily range, or should it impose no restrictions on the price of either leg of an EFP?

(15) Should the Commission require contract markets to obtain documentation regarding the business purpose underlying the pricing of an EFP?

C. Other Regulatory Requirements Governing EFPs

1. Reporting and Recordkeeping

(a) Current Requirements Under the Commission's current regulations EFPs are subject to broad reporting and recordkeeping requirements. Commission Regulation 1.35(a) generally requires every FCM, introducing broker ("IB"), and contract market member to keep full, complete and systematic records of all transactions relating to its business of dealing in commodity futures, commodity options, and cash commodities, to retain such records for a period of five years, and to produce them upon request of the Commission or the Department of Justice. Commission Regulation 1.38(b) requires every person handling, executing, clearing, or carrying EFPs to identify all related documents by appropriate symbol or designation. Similarly, under Commission Regulation 1.35(e), each

---

[22] *Id.* at 159–160.

For example, if the futures position established by the EFP transaction represents 50,000 bushels of corn, then the associated cash leg should also equal approximately 50,000 bushels of corn. With respect to the use of appropriate hedge ratios to create dollar equivalency, traders might cross-hedge a 182-day T-bill by using more than one 91-day T-bill futures contract since the risk exposure on the principal amount of the T-bill increases the higher the duration of the security. Other instruments with differing maturities and yields would require different ratios.

[23] *Id.* at 147, 149–150.

[24] *Id.* at 47, 148 n. 173.

[25] For example, party A has agreed to sell grain to and buy futures contracts from party B. Meanwhile, party B has agreed to sell grain to and buy futures contracts from party C. When C is ready to sell futures contracts to B in order to fix the price of their cash transaction, B directs C to execute the futures trade with A instead, thus satisfying B's obligation to sell futures contracts to A. Thus, A and C execute an EFP in which C sells futures contracts to A, but there is no corresponding cash transaction between A and C. In the absence of this string trade, parties A and B and parties B and C must execute separate EFP transactions consistent with their contractual obligations. Thus, the string trade serves to match the mutually exclusive futures obligations so that only one EFP is reported to the contract market.

[26] 7 U.S.C. 6b.

[27] EFP Report at 146.

[28] *Id.* at 149. For example, under this approach, a third party could assume the seller's obligation to deliver the cash commodity, or the cash seller could contract to purchase the cash commodity from the third party and direct that delivery be made to the cash buyer in the EFP.

[38] *Id.* at 174–175.

[39] The Division identified several such examples in the EFP Report including meeting a margin call, taking advantage of expected foreign exchange fluctuations, and complying with internal inventory policies. *Id.* at 169–173.

[40] *Id.* at 169.

[41] *Id.* at 175.

VOL 63 ISS 16 JA 26 1998 UMI

contract market must maintain a record showing, by appropriate and uniform symbols, any transaction which is made noncompetitively in accordance with written rules of the contract market. Commission Regulation 1.35(a–2) requires FCMs, IBs, and other contract market members to ask their customers for documentation of the cash leg of an EFP upon request of the contract market, the Commission, or the Department of Justice and upon receipt to provide the documentation to the requesting body; requires customers to create, retain, and produce such documentation directly to the requesting body; and requires that all contract markets adopt, as necessary, corresponding rules requiring its members to provide the documentation to the contract market.

Under Part 16 of the Commission's regulations, each contract market must report the total quantity of futures contracts bought or sold in connection with EFPs to the Commission by clearing member and must publish the total quantity of EFPs executed on any given business day. Part 17 of the Commission's regulations requires FCMs, members of contract markets, and foreign brokers to report to the Commission the quantity of EFPs executed in each special account on the day it has a reportable futures position as well as on the first day the account is no longer reportable. Commission Regulation 18.05 requires each trader holding or controlling a reportable futures position ("large trader") to keep records of all futures and cash commodity positions and transactions. Finally, the Commission may issue a special call under Regulation 21.03(e)(1)(iii) to FCMs, IBs, or customers that requires information about EFPs to be submitted for the particular commodity, contract market, and delivery months named in the call.

(b) Request for Comments. The Commission is soliciting comments on the following question:

(16) Are the current reporting and recordkeeping requirements relating to EFPs adequate?

2. Disclosure

(a) Current Requirements. Commission Regulation 1.55(a)(1) prohibits an FCM or IB from opening a commodity futures account for any customer unless the FCM or IB first provides the customer with a written risk disclosure statement prepared by or approved by the Commission and receives a signed acknowledgment from the customer that he or she has received and understood this statement.[42] This risk disclosure statement, as set forth in Commission Regulation 1.55(b), does not specifically address EFPs. However, Commission Regulation 1.55(f) makes clear that compliance with the specific disclosure requirements of Regulation 1.55 does not relieve an FCM or IB from any other disclosure obligation it may have under applicable law. These disclosure obligations arise under Section 4b of the Act as well as under state and common law and require an FCM or IB to provide its customers with all material information relating to a transaction, including information relating to the risks involved in entering a particular transaction.[43]

The Commission seeks to ensure full and fair disclosure of the requirements of and risks inherent in EFPs. Only when customers have complete information regarding EFPs can they effectively evaluate whether such transactions are consistent with their financial goals. The Commission believes that some guidance as to the form and content of disclosure concerning EFPs may be appropriate.

(b) Request for Comments. The Commission is soliciting comments on the following questions:

(17) What should be the form and content of disclosure concerning EFPs?

(18) Should the form and content of disclosure vary according to the commercial sophistication of the EFP participant similar to the Commission's proposed amendment to Regulation 1.55?

(19) Should the Commission explicitly require that customers must be informed that an EFP is executed noncompetitively, that it involves a cash transaction, and that their FCM might take the opposite side of the EFP?

(20) Should the Commission explicitly require Commission registrants to obtain customer consent before executing an EFP on the customer's behalf?

[42] The Commission is currently proposing to amend Regulation 1.55 so that FCMs and IBs would no longer be required to furnish the specified written risk disclosure statement to certain categories of financially accredited customers or to obtain written acknowledgments of receipt of the risk disclosure statement before opening a commodity futures account for these customers. In addition, the Commission is currently proposing amendments to relieve FCMs and IBs from requirements to furnish disclosure statements to these financially accredited customers pertaining to foreign futures or foreign options (Regulation 30.6(a)), domestic exchange-traded commodity options (Regulation 33.7(a)), customers whose accounts are transferred to another FCM or IB other than at the customer's request (Regulation 1.65(a)(3)), and the treatment in bankruptcy of non-cash margin held by an FCM (Regulation 190.10(c)). *Distribution of Risk Disclosure Statements by Futures Commission Merchants and Introducing Brokers*, 62 FR 47612 (Sept. 10, 1997).

[43] *Id.* at 47614.

3. Internal Controls

(a) Current Requirements. Commission Regulation 166.3 generally requires all Commission registrants, except associated persons who have no supervisory duties, to "diligently supervise the handling by its partners, officers, employees and agents * * * of all commodity interest accounts carried, operated, advised or introduced by the registrant and all other activities * * * relating to its business as a Commission registrant." One basic purpose of the rule is to protect customers by ensuring that their dealings with employees of Commission registrants will be reviewed and overseen by other officials in the firm.[44] Although Commission Regulation 166.3 currently applies to EFPs, the Commission believes that some guidance as to the types of internal controls that Commission registrants should be required to maintain may be appropriate.

(b) Request for Comments. The Commission is soliciting comments on the following question:

(21) What internal controls are appropriate for Commission registrants to ensure compliance with regulatory requirements concerning the essential elements of bona fide EFPs, reporting and recordkeeping, and disclosure?

4. Transparency

(a) Current Requirements. The current reporting requirements for EFPs are outlined above. Exchanges do not require, and generally do not have a mechanism for providing, timely information about EFP bids, offers, and transactions.

(b) Request for Comments. The Commission is soliciting comments on the following questions:

(22) Do existing price reporting standards provide adequate transparency concerning EFPs to the marketplace and, if not, are there alternative methods of achieving improved price transparency?

(23) Should the Commission require contract markets to publicize information about bids and offers, as well as consummated EFP transactions?

III. Other Noncompetitive Transactions Executed on or Subject to the Rules of a Contract Market

A. Types of Eligible Transactions

Although EFPs have raised many issues and concerns, they have proven to be useful commercial tools. As noted above, the Commission seeks to explore whether there are other types of noncompetitive transactions that also could enhance the usefulness of

[44] *Adoption of Customer Protection Rules*, 43 FR 31886, 31889 (July 24, 1978).

designated contract markets without compromising necessary regulatory safeguards. The Commission has identified three potential candidates: (i) EFS transactions; (ii) exchanges of options for physicals ("EOPs"); and (iii) block trades. The Commission welcomes the identification by commenters of any other potential types of transactions.

1. Exchanges of Futures for Swaps

(a) The New York Mercantile Exchange Proposal. As noted, the NYMEX has applied to the Commission for approval of a rule that would permit the execution of EFS transactions. As proposed by the NYMEX, EFS transactions would involve the noncompetitive exchange of futures contracts for separately negotiated swap agreements. In this respect, the proposal would establish for EFS transactions provisions that are parallel to, but separate from, those governing EFP transactions.[45] Thus, an EFS transaction would follow the structural form of an EFP transaction except that a swap agreement would be substituted for the physical component of the transaction.[46]

Under the NYMEX proposal, the swap component of the EFS transaction must comply with the requirements of Part 35 of the Commission's regulations or with the Commission's 1989 Policy Statement concerning cash-settled swap transactions or must otherwise qualify for or fall within other exemptions or jurisdictional exclusions under the Act or Commission regulations. This initiative represents the first proposal the Commission has received for approval of EFS transactions.

The NYMEX states that the rule proposal in part responds to the substantial growth that has occurred in the swaps market during recent years. In this respect, the NYMEX asserts that swap transactions, though not "physical" in the traditional sense, subject market participants to the same type of price risk. Thus, the NYMEX claims that the proposal could aid in linking the on-exchange futures and off-exchange swap markets.

The NYMEX believes that allowing EFS transactions would increase market efficiency and enhance the use of the exchange as a risk transfer medium. Specifically, the NYMEX believes that both traditional market users and swap dealers (banks, trading companies, and energy companies) would benefit from the availability of EFS transactions. By a similar line of reasoning, the NYMEX notes that commodity swap instruments continue to play an increasingly important role in providing a risk management function in crude oil and other markets, in part because they can be individually tailored to a user's commercial needs and thereby reduce substantially the presence of basis risk. Because of this, the NYMEX concludes that permitting EFS transactions would reduce basis risk for NYMEX market participants, enhance competition among exchange and over-the-counter markets, and facilitate greater usage of NYMEX as a centralized market.

The NYMEX affirms that it has not identified any evidence suggesting that adoption of the proposal would harm existing liquidity in NYMEX markets. Moreover, the NYMEX concludes that the rule proposal would make the liquidity present in NYMEX energy markets accessible to swap market participants via the EFS process. Additionally, the NYMEX identifies the ability of swap participants to close out futures positions more readily, as the underlying futures contracts approach expiration, and thus utilize the exchange in managing price risk associated with swap market transactions as a potential benefit of the proposal.

The NYMEX also views the financial safeguards of the on-exchange trading environment as potentially beneficial, and attractive to, swap market participants. The NYMEX concludes that access to these financial safeguards, including those associated with the position limit and margining systems, either for purposes of creating or extinguishing swap agreements, would enable swap market participants to enhance the credit quality of swap positions. Thus, in summary, the NYMEX concludes that several benefits would accrue to market participants from adoption of the proposed rule, including improvements in liquidity and price transparency, and reductions in basis and credit risk.

(b) Request for Comments. The Commission is soliciting comments on the following questions:

(24) What are the economic reasons firms might have for engaging in EFS transactions and what benefits might accrue thereunder, including the potential benefits to domestic futures markets, to over-the-counter markets, and to financial markets generally?

(25) What are the potential costs or risks of permitting EFS transactions, particularly with respect to the effect on price discovery, risk transfer, and the competitive character of "on-exchange" transactions?

(26) Should the Commission approve the NYMEX rule proposal permitting EFS transactions?

(27) Should EFS transactions be limited to particular markets, participants or types of transactions?

(28) Should special provisions be established to ameliorate any competitive costs or otherwise safeguard the competitive conditions of the on-exchange market?

2. Exchanges of Options for Physicals

(a) Background. The EFP Report included an examination of EOPs.[47] The Division noted that the statutory sections governing options trading, Sections 4c(b) and 4c(c) of the Act,[48] do not provide for the extension of the Section 4c(a) exception for EFPs to options. The Division acknowledged that Regulation 1.38 provides for the execution of noncompetitive transactions pursuant to Commission-approved contract market rules and, on that basis, concluded that EOP transactions could potentially fall within the noncompetitive trade exception found in that regulation.

The EFP Report's investigation of contract market rules found that most were silent on the question of whether EOP transactions were acceptable, with only the Chicago Mercantile Exchange ("CME") rules expressly prohibiting EOP transactions.[49] Although the Amex Commodities Corporation ("ACC") adopted a rule permitting EOPs,[50] it subsequently withdrew that rule, apparently prior to the execution of any EOP transactions.

The Division staff that prepared the EFP Report were unable to discover any instances in which an option on a futures contract was exchanged for a cash commodity, and the Commission is not aware that any of these transactions have occurred since the publication of the report. The Division observed that the absence of these transactions could be due to the fact that market participants had not yet been able to design a plan to execute EOPs, perhaps

[45] As noted above, pursuant to Section 4c(a) of the Act, EFPs are explicitly permitted as an exception to the usual open and competitive execution requirements established by the Act, but only to the extent provided for by contract market rules approved by the Commission. Also as noted, Commission Regulation 1.38(a) authorizes noncompetitive transactions if executed in accordance with contract market rules that have received Commission approval. All domestic commodity exchanges permit the execution of EFP transactions, although there is some variation among exchange rules.

[46] In general, a simplified swap agreement may be characterized as an agreement between two parties to exchange a series of cash flows measured by different interest rates, exchange rates, or prices, with payments calculated by reference to a principal base (or notional amount). *See Policy Statement Concerning Swap Transactions*, 54 FR 30695 (July 21, 1989). Part 35 of the Commission's Regulations defines swap agreements by reference to the Bankruptcy Code. *See* 17 CFR 35.1(b)(1).

[50] ACC Rule 908.

VOL 63 ISS 16 JA 26 1998 UMI

because of difficulty in establishing an appropriate basis relationship between the option and the cash commodity.

The EFP Report indicated that commentary from contract market officials and market participants on the EOP issue was divided. Some commenters objected on the basis that an option does not involve a delivery commitment. However, others indicated that EOPs could be appropriate in some circumstances. These commenters indicated that an EOP might be appropriate for the grantor of an option, who has a delivery commitment upon exercise, or in the case of a deep-in-the-money option, which as a practical matter appears to be the equivalent of a futures position. One commenter stated that EOPs were conceptually viable but that the instability associated with option deltas (and therefore option value) could create great risk for a person accepting an option in exchange for a cash commodity. This commenter also indicated that, assuming this risk was reflected in the price, EOP transactions could be very expensive.

(b) Request for Comments. The Commission is soliciting comments on the following questions:

(29) Are EOPs viable and do these transactions offer genuine risk management benefits?

(30) If so, should EOPs be permitted, and should there be limitations on EOPs that reflect the particular risk characteristics of options?

3. Alternative Execution Procedures

(a) Current Procedures. (1) Contract Market Large Order Procedures. The Commission has approved several contract market rules that establish alternative execution procedures for certain transactions. These procedures generally preserve the competitive forces available on a centralized market and thereby comply with the "open and competitive" requirement of Commission Regulation 1.38(a).

The CME, the New York Cotton Exchange ("NYCE") and the New York Futures Exchange ("NYFE") have adopted similar procedures providing for the execution of large orders.[51] These procedures may be used only upon customer request or if the large order bid or offer is the best price available to satisfy the terms of the order. A member makes a request for a large order bid and/or offer in the appropriate trading area. Responding members may make bids and/or offers at, above or below the current prevailing bid or offer in the underlying market for regular size orders. Only the best bid and/or offer shall prevail, and the large order must be filled on an all-or-none basis. The large order execution price does not trigger conditional orders in the underlying market, such as stop or limit orders.

The NYCE and NYFE expressly prohibit an initiating floor broker from bundling customer orders to meet the minimum contract size required for eligibility under the large order execution procedures, but allow a responding broker to bundle customer limit orders and to add orders from his or her own account to match the quantity of futures or options in the large order request. Under the CME all-or-none procedures, both the initiating floor broker and the responding floor broker may bundle customer orders to meet the minimum contract size as long as the customers specifically request execution under these procedures or the all-or-none bid or offer is the best price available to satisfy the terms of the orders. Although cross trades are not permitted at the NYCE and NYFE under these procedures, they are permitted at the CME. Large order transactions executed at all three exchanges must be reported to a designated Exchange official who records and publishes the quantity and prices separately from reports of transactions in the regular market.

The CME also has adopted separate large order execution ("LOX") procedures for transactions involving 300 or more futures contracts in the Standard & Poor's 500 Stock Price Index or the Nikkei Stock Average.[52] These procedures, which include the pre-execution solicitation of interest and discussion of price, have only been used once in the several years they have been available.

The CME also has adopted request for size ("RFS") quotations for the GLOBEX system. These procedures supplement the GLOBEX request for quote ("RFQ") procedures. As originally configured, RFQ messages were distributed without any contract quantity indication. Thus, the adoption of RFS procedures permits requests for large size transactions for all contracts traded through GLOBEX, subject to a minimum threshold quantity for RFS quotations of 100 contracts.[53]

(2) Section 4(c) Contract Market Transactions. As noted previously, Section 4(c) of the Act vests the Commission with certain exemptive authority from the general requirement that all futures transactions must be executed on designated contract markets, subject to specified qualifying criteria. Part 36 of the Commission's regulations adopts certain exemptions under a pilot program for the establishment of separate professional markets which would have less restrictive requirements governing trading, reporting, and risk disclosure for eligible transactions than are applicable to current contract markets. Subject to certain recordkeeping and audit trail requirements, Part 36 procedures provide for the execution of noncompetitive transactions, regardless of size. In addition, these transactions are limited to certain Commission registrants and sophisticated and/or institutional traders which meet certain minimum asset requirements, including banks, trust companies, savings associations, credit unions, investment companies, commodity pools, certain business associations, employee benefit plans, government entities, broker-dealers, FCMs, floor brokers, floor traders, and certain other natural persons. A contract market may adopt trading rules permitting the execution of Part 36 transactions using any combination of noncompetitive execution procedures and competitive on-floor trading procedures.

No contract market has filed a proposal with the Commission pursuant to Section 4(c) and Part 36. Significantly, Part 36 only permits noncompetitive executions in specially-designated, stand-alone, professional markets. In contrast, the other noncompetitive trading methods discussed in this release are adjuncts to regular trading on or subject to the rules of a contract market.

(3) Securities Market Block Trading Procedures. Block trading in securities markets differs substantially from that on Commission designated contract markets. Blocks may be traded on securities exchanges, in over-the-counter securities markets, or through "principal-to-principal" trade execution venues. In the securities industry, a block trade is commonly defined as a transaction involving 10,000 or more shares or a quantity of stock having a market value greater than or equal to $200,000. In recent years, block trading in securities markets has increased as a percentage of reported trading volume.[54]

The New York Stock Exchange ("NYSE") and the Chicago Board Options Exchange ("CBOE") have rules providing for block trading.[55] A customer desiring to trade a block of NYSE-listed stocks contacts a block trader. Depending on the block trader's assessment of market demand and supply, the block trader may notify the Specialist of the pending block trade.[56] If notified, the Specialist may indicate an interest in participating in the block. The block trader then must decide whether to "position" the entire block by serving as the counterparty or "shop the block" by seeking customers to take the other side of the trade. The block trader may also combine these strategies by positioning part of the block and seeking customers for the remaining shares. Upon agreement of a price for the block,[57] the block order is transmitted to the NYSE floor for crossing against the block trader's house account or against other customer orders as arranged in "shopping the block."

Block orders crossed on the NYSE floor must comply with NYSE rules, including the following. Block orders within the current market quotation must first be offered publicly at a price higher than the member's bid by the minimum variation applicable to that stock so that the trading crowd may participate in the block at that publicly offered price, before the member may proceed with the cross transaction.[58] Block orders crossed outside the current market quotation must be disclosed to the Specialist.[59] Where the member is holding agency orders on both sides of the market, he or she must probe the market to determine whether more stock would be lost than is reasonable under the circumstances to orders in the crowd.[60] Where the member is serving as the counterparty of the block and where all or any portion of the block establishes or increases his or her position, the member must fill all limit orders at the post for the clean-up price or better at the clean-up price, before any amount may be retained for the member's account.[61] As an anti-manipulation safeguard, when a member holds any part of a long position in a stock in its trading account as a result of a block trade it completed with a customer, the member is precluded from effecting certain transactions in this stock on the same trading day in which the block trade was executed.[62]

At the CBOE, a member or member organization may solicit another member, member organization, non-member customer or broker-dealer ("solicited person") to take the opposite side of a large-sized order ("original order").[63] The member representing the original order must disclose the terms and conditions of that order to the trading crowd before it can be executed.[64]

In order to promote disclosure at the inception of the solicitation period and to encourage solicited persons to bid or offer at prices that improve the current market, the CBOE rule establishes a series of priority principles for these solicited transactions. Priority depends upon whether the original order is disclosed throughout the solicitation period, whether the solicited order improves the best bid or offer in the crowd and whether the solicited order matches the original order's limit.

If the terms and conditions of the original order are disclosed to the trading crowd prior to any solicitation and the order is continuously represented in the crowd throughout the solicitation process, then the following rules apply. If the solicited order matches the original order's limit and improves the best bid or offer in the trading crowd, then the solicited order has priority over the crowd and may trade with the original order at the improved bid or offered price subject to the customer limit order book priorities set forth in CBOE Rule 6.45.[65] If the solicited order does not match the original order's limit, but improves the best bid or offer in the crowd and the original order is subsequently modified to match the solicited order's bid or offer, then the terms of the original order, as modified, must be disclosed to the trading crowd. The crowd has priority to trade with the modified original order before this order may be crossed with the solicited order.[66] If the solicited order does not match the original order's limit and meets but does not improve the best bid or offer in the trading crowd and the original order is subsequently modified to match the solicited order's bid or offer, then the trading crowd has priority to trade with

---

[51] CME Rule 521 ("All-Or-None Transactions"); NYCE Rule 1.10-B ("Block Order Execution"); NYFE Rule 312 ("Block Order Execution").

The CME all-or-none procedures apply to a variety of products, including currency futures, South African Rand options, 28-day Mexican TIIE futures, 91-day Mexican CETES futures, Brady Bond futures, IPC futures, Three-month Eurodollar futures bundle combinations, 13-week U.S. Treasury Bill futures, British Pound/Deutsche Mark and Deutsche Mark/Japanese Yen futures, and Argentine Par Bond futures. The minimum contract size eligible for execution under these procedures ranges from 20 contracts to 100 contracts. The NYCE limits its block order execution procedures to transactions involving 50 or more FINEX futures or futures spreads, options spreads or futures/options combinations in the same contract. The NYFE limits its block order execution procedures to transactions involving 15 or more NYSE Large Composites, 30 or more NYSE Composite Index or 50 or more CRB futures or options, futures spreads, options spreads or futures/options combinations in the same contract.

[52] CME Rule 549.

[53] The CME recently lowered the minimum threshold quantity for RFS quotations for currency futures traded through GLOBEX to 50 contracts.

[54] In 1996, block trading on the New York Stock Exchange comprised 55.9% of the exchange's reported volume, or 2,348,457 transactions accounting for 58.5 billion shares. *New York Stock Exchange Fact Book 1996*, at 16 (May 1997).

[55] NYSE Rule 127; CBOE Rule 6.9.

[56] NYSE Rule 127(a).

[57] When positioning a block, the block trader quotes a tentative price for the stock to the block customer, and the customer may tentatively accept this price. Barring an extreme and unexpected movement in the price of the stock, the customer may be reasonably assured of execution at the quoted price.

When a block trader "shops a block," the trader contacts one or more potential customers to take the opposite side of the block at a specified price. The block trader might be willing to negotiate this price depending on how interested other investors are in participating in the block. The block trader continues to "shop the block" until he or she has a sufficient quantity of orders for the opposite side at a single price. At this point, the block trader returns to the block customer and confirms the customer's interest in the block transaction at the negotiated price, also known as the "clean-up" price.

[58] NYSE Rule 76.

[59] NYSE Rule 127(b).

[60] NYSE Rule 127(c). If the member representing the block orders decides that the amount of stock that would be lost is not excessive, then he or she announces the clean-up price to the crowd and fills at such price all agency limit orders at the post for the clean-up price or better. The member then crosses the remaining block orders at the clean-up price.

If the member decides that the amount of stock that would be lost is excessive, then he or she either may return to the block customers to negotiate a new clean-up price or may limit participation in the block by members at the post. The member limits participation merely by informing the crowd that they cannot participate freely in the block. After such an announcement, the member follows the crossing procedures set forth in NYSE Rule 76 and makes a bid and offer for the full amount of the block. A "reasonable" time must elapse before the cross is completed in order to provide the crowd, including the Specialist, the opportunity to execute superior priced bids or offers to provide price improvement. Thereafter, the member crosses the orders for the remaining shares at the clean-up price. The member is not required to fill at the clean-up price orders limited to the clean-up price or better. The block is entitled to priority at the proposed clean-up price.

[61] NYSE Rule 127(d)(1).

[62] NYSE Rule 97.

[63] CBOE Rule 6.9. CBOE Rule 6.9 specifically allows solicited transactions by "a member or member organization representing an order respecting an option traded on the Exchange * * * including a spread, combination, or straddle order as defined in Rule 6.53 and a stock-option order as defined in Rule 1.1(ii)."

[64] CBOE Rule 6.9(d). However, the member is not required to announce to the trading crowd that another person has been solicited to participate in the order. The initiating member simply must disclose all the terms and conditions of the original order and any modifications to the trading crowd.

[65] CBOE Rule 6.9(a).

Under CBOE Rule 6.45, the highest bid or lowest offer has priority. Where two or more bids (offers) for the same option contract represent the highest (lowest) price, the bid (offer) that is displayed in the customer limit order book shall have priority over any other bid at the post. If two or more bids (offers) represent the highest (lowest) price and the customer limit order book is not involved, then priority is determined according to the sequence in which the bids (offers) were made.

The procedures set forth in CBOE Rule 6.74 govern the crossing of original orders with solicited orders, except when the solicited party has priority as is the case under CBOE Rule 6.9(a).

[66] CBOE Rule 6.9(b).

VOL 63 ISS 16 JA 26 1998 UMI

the modified original order at the best bid or offered price subject to the customer limit order book priorities.[67] Finally, where the terms and conditions of the original order have not been disclosed in advance of the solicitation, the trading crowd has priority to trade with the original order at the best bid or offered price subject to the customer limit order book priorities before the original order may be crossed with the solicited order.[68]

CBOE members and their associated persons who have knowledge of all the material terms and conditions of an imminent, undisclosed solicited transaction are prohibited from certain trading in an option of the same class that is the subject of the solicited transaction, the underlying security or any related instrument. That prohibition is in effect until the original order and any modifications are disclosed to the trading crowd or until the solicited transaction can no longer reasonably be considered imminent in view of the passage of time since the solicitation.[69]

Block trading also is carried out on regional securities exchanges and in over-the-counter securities markets. The procedures governing block trades in these markets are generally less complex than those applicable at the NYSE. Block trades for stocks listed on regional exchanges are negotiated off-floor and in most cases must be crossed on the floor of the exchange. Moreover, traders generally do not have to accommodate limit orders. Over-the-counter block trades are arranged by a block trader who then crosses the resulting orders.

Another venue for securities block trading involves "principal-to-principal" systems. Generally, block customers directly enter trade quantities and bid/ask prices into a computerized system, which matches the orders according to the availability of bids and offers at matching prices. In addition, block customers may execute block trades themselves, off-exchange, without the assistance of a broker or block trader.

(b) Potential Procedures. Certain participants in the futures markets have suggested that the competitive execution requirements under the Commission's regulations be relaxed to permit block trading procedures similar to those in the securities exchange and over-the-counter markets. As noted previously, the proviso to Commission Regulation 1.38(a) permits noncompetitive transactions if executed pursuant to contract market rules that have been approved by the Commission.

One of the purposes of this release is to investigate whether there are alternative, noncompetitive execution procedures that would further the policies and purposes of the Act. If so, the Commission seeks to determine the extent to which these procedures could be structured to serve the purposes of market participants while not sacrificing customer protection. The procedures might be limited according to order size, class of participant, contract, or some other category. In addition, the Commission seeks to determine the extent to which the procedures would be, and should be, similar to securities market procedures.

The following examples, while not exhaustive, illustrate the range of possibilities. The least significant modification of current open and competitive procedures would expressly permit market participants to alert potential counterparties of their interest in trading in a particular market at a particular time. Actual execution would occur pursuant to existing competitive procedures.

A more significant departure from current procedures would permit market participants to divulge not only a general interest in trading but also specific information about quantity and price to potential counterparties. Again, actual execution would occur competitively. This might be analogous to the practice of "shopping the block" in securities markets.

A further variation would permit negotiation between market participants. This would permit some degree of prearrangement although the execution price would to some extent remain subject to prices in the competitive market.

Yet another variation would adjust execution procedures to confer a degree of priority on particular orders that they might not attain in the open and competitive process. Such priority could be conferred, for example, on certain retail orders or on certain marketmaker orders.

Finally, market participants could be permitted to execute certain transactions bilaterally, away from the centralized marketplace, and simply report them to the exchange and clearing house. This would be similar to the way EFPs are handled currently.

Each of these alternatives potentially raises concerns, including, among others:

the impact on price discovery;
the impact on liquidity;
the potential for manipulation; and
the potential for mispricing, frontrunning, or other customer fraud.

Any proposed procedure would have to address such concerns. The need for safeguards is discussed further below.

(c) Request for Comments. The Commission is soliciting comments on the following questions:

(31) Should alternative, noncompetitive execution procedures be permitted on or subject to the rules of a contract market?

(32) If so, how should these procedures be structured to address regulatory concerns?

(33) Should these procedures be limited by order size, participant class, contract, or some other criteria?

(34) Can adequate safeguards be devised in connection with these procedures to prevent manipulation?

(35) Can adequate safeguards be devised in connection with these procedures to prevent fraud?

B. Qualifying Standards

1. The Need for Standards

The preceding discussion identifies particular types of transactions that might be appropriate for noncompetitive execution, such as EFS transactions or block trades. The common thread connecting these types of transactions with one another and with EFPs is their potential ability to fulfill some particularized need of market participants that the traditional open and competitive execution methods cannot fulfill as well. Congress has implicitly found with respect to EFPs that, at least under some circumstances, they provide certain benefits although their pricing and execution occurs outside of the centralized, open and competitive marketplace. To permit other types of noncompetitive transactions, the Commission would have to make a similar finding. For example, a contract market seeking approval of new procedures could address the effect of the proposal on the contract market's usefulness as a vehicle for price discovery and risk transfer. If the proposal had the potential to affect those functions adversely, the contract market could try to demonstrate countervailing benefits. The contract market also could address, pursuant to Section 15 of the Act,[70] whether its proposal was the least anticompetitive means of achieving its objective. Moreover, a contract market might show that these transactions are structured in such a way as to complement the competitive market, not to supplant it.

[67] CBOE Rule 6.9(c).

[68] CBOE Rule 6.9(d).

[69] CBOE Rule 6.9(s). This trading restriction applies to the solicited party as well as to any other member or associated person who has knowledge of all the material terms and conditions of both the original and solicited orders, including the price.

[70] 7 U.S.C. 19.

2. Request for Comments

The Commission seeks input on the general qualifying standards that should govern a proposal's eligibility for approval and how compliance with such standards would be demonstrated. The Commission is soliciting comments on the following questions:

(36) What are the appropriate qualifying standards for noncompetitive transactions concerning:

(a) the effect on the usefulness of a designated futures contract as a hedging mechanism?

(b) the effect on the price discovery function of a designated futures contract?

(c) the effect on the level of financial integrity in a designated contract market?

(d) the effect on the level of customer protection in a designated contract market?

(37) Should access to noncompetitive transactions be limited to commercials or sophisticated investors?

(38) Should noncompetitive transactions be subject to contract market rules?

(39) Are there other appropriate qualifying standards?

C. Continuing Regulatory Requirements

1. The Need for Requirements

As discussed above, in addition to determining whether an EFP is bona fide, there is a need for appropriate regulatory oversight in areas such as reporting and recordkeeping, disclosure, and internal controls. Similar considerations apply to other types of noncompetitive transactions.

2. Request for Comments

The Commission seeks input on any additional requirements that should apply to a potential noncompetitive transaction, once it is determined that the transaction meets basic eligibility standards. To that end, the Commission has identified the following areas where it appears that additional qualifying requirements would be required in order to maintain systemic integrity and to provide guidance to self-regulatory entities. The Commission seeks input both as to whether the prospective requirement is necessary and, if so, how the requirement could be structured to provide a meaningful test. The Commission is soliciting comments on the following questions:

(40) What are the appropriate standards to ensure that noncompetitive transactions are bona fide and meet basic qualifying requirements on an ongoing basis?

(41) What are the appropriate reporting and recordkeeping requirements applicable to these transactions?

(42) What are the appropriate disclosure requirements applicable to these transactions?

(43) What are the appropriate internal controls applicable to these transactions?

(44) What are the appropriate safeguards to maintain an adequate level of transparency?

(45) What are the appropriate safeguards to prevent manipulation?

(46) What are the appropriate safeguards to prevent fraud?

IV. Execution Facilities for Noncompetitive Transactions Executed on or Subject to the Rules of a Contract Market

A. Current, Proposed and Potential Facilities

As noted in the Introduction, several organizations have developed execution facilities for transactions that are executed off-exchange and reported to contract markets as EFPs. As with the procedures discussed in the previous section, these facilities expand the opportunity for market participants to engage in the negotiation of transactions off the floor of the exchange. It appears, however, that there are significant structural differences between these facilities and traditional methods for the execution of EFPs. The latter generally appear to take a bilateral, over-the-counter approach to the negotiation of trades.

Unlike traditional approaches, these execution facilities provide a formal market environment for the negotiation and arrangement of transactions, are typically operated by third parties, and may be beyond the operational and regulatory purview of contract markets to some extent. In this respect, however, the Commission also recognizes that these facilities perhaps should be characterized as noncompetitive only in the sense that the transactions executed thereon are completed outside of designated contract markets. Thus, unlike the execution procedures on a contract market, the execution procedures on one of these facilities have not been formally reviewed and approved by the Commission for compliance with the open and competitive requirements of the Act and other statutory requirements. The Commission acknowledges that an execution facility's centralized structure may provide a market environment that facilitates the competitive execution of transactions and also may provide competitive benefits for the underlying contract markets.

This section includes a discussion of existing facilities, proposed facilities, and potential facilities and presumes that the futures leg of the transaction is reported to and cleared by an existing contract market clearing organization. Generally, the request for comments relative to this section seeks input as to whether the regulatory environment applicable to such transactions continues to be appropriate in light of the growth and evolution of activity on such facilities or whether some form of additional oversight is needed. As more fully set out below, the Commission's request for comments also seeks input on the appropriate form of any prospective regulatory actions applicable to these facilities.

1. Interdealer Brokers

There are six major interdealer brokers in the cash U.S. Treasury securities market.[71] All or most offer basis trading facilities. As noted above, a basis trade involves the simultaneous acquisition of positions in actual Treasury securities and in offsetting futures contracts. Transactions through these facilities must meet minimum trade sizes as well as other qualifying requirements.

It appears that at least a minimal level of transparency is maintained for basis trading on these facilities, although it is not clear whether that level is completely adequate. Information on these basis trades is obtained through reports published over screen-based news reporting services, such as Govpx or Bloomberg. The screens are anonymous, except that firms may be identified for basis trade quotations.

It also appears that these firms restrict their activities to dealing only with primary dealers and other large institutional entities. The interdealer brokers do not reveal counterparty names, and anonymity is thereby maintained. Trades generally are cleared through the Government Securities Clearing Corporation ("GSCC"), and anonymity is maintained even after a trade is consummated. GSCC nets the cash market legs of the basis trades.

2. The Chicago Board Brokerage

The CBT is developing a computerized system for, among other things, basis trading of U.S. Treasury securities. The system will be operated by the Chicago Board Brokerage ("CBB"), a subsidiary of the CBT, which is registered with the Securities and Exchange Commission ("SEC") as a broker/dealer.

Pricing of basis trades on the CBB system will be carried out according to a standardized formula. The futures leg will be assigned a price equal to the last sale price for the futures contract. The cash Treasury leg will be assigned a price according to the basis spread relative to the price of the futures leg. The price of the cash Treasury leg also will be adjusted to account for

[71] The six are Cantor Fitzgerald, Liberty, RMJ, Tullet & Tokyo, Garban, and Hilliard & Farber.

VOL

differences between the coupon rate of the actual Treasury security and the standardized 8 percent coupon rate of the futures contract. The cash leg will be cleared through the Clearing Corporation for Options and Securities ("CCOS"), a subsidiary of the Board of Trade Clearing Corporation ("BOTCC") which is registered as a clearing agency with the SEC. The futures leg will be cleared through the CBT and BOTCC pursuant to rules governing EFP transactions.

3. Potential Facilities for Transactions Other Than EFPs

The interdealer brokers and the CBB are facilities for the execution of EFPs. If the Commission were to permit other types of noncompetitive trading, such as block trading, facilities might be established for the execution of those types of transactions. For example, a computerized, bulletin board system might be established in connection with the execution of blocks. The Commission, of course, before approving relevant contract market rules, would have the opportunity to review procedures relating to these trades. Nonetheless, as discussed below, the Commission is requesting comments as to the appropriate form of regulatory oversight for these facilities.

B. Qualifying Standards

1. Current Requirements

Basis trades executed through these facilities currently are subject to the same regulatory requirements as any other EFP transaction. The Commission's oversight of these facilities does not differ in any way from its oversight of the EFP markets generally. The Commission is concerned that the nature of the transactions executed on these facilities and the environment in which they are executed may differ enough from the nature of traditional EFPs as to warrant differing regulatory treatment. Indeed, it could be argued that some of these facilities have evolved to the extent that they are functionally the equivalent of designated contract markets.

2. Request for Comments

The Commission seeks input on the regulatory structure appropriate for these execution facilities. At a threshold level, this area of inquiry seeks comments on whether the existing regulatory structure appears adequate as currently organized and administered. To the extent that a commenter believes the current approach is adequate, a supporting rationale should be set forth. To the extent that a commenter believes the current approach is deficient, the Commission seeks comments identifying the nature of the deficiency and whether new guidelines or standards are required. Where a commenter believes that new regulatory initiatives are required, the Commission seeks comments on the form and nature of any such initiatives. Any such comments should include a supporting rationale.

Specifically, the Commission is soliciting comments on the following questions:

(47) What characteristics distinguish execution facilities for EFPs from contract markets?

(48) Is the current regulatory approach concerning these facilities adequate?

(49) If not, what modifications are appropriate?

(50) If execution facilities were established for noncompetitive transactions other than EFPs, how, if at all, should the regulatory approach that would apply to those facilities vary from that currently applicable to contract markets?

(51) Should execution facilities for EFPs and other noncompetitive transactions that are operated by non-contract markets be subject to oversight by the relevant contract market?

(52) Should these facilities limit access to commercials or sophisticated investors?

(53) Should these facilities be subject to procedures to prevent manipulation?

(54) Should these facilities be subject to procedures to prevent fraud?

(55) Should these facilities be subject to procedures to ensure that transactions executed thereon are bona fide?

(56) Should these facilities be subject to procedures to provide for market transparency?

(57) Should these facilities be subject to procedures related to reporting and recordkeeping?

V. Summary of Request for Comments

After reviewing the comments, the Commission will determine whether rulemaking or other action is appropriate. Commenters are invited to discuss the broad range of concepts and approaches described in this release. The Commission specifically invites commenters to compare the advantages and disadvantages of the possible changes discussed above with those of the existing regulatory framework. In addition to responding to the specific questions presented, the Commission encourages commenters to submit any other relevant information. In sum, the Commission is soliciting comments on the following questions:

Overview

(1) Should the standards articulated in the EFP Report be codified in the Commission's regulations and/or refined in any way?

(2) Should other types of noncompetitive transactions, such as EFS transactions or block trades, be permitted to be executed on or subject to the rules of a contract market and, if so, what standards should apply to these transactions?

(3) What standards should be applicable to execution facilities for noncompetitive transactions executed on or subject to the rules of a contract market?

Elements of a Bona Fide EFP: Relationship of the Instruments

(4) How should the "strong price correlation" standard articulated in the EFP Report be implemented?

(5) Should the Commission require contract markets to adopt a minimum statistical correlation coefficient to be used in assessing the acceptability of a particular cash commodity for use as the cash leg of an EFP?

(6) If a minimum correlation coefficient is required, should this coefficient apply to all EFPs, or should it be adjusted to account for the different commodities involved in EFPs?

(7) What is the appropriate type and scope of guidance contract markets should be required to provide to the general public concerning the acceptability of particular commodities as the cash leg of an EFP?

Elements of a Bona Fide EFP: Relationship of the Parties

(8) What is the appropriate scope of the separate parties requirement?

(9) Should the Commission address string trades as that practice is described in the EFP Report and, if so, how?

Elements of a Bona Fide EFP: Nature of the Transaction

(10) What criteria are appropriate for judging whether the futures leg of an EFP is bona fide?

(11) What criteria are appropriate for judging whether the cash leg of an EFP is bona fide?

(12) What criteria are appropriate for determining whether a transitory EFP is bona fide?

(13) What criteria are appropriate for determining whether an EFP is contingent?

Elements of a Bona Fide EFP: Price of the Transaction

(14) Should the Commission require both the futures and cash legs of an EFP to be priced within the daily range of their current respective markets, should it require only one leg of an EFP to be priced within its daily range, or should it impose no restrictions on the price of either leg of an EFP?

(15) Should the Commission require contract markets to obtain documentation regarding the business purpose underlying the pricing of an EFP?

Other Regulatory Requirements Governing EFPs: Reporting and Recordkeeping

(16) Are the current reporting and recordkeeping requirements relating to EFPs adequate?

Other Regulatory Requirements Governing EFPs: Disclosure

(17) What should be the form and content of disclosure concerning EFPs?

(18) Should the form and content of disclosure vary according to the commercial sophistication of the EFP participant similar to the Commission's proposed amendment to Regulation 1.55?

(19) Should the Commission explicitly require that customers must be informed that an EFP is executed noncompetitively, that it involves a cash transaction, and that their FCM might take the opposite side of the EFP?

(20) Should the Commission explicitly require Commission registrants to obtain customer consent before executing an EFP on the customer's behalf?

Other Regulatory Requirements Governing EFPs: Internal Controls

(21) What internal controls are appropriate for Commission registrants to ensure compliance with regulatory requirements concerning the essential elements of bona fide EFPs, reporting and recordkeeping, and disclosure?

Other Regulatory Requirements Governing EFPs: Transparency

(22) Do existing price reporting standards provide adequate transparency concerning EFPs to the marketplace and, if not, are there alternative methods of achieving improved price transparency?

(23) Should the Commission require contract markets to publicize information about bids and offers, as well as consummated EFP transactions?

Types of Eligible Transactions: Exchanges of Futures for Swaps

(24) What are the economic reasons firms might have for engaging in EFS transactions and what benefits might accrue thereunder, including the potential benefits to domestic futures markets, to over-the-counter markets, and to financial markets generally?

(25) What are the potential costs or risks of permitting EFS transactions, particularly with respect to the effect on price discovery, risk transfer, and the competitive character of "on-exchange" transactions?

(26) Should the Commission approve the NYMEX rule proposal permitting EFS transactions?

(27) Should EFS transactions be limited to particular markets, participants or types of transactions?

(28) Should special provisions be established to ameliorate any competitive costs or otherwise safeguard the competitive conditions of the on-exchange market?

Types of Eligible Transactions: Exchanges of Options for Physicals

(29) Are EOPs viable and do these transactions offer genuine risk management benefits?

(30) If so, should EOPs be permitted, and should there be limitations on EOPs that reflect the particular risk characteristics of options?

Types of Eligible Transactions: Alternative Execution Procedures

(31) Should alternative, noncompetitive execution procedures be permitted on or subject to the rules of a contract market?

(32) If so, how should these procedures be structured to address regulatory concerns?

(33) Should these procedures be limited by order size, participant class, contract, or some other criteria?

(34) Can adequate safeguards be devised in connection with these procedures to prevent manipulation?

(35) Can adequate safeguards be devised in connection with these procedures to prevent fraud?

Qualifying Standards

(36) What are the appropriate qualifying standards for noncompetitive transactions concerning:

(a) the effect on the usefulness of a designated futures contract as a hedging mechanism?

(b) the effect on the price discovery function of a designated futures contract?

(c) the effect on the level of financial integrity in a designated contract market?

(d) the effect on the level of customer protection in a designated contract market?

(37) Should access to noncompetitive transactions be limited to commercials or sophisticated investors?

(38) Should noncompetitive transactions be subject to contract market rules?

(39) Are there other appropriate qualifying standards?

Continuing Regulatory Requirements

(40) What are the appropriate standards to ensure that noncompetitive transactions are bona fide and meet basic qualifying requirements on an ongoing basis?

(41) What are the appropriate reporting and recordkeeping requirements applicable to these transactions?

(42) What are the appropriate disclosure requirements applicable to these transactions?

(43) What are the appropriate internal controls applicable to these transactions?

(44) What are the appropriate safeguards to maintain an adequate level of transparency?

(45) What are the appropriate safeguards to prevent manipulation?

(46) What are the appropriate safeguards to prevent fraud?

Execution Facilities for Noncompetitive Transactions Executed on or Subject to the Rules of a Contract Market: Qualifying Standards

(47) What characteristics distinguish execution facilities for EFPs from contract markets?

(48) Is the current regulatory approach concerning these facilities adequate?

(49) If not, what modifications are appropriate?

(50) If execution facilities were established for noncompetitive transactions other than EFPs, how, if at all, should the regulatory approach that would apply to those facilities vary from that currently applicable to contract markets?

(51) Should execution facilities for EFPs and other noncompetitive transactions that are operated by non-contract markets be subject to oversight by the relevant contract market?

(52) Should these facilities limit access to commercials or sophisticated investors?

(53) Should these facilities be subject to procedures to prevent manipulation?

(54) Should these facilities be subject to procedures to prevent fraud?

(55) Should these facilities be subject to procedures to ensure that transactions executed thereon are bona fide?

(56) Should these facilities be subject to procedures to provide for market transparency?

(57) Should these facilities be subject to procedures related to reporting and recordkeeping?

Issued in Washington, DC, on January 16, 1998.

Jean A. Webb,

Secretary.

[FR Doc. 98–1672 Filed 1–23–98; 8:45 am]

BILLING CODE 6351–01–P

DEPARTMENT OF DEFENSE

Office of the Secretary

Submission for OMB Review; Comment Request

ACTION: Notice.

The Department of Defense has submitted to OMB for clearance, the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

Title, Associated Form, and OMB Number: Customer Comments; AF Form 3211; OMB Number 0701–(to be determined).

Type of Request: New Collection.

Number of Respondents: 200.

Responses Per Respondent: 1.

Annual Responses: 200.

Average Burden per Response: 5 minutes.

Annual Burden Hours: 17.

Needs and Uses: Each guest of Air Force lodging and its contract lodging operations are provided access to AF Form 3211. AF Form 3211 gives each guest the opportunity to comment on facilities and service received. Completion of the form is optional. The information collection requirement is necessary for Wing leadership to access the effectiveness of their lodging program. AF Form 3211 is useful as background documentation and supporting material for various management decisions. The information is reviewed by higher headquarters during lodging assistance and Innkeeper Award competitions.

VOL 63 ISS 16 JA 26 1998 UMI

Affected Public: Individuals or Households; Business or Other For-Profit.

Frequency: On occasion.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Mr. Edward C. Springer.

Written comments and recommendations on the proposed information collection should be sent to Mr. Springer at the Office of Management and Budget, Desk Officer for DoD, Room 10236, New Executive Office Building, Washington, DC 20503.

DOD Clearance Officer: Mr. Robert Cushing.

Written requests for copies of the information collection proposal should be sent to Mr. Cushing, WHS/DIOR, 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202–4302.

Dated: January 21, 1998.

Patricia L. Toppings,

Alternate OSD Federal Register Liaison Officer, Department of Defense.

[FR Doc. 98–1738 Filed 1–23–98; 8:45 am]

BILLING CODE 5000–04–M

DEPARTMENT OF DEFENSE

GENERAL SERVICES ADMINISTRATION

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

[OMB Control No. 9000–0090]

Submission for OMB Review; Comment Request Entitled Rights in Data and Copyrights

AGENCIES: Department of Defense (DOD), General Services Administration (GSA), and National Aeronautics and Space Administration (NASA).

ACTION: Notice of request for an extension to an existing OMB clearance (9000–0090).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U S.C. Chapter 35), the Federal Acquisition Regulation (FAR) Secretariat has submitted to the Office of Management and Budget (OMB) a request to review and approve an extension of a currently approved information collection requirement concerning Rights in Data and Copyrights. A request for public comments was published at 62 FR 62001, November 20, 1997. No comments were received.

DATES: Comments may be submitted on or before February 25, 1998.

FOR FURTHER INFORMATION CONTACT: Jack O'Neill, Federal Acquisition Policy Division, GSA (202) 501–3856.

ADDRESSES: Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should be submitted to: FAR Desk Officer, OMB, Room 10102, NEOB, Washington, DC 20503, and a copy to the General Services Administration, FAR Secretariat, 1800 F Street, NW, Room 4037, Washington, DC 20405. Please cite OMB Control No. 9000–0090, Rights in Data and Copyrights, in all correspondence.

SUPPLEMENTARY INFORMATION:

A. Purpose

Rights in Data is a regulation which concerns the rights of the Government, and organizations with which the Government contracts, to information developed under such contracts. The delineation of such rights is necessary in order to protect the contractor's rights to not disclose proprietary data and to insure that data developed with public funds is available to the public.

The information collection burdens and recordkeeping requirements included in this regulation fall into the following four categories.

(a) A provision which is to be included in solicitations where the proposer would identify any proprietary data he would use during contract performance in order that the contracting officer might ascertain if such proprietary data should be delivered.

(b) Contract provisions which, in unusual circumstances, would be included in a contract and require a contractor to deliver proprietary data to the Government for use in evaluation of work results, or is software to be used in a Government computer. These situations would arise only when the very nature of the contractor's work is comprised of limited rights data or restricted computer software and if the Government would need to see that data in order to determine the extent of the work.

(c) A technical data certification for major systems, which requires the contractor to certify that the data delivered under the contract is complete, accurate and compliant with the requirements of the contract. As this provision is for major systems only, and few civilian agencies have such major systems, only about 30 contracts will involve this certification.

(d) The Additional Data Requirements clause, which is to be included in all contracts for experimental, developmental, research, or demonstration work (other than basic or applied research to be performed solely by a university or college where the contract amount will be $500,000 or less). The clause requires that the contractor keep all data first produced in the performance of the contract for a period of three years from the final acceptance of all items delivered under the contract. Much of this data will be in the form of the deliverables provided to the Government under the contract (final report, drawings, specifications, etc.). Some data, however, will be in the form of computations, preliminary data, records of experiments, etc., and these will be the data that will be required to be kept over and above the deliverables. The purpose of such recordkeeping requirements is to insure that the Government can fully evaluate the research in order to ascertain future activities and to insure that the research was completed and fully reported, as well as to give the public an opportunity to assess the research results and secure any additional information. All data covered by this clause is unlimited rights data paid for by the Government.

Paragraph (d) of the Rights in Data-General clause outlines a procedure whereby a contracting officer can challenge restrictive markings on data delivered. Under civilian agency contracts, limited rights data or restricted computer software is rarely, if ever, delivered to the Government. Therefore, there will rarely be any challenges. Thus, there is no burden on the public.

B. Annual Reporting Burden

The annual reporting burden is estimated as follows: Respondents, *1,100;* responses per respondent, *1;* total annual responses, *1,100;* preparation hours per response, *2.7;* and total response burden hours, *29,970.*

C. Annual Recordkeeping Burden

The annual recordkeeping burden is estimated as follows: Recordkeepers, *9,000;* hours per recordkeeper, *3;* and total recordkeeping burden hours, *27,000.*

Obtaining Copies of Proposals: Requester may obtain a copy of the justification from the General Services Administration, FAR Secretariat (VRS), Room 4037, 1800 F Street, Washington, DC 20405, telephone (202) 501–4755. Please cite OMB Control No. 9000–0090, Rights in Data and Copyrights, in all correspondence.

Dated: January 21, 1998.

Sharon A. Kiser,

FAR Secretariat.

BILLING CODE 6820–34–P

DEPARTMENT OF DEFENSE

Department of the Army

Records of Decision on the Final Environmental Impact Statement (FEIS) on the Disposal and Reuse of the Savanna Army Depot Activity, Savanna, Illinois

AGENCY: Department of the Army, DOD.

ACTION: Notice of availability.

SUMMARY: The Department of the Army announced its Record of Decision (ROD) on the FEIS for the disposal and reuse of the 13,062 acres comprising the Savanna Army Depot Activity, Savanna, Illinois, in accordance with the Defense Base Closure and Realignment Act of 1990, Public Law 101–510, as amended.

Under the Act, the Secretary of the Army has been delegated the authority to dispose of excess real property and facilities located at a military installation being closed or realigned. The National Environmental Policy Act requires the Army to prepare its analysis of the environmental impacts of disposal. The EIS also analyzes the secondary environmental impacts of disposal—the reuse of the property. The ROD and the FEIS satisfy the requirements of NEPA.

The Army has selected the encumbered disposal alternative. Encumbered disposal requires the transfer of the property to others with use restrictions imposed by the Army. The ROD concludes that surplus property will be conveyed subject to restrictions, identified in the FEIS, that pertain to the following: unexploded ordnance, wetlands, historical resources, threatened and endangered species, utilities easements, easements and rights-of-way, access easements, reversionary interests, overflow easements, remedial activities, and lead-based paint. The Army will impose deed restrictions or other requirements to ensure safety and protection of human health and the environment.

The Army has taken all practicable measures to avoid or minimize adverse environmental impacts associated with its preferred alternative of encumbered property disposal. The Army will continue to work with individual future owners to avoid, reduce, or compensate for adverse impacts that might occur as a result of disposal. Mitigation measures for reuse activities are identified in the FEIS.

ADDRESSES: A copy of the ROD may be obtained by writing to Ms. Shirley Barnett, at the U.S. Army Materiel Command, ATTN: AMCSO, 5001 Eisenhower Avenue, Alexandria, VA 22333–0001 or by calling (703) 617–8172. Copies of the Final EIS may be obtained by writing to Mr. Glen Coffee at the Corps of Engineers, Mobile District, ATTN: CESAM–PD–E, 109 St. Joseph Street, Mobile, AL 36628–0001, or by facsimile at (334) 690–2721.

Dated: January 20, 1998.

Raymond J. Fatz,

Deputy Assistant Secretary of the Army (Environment, Safety and Occupational Health), OASA, (I,L&E).

BILLING CODE 3710–08–M

DEPARTMENT OF DEFENSE

Department of the Army; Corps of Engineers

New York and New Jersey Harbor Navigation Feasibility Study

AGENCY: Corps of Engineers, Army, DOD.

ACTION: Notice and request for comments.

SUMMARY: The U.S. Army Corps of Engineers, New York District, seeks comments from interested individuals, groups, and businesses about the need for, and alternatives to, Federal participation in the deepening of navigation channels within the Port of New York and New Jersey. It will consider all comments in its formulation and selection of alternatives.

DATES: Comments must reach the New York District on or before 30 March 1998.

ADDRESSES: You may mail comments to the Study Manager, Flood Control & Navigation Section, Planning Division, New York District, U.S. Army Corps of Engineers, 26 Federal Plaza, New York, NY 10278–0090, or deliver them to Room 2151 at the same address between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal Holidays, or e-mail to thomas.shea@usace.army.mil. The telephone number is (212) 264–1060.

FOR FURTHER INFORMATION CONTACT: Thomas J. Shea III, Study Manager, Flood Control & Navigation Section, Planning Division, New York District, U.S. Army Corps of Engineers, (212) 264–1060. E-mail: thomas.shea@usace.army.mil.

SUPPLEMENTARY INFORMATION: This announces the initiation of a cost shared feasibility level study for determining whether Federal participation in navigation improvements in the Port of New York and New Jersey is justified. The study is being conducted in partnership among the State of New York acting through the New York State Urban Development Corporation d/b/a Empire State Development Corporation, the State of New Jersey Department of Commerce and Economic Development (Maritime Resources), The Port Authority of New York and New Jersey and the U.S. Army Corps of Engineers, New York District. The study is authorized by Section 435 of the Water Resources Development Act of 1996 (WRDA 96).

Planning studies of water resource problems are conducted in two phases by the U.S. Army Corps of Engineers in its Civil Works role. The first phase is the reconnaissance study, accomplished entirely at Federal expense. The second phase is the feasibility study, which is cost shared equally between the Federal Government and one or more non-Federal sponsors.

The Section 905b, WRDA 86 Analysis Fact Sheet was completed in April, 1997. The purpose of this analysis is three-fold: (1) determine whether the Federal Government should participate in further studies of the water resource problems; (2) determine the scope, duration and cost of any further studies; (3) identify one or more non-Federal sponsors willing to cost-share the studies. The analysis found that there should be sufficient economic benefits to justify deepening selected channels within the Port to 50 feet or more below mean low water and identified the non-Federal sponsors mentioned above for the feasibility study.

The feasibility phase will perform, in more detail, the engineering, economic and environmental evaluations necessary to identify the optimum channel depths to meet the existing and future needs of the Port of New York and New Jersey, with an emphasis on container and crude petroleum traffic. At its completion, a "Feasibility Report" containing a recommendation for construction, if justified and supported by a non-Federal sponsor, will be released. The report, including the necessary environmental documentation, will be submitted to the United States Congress for project authorization.

The Port of New York and New Jersey is the largest port on the East Coast, providing more than 166,000 port-related jobs, $20 billion in economic activity, and serving more than 17 million consumers in the states of New York and New Jersey. Through its intermodal links, the Port provides second day access to another 80 million consumers in the northeast and mid-western states. In 1995, the Port

VOL 63 ISS 16 JA 26 1998 UMI

received and shipped more than 44.8 million long tons of waterborne general cargo to all parts of the United States and throughout the world and received petroleum and related products from ports on the Atlantic and Gulf Coasts, the Caribbean, Africa and the Persian Gulf.

The Corps' New York District requests any pertinent information about the project area from any Federal, state, or local agencies, and the private sector. In particular, we request information on the type, amount, and location of waterborne commerce and ships calling on the Port and any projections of future commerce and size of ships. This information will be used to define the status of the Port, forecast the benefits of channel improvements, and determine potential Federal involvement in providing deeper, wider and/or realigned channels. The Corps also welcomes any assistance and suggestions concerning the conduct of this study.

John Sassi,

Chief, Planning Division.

[FR Doc. 98–1721 Filed 1–23–98; 8:45 am]

BILLING CODE 3710–06–M

DEPARTMENT OF EDUCATION

Submission for OMB Review; Comment Request

AGENCY: Department of Education.

ACTION: Submission for OMB review; comment request.

SUMMARY: The Deputy Chief Information Officer, Office of the Chief Information Officer, invites comments on the submission for OMB review as required by the Paperwork Reduction Act of 1955.

DATES: Interested persons are invited to submit comments on or before February 25, 1998.

ADDRESSES: Written comments should be addressed to the Office of Information and Regulatory Affairs, Attention: Dan Chenok, Desk Officer, Department of Education, Office of Management and Budget, 725 17th Street, NW., Room 10235, New Executive Office Building, Washington, DC 20503. Requests for copies of the proposed information collection requests should be addressed to Patrick J. Sherrill, Department of Education, 600 Independence Avenue, SW., Room 5624, Regional Office Building 3, Washington, DC 20202–4651.

FOR FURTHER INFORMATION CONTACT: Patrick J. Sherrill (202) 708–8196. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

SUPPLEMENTARY INFORMATION: Section 3506 of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35) requires that the Office of Management and Budget (OMB) provide interested Federal agencies and the public an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations. The Deputy Chief Information Officer, Office of the Chief Information Officer, publishes this notice containing proposed information collection requests prior to submission of these requests to OMB. Each proposed information collection, grouped by office, contains the following: (1) Type of review requested, *e.g.*, new, revision, extension, existing or reinstatement; (2) Title; (3) Summary of the collection; (4) Description of the need for, and proposed use of, the information; (5) Respondents and frequency of collection; and (6) Reporting and/or Recordkeeping burden. OMB invites public comment at the address specified above. Copies of the requests are available from Patrick J. Sherrill at the address specified above.

Dated: January 20, 1998.

Gloria Parker,

Deputy Chief Information Officer, Office of the Chief Information Officer.

Office of Elementary and Secondary Education

Type of Review: Reinstatement.
Title: Goals 2000 Comprehensive Local Reform Assistance.
Frequency: Annually.
Affected Public: State, local or Tribal Gov't, SEAs or LEAs.
Annual Reporting and Recordkeeping Hour Burden:
Responses: 400.
Burden Hours: 12,000.
Abstract: Section 304(e) of the Goals 2000: Educate America Act authorizes the Secretary to award direct grants to LEAs in States that were not participating in Goals 2000 as of October 20, 1995, if the applicable SEA approves the LEAs' participation in Goals 2000 as of that date. Both the Oklahoma and Montana SEAs have approved LEA participation in this direct grant program. The Goals 2000 Act is designed to help States and communities develop and implement their own education reforms focused on challenging academic standards in order to increase student academic achievement.

This information collection is being submitted under the Streamlined Clearance Process for Discretionary Grant Information Collections (OMB Control No. 1890–0001). Therefore, this 30-day public comment period notice will be the only public comment notice published for this information collection.

BILLING CODE 4000–01–M

DEPARTMENT OF ENERGY

Office of Environmental Management; Environmental Management Advisory Board Renewal

Pursuant to Section 14(a)(2)(A) of the Federal Advisory Committee Act (Public Law 92–463), and in accordance with Title 41 of the Code of Federal Regulations, section 101–6.1015(a), and following consultation with the Committee Management Secretariat, General Services Administration, notice is hereby given that the Environmental Management Advisory Board has been renewed for a two-year period beginning on January 17, 1998. The Board will provide advice to the Assistant Secretary for Environmental Management.

The purpose of the Board is to provide the Assistant Secretary for Environmental Management with advice and recommendations on Environmental Management projects and issues, such as program budget, strategic planning, risk, technology development, the National Environmental Policy Act, long-term nuclear stewardship, science initiatives, worker health and safety, and program cost effectiveness, from the perspective of affected groups and State Tribal, and local governments. Consensus recommendations to the Department of Energy from the Board on programmatic nationwide resolution of numerous difficult issues will help achieve the Department's objective of an integrated environmental restoration program.

Additionally, the renewal of the Environmental Management Advisory Board has been determined to be essential to the conduct of Department of Energy business and to be in the public interest in connection with the performance of duties imposed on the Department of Energy by law. The Board will operate in accordance with the provisions of the Federal Advisory Committee Act, the Department of Energy Organization Act (Public Law 95–91), and rules and regulations issued in implementation of those Acts.

Further information regarding this Advisory Board may be obtained from Rachel Samuel at (202) 586–3279.

Issued in Washington, D.C. on January 16, 1998.

James N. Solit,

Advisory Committee Management Officer.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER98–1168–000]

Central Louisiana Electric Company, Inc.; Notice of Filing

January 20, 1998.

Take notice that on December 22, 1997, Central Louisiana Electric Company, Inc., (CLECO), tendered for filing a service agreement under which CLECO will provide non-firm point-to-point transmission service to NESI Power Marketing, Inc., under its point-to-point transmission tariff.

CLECO states that a copy of the filing has been served on NESI Power Marketing, Inc.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before February 2, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Entergy Services, Inc.; Notice of Filing

January 20, 1998.

Take notice that on December 23, 1997, Entergy Services, Inc. (Entergy Services), on behalf of Entergy Mississippi, Inc., an operating company subsidiary of Entergy Corporation, tendered for filing an Agreement between Entergy Mississippi, Inc., and South Mississippi Electric Power Association (SMEPA). Entergy Services states that the Agreement sets out an additional delivery point between Entergy Mississippi, Inc., and SMEPA.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before February 2, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceedings. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Florida Gas Transmission Company; Notice of Report of Refunds

January 20, 1998.

Take notice that on January 14, 1998, Florida Gas Transmission Company (FGT) tendered for filing a refund report reflecting amounts refunded to its transportation customers on December 15, 1997 in compliance with a Commission Order dated September 24, 1997 under the referenced dockets.

FGT states that in accordance with the terms of the Commission's Order, FGT has refunded to each of its customers an amount, including interest, equal to the difference between: (1) the total payments actually made by each customer for services rendered to it during the period March 1, 1997 through October 31, 1997; and (2) the total payments that each customer would have made for such services if the rates paid by the customer during this period had equaled the refund rates. The refund rates are contained in 1) Appendix A, page 1 of the August 5, 1997 Settlement in the referenced dockets as approved by the Commission Order dated September 24, 1997, and 2) the tariff sheets set forth in FGT's November 12, 1997 "Compliance Filing to Place Settlement Rates Into Effect," as approved by Commission Order dated January 12, 1998.

Any person desiring to protest this filing should file a protest with the Federal Energy Regulatory Commission, 888 first Street, NE, Washington, DC 20426, in accordance with Section 385.211 of the Commission's Rules and Regulations. All such protests must be filed on or before January 27, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Copies of this filing are on file with the Commission and are available for public inspection in the Public Reference Room.

Granite State Gas Transmission, Inc.; Notice of Refund Report

January 20, 1998.

Take notice that on December 23, 1997, Granite State Gas Transmission, Inc., (Granite State) tendered for filing a report of refunds to its transportation service customers, pursuant to the Stipulation and Agreement approved by the Commission on October 20, 1997.

Granite State's report indicates that the refund period extends from April 1, 1997 when the motion rates became effective to November 1, 1997, when the Phase I settlement rates became effective. The report also indicates that on December 11, 1997, Granite State made refunds of $561,643.55 including interest calculated to that date.

Granite State notes that copies of its filing have been served on its firm and interruptible customers, and on the regulatory agencies of the states of Maine, Massachusetts and New Hampshire.

Any person desiring to protest said filing should file a protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Section 385.211 of the Commission's Rules of Practice and Procedure. [Docket No. ER98–1176–000]

Long Island Lighting Company; Notice of Filing

January 20, 1998.

Take notice that on December 22, 1997, Long Island Lighting Company (LILCO), filed an Electric Power Service Agreement between LILCO and North American Energy Conservation, Inc., entered into on December 9, 1997.

The Electric Power Service Agreement listed above was entered into under LILCO's Power Sales Umbrella Tariff. On November 3, 1997, LILCO proposed modifications to the Power Sales Umbrella Tariff in Docket No. OA98–5–000. Upon the Commission's approval of LILCO's proposed modifications, North American Energy Conservation, Inc., will take service subject to the Modified Power Sales Umbrella Tariff.

LILCO requests waiver of the Commission's sixty (60) day notice requirements and an effective date of December 9, 1997, for the Electric Power Service Agreement listed above because in accordance with the policy announced in Prior Notice and Filing Requirements Under Part II of the Federal Power Act, 64 FERC § 61,139, clarified and reh'g granted in part and denied in part, 65 FERC § 61,081 (1993), service will be provided under an umbrella tariff and the Electric Power Service Agreement is being filed either prior to or within thirty (30) days of the commencement of service. LILCO has served copies of this filing on the customer which is a party to the Electric Power Service Agreement and on the New York State Public Service Commission.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 8888 First Street, N.E., Washington, D.C. 20426 in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before February 2, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make the protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

Niagara Mohawk Power Corporation; Notice of filing

January 20, 1998.

Take notice that on December 22, 1997, Niagara Mohawk Power Corporation (NMPC), tendered for filing with the Federal Energy Regulatory Commission an executed Transmission Service Agreement between NMPC and DTE Energy Trading, Inc. This Transmission Service Agreement specifies that DTE Energy Trading, Inc., has signed on to and has agreed to the terms and conditions of NMPC's Open Access Transmission Tariff as filed in Docket No. OA96–194–000. This Tariff, filed with FERC on July 9, 1996, will allow NMPC and DTE Energy Trading, Inc., to enter into separately scheduled transactions under which NMPC will provide transmission service for DTE Energy Trading, Inc., as the parties may mutually agree.

NMPC requests an effective date of December 4, 1997. NMPC has requested waiver of the notice requirements for good cause shown.

NMPC has served copies of the filing upon the New York State Public Service Commission and DTE Energy Trading, Inc.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 385.214). All such motions or protests should be filed on or before February 2, 1988. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

West Texas Utilities Company; Notice of Filing

January 20, 1998.

Take notice that on December 19, 1997, West Texas Utilities Company (WTU), submitted for filing a Control Area Services Agreement Among West Texas Utilities Company and Rayburn Country Electric Cooperative, Inc., and LG&E Power Marketing (the Agreement) pursuant to which WTU will sell a package of control area services to Rayburn Country Electric Cooperative, Inc. (Rayburn), and LG&WE Energy Marketing Inc. (formerly known as LG&E Power Marketing Inc.) (LPM).

WTU seeks an effective date of May 22, 1998. Accordingly, WTU seeks waiver of the Commission's notice requirements to permit WTU to file the Agreement more than 120 days in advance of the requested effective date. WTU has served copies of the filing on Rayburn, LPM and the Public Utility Commission of Texas.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before February 2, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. ER98–1177–000]

Wisconsin Electric Power Company; Notice of Filing

January 20, 1998.

Take notice that on December 22, 1997, Wisconsin Electric Power Company (Wisconsin Electric), tendered for filing an electric service agreement under its Coordination Sales Tariff (FERC Electric Tariff, Original Volume No. 2). Wisconsin Electric respectfully requests an effective date January 2, 1998. Wisconsin Electric is authorized to state that Tenaska Power Services Company joins in the requested effective date.

Copies of the filing have been served on Tenaska Power Services Company, the Michigan Public Service Commission, and the Public Service Commission of Wisconsin.

Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before February 2, 1998. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

BILLING CODE 6717–01–M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Docket No. DR98–31–000, et al.]

Arizona Public Service Company, et al.; Electric Rate and Corporate Regulation Filings

January 16, 1998.

Take notice that the following filings have been made with the Commission:

1. Arizona Public Service Company

[Docket No. DR98–31–000]

Take notice that on December 30, 1997, Arizona Public Service Company, filed an application for approval of depreciation rates pursuant to Section 302 of the Federal Power Act. The proposed depreciation rates are for accounting purposes only. Arizona Public Service Company requests that the Commission allow the proposed depreciation rates to become effective January 1, 1995.

Comment date: February 13, 1998, in accordance with Standard Paragraph E at the end of this notice.

2. Tucson Electric Power Company

[Docket No. ER98–1142–000]

Take notice that on December 19, 1997, Tucson Electric Power Company (TEP), tendered for filing the following service agreements for firm point-to-point transmission service under Part II of its Open Access Transmission Tariff filed in Docket No. OA96–140–000. TEP requests waiver of notice to permit the service agreements to become effective as of the earliest date service commenced under the agreements. The details of the service agreement are as follows:

1. Service Agreement for Firm Point-to-Point Transmission Service with Enron Power Marketing, Inc., dated November 19, 1997. Service under this agreement commenced on November 19, 1997.

2. Service Agreement for Firm Point-to-Point Transmission Service with Enron Power Marketing, Inc., dated November 28, 1997. Service under this agreement commenced on November 28, 1997.

3. Service Agreement for Firm Point-to-Point Transmission Service with Enron Power Marketing, Inc., dated November 28, 1997. Service under this agreement commenced on November 30, 1997.

4. Service Agreement for Firm Point-to-Point Transmission Service with Electric Clearinghouse, Inc., dated December 1, 1997. Service under this agreement commenced on December 1, 1997.

5. Service Agreement for Firm Point-to-Point Transmission Service with Tucson Electric Power Company, Contracts & Wholesale Marketing dated December 1, 1997. Service under this agreement commenced on December 1, 1997.

6. Service Agreement for Firm Point-to-Point Transmission Service with Tucson Electric Power Company, Contracts & Wholesale Marketing dated December 10, 1997. Service under this

VOL 63 ISS 16 JA 26 1998 UMI

agreement commenced on December 10, 1997.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

3. FirstEnergy System

[Docket No. ER98–1143–000]

Take notice that on December 19, 1997, FirstEnergy System filed Service Agreements to provide Non-Firm Point-to-Point Transmission Service for Delmarva Power & Light Company and Illinois Power Company, the Transmission Customers. Services are being provided under the FirstEnergy System Open Access Transmission Tariff submitted for filing by the Federal Energy Regulatory Commission in Docket No. ER97–412–000. The proposed effective date under the Service Agreements is December 01, 1997.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

4. Public Service Company of New Mexico

[Docket No. ER98–1144–000]

Take notice that on December 19, 1997, Public Service Company of New Mexico (PNM), submitted for filing an executed service agreement, dated December 3, 1997, for firm point-to-point transmission service and ancillary service, between PNM Transmission Development and Contracts (Transmission Provider) and PNM Wholesale Power Marketing (Transmission Customer), under the terms of PNM's Open Access Transmission Service Tariff. Under this Service Agreement, Transmission Provider provides to Transmission Customer reserved capacity from the Coronado Generating Station 500kV Switchyard (point of receipt) to the Palo Verde Generating Station 500kV Switchyard (point of Delivery) for the period beginning December 1, 1997 and ending April 30, 2001.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

5. Public Service Company of New Mexico

[Docket No. ER98–1145–000]

Take notice that on December 19, 1997, Public Service Company of New Mexico (PNM), filed its Certificate of Concurrence in association with the filing by Tucson Electric Power Company (TEP), in the above-captioned docket, of the Amended Interconnection Agreement between PNM and TEP. This certificate of concurrence is being filed in lieu of the separate filing of the Amended Interconnection Agreement. The Amended Interconnection Agreement between PNM and TEP provides for the interconnected operation of the transmission systems of PNM and TEP and allows for the sharing of contingency reserves for emergencies between TEP and PNM.

The parties have requested a waiver of notice pursuant to 18 CFR 35.11 to permit the Amended Interconnection Agreement to become effective as of December 20, 1997.

Copies of this notice have been mailed to TEP and the New Mexico Public Utility Commission.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

6. Public Service Company of New Mexico

[Docket No. ER98–1146–000]

Take notice that on December 19, 1997, Public Service Company of New Mexico (PNM), submitted for filing an executed service agreement, dated December 3, 1997, for firm point-to-point transmission service and ancillary service, between PNM Transmission Development and Contracts (Transmission Provider) and PNM Wholesale Power Marketing (Transmission Customer), under the terms of PNM's Open Access Transmission Service Tariff. Under this Service Agreement, Transmission Provider provides to Transmission Customer various amounts of reserved capacity from the Palo Verde Generating Station 500kV Switchyard (point of receipt) to the Westwing 345kV Switching Station (point of Delivery) for the period beginning December 1, 1997 and ending May 30, 2002.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

7. Washington Water Power

[Docket No. ER98–1147–000]

Take notice that on December 19, 1997, The Washington Water Power Company (WWP), tendered for filing a letter terminating Service Agreement No. 69, previously filed by Washington Water Power, under the Commission's Docket No. ER97–1252–000 with Delhi Energy Services Inc., which is to be canceled by request of the power marketer due to its decision to exit the power marketing business.

Notice of the cancellation has been served upon the following: Mr. Brad Helton, Delhi Energy Services, Inc., Marketing Administrator 1700 Pacific Avenue, Dallas, Texas 75201.

WWP requests that this cancellation become effective December 1, 1997.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

8. Kamps Propane, Inc.

[Docket No. ER98–1148–000]

Take notice that on December 19, 1997, Kamps Propane, Inc. (Kamps), petitioned the Commission for acceptance of Kamps Rate Schedule FERC No. 1; the granting of certain blanket approvals, including the authority to sell electricity at market-based rates; and the waiver of certain Commission regulations.

Kamps intends to engage in wholesale electric poser and energy purchases and sales as a marketer. Kamps is not in the business of generating or transmitting electric power.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

9. Southern Indiana Gas and Electric Company

[Docket No. ER98–1151–000]

Take notice that on December 19, 1997, Southern Indiana Gas and Electric Company (SIGECO), tendered for filing the following agreements concerning the provision of electric service to the City of Tell City, Indiana:

1. Agreement for the Supply of Electric Energy Between the City of Tell City, Indiana and Southern Indiana Gas and Electric Company.

2. Service Agreement for Network Integration Transmission Service.

3. Transmission Service Specifications For Network Integration.

4. Network Operating Agreement.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

10. Kentucky Utilities Company

[Docket No. ER98–1152–000]

Take notice that on December 19, 1997, Kentucky Utilities Company (KU), tendered for filing an executed Contract for Electric Service with the Borough of Pitcairn (Pitcairn), and an executed service agreement with Pitcairn under KU's Power Services Tariff (Rate PS). KU requests effective dates of December 3, 1997.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

11. Kentucky Utilities Company

[Docket No. ER98–1153–000]

Take notice that on December 19, 1997, Kentucky Utilities Company (KU), tendered for filing service agreements between KU and SCANA Energy Marketing, Inc., and Ohio Valley Electric Corporation under its Transmission Services Tariff (TS) and with SCANA Energy Marketing, Inc., under its Power Services (PS) Tariff.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

12. Carolina Power & Light Company

[Docket No. ER98–1154–000]

Take notice that on December 19, 1997, Carolina Power & Light Company (CP&L), tendered for filing a Service Agreement for Non-Firm Point-to-Point Transmission Service executed between CP&L and the following Eligible Transmission Customer, Tenaska Power Services and a Service Agreement for Short-Term Firm Point-to-Point Transmission Service with Tenaska Power Services. Service to each Eligible Customer will be in accordance with the terms and conditions of Carolina Power & Light Company's Open Access Transmission Tariff.

Copies of the filing were served upon the North Carolina Utilities Commission and the South Carolina Public Service Commission.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

13. Public Service Company of New Mexico

[Docket No. ER98–1155–000]

Take notice that on December 19, 1997, Public Service Company of New Mexico (PNM), submitted for filing an executed service agreement, dated December 3, 1997, for firm point-to-point transmission service and ancillary service, between PNM Transmission Development and Contracts (Transmission Provider) and PNM Wholesale Power Marketing (Transmission Customer), under the terms of PNM's Open Access Transmission Service Tariff. Under this Service Agreement, Transmission Provider provides to Transmission Customer reserved capacity from the San Juan Generating Station 345kV Switchyard (point of receipt) to the Greenlee Switching Station 500kV Switchyard (point of Delivery) for the period beginning December 1, 1997 and ending December 31, 2008.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

14. Duke Energy Corporation

[Docket No. ER98–1156–000]

Take notice that on December 19, 1997, Duke Power division of Duke Energy Corporation (Duke), tendered for filing a Notice of Cancellation of the Market-Based Service Agreement between Duke and Delhi Energy Services, Inc., Service Agreement No. 56 under Rate Schedule MR of Duke Energy Corporation, FERC Electric Tariff Original Volume No. 3.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

15. The Detroit Edison Company

[Docket No. ER98–1157–000]

Take notice that on December 19, 1997, The Detroit Edison Company (Detroit Edison), tendered for filing a Notice of Cancellation of optional Deviation Band Extension Service offered under Schedule 4 of the Open Access Transmission Tariff of The Detroit Edison Company, FERC Electric Tariff Original Volume No. 2, and the Joint Open Access Transmission Tariff of Consumers Energy Corporation and The Detroit Edison Company, FERC Electric Tariff Original Volume No. 1.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

16. The Detroit Edison Company

[Docket No. ER98–1158–000]

Take notice that on December 19, 1997, The Detroit Edison Company (Detroit Edison), filed an amendment to its Wholesale Power Sales Tariff (WPS–2) Tariff, FERC Electric Tariff Original Volume No. 3 (the WPS–2 Tariff). Detroit Edison proposes to amend the WPS–2 Tariff to permit Detroit Edison to sell, assign, or transfer transmission rights held by Detroit Edison to customers taking service under the WPS–2 Tariff. Detroit Edison requests that the revisions to the WPS–2 Tariff be accepted for filing effective as of a date 60 days after the date of filing or on the date on which the Commission issues an order accepting the revisions for filing, whichever is earlier.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

17. The Detroit Edison Company

[Docket No. ER98–1159–000]

Take notice that on December 19, 1997, The Detroit Edison Company (Detroit Edison), filed amendments to its Wholesale Power Sales Tariff (WPS–1) Tariff, FERC Electric Tariff Original Volume No. 4 (the WPS–1 Tariff). Detroit Edison proposes to amend the WPS–1 Tariff to permit Detroit Edison to sell, assign, or transfer transmission rights held by Detroit Edison to customers taking service under the WPS–1 Tariff. Detroit Edison also proposes to amend the WPS–1 Tariff's Form of Service Agreement to add a Form of Certificate of Concurrence to be executed by customers in the event they intend to engage in exchange transactions under the WPS–1 Tariff. Detroit Edison requests that the revisions to the WPS–1 Tariff be accepted for filing effective as of a date 60 days after the date of filing or on the date on which the Commission issues an order accepting the revisions for filing, whichever is earlier.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

18. The Detroit Edison Company

[Docket No. ER98–1160–000]

Take notice that on December 19, 1997, The Detroit Edison Company (Detroit Edison), tendered for filing Service Agreements for wholesale power sales transactions (the Service Agreements) under Detroit Edison's Wholesale Power Sales Tariff (WPS–1), FERC Electric Tariff No. 4 (the WPS–1 Tariff), between Detroit Edison and the following Customers:

Customer	Date of serv. agreement
NIPSCO Energy Services, Inc.	June 26, 1997.
Southern Energy Trading and Marketing, Inc.	Aug. 19, 1996.

Detroit Edison requests that the Service Agreements be made effective as of February 17, 1998, a date sixty (60) days from the date of this filing.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

19. Public Service Company of New Mexico

[Docket No. ER98–1161–000]

Take notice that on December 19, 1997, Public Service Company of New Mexico (PNM), submitted for filing an executed service agreement, dated December 3, 1997, for firm point-to-point transmission service and ancillary service, between PNM Transmission Development and Contracts (Transmission Provider), and PNM Wholesale Power Marketing (Transmission Customer), under the terms of PNM's Open Access Transmission Service Tariff. Under this Service Agreement, Transmission Provider provides to Transmission

VOL 63 ISS 16 JA 26 1998 UMI

Customer reserved capacity from the San Juan Generating Station 345 kV Switchyard (point of receipt) to the Coronado Generating Station 500 kV Switchyard (point of Delivery) for the period beginning December 1, 1997 and ending April 30, 2001.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

20. Duke Energy Corporation

[Docket No. ER98–1162–000]

Take notice that on December 19, 1997, Duke Power, a division of Duke Energy Corporation (Duke), tendered for filing a Market Rate Service Agreement (the MRSA) between Duke and NP Energy, Inc., dated as of December 1, 1997. Duke requests that the MRSA be made effective as of December 1, 1997.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

21. Southwest Power Pool

[Docket No. ER98–1163–000]

Take notice that on December 19, 1997, Southwest Power Pool (SPP), as agent for its participating member public utilities,[1] (Transmission Providers), and on behalf of all of its members, tendered for filing a Regional Open Access Transmission Tariff (Tariff), to be effective on April 1, 1998.

SPP states that the Tariff will supplant, in part, the Transmission Providers' currently filed tariffs by providing one-stop shopping for regional point-to-point short-term firm and non-firm transmission service at non-pancaked rates. Each individual Transmission Provider will continue to provide long-term firm and network transmission services under its individual open access tariff. SPP further states that the Tariff provides for rates designed on a MW-mile basis, using a methodology closely patterned after the MW-mile methodology that the Commission has approved for the Mid-Continent Area Power Pool.

Comment date: January 30, 1998, in accordance with Standard Paragraph E at the end of this notice.

Standard Paragraph

E. Any person desiring to be heard or to protest said filing should file a motion to intervene or protest with the Federal Energy Regulatory Commission, 888 First Street, N.E., Washington, D.C. 20426, in accordance with Rules 211 and 214 of the Commission's Rules of Practice and Procedure (18 CFR 385.211 and 18 CFR 385.214). All such motions or protests should be filed on or before the comment date. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a motion to intervene. Copies of these filings are on file with the Commission and are available for public inspection.

David P. Boergers,

Acting Secretary.

[FR Doc. 98–1681 Filed 1–23–98; 8:45 am]

BILLING CODE 6717–01–P

[1] SPS states that it submitted the filing pursuant to agency agreements executed with each of the following entities: Central & South West Services; Central Louisiana Electric Co.; Cit Utilities of Springfield; Empire District Electric Co.; Grand River Dam Authority; Kansas City Power & Light; OG&E Electric Services; Southwestern Power Administration; UtiliCorp United and Western Resources.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

Notice of Amendment of License

January 20, 1998.

Take notice that the following hydroelectric application has been filed with the Commission and is available for public inspection:

a. Type of Application: Amendment of license allowing the licensee: To convey 13.7 acres of project lands for the construction and operation of a water pumping station on Bouldin Reservoir, a raw water pipeline, and a water treatment plant; and to permit the withdrawal of up to 14 million gallons per day from Bouldin Reservoir for municipal water supply.

b. Project No: 2146–079.

c. Date Filed: November 19, 1997.

d. Applicant: Alabama Power Company.

e. Name of Project: Coosa River Project.

f. Location: Elmore County, Alabama.

g. Filed Pursuant to: Federal Power Act, 16 U.S.C. 791(a)–825(r).

h. Applicant Contact: Mr. Jim Crew, Alabama Power Company-Hydro, Licensing, P.O. Box 2641, Birmingham, AL 35291–8180, (205) 257–4265.

i. FERC Contact: Jim Haimes, (202) 219–2780.

j. Comment Date: February 21, 1998.

k. Description of Project: The licensee proposes: (1) To grant an easement to the Five Star Water Supply District (District) for the construction of a raw water pumping station on Bouldin Reservoir and a 20-inch-diameter, 2,000-foot-long pipeline; (2) to convey fee title to a 12.7-acre parcel of project lands to the District for the construction and operation of a water treatment plant at the site; and (3) to implement an agreement allowing the District to withdraw up to 14 million gallons per day from Bouldin Reservoir for municipal water supply beginning in the year 2000.

1. This notice also consists of the following standard paragraphs: B, C1, and D2.

B. Comments, Protests, or Motions to Intervene—Anyone may submit comments, a protest, or a motion to intervene in accordance with the requirements of Rules of Practice and Procedure, 18 CFR 385.210, .211, .214. In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.

C1. Filing and Service of Responsive Documents—Any filings must bear in all capital letters the title "COMMENTS", "RECOMMENDATIONS FOR TERMS AND CONDITIONS", "PROTEST", OR "MOTION TO INTERVENE", as applicable, and the Project Number of the particular application to which the filing refers. Any of the above-named documents must be filed by providing the original and the number of copies provided by the Commission's regulations to: The Secretary, Federal Energy Regulatory Commission, 888 First Street, NE., Washington, DC 20426. A copy of any motion to intervene must also be served upon each representative of the Applicant specified in the particular application.

D2. Agency Comments—Federal, state, and local agencies are invited to file comments on the described application. A copy of the application may be obtained by agencies directly from the Applicant. If an agency does not file comments within the time specified for filing comments, it will be presumed to have no comments. One copy of an agency's comments must also be sent to the Applicant's representatives.

David P. Boergers,

Acting Secretary.

DEPARTMENT OF ENERGY

Office of Hearings and Appeals

Notice of Cases Filed; Week of November 17 through November 21, 1997

During the Week of November 17 through November 21, 1997, the appeals, applications, petitions or other requests listed in this Notice were filed with the Office of Hearings and Appeals of the Department of Energy.

Any person who will be aggrieved by the DOE action sought in any of these cases may file written comments on the application within ten days of publication of this Notice or the date of receipt of actual notice, whichever occurs first. All such comments shall be filed with the Office of Hearings and Appeals, Department of Energy, Washington, D.C. 20585–0107.

Dated: January 15, 1998.

George B. Breznay,
Director, Office of Hearings and Appeals.

LIST OF CASES RECEIVED BY THE OFFICE OF HEARINGS AND APPEALS
[Week of November 17 through November 21, 1997]

Date	Name and location of applicant	Case No.	Type of submission
11/17/97	Tod Rockefeller Carlsbad, New Mexico.	VFA–0351	Appeal of an Information Request Denial. IF GRANTED: The October 14, 1997 Freedom of Information Request Denial issued by the Albuquerque Operations Office would be rescinded, and Tod Rockefeller would receive access to certain DOE information.
11/18/97	INEEL Research Bureau, Troy, Idaho	VFA–0352	Appeal of an Information Request Denial. IF GRANTED: The October 24, 1997 Freedom of Information Request Denial issued by the Richland Operations Office would be rescinded, and INEEL Research Bureau would receive access to certain DOE information.
11/18/97	Personnel Security Hearing	VSO–0184	Request for Hearing under 10 CFR Part 710. IF GRANTED: An individual employed by a contractor of the Department of Energy would receive a hearing under 10 CFR Part 710.
11/18/97	Thomas T. Tiller, Oak Ridge, Tennessee.	VWA–0018	Request for Hearing under DOE Contractor Employee Protection Program. IF GRANTED: A hearing under 10 CFR Part 708 would be held on the complaint of an individual that reprisals were taken against him by management officials of Wackenhut Services, Inc. as a consequence of having disclosed safety/health concerns.
11/20/97	Information Focus on Energy, Gaithersburg, Maryland.	VFA–0353	Appeal of an Information Request Denial. IF GRANTED: The November 3, 1997 Freedom of Information Request Denial issued by the Office of the Inspector General would be rescinded, and Information Focus on Energy, Inc. would receive access to certain DOE information.
11/20/97	Personnel Security Hearing	VSO–0185	Request for Hearing under 10 CFR Part 710. IF GRANTED: An individual employed by a contractor of the Department of Energy would receive a hearing under 10 CFR Part 710.
11/20/97	William H. Payne, Albuquerque, New Mexico.	VFA–0354	Appeal of an Information Request Denial. IF GRANTED: The Albuquerque Operations Office would be required to issue a determination under the Freedom of Information Act and William H. Payne would receive access to certain DOE information.
11/21/97	Homesteaders ASC/Pajarito Plat, Los Alamos, New Mexico.	VFA–0355	Appeal of an Information Request Denial. IF GRANTED: The October 20, 1997 Freedom of Information Request Denial issued by Albuquerque Operations Office would be rescinded, and Homesteaders Association of the Pajarito Plateau would receive access to certain DOE information.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5953–9]

Agency Information Collection Activities up for Renewal: Facility Ground-Water Monitoring Requirements; Proposed Collection; Comment Request

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that EPA is planning to submit the following continuing Information Collection Request (ICR) to the Office of Management and Budget (OMB): Facility Ground-Water Monitoring Requirements, EPA ICR #959.09; OMB Control Number 2050–0033; expiration 5/31/98. Before submitting the ICR to OMB for review and approval, EPA is soliciting comments on specific aspects of the proposed information collection as described below.

DATES: Comments must be submitted on or before March 27, 1998.

ADDRESSES: Commenters must send an original and two copies of their comments referencing docket number F–98–GWIP–FFFFF to: RCRA Docket Information Center, Office of Solid Waste (5305G), U.S. Environmental Protection Agency Headquarters (EPA, HQ), 401 M Street, SW, Washington, DC 20460. Hand deliveries of comments should be made to the Arlington, VA, address below. Comments may also be submitted electronically through the Internet to: rcradocket@epamail.epa.gov. Comments in electronic format should also be identified by the docket number F–98–GWIP–FFFFF. All electronic comments must be submitted as an ASCII file avoiding the use of special characters and any form of encryption.

Commenters should not submit electronically any confidential business information (CBI). An original and two copies of CBI must be submitted under separate cover to: RCRA CBI Document Control Officer, Office of Solid Waste (5305W), U.S. EPA, 401 M Street, SW, Washington, DC 20460.

Public comments and supporting materials are available for viewing in the RCRA Information Center (RIC), located at Crystal Gateway I, First Floor, 1235 Jefferson Davis Highway, Arlington, VA. The RIC is open from 9 a.m. to 4 p.m., Monday through Friday, excluding federal holidays. To review docket materials, it is recommended that the public make an appointment by calling 703–603–9230. The public may copy a maximum of 100 pages from any regulatory docket at no charge. Additional copies cost $0.15/page. The index and some supporting materials are available electronically.

The ICR is available on the Internet. Follow these instructions to access the information electronically:

WWW: http://www.epa.gov/epaoswer/hazwaste/corrective action

The official record for this action will be kept in paper form. Accordingly, EPA will transfer all comments received electronically into paper form and place them in the official record, which will also include all comments submitted directly in writing.

EPA responses to comments, whether the comments are written or electronic, will be in a notice in the **Federal Register**. EPA will not immediately reply to commenters electronically other than to seek clarification of electronic comments that may be garbled in transmission or during conversion to paper form, as discussed above.

FOR FURTHER INFORMATION CONTACT: For general information, contact the RCRA Hotline at 800 424–9346 or TDD 800 553–7672 (hearing impaired). In the Washington, DC, metropolitan area, call 703 412–9810 or TDD 703 412–3323.

For more detailed information on specific aspects of this rulemaking, contact Hugh Davis, Office of Solid Waste 5303W, U.S. Environmental Protection Agency, 401 M Street, SW, Washington, DC 20460, (703) 308–8633, or davis.hugh@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Affected entities: Entities potentially affected by this action are those which own or operate surface impoundments, waste piles, land treatment units, and landfills which manage hazardous waste regulated under the Resource Conversation and Recovery Act.

Title: Facility Ground-Water Monitoring Requirements, EPA ICR #959.09; OMB Control Number 2050–0033; expiration date 5/31/98.

Abstract: Subtitle C of the Resource Conservation and Recovery Act of 1976 (RCRA) creates a comprehensive program for the safe management of hazardous waste. Section 3004 of RCRA requires owners and operators of facilities that treat, store, or dispose of hazardous waste to comply with standards established by EPA that are "necessary to protect human health and the environment." Section 3005 provides for implementation of these standards under permits issued to owners and operators by EPA or authorized States. Section 3005 also allows owners and operators of facilities in existence when the regulations came into effect to comply with applicable notice requirements to operate until a permit is issued or denied. This statutory authorization to operate prior to permit determination is commonly known as "interim status." Owners and operators of interim status facilities also must comply with standards set under Section 3004.

EPA promulgated ground-water monitoring standards for interim status facilities in 1980 (45 FR 33154 May 19, 1980), codified in 40 CFR Part 265, Subpart F, and for permitted facilities in 1982 (47 FR 32274 July 26, 1982), codified in 40 CFR Part 264, Subpart F. Both sets of standards establish programs for protecting ground water from releases of hazardous wastes from land disposal facilities with regulated units (these include surface impoundments, waste piles, land treatment units, and landfills).

The ground-water monitoring requirements for regulated units follow a tiered approach whereby releases of hazardous contaminants are first detected, then confirmed, and, if necessary, are required to be cleaned up. Each of these tiers requires collection and analysis of groundwater samples. Owners or operators that conduct groundwater monitoring are required to report information to the oversight agencies on releases of contaminants and to maintain records of ground-water monitoring data at their facilities. The goal of the ground-water monitoring program is to prevent and quickly detect releases of hazardous contaminants to groundwater, and to establish a program whereby any contamination is expeditiously cleaned up.

An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR Part 9 and 48 CFR Chapter 15.

The EPA would like to solicit comments to:

(i) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(ii) Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(iii) Enhance the quality, utility, and clarity of the information to be collected; and

(iv) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: For both permitted and interim status land disposal facilities, the estimated total annual hour burden for this information collection is 196,363 hours. The estimated total annual cost burden for this information collection is $67,303,862, which includes labor, capital, operations and maintenance, and purchased service costs. For 623 permitted land disposal facilities, the annual reporting hour burden is estimated to average 112.4 hours per response, and the annual record keeping hour burden is estimated to average 26.0 hours per response, regardless of whether the facility is performing detection monitoring, compliance monitoring or corrective action. For 1,024 interim status land disposal facilities, the annual reporting hour burden is estimated to average 74.7 hours per response, and the annual record keeping hour burden is estimated to average 32.8 hours per response. Burden means the total time, effort, or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information; and transmit or otherwise disclose the information.

Dated: January 20, 1998.

Matthew Hale,

Acting Director, Office of Solid Waste.

[FR Doc. 98–1759 Filed 1–23–98; 8:45 am]

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5953–6]

Notice of Information Collection Activities; Detailed Industry Questionnaire: Phase II Cooling Water Intake Structures

AGENCY: Environmental Protection Agency.

ACTION: Notice of information collection activities.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this document announces that the United States Environmental Protection Agency (EPA) is planning to seek approval from the Office of Management and Budget (OMB) to administer an information collection request (ICR) entitled "Detailed Industry Questionnaire: Phase II Cooling Water Intake Structures," EPA ICR 1838.01. Before the Agency submits the proposed ICR to OMB for review and approval, EPA is soliciting comments from the public, as described below, on the specific aspects of the Detailed Industry Questionnaire (Phase II) for facilities potentially subject to section 316(b) of the Clean Water Act, 33 U.S.C. 1326(b).

DATES: Comments and requests for information must be received by EPA no later than March 27, 1998.

ADDRESSES: Address comments on the draft Detailed questionnaire to Ms. Deborah G. Nagle, U.S. EPA, Engineering and Analysis Division, Mail Code (4303), Office of Science and Technology, 401 M Street S.W., Washington, DC 20460. EPA will also accept comments electronically. The E-mail address for comments is "nagle.deborah@epamail.epa.gov." Electronic comments must include the sender's name, address, and telephone number. There are five versions of the detailed questionnaire, which primarily reflect the diversity of industries from an economic viewpoint. They are: (1) Publicly Owned Utilities; (2) Major Privately Owned Electric Utilities; (3) Rural Electric Cooperatives; (4) Nonutility Power Producers; and (5) Manufacturers. A copy of each proposed detailed questionnaire can be obtained from the Internet at "http://www.epa.gov/owm/new.htm." You must use ADOBE ACROBAT READER to read the document; the document is a PDF file. If you do not have Internet access, you may obtain a copy of the detailed questionnaire by sending a FAX to Deborah Nagle at (202) 260–7185 (be sure to identify the specific questionnaire of interest). The draft questionnaire that is being made available includes all pertinent instructions, information request questions, and definitions.

SUPPLEMENTARY INFORMATION:

Affected Entities: Entities potentially affected by this action are those which are subject to section 316(b) of the Clean Water Act. These entities include, among others, facilities in the following industry sectors: Utility Steam Electric Generation; Nonutility Steam Power Producers; Paper and Allied Products; Chemical and Allied Products; Petroleum and Coal Products; and Primary Metals. EPA also intends to collect information related to the regulatory burden of implementing final section 316(b) regulation on state governmental authorities that are responsible for issuing National Pollutant Discharge Elimination System permits. Impacts on these state government entities could include either increased costs as a result of additional efforts needed to implement a final section 316(b) rule or cost savings realized from using final section 316(b) regulations instead of facility-specific best professional judgment to establish permit requirements.

Title: Detailed Industry Questionnaire: Phase II Cooling Water Intake Structures.

Abstract: The U.S. Environmental Protection Agency (EPA) is currently developing regulations under section 316(b) of the Clean Water Act, 33 U.S.C. 1326(b). Section 316(b) provides that any standard established pursuant to section 301 or 306 of the Clean Water Act (CWA) and applicable to a point source shall require that the location, design, construction, and capacity of cooling water intake structures shall reflect the best technology available (BTA) for minimizing adverse environmental impact.

Such impacts occur as a result of impingement (where fish and other aquatic life are trapped in cooling water intake screens) and entrainment (where aquatic organisms, eggs and larvae are sucked into the cooling system, through the heat exchanger, and then pumped back out). As the result of a lawsuit by a coalition of environmental groups headed by the Hudson Riverkeeper (*Cronin, et al.* v. *Reilly*, 93 Civ. 0314 (AGS)), the United States District Court, Southern District of New York entered a Consent Decree on October 10, 1995. The Consent Decree established a seven-year schedule for EPA to take final action with respect to regulations addressing impacts from cooling water intake structures.

To ensure that the regulations are based upon accurate information, EPA is conducting a variety of data-gathering activities. The detailed questionnaire represents one mechanism through which EPA is gathering background technical and cost data on cooling water intake structures. The proposed survey instrument will provide EPA with preliminary technical and economic data needed to help quantify the adverse environmental impacts from cooling water structures, evaluate the efficacy of control technologies, and determine the economic reasonableness of the final rule.

EPA has designed the detailed questionnaire to collect information on such topics as cooling water use within industry groups; cooling water intake structure location, design configurations, construction, and capacity; and other cooling water intake structure impingement and entrainment control technologies. These data will enable EPA to characterize cooling water intake structure operations across industry. The Agency is also collecting data on the types of intake water sources and environmental assessment data associated with cooling water intake structures. The Agency does not intend to rely completely on the environmental data collected through the proposed questionnaire to assess adverse environmental impacts (impingement and entrainment) or BTA efficacy. The Agency's intent is to use the environmental assessment data and BTA data from the questionnaire, in part, to identify potential facilities for on site sampling and analysis in order to collect more in depth data on adverse environmental impacts and BTA efficacy. Lastly, EPA is requesting facility and firm level economic data. These economic data will enable EPA to consider cooling water use across a broad variety of facility and firm sizes. The economic data will also enable EPA to carry out required economic analyses, including a Regulatory Impact Analysis (RIA), and requirements of the Small Business Regulatory Enforcement Fairness Act (SBREFA). EPA will consider both technical and economic factors when developing the final regulations.

The Agency has divided the potentially affected entities into five groups: (1) Publicly Owned Utilities; (2) Major Privately Owned Electric Utilities; (3) Rural Electric Cooperatives; (4) Nonutility Power Producers; and (5) Manufacturers. The first three groups (Publicly Owned Utilities, Major Privately Owned Electric Utilities, and Rural Electric Cooperatives) are collectively categorized as Electric Utilities. To help determine which questionnaire a facility may be required to complete, the two tables below describe, for the purposes of this questionnaire, the major distinguishing characteristics of each group. Table 1 differentiates between Electric Utilities, Nonutility Power Producers, and Manufacturers. If a facility is classified as an Electric Utility, table 2 is used to further classify the facility as a Publicly Owned Utility, Major Privately Owned Electric Utility, or Rural Electric Cooperative.

VOL 63 ISS 16 JA 26 1998 UMI

TABLE 1.—ELECTRIC UTILITY, NONUTILITY POWER PRODUCER, AND MANUFACTURER CHARACTERISTICS

Primary category	Major characteristics
(1) Electric Utility	• A corporation, person, agency, authority, or other legal entity or instrumentality that owns and/or operates facilities for the generation, transmission, distribution, or sale of electric energy primarily for use by the public. • Files forms listed in the Code of Federal Regulations, Title 18, Part 141.
(2) Nonutility Power Producers	• A corporation, person, agency, authority, or other legal entity or instrumentality that owns electric generating capacity and is not an electric utility. • Includes FERC (Federal Energy Regulatory Commission) Qualifying Cogenerators, FERC Qualifying Small Power Producers, and Other Nonutility Generators (including Independent Power Producers) without a designated franchised service area. • Does not file forms listed in the *Code of Federal Regulations*, Title 18, Part 141.
(3) Manufacturers	• All other industrial facilities which do not qualify as an Electric Utility or Nonutility Power Producer as defined above.

TABLE 2.—UTILITY SUBCATEGORY CHARACTERISTICS

Utility subcategory	Major characteristics
(1) Major Privately Owned Electric Utility	• Earns a return for investors; either distribute their profits to stock holders as dividends or reinvest the profits. • Is granted service monopoly in certain geographic areas. • Is regulated by State and sometimes Federal governments, which in turn approve rates that allow a fair rate of return on investment. • Most are operating companies that provide basic services for generation, transmission, and distribution.
(2) Publicly Owned Electric Utility	• Ownership is Federal, State, or local agencies (e.g., Federal Authorities, Municipals, Public Power Districts, State Authorities, Irrigation Districts). • Power not generated for profit. • Serves at cost; return excess funds to the consumers in the form of community contributions, economic and efficient facilities, and reduced rates.
(3) Rural Electric Cooperatives	• Owned by members (small rural farms and communities). • Provides service mostly to members only. • Incorporated under State law and directed by an elected board of directors which, in turn, selects a manager.

The detailed questionnaire will be administered under authority of section 308 of the Clean Water Act, 33 U.S.C. 1318; therefore, all recipients of the detailed questionnaire are required to complete and return the questionnaire to EPA. The survey instrument will be mailed after OMB approves the ICR. An agency may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number. The OMB control numbers for EPA's regulations are listed in 40 CFR part 9 and 48 CFR Chapter 15. The ICR that EPA intends to submit to OMB will include a discussion of the comments on the proposed detailed questionnaire that EPA has received to date and the comments received as the result of today's announcement. EPA solicits comment on all aspects of the detailed questionnaire, and specifically solicits comment on the following information collection functional areas:

(i) whether the proposed detailed questionnaire is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(ii) the accuracy of the Agency's estimate of the burden of the proposed detailed questionnaire, including the validity of the methodology and assumptions used;

(iii) the detailed questionnaire's quality, utility, and clarity; and

(iv) minimization of the burden of the detailed questionnaire on those who are to respond, including through the use of appropriate automated electronic, mechanical, or other technology collection techniques or other forms of information technology collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

Burden Statement: The total national burden estimate for all parts of this detailed questionnaire is 272,800 hours. The burden estimates are based on EPA administering 1,705 detailed questionnaires. The Agency intends to conduct a census of the facilities within the Electric Utility category (this group did not receive a screener questionnaire), and to select a statistically valid sample of the nonutility power producers and manufacturers that received the screener questionnaire. The Agency anticipates administering the detailed questionnaire to 905 electric utility facilities, 500 nonutility power producer facilities, and 300 manufacturers. EPA estimates that each facility will require, on the average, 160 hours to complete the detailed questionnaire. Burden means the total time, effort or financial resources expended by persons to generate, maintain, retain, or disclose or provide information to or for a Federal agency. This includes the time needed to review instructions; develop, acquire, install, and utilize technology and systems for the purposes of collecting, validating, and verifying information, processing and maintaining information, and disclosing and providing information; adjust the existing ways to comply with any previously applicable instructions and requirements; train personnel to be able to respond to a collection of information; search data sources; complete and review the collection of information and transmit or otherwise disclose the information.

In developing the detailed questionnaire, EPA conducted a program of outreach to industry and other government entities with the objective of minimizing reporting burdens. The outreach program included distribution of the draft detailed questionnaire to industry associations and environmental groups plus a meeting to discuss comments. EPA also made presentations at many professional and industry association meetings. The following are the industry associations that participated in the EPA outreach program: Utility Water Act Group, American Forest and Paper Association, American Iron and Steel Institute, American Petroleum Institute, Chemical Manufacturers Association, and Edison Electric Institute. EPA also requested comments on the detailed questionnaire from the Electric Power Research Institute. Environmental group outreach included the Hudson Riverkeeper, the New York and New Jersey Baykeeper and other interested environmental group representatives. Based on comments received from these early outreach activities, EPA decided to first administer a screener questionnaire (except to electric utilities) followed by a detailed questionnaire. The screener is designed to assist EPA in selecting an appropriate sample of facilities that employ cooling water intake structures to receive the detailed technical questionnaire. Electric utilities will not receive a screener questionnaire because of the large volume of publicly available data.

The Agency has coordinated extensively with the Energy Information Association (EIA) to determine what pertinent information is publicly available. EPA does not intend to request, in the detailed questionnaire, information that is publicly available. For that reason, the Agency has greatly reduced the financial and economic information burden on the electric utilities. The majority of the information EIA collects from nonutility power producers is confidential business information not available to EPA.

EPA significantly lowered the burden to industry by systematically reducing the number of industrial facilities to receive the detailed questionnaire from a possible 412,000 facilities to about 1,700 facilities. Based on water intake and cooling water use from the 1982 Census of Manufacturers, EPA identified six industrial sectors to receive the screener or the detailed questionnaire or both. These six industrial sectors are: Electric Utilities, Nonutility Power Producers, Chemicals & Allied Products, Primary Metals Industry, Petroleum & Coal Products, and Paper & Allied Products. Together, EPA estimates that these six sectors account for more than 99 percent of all cooling water withdrawals and include about 50,000 facilities. EPA limited the sample frame for electric utilities and nonutility power producers to only those facilities that have a prime mover which utilizes a steam cycle operation (a steam cycle operation requires cooling water). EPA also limited data collection to industrial subcategories which documented significant cooling water use, thereby further reducing the potential number of facilities to be surveyed to about 7,515. To help further refine the sample frame for the detailed questionnaire, EPA decided to administer a screener survey to five of the six industrial sectors (excluding electric utility). The Agency anticipates administering the screener to approximately 6,700 facilities. As stated earlier, EPA expects to administer the detailed survey to approximately 1,705 facilities. Limiting the survey sample frame as described above is not intended to limit the scope or applicability of the section 316(b) regulation.

Finally, EPA will maintain a temporary, no-charge telephone number that survey recipients may call to obtain assistance in completing the data collection surveys. EPA believes that the no-charge telephone number will greatly reduce burden by helping recipients to answer specific questions within the context of their individual operations.

Dated: January 19, 1998.

Tudor T. Davies,

Director, Office of Science and Technology.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5953–7]

EPA's National Drinking Water Contaminant Occurrence Data Base

AGENCY: Environmental Protection Agency (EPA).

ACTION: Announcement of a stakeholder meeting on the National Drinking Water Contaminant Occurrence Data Base.

SUMMARY: The Environmental Protection Agency (EPA) has scheduled a two-day public meeting on EPA's National Drinking Water Contaminant Occurrence Data Base. At the upcoming meeting, EPA is seeking input from stakeholders, including national and state representatives, environmental organizations, industry, the public, and other interested parties. The purpose of the meeting is to seek input from stakeholders on the design of the national drinking water contaminant occurrence data base to include such issues as data elements, data element standardization, reporting, storage, retrieval, use and access. EPA encourages the full participation of stakeholders throughout this process.

DATES: The stakeholder meeting on the National Drinking Water Contaminant Occurrence Data Base will be held on February 12, 1998 from 9:00–5:00 p.m. EST and on February 13 from 9:00–3:00 p.m. EST.

ADDRESSES: Resolve, Inc. (an EPA contractor) will provide logistical support for the stakeholders meeting. The meeting will be held at Resolve, Inc., 1255 23rd Street, NW, Suite 275, Washington, D.C. 20037.

FOR FURTHER INFORMATION CONTACT: For general information about the meeting logistics, please contact Mr. Jeff Citrin at Resolve, Inc., 1255 23rd Street, NW, Suite 275, Washington, D.C. 20037; *phone:* (202) 944–2300; *fax:* (202) 338–1264, or *e-mail* at jcitrin@resolv.org.

Members of the public wishing to attend the meeting may register by phone by contacting Mr. Jeff Citrin by February 2, 1998. Those registered for the meeting will receive background materials prior to the meeting.

For other information on the National Drinking Water Contaminant Occurrence Data Base, please contact Charles Job at the U.S. Environmental Protection Agency, Phone: 202–260–7084, Fax: 202–260–3762, or e-mail at job.charles@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

A. Background on the National Drinking Water Contaminant Occurrence Data Base

The Safe Drinking Water Act, SDWA, as amended in 1996, states that: Not later than three years after the date of enactment of the Safe Drinking Water Act Amendments of 1996, the Administrator shall assemble and maintain a national drinking water contaminant occurrence data base using information on the occurrence of both regulated and unregulated contaminants in public water systems obtained under section 1445(a)(1)(A) or section 1445(a)(2) and reliable information from other public and private sources. The National Drinking Water Contaminant Occurrence Data Base is required to be developed by August 6, 1999.

B. Request for Stakeholder Involvement

EPA has convened this public meeting to hear the views of stakeholders on the next stage (i.e., design) of the National Drinking Water Contaminant Occurrence Data Base development. The EPA National Contaminant Occurrence Data Base (NCOD) project Team will soon be making final recommendations on the

VOL 63 ISS 16 JA 26 1998 UMI

data elements that will be the foundation for future regulated and unregulated contaminant occurrence data reporting. The data submitted using these data elements will provide the basis for the Administrator to determine whether or not to regulate contaminants in the future. For chemical contaminants, a series of meetings have been held with a diverse group of EPA, state, public water system, public health, consumer, and environmental groups, which identified a number of data elements that should be considered for reporting. The majority of the data elements are already in the structure of the EPA Safe Drinking Water Information System (SDWIS). A preliminary categorization of the remaining data elements indicates that some could be dropped because of potential duplication with other data elements, others could be derived from other data elements in the SDWIS structure, and the rest are new data elements. The new data elements are principally focused on: quality assurance, representativeness of the sample, laboratory information, sample location, and well information.

Additionally, the meeting will address such issues as:

1. What specific data element standards should be used?

2. How will electronic reporting by States, public water systems and/or laboratories best be accomplished?

3. What electronic platform(s) should be used to support the NCOD, recognizing public access as a major consideration in data base design?

4. What options for data retrieval should be considered?

5. In what ways will EPA use the data?

6. How should the data be analyzed?

7. What information should be available to the public?

The public is invited to provide comments on the issues listed above or other issues related to the National Drinking Water Contaminant Occurrence Data Base during the February 12–13, 1998 meeting.

Dated: January 21, 1998.

Cynthia Dougherty,

Director, Office of Ground Water and Drinking Water.

ENVIRONMENTAL PROTECTION AGENCY

[FRL–5953–5]

Meeting of the Small Community Advisory Subcommittee of the Local Government Advisory Committee

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: This meeting is the first for the Small Community Advisory Subcommittee of the Local Government Advisory Committee. Orientation, organization and agenda setting will be the focus of this gathering. The group takes up the work of an earlier advisory group known as the Small Towns Task Force. At this meeting, the subcommittee will hear presentations about the history and recommendations of the Small Towns Task Force. Part of the meeting will also be devoted to presentations about Federal Advisory committee operations, rules and regulations. The group will also develop a strategy to guide subsequent meetings. Responsibility for the Small Community Advisory Subcommittee of the Local Government Advisory Committee rests with the Office of Administrator, Office of Congressional and Intergovernmental Relations (OCIR) under the leadership of Joseph Crapa, Associate Administrator for Congressional and Intergovernmental Relations and Michael O'Connor, Deputy Associate Administrator for State and Local Relations. OCIR serves as the Agency's principal liaison with State and local government officials and the organizations which represent them.

From 3:00–3:30 p.m. on February 18, the Committee will hear comments from the public. Each individual or organization wishing to address the Committee will be allowed three minutes. Please contact the Designated Federal Officer (DFO) at the number listed below to schedule agenda time. Time will be allotted on a first come, first serve basis.

This is an open meeting and all interested persons are invited to attend. Meeting minutes will be available after the meeting and can be obtained by written request from the DFO. Members of the public are requested to call the DFO at the number listed below if planning to attend so that arrangements can be made to comfortably accommodate attendees as much as possible. However, seating will be on a first come, first serve basis.

DATES: The meeting will begin at 8:30 a.m. on Tuesday, February 17 and conclude at 4:00 p.m. on February 18.

ADDRESSES: The meeting will be held at the Kansas City Marriott Downtown located at 200 West 12th Street in Kansas City, Missouri.

Requests for Minutes and other information can be obtained by writing to 401 M Street, S.W. (1502), Washington, DC 20460.

FOR FURTHER INFORMATION CONTACT: The DFO for this subcommittee is Steven Wilson. He is the point of contact for information concerning any Committee matters and can be reached by calling (202) 260–2294.

Steven Wilson,

Designated Federal Officer, Small Community Advisory Subcommittee of the Local Government Advisory Committee.

ENVIRONMENTAL PROTECTION AGENCY

[OPP–00521; FRL–5767–4]

Liquid Chemical Sterilant Products; Notice of Availability of PR Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of availability.

SUMMARY: EPA is announcing the availability of Pesticide Regulation (PR) Notice 98–2, entitled "Liquid Chemical Sterilant Products." The PR Notice advises applicants and registrants of new FIFRA provisions related to liquid chemical sterilants intended for use on critical or semi-critical medical devices. Interested parties may request a copy of this PR Notice and obtain further information as set forth in the Addresses unit of this notice.

ADDRESSES: The PR Notice is available from, by mail: Barbara Mandula, Antimicrobials Division (7510W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. The public record is filed in OPP's Docket Office under docket control number "OPP–00521", located in Room 119 of the Public Information and Records Integrity Branch, Information Resources and Services Division (7502C), Office of Pesticide Programs, Environmental Protection Agency, Crystal Mall #2, 1921 Jefferson Davis Highway, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: By mail: Barbara Mandula (7510W), Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Sixth Floor, Crystal Station #1, 2800 Crystal Drive, Arlington, VA, (703) 308–7378, fax: (703) 308–8481; e-mail: mandula.barbara@epamail.epa.gov.

SUPPLEMENTARY INFORMATION:

Electronic Availability:

Internet

Electronic copies of this document and the PR Notice are available from the EPA Home Page at the Federal Register - Environmental Documents entry for this document under "Laws and Regulations" (http://www.epa.gov/fedrgstr/).

Fax on Demand

Using a faxphone call 202–401–0527 and select item (6107) for a copy of the PR Notice.

I. Purpose

The purpose of the PR Notice is to announce that liquid chemical sterilant products intended for use on critical or semi-critical medical devices are no longer regulated as "pesticides" by the Environmental Protection Agency (EPA), but as "medical devices" under the regulatory authority of the Food and Drug Administration (FDA). For the affected liquid chemical sterilants, EPA will no longer follow the procedures described in the Memorandum of Understanding (MOU) between EPA and FDA signed on June 4, 1993 and amended on June 20, 1994. The goal of this notice is to clarify the authorities of FDA and EPA as they apply to liquid chemical sterilants, thereby increasing the efficiency of regulatory processes affecting these products.

II. Applicability

The PR Notice applies to all manufacturers, formulators, producers, and registrants of liquid chemical sterilant products intended for use on critical or semi-critical medical devices, and to products with subordinate disinfectant claims, such as tuberculocidal or virucidal claims, which support a high level disinfectant use pattern for critical or semi-critical devices.

III. Contents of the PR Notice

This notice informs registrants of liquid chemical sterilant products how to ensure that their products remain in compliance with FIFRA requirements where FIFRA still applies, and how products no longer regulated under FIFRA will be treated by EPA. In particular, the affected products will no longer be permitted to bear both FDA- and EPA-regulated claims. This notice supersedes all provisions of PR Notice 94–4 with respect to liquid chemical sterilants, but retains the provisions of PR Notice 94–4 that apply solely to general purpose disinfectants.

List of Subjects

Environmental protection, Antimicrobials, Liquid chemical sterilants.

Dated: January 15, 1998.

Frank Sanders,

Director, Antimicrobials Division, Office of Pesticide Programs.

FEDERAL DEPOSIT INSURANCE CORPORATION

Agency Information Collection Activities: Submission for OMB Review; Comment Request

AGENCY: Federal Deposit Insurance Corporation.

ACTION: Notice of information collection to be submitted to OMB for review and approval under the Paperwork Reduction Act of 1995.

SUMMARY: In accordance with requirements of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the FDIC hereby gives notice that it plans to submit to the Office of Management and Budget (OMB) a request for OMB review and approval of the information collection system described below.

Type of Review: New collection.

Title: Occasional Qualitative Surveys.

OMB Number: New collection, number not yet assigned.

Annual Burden:

Estimated annual number of respondents: 5,000.

Estimated time per response: 1 hour.

Average annual burden hours: 5,000 hours.

OMB Reviewer: Alexander T. Hunt, (202) 395–7860, Office of Management and Budget, Office of Information and Regulatory Affairs, Washington, DC 20503.

FDIC Contact: Tamara R. Manly, (202) 898–7453, Office of the Executive Secretary, Room F–4022, Federal Deposit Insurance Corporation, 550 17th Street, NW., Washington, DC 20429.

Comments: Comments on this collection of information are welcome and should be submitted on or before [insert date 30 days after date of publication in the Federal Register] to both the OMB reviewer and the FDIC contact listed above.

ADDRESSES: Information about this submission, including copies of the proposed collection of information, may be obtained by calling or writing the FDIC contact listed above.

SUPPLEMENTARY INFORMATION: The collection involves the occasional use of qualitative surveys to gather anecdotal information about regulatory burden, problems or successes in the bank supervisory process (including both safety-and-soundness and consumer-related exams), and similar concerns.

Dated: January 20, 1998.

BILLING CODE 6714–01–M

FEDERAL TRADE COMMISSION

[Dkt. C–3723]

Boeing Co.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.
ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair or deceptive acts or practices and unfair methods of competition, this consent order involves the Boeing Company's acquisition of Rockwell International Corporation's aerospace and defense business and the competition in the markets for high altitude endurance unmanned air vehicles ("UAVs") and space launch vehicles. The consent order, among other things, gives Teledyne Ryan, the prime contractor of one team, the opportunity to replace Boeing on that team, thereby protecting competition in the UAVs market. The consent order also establishes a "firewall" to prevent the flow of competitively sensitive information between Boeing's team and a division of Rockwell International Corporation's aerospace and defense business that is currently providing wings to the other teams, establishes a firewall that prevents Boeing from making any space launch vehicle manufacturer's non-public information available to its launch vehicle division, and allows Boeing to use such information only in its capacity as a propulsion system provider.

DATES: Complaint and Order issued March 5, 1997.[1]

FOR FURTHER INFORMATION CONTACT: George Cary, FTC/H–374, Washington, DC 20580. (202) 326–3741.

SUPPLEMENTARY INFORMATION: On Monday, December 16, 1996, there was published in the **Federal Register**, 61 FR 66038, a proposed consent agreement with analysis In the Matter of The Boeing Company, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, modified as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Donald S. Clark,
Secretary.

FEDERAL TRADE COMMISSION

[File Nos. 972–3190; 972–3191; and 972–3192]

Grey Advertising, Inc.; Rubin Postaer and Associates, Inc.; and Foote, Cone & Belding Advertising, Inc.—Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.
ACTION: Proposed consent agreements.

SUMMARY: The consent agreements in these matters settle alleged violations of federal law prohibiting unfair or deceptive acts or practices or unfair methods of competition. The attached Analysis to Aid Public Comment describes both the allegations in the draft complaints that accompany the consent agreements and the terms of the consent orders—embodied in the consent agreements—that would settle these allegations.

DATES: Comments must be received on or before March 27, 1998.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, Room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: David Medine, FTC/S–4429, Washington, DC 20580. (202) 326–3224.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the above-captioned consent agreements containing consent orders to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, have been placed on the public record for a period of sixty (60) days. The following Analysis to Aid Public Comment describes the terms of the consent agreements, and the allegations in the complaints. An electronic copy of the full text of the consent agreement packages can be obtained from the FTC Home Page (for January 20, 1998), on the World Wide Web, at "http://www.ftc.gov/os/actions/htm." A paper copy can be obtained from the FTC Public Reference Room, Room H–130, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, either in person or by calling (202) 326–3627. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's rules of practice (16 CFR 4.9(b)(6)(ii)).

Analysis of Proposed Consent Orders to Aid Public Comment

The Federal Trade Commission has accepted separate agreements, subject to final approval, to proposed consent orders from three advertising agencies—Grey Advertising, Inc. ("Grey"), Rubin Postaer and Associates, Inc. ("Rubin Postaer"), and Foote, Cone & Belding, Inc., ("FCB") (collectively referred to as "respondents").

The proposed consent orders have been placed on the public record for sixty (60) days for reception of comments by interested persons. Comments received during this period will become part of the public record. After sixty (60) days, the Commission will again review the agreements and the comments received and will decide whether it should withdraw from the agreements or make final the agreements' proposed orders.

These matters concern automobile lease and/or credit advertisements at issue in the Federal Trade Commission's enforcement actions against Mitsubishi Motor Sales of America, Inc. ("Mitsubishi"), Dkt. No. C–3713, American Honda Motor Corporation, Inc. ("Honda"), Dkt. No. C–3711, and Mazda Motor of America, Inc. ("Mazda"), Dkt. No. C–3714. The complaints allege that Grey, Rubin Postaer, and FCB, the advertising agencies for Mitsubishi, Honda, and Mazda, respectively, created and disseminated automobile lease advertisements that violate the Federal Trade Commission Act ("FTC Act"), the Consumer Leasing Act ("CLA"), and Regulation M. The complaint against Grey also alleges that respondent Grey's automobile credit advertisements violated the FTC Act, the Truth in Lending Act ("TILA"), and Regulation Z.

Section 5 of the FTC Act prohibits false, misleading, or deceptive representations or omissions of material information in advertisements. In addition, Congress established statutory disclosure requirements for lease and credit advertising under the CLA and TILA, respectively, and directed the Federal Reserve Board ("Board") to promulgate regulations implementing such statutes—Regulations M and Z. *See* 15 U.S.C. 1667–1667e; 12 CFR part 213; 12 CFR part 226. On September 30, 1996, Congress passed revisions to the CLA that became optionally effective immediately and that have been implemented through the Board's recent revisions to Regulation M. *See* Title II, Section 2605 of the Omnibus Consolidated Appropriations Act for Fiscal Year 1997, Pub. L. No. 104–208, 110 Stat. 3009, 3009–473 (Sept. 30, 1996) ("revised CLA"); 61 FR 52,246 (October 7, 1996), 62 FR 15,364 (April 1, 1997), and 62 FR 16,053 (April 4, 1997) (together "revised Regulation M") (to be codified at 12 CFR part 213), as amended.

The complaints allege that each of the respondent's automobile lease advertisements represented that a particular amount stated as "down" is the total amount consumers must pay at the initiation of a lease agreement to lease the advertised vehicles. This representation is false, according to the complaints, because consumers must pay additional fees beyond the amount stated as "down," such as a security deposit, first month's payment and/or an acquisition fee, to lease the advertised vehicles. The complaints allege that respondents knew or should have known that this representation was false or misleading. The complaints also allege that respondents knew or should have known that the failure to disclose adequately lease inception fees in their advertisements was deceptive. These practices, according to the complaints, constitute deceptive acts or practices in violation of section 5(a) of the FTC Act.

The complaints further allege that respondents' lease advertisements failed to disclose the terms of the offered lease in a clear and conspicuous manner, as required by the CLA and Regulation M. According to the complaints, respondents' television lease disclosures were not clear and conspicuous because they appeared on the screen in small type, against a background of similar shade, for a very short duration, and/or over a moving background. The Grey and Rubin Postaer complaints also allege that these respondents' fine print disclosures of lease terms in print advertisements were not clear and conspicuous. The complaints, therefore, allege that respondents' failure to disclose lease terms in a clear and conspicuous manner violates the CLA and Regulation M. These alleged practices would also violate the advertising disclosure requirements of the revised CLA and the revised Regulation M.

The Grey complaint also alleges that respondent Grey's credit advertisements represented that consumers can purchase the advertised vehicles at the terms prominently stated in the ad, such as a low monthly payment and/or a low amount "down." This representation is false, according to the complaint, because consumers must also pay a final balloon payment of several thousand dollars, in addition to the low monthly payment and/or amount down, to purchase the advertised vehicles. The Grey complaint alleges that Grey knew or should have known that this representation was false or misleading. The Grey complaint also alleges that Grey knew or should have known that the failure to disclose adequately in its credit advertisements additional terms pertaining to the credit offer, including the existence of a final balloon payment of several thousand dollars and the annual percentage rate, was deceptive. These practices, according to the complaint, constitute deceptive acts or practices in violation of Section 5(a) of the FTC Act.

The Grey complaint further alleges that respondent Grey's credit advertisements failed to disclose required credit terms in a clear and conspicuous manner, as required by the TILA and Regulation Z. According to the complaint, respondent's television advertisements contained credit disclosures that were not clear and conspicuous because they appeared on the screen in small type, against a background of similar shade, for a very short duration, and/or over a moving background. The complaint also alleges that this respondent's fine print disclosures of credit terms in print advertisements were not clear and conspicuous. The complaint, therefore, alleges that Grey's failure to disclose credit terms in a clear and conspicuous manner violates the TILA and Regulation Z.

The proposed consent orders contain provisions designed to remedy the violations charged and to prevent the respondents from engaging in similar acts and practices in the future. Specifically, subparagraph I.A. of the proposed orders prohibits respondents, in any motor vehicle lease advertisement, from misrepresenting the total amount due at lease signing or delivery, the amount down, and/or the downpayment, capitalized cost reduction, or other amount that reduces the capitalized cost of the vehicle (or that no such amount is required). Subparagraph I.B. of the proposed orders also prohibits respondents, in any motor vehicle lease advertisement, from stating the amount of any payment or that any or no initial payment is required at consummation of the lease, unless the ad also states: (1) That the transaction advertised is a lease; (2) the total amount due at lease signing or delivery; (3) whether or not a security deposit is required; (4) the number, amount, and timing of scheduled payments; and (5) that an extra charge maybe imposed at the end of the lease term where the liability of the consumer at lease end is based on the anticipated residual value of the vehicle. The information enumerated above must be displayed in the motor vehicle lease advertisement in a clear and conspicuous manner. This approach is consistent with the lease advertising disclosure requirements of the revised CLA and the revised Regulation M.

Moreover, subparagraph I.C. of the proposed orders prohibits respondents, in any motor vehicle lease advertisement, from stating the amount of any payment or that any or no initial payment is required at consummation of the lease, unless the ad also states: (1) That the transaction advertised is a lease; (2) the total amount due at lease signing or delivery; (3) whether or not a security deposit is required; (4) the number, amount, and timing of scheduled payments; and (5) that an extra charge maybe imposed at the end of the lease term where the liability of the consumer at lease end is based on the anticipated residual value of the vehicle. The information enumerated above must be displayed in the motor vehicle lease advertisement in a clear and conspicuous manner. This approach is consistent with the lease advertising disclosure requirements of the revised CLA and the revised Regulation M.

Paragraph II of the proposed orders provides that lease advertisements that comply with the disclosure requirements of subparagraph I.C. of the orders shall be deemed to comply with section 184(a) of the CLA, as amended, or § 213.7(d)(2) of the revised Regulation M, as amended.

Paragraph III of the proposed orders provides that certain future changes to the CLA or Regulation M will be incorporated into the orders. Specifically, subparagraphs I.B. and I.C. will be amended to incorporate future CLA or Regulation M required advertising disclosures that differ from those required by the above order paragraphs. In addition, the definition of "total amount due at lease signing or delivery," as it applies to subparagraph I.B. and I.C. only, will be amended in the same manner. The orders provide that all other order requirements, including the definition of "clearly and conspicuously," will survive any such revisions.

[1] Copies of the Complaint and the Decision and Order are available from the Commission's Public Reference Branch, H–130, 600 Pennsylvania Avenue, NW., Washington, DC 20580.

VOL 63 ISS 16 JA 26 1998 UMI

Subparagraph IV.A of the proposed Grey order prohibits respondent Grey, in any closed-end credit advertisement involving motor vehicles, from misrepresenting the existence and amount of any balloon payment or the annual percentage rate; subparagraph IV.B also prohibits respondent Grey from stating the amount of any payment, including but not limited to any monthly payment, in any motor vehicle closed-end credit advertisement unless the amount of any balloon payment is disclosed prominently and in close proximity to the most prominent of the above statements.

Subparagraphs IV.C of the proposed Grey order also enjoins respondent from disseminating motor vehicle closed-end credit advertisements that state the amount or percentage of any downpayment, the number of payments or period of repayment, the amount of any periodic payment, including but not limited to the monthly payment, or the amount of any finance charge without disclosing, clearly and conspicuously, all of the terms required by Regulation Z, as follows: (1) The amount or percentage of the downpayment; (2) the terms of repayment, including but not limited to the amount of any balloon payment; and (3) the correct annual percentage rate, using that term or the abbreviation "APR," as defined as Regulation Z and the Official Staff Commentary to Regulation Z. If the annual percentage rate may be increased after consummation of the credit transaction, that fact must also be clearly and conspicuously disclosed.

The information required by subparagraph I.C. (lease advertisements) and IV.C of the Grey order (credit advertisements) must be disclosed "clearly and conspicuously" as defined in the proposed orders. The "clear and conspicuous" definition requires that respondents present such lease or credit information within the advertisement in a manner that is readable (or audible) and understandable to a reasonable consumer. This definition is consistent with the "clear and conspicuous" requirements for advertising disclosures in the revised Regulation M and Regulation Z that require disclosures that consumers can see and read (or hear) and comprehend. Similar to prior Commission orders and statements interpreting Section 5's prohibition or deceptive acts and practices, these orders require respondents to include certain disclosures in advertising that are readable (or audible) and understandable to reasonable consumers.

The purpose of this analysis is to facilitate public comment on the proposed orders, and it is not intended to constitute an official interpretation of the agreements and proposed orders or to modify in any way their terms.

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

FEDERAL TRADE COMMISSION

[Dkt. C–3724]

Progressive Mortgage Corp., et al.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair or deceptive acts or practices and unfair methods of competition, this consent order prohibits, among other things, the Ohio-based mortgage corporation and its president from misrepresenting any terms or conditions of financing, such as, the annual percentage rate and finance charges of consumer loans; the number, amount and timing of mortgage payments; and the total number of payments to repay consumer loans.

DATES: Complaint and Order issued March 10, 1997.[1]

FOR FURTHER INFORMATION CONTACT: John Mendenhall, FTC Cleveland Regional Office, Eaton Center, Suite 200, 1111 Superior Ave., Cleveland, Ohio 44114. (216) 522–4210.

SUPPLEMENTARY INFORMATION: On Tuesday, December 10, 1996, there was published in the **Federal Register**, 61 FR 65061, a proposed consent agreement with analysis In the Matter of Progressive Mortgage Corporation, et al., for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

No comments having been received, the Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to cease and desist, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interprets or applies sec. 5, 38 Stat. 719, as amended; 15 U.S.C. 45)

Donald S. Clark,

Secretary.

BILLING CODE 6750–01–M

FEDERAL TRADE COMMISSION

[Dkt. C–3584]

Schwegmann Giant Super Markets, Inc.; Prohibited Trade Practices and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Modifying order.

SUMMARY: This order reopens a 1995 consent order—that required the Louisiana-based corporation to divest several supermarkets in the New Orleans area—and this order modifies the consent order by replacing a provision requiring Schwegmann to obtain prior Commission approval for certain transactions, with a prior notice provision for any acquisition of retail supermarkets in the New Orleans area that Schwegmann makes through June 6, 2005. The Commission determined that the changed provisions are warranted and consistent with the Statement of FTC Policy Concerning Prior Approval and Prior Notice Provisions and therefore justified reopening the proceeding and modifying the order.

DATES: Consent order issued June 2, 1995. Modifying order issued February 24, 1997.[1]

FOR FURTHER INFORMATION CONTACT: Daniel Ducore, FTC/S–2115, Washington, DC 20580. (202) 326–2526.

SUPPLEMENTARY INFORMATION: In the Matter of Schwegmann Giant Super Markets, Inc. The prohibited trade practices and/or corrective actions as set forth at 60 FR 35032, are changed, in part, as indicated in the summary.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat. 719, as amended; sec 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

FEDERAL TRADE COMMISSION

[File No. 951–0083]

Sensormatic Electronics Corporation; and Checkpoint Systems, Inc.—Analysis to Aid Public Comment

AGENCY: Federal Trade Commission.

ACTION: Proposed Consent Agreements.

SUMMARY: The consent agreements in these matters settle alleged violations of federal law prohibiting unfair or deceptive acts or practices or unfair methods of competition. The attached Analysis to Aid Public Comment describes both the allegations in the draft complaints that accompany the consent agreements and the terms of the consent orders—embodied in the consent agreements—that would settle these allegations.

DATES: Comments must be received on or before March 27, 1998.

ADDRESSES: Comments should be directed to: FTC/Office of the Secretary, Room 159, 6th St. and Pa. Ave., NW., Washington, DC 20580.

FOR FURTHER INFORMATION CONTACT: William Baer or Michael Antalics, FTC/H–374, Washington, D.C. 20580. (202) 326–2932 or 326–2821.

SUPPLEMENTARY INFORMATION: Pursuant to section 6(f) of the Federal Trade Commission Act, 38 Stat. 721, 15 U.S.C. 46 and § 2.34 of the Commission's rules of practice (16 CFR 2.34), notice is hereby given that the above-captioned consent agreements containing consent orders to cease and desist, having been filed with and accepted, subject to final approval, by the Commission, have been placed on the public record for a period of sixty (60) days. The following Analysis to Aid Public Comment describes the terms of the consent agreements, and the allegations in the complaints. An electronic copy of the full text of the consent agreement packages can be obtained from the FTC Home Page (for January 21, 1998), on the World Wide Web, at "http://www.ftc.gov/os/actions/htm." A paper copy can be obtained from the FTC Public Reference Room, Room H–130, Sixth Street and Pennsylvania Avenue, NW., Washington, DC 20580, either in person or by calling (202) 326–3627. Public comment is invited. Such comments or views will be considered by the Commission and will be available for inspection and copying at its principal office in accordance with § 4.9(b)(6)(ii) of the Commission's rules of practice (16 CFR 4.9(b)(6)(ii)).

Analysis of Proposed Consent Orders To Aid Public Comment

The Federal Trade Commission has accepted agreements to proposed consent orders from Sensormatic Electronics Corporation ("Sensormatic") and Checkpoint Systems, Inc. ("Checkpoint"). Sensormatic's principal place of business is located at 951 Yamato Road, Boca Raton, Florida. Checkpoint's principal place of business is located at 101 Wolf Drive, Thorofare, New Jersey.

The proposed consent orders have been placed on the public record for 60 days for reception of comments by interested persons. Comments received during this period will become part of the public record. After 60 days, the Commission will again review the agreements and the comments received, and will decide whether it should withdraw from the agreements or make final the agreements' proposed orders.

Sensormatic and Checkpoint are the two largest manufacturers and sellers of electronic article surveillance ("EAS") systems in the United States and the world. Their combined worldwide sales exceed 70 percent of total EAS industry sales.

EAS systems are used primarily by retailers to deter and detect shoplifting and employee theft. Bits of reactive metal or electronic transmitters called "tags" are attached to products sold in retail stores. When a product is purchased, the tag is removed or deactivated by the cashier. If a tag passes through an EAS system's sensors at a store exit without being deactivated, it sets off an alarm. EAS systems are also commonly found in libraries and video stores.

The complaint alleges that Sensormatic and Checkpoint entered a written agreement on June 27, 1993 to refrain from "negative advertising or other negative selling, promotional activities or other communications with respect to the other party or the other party's products and services," including "statements that the other party's products or services cause or may cause harm to customers, consumers or merchandise." The complaint further alleges that the respondents have construed the June 27, 1993 agreement to restrict comparative advertising relating to the performance and effectiveness of the proposed respondents' EAS systems.

The complaint alleges that the June 27, 1993 agreement deprives retailers, other customers who purchase EAS systems, and consumers of comparative information about the characteristics of EAS systems that they would find helpful. In particular, the complaint alleges that retailers and other EAS customers have an interest in obtaining comparative information relevant to their purchasing decisions. The complaint further alleges that certain information about EAS systems, such as the potential harm to retail products and information about possible interactions between certain medical devices and EAS equipment, is relevant to consumers. Finally, the complaint alleges that the June 27, 1993 agreement is an agreement among competitors to refrain from making truthful, non-deceptive claims, including comparisons, criticisms, or disparaging statements in advertising, and that this agreement constitutes an unfair method of competition in violation of Section 5 of the Federal Trade Commission Act.

On many occasions, the Commission has prohibited groups of horizontal competitors from agreeing to refrain from making truthful, non-deceptive claims, including comparisons, criticisms, or disparaging statements in advertising. The Commission has recognized that one of the benefits of competition is that competitors may be driven to provide consumers with information that makes for better educated, effective consumers.[1] The alleged conduct engaged in by Sensormatic and Checkpoint and the terms of the proposed orders are similar to the conduct alleged and the relief obtained in *Personal Protective Armor Association, Inc.*, 117 F.T.C. 104 (1994).

Sensormatic and Checkpoint have signed consent agreements containing the proposed consent orders. The proposed consent orders require Sensormatic and Checkpoint to declare null and void the negative advertising provision of the June 27, 1993 agreement. The proposed consent orders also prohibit Sensormatic and Checkpoint from entering into any agreement that prohibits, restricts, impedes, interferes with, restrains, places limitations on, or advises against engaging in truthful, non-deceptive advertising, comparative advertising, promotional and sales activities for twenty years after the date the order becomes final. In addition, the proposed consent orders require that Sensormatic and Checkpoint provide copies of the orders to their respective executives, and that Sensormatic and Checkpoint file annual compliance reports with the Federal Trade Commission.

[1] *See generally* Commission Policy Statement in Regard to Comparative Advertising, 16 CFR 14.15 (1997) (comparative advertising assists consumers in making rational purchase decisions, encourages product improvement or innovation, and can lead to lower market prices).

VOL 63 ISS 16 JA 26 1998 UMI

The purpose of this analysis is to facilitate public comment on the proposed orders, and it is not intended to constitute an official interpretation of the agreement and proposed orders or to modify in any way their terms.

Donald S. Clark,

Secretary.

FEDERAL TRADE COMMISSION

[Dkt. C–3743]

Tenet Healthcare Corp.; Prohibited Trade Practices, and Affirmative Corrective Actions

AGENCY: Federal Trade Commission.

ACTION: Consent order.

SUMMARY: In settlement of alleged violations of federal law prohibiting unfair or deceptive acts or practices and unfair methods of competition, this consent order, among other things, requires Tenet Healthcare Corporation ("Tenet"), a California acute care hospital chain, to divest OrNda's French Hospital Medical Center and related assets and facilities by August 1, 1997. The consent order also requires Tenet to maintain the marketability and viability of French Hospital, pending the divestiture of French, and to notify the Commission before combining its acute care hospitals in San Luis Obispo County with any other acute care hospital in the area and before acquiring any Monarch stock.

DATES: Complaint and Order issued May 20, 1997.[1]

FOR FURTHER INFORMATION CONTACT: Robert Leibenluft, FTC/S–3115, Washington, DC 20580. (202) 326–3688.

SUPPLEMENTARY INFORMATION: On Wednesday, February 5, 1997, there was published in the **Federal Register**, 62 FR 5418, a proposed consent agreement with analysis In the Matter of Tenet Healthcare Corporation, for the purpose of soliciting public comment. Interested parties were given sixty (60) days in which to submit comments, suggestions or objections regarding the proposed form of the order.

Comments were filed and considered by the Commission. The Commission has ordered the issuance of the complaint in the form contemplated by the agreement, made its jurisdictional findings and entered an order to divest, as set forth in the proposed consent agreement, in disposition of this proceeding.

(Sec. 6, 38 Stat. 721; 15 U.S.C. 46. Interpret or apply sec. 5, 38 Stat 719, as amended; sec. 7, 38 Stat. 731, as amended; 15 U.S.C. 45, 18)

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–0093]

Proposed Collection; Comment Request Entitled Transportation Discrepancy Report, SF 361

AGENCY: Federal Supply Service, GSA.

ACTION: Notice of request for public comments regarding reinstatement to a previously approved OMB clearance (3090–0093).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Office of Acquisition Policy has submitted to the Office of Management and Budget (OMB) a request to review and approve a reinstatement of a previously approved information collection requirement concerning Transportation Discrepancy Report, SF–361.

DATES: Comment Due Date: March 27, 1998.

ADDRESSES: Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should be submitted to: Edward Springer, GSA Desk Officer, Room 3235, NEOB, Washington, DC 20503, and to Marjorie Ashby, General Services Administration (MVP), 1800 F Street NW., Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Roger Sullins, Federal Supply Service (816) 926–2932.

SUPPLEMENTARY INFORMATION:

A. Purpose

The GSA is requesting the Office of Management and Budget (OMB) to reinstate information collection, 3090–0093 concerning Transportation Discrepancy Report, SF–361. This form is prepared by Government shippers or receivers to document loss, damage, or other discrepancy resulting from the movement of freight by commercial transportation companies.

B. Annual Reporting Burden

Respondents: 160; *annual responses:* 1; *average hours per response:* 1; *burden hours:* 160.

Copy of Proposal: A copy of this proposal may be obtained from the GSA Acquisition Policy Division (MVP), Room 4011, GSA Building, 1800 F Street NW., Washington, DC 20405, or by telephoning (202) 501–3822, or by faxing your request to (202) 501–3341.

Dated: January 20, 1998.

GENERAL SERVICES ADMINISTRATION

[OMB Control No. 3090–0058]

Proposed Collection; Comment Request Entitled Deposit Bond—Annual Sale of Government Personal Property

AGENCY: Federal Supply Service, GSA.

ACTION: Notice of request for public comments regarding reinstatement to a previously approved OMB clearance (3090–0058).

SUMMARY: Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the Office of Acquisition Policy has submitted to the Office of Management and Budget (OMB) a request to review and approve a reinstatement of a previously approved information collection requirement concerning Deposit Bond—Annual Sale of Government Personal Property.

DATES: Comment Due Date: March 27, 1998.

ADDRESSES: Comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, should be submitted to: Edward Springer, GSA Desk Officer, Room 3235, NEOB, Washington, DC 20503, and to Marjorie Ashby, General Services Administration (MVP), 1800 F Street NW., Washington, DC 20405.

FOR FURTHER INFORMATION CONTACT: Andrea Dingle, Federal Supply Service, (703) 305–6190.

SUPPLEMENTARY INFORMATION:

A. Purpose

The GSA is requesting the Office of Management and Budget (OMB) to reinstate information collection, 3090–0058, concerning Deposit Bond—Annual Sale of Government Personal Property. This form is used by a bidder participating in sales of Government personal property whenever the sales invitation permits an annual type of deposit bond in lieu of cash or other form of bid deposit.

B. Annual Reporting Burden

Respondents: 1,000; *annual responses:* 1; *average hours per response:* .25; *burden hours:* 250.

Copy of Proposal: A copy of this proposal may be obtained from the GSA Acquisition Policy Division (MVP), Room 4011, GSA Building, 1800 F Street, NW., Washington, DC 20405, or by telephoning (202) 501–3822, or by faxing your request to (202) 501–3341.

Centers for Disease Control and Prevention

Board of Scientific Counselors, National Institute for Occupational Safety and Health: Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), the Centers for Disease Control and Prevention (CDC) announces the following committee meeting:

Name: Board of Scientific Counselors, National Institute for Occupational Safety and Health (BSC, NIOSH).

Time and Date: 9 a.m.–4:30 p.m., February 11, 1998.

Place: The Washington Court, Montpelier Room, 525 New Jersey Avenue, NW, Washington, DC 20001–1527.

Status: Open to the public, limited only by the space available. The meeting room accommodates approximately 50 people.

Purpose: The BSC, NIOSH is charged with providing advice to the Director, NIOSH on NIOSH research programs. Specifically, the Board shall provide guidance on the Institute's research activities related to developing and evaluating hypotheses, systematically documenting findings, and disseminating results.

Matters to be Discussed: Agenda items include a report from the Director of NIOSH, research program planning, state surveillance activities, Workers' Family Protection Task Force, the NIOSH energy-related research program, NIOSH Metal Working Fluids Criteria Document, and future activities of the Board.

Agenda items are subject to change as priorities dictate.

Contact Person for More Information: Bryan D. Hardin, Ph.D., Executive Secretary, BSC, NIOSH, Room 715–H, Hubert H. Humphrey Building, 200 Constitution Avenue SW, Washington, DC, 20201, telephone 202/205–8556, fax 202/260–4464, e-mail bdh1@cdc.gov.

Dated: January 20, 1998.

Food and Drug Administration

[Docket No. 98F–0014]

Bio-Cide International, Inc.; Filing of Food Additive Petition

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing that Bio-Cide International, Inc., has filed a petition proposing that the food additive regulations be amended to provide for the safe use of acidified sodium chlorite solutions in processing water and ice intended for use in contact with seafood.

DATES: Written comments on the petitioner's environmental assessment by February 25, 1998.

ADDRESSES: Submit written comments to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Robert L. Martin, Center for Food Safety and Applied Nutrition (HFS–217), Food and Drug Administration, 200 C St. SW., Washington, DC 20204, 202–418–3074.

SUPPLEMENTARY INFORMATION: Under the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5) (21 U.S.C. 348(b)(5))), notice is given that a petition (FAP 8A4568) has been filed by Bio-Cide International, Inc., c/o Keller and Heckman LLP, 1001 G St. NW., suite 500 West, Washington, DC 20001. The petition proposes to amend the food additive regulations in 21 CFR part 173 to provide for the safe use of acidified sodium chlorite solutions in processing water and ice intended for use in contact with seafood.

The potential environmental impact of this action is being reviewed. To encourage public participation consistent with regulations promulgated under the National Environmental Policy Act (40 CFR 1501.4(b)), the agency is placing the environmental assessment submitted with the petition that is the subject of this notice on public display at the Dockets Management Branch (address above) for public review and comment. Interested persons may, on or before February 25, 1998, submit to the Dockets Management Branch (address above) written comments. Two copies of any comments are to be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Received comments may be seen in the office above between 9 a.m. and 4 p.m., Monday through Friday. FDA will also place on public display any amendments to, or comments on, the petitioner's environmental assessment without further announcement in the **Federal Register**. If, based on its review, the agency finds that an environmental impact statement is not required and this petition results in a regulation, the notice of availability of the agency's finding of no significant impact and the evidence supporting that finding will be published with the regulation in the **Federal Register** in accordance with 21 CFR 25.40(c).

Dated: January 7, 1998.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Food and Drug Administration

[Docket No. 97D–0528]

Draft "Guidance for Industry: Efficacy Studies to Support Marketing of Fibrin Sealant Products Manufactured for Commercial Use"

AGENCY: Food and Drug Administration, HHS.

ACTION: Notice.

SUMMARY: The Food and Drug Administration (FDA) is announcing the availability of a draft document entitled "Guidance for Industry: Efficacy Studies to Support Marketing of Fibrin Sealant Products Manufactured for Commercial Use." After reviewing recent experience with fibrin sealant products in clinical studies conducted under Investigational New Drug (IND) regulations, the agency is proposing to accept applications for licensure of fibrin sealant products based on evidence from pivotal studies in which the primary endpoint is hemostasis effectiveness. As in the past, other endpoints such as wound healing or tissue sealing may serve as primary endpoints for pivotal studies, depending on the nature of the indications sought. This draft document will provide guidance to manufacturers of fibrin sealant products for the design of clinical trials intended to support licensure.

DATES: Written comments may be submitted at any time, however, comments should be submitted by April 27, 1998, to ensure their adequate consideration in preparation of the final document.

ADDRESSES: Submit written requests for single copies of the draft guidance document "Guidance for Industry: Efficacy Studies to Support Marketing of Fibrin Sealant Products Manufactured for Commercial Use" to the Office of Communication, Training, and Manufacturers Assistance (HFM–40), Center for Biologics Evaluation and Research (CBER), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852–1448. Send one self-addressed adhesive label to assist that office in processing your requests. The draft guidance document may also be obtained by mail by calling the CBER Voice Information System at 1–800–835–4709 or 301–827–1800, or by fax by calling the FAX Information System at 1–888–CBER–FAX or 301–827–3844. Submit written comments on the draft guidance document to the Dockets Management Branch (HFA–305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1–23, Rockville, MD 20857.

FOR FURTHER INFORMATION CONTACT: Paula S. McKeever, Center for Biologics Evaluation and Research (HFM–17), Food and Drug Administration, 1401 Rockville Pike, Rockville, MD 20852–1448, 301–827–6210.

SUPPLEMENTARY INFORMATION:

I. Background

FDA is announcing the availability of a draft document entitled "Efficacy Studies to Support Marketing of Fibrin Sealant Products Manufactured for Commercial Use." This draft guidance document represents the agency's current thinking with regard to information on the efficacy studies to support marketing of licensure of fibrin sealant products manufactured for commercial use. It does not create or confer any rights for or on any person and does not operate to bind FDA or the public. An alternative approach may be used if such approach satisfies the requirements of the applicable statute, regulations, or both. As with other guidance documents, FDA does not intend this draft document to be all-inclusive and cautions that not all information may be applicable to all situations. The draft guidance document is intended to provide information and does not set forth requirements.

II. Comments

This draft document is being distributed for comment purposes only, and is not intended for implementation as general guidance at this time. Interested persons may submit to the Dockets Management Branch (address above) written comments on the draft guidance document. Written comments may be submitted at any time, however, comments should be submitted by April 27, 1998, to ensure adequate consideration in preparation of the final document. Two copies of any comment are to be submitted, except individuals may submit one copy. Comments and request for copies should be identified with the docket number found in the brackets in the heading of this document. A copy of the draft guidance document and received comments are available for public examination in the Dockets Management Branch between 9 a.m. and 4 p.m., Monday through Friday.

III. Electronic Access

Persons with access to the internet may obtain the draft document using the World Wide Web (WWW). For WWW access connect to CBER at "http://www.fda.gov/cber/guidelines.htm".

Dated: January 13, 1998.

William K. Hubbard,

Associate Commissioner for Policy Coordination.

Efficacy Studies to Support Marketing of Fibrin Sealant Products Manufactured for Commercial Use

DRAFT - NOT FOR IMPLEMENTATION

This guidance document is being distributed for comment purposes only.

Draft released for comment on January 1998

Comments and suggestions regarding this draft document should be submitted by April 1998 to Dockets Management Branch (HFA-305), Food and Drug Administration, 12420 Parklawn Dr., rm. 1-23, Rockville, MD 20857. All comments should be identified with the docket number 97D-0528. For questions regarding this draft document, contact Paula McKeever (CBER), 301-827-6210.

Draft-Not for Implementation

Guidance for Industry [1]: Efficacy Studies to Support Marketing of Fibrin Sealant Products Manufactured for Commercial Use

I. Introduction

This document pertains to commercially-produced fibrin sealants composed of purified, virus-inactivated/removed human fibrinogen and human or bovine thrombin, with or without added components such as virus-inactivated/removed human factor XIII and/or aprotinin. Such products are currently available in Europe and Canada as hemostasis agents. Although manufacturers and clinicians in the United States have been actively engaged in the development and testing of fibrin sealants, no fibrin sealant product has been licensed in this country. This document outlines the agency's current position with regard to clinical data used to support licensure of safe and effective commercially-produced fibrin sealants in the United States.

II. Background

As early as 1909, surgeons were reporting the hemostatic properties of fibrin powder used in the operative field. In the 1940s, combinations of fibrinogen and thrombin were first utilized. The development of Cohn fractionation in the 1940s, and a method for cryoprecipitation of fibrinogen in the 1960s, led to the development of fibrin sealants in the 1970s. However, fibrinogen concentrates were found to transmit hepatitis and thus all U.S. licenses for Fibrinogen (Human) were revoked on December 7, 1977. Since that time, a number of manufacturers have been evaluating a new generation of virus-inactivated/removed fibrin sealants.

In 1994, the FDA co-sponsored a conference on the characteristics and clinical uses of fibrin sealants, held at the Uniformed Services University of the Health Sciences, Bethesda, Maryland (summarized in Transfusion 35:783–790, 1995). A number of academic investigators presented data from clinical trials in which fibrin sealants either reduced blood loss or reduced the time to achieve hemostasis. However, based on the available data, FDA representatives were of the opinion that a direct clinical benefit to patients treated with fibrin sealant should be demonstrated in a well-controlled clinical trial to support product licensure for a narrow indication.

Despite FDA's requests for well-controlled trials with patient outcomes as endpoints, many clinicians have been reluctant to conduct placebo-controlled trials in settings where they view the standard of care to be the use of fibrin sealant prepared on site from commercial bovine thrombin and various sources of fibrinogen. These clinicians consider the use of locally-prepared fibrin sealant to be of such benefit in controlling bleeding in confined or nearly inaccessible areas that a placebo-controlled trial would put the control patients at significant and unnecessary risk. However, locally-prepared fibrin sealants are not standardized or consistent, and the available sources of fibrinogen are not treated to inactivate or remove viruses.

III. Guidance

Based on clinical trial experience since 1994, FDA's Center for Biologics Evaluation and Research (CBER) proposes to consider, for licensure of commercially-produced fibrin sealants, data from pivotal studies in which the primary endpoint is hemostasis effectiveness. This review standard is similar to that used by the Center for Devices and Radiological Health, in clearing a number of commercial medical devices on the basis of clinical studies in which the primary endpoint was control of hemostasis within a specific time in a variety of clinical settings. CBER proposes that time to hemostasis could also serve as a primary endpoint for pivotal studies of fibrin sealants.

As in the past, CBER also encourages manufacturers to conduct well-controlled clinical trials using a variety of other endpoints, including blood loss, transfusion requirements, tissue sealing, and wound healing. Endpoints for such trials will be reviewed on a case-by-case basis. Manufacturers who demonstrate the safety and efficacy of their fibrin sealant preparations for specific indications may, upon FDA licensure, label and promote their products for these indications. FDA licensure for a given indication will denote that the specific formulation of fibrin sealant is safe and effective for that specific indication.

For fibrin sealant products containing multiple biologic components, the contribution of each component may be demonstrated in a non-clinical setting appropriate to the indication(s) sought, although the overall efficacy of multiple-component fibrin sealant products should be demonstrated in clinical trials. Proposals to utilize in vitro and/or animal studies to support the inclusion of multiple biologic components into a fibrin sealant product should be discussed with CBER.

The following points are proposed for review of pivotal clinical trials of fibrin sealant products:

1) Fibrin sealant products should be tested in settings and under conditions where they would normally be expected to be used in clinical practice.

2) Fibrin sealant products may be tested against a placebo, a cleared hemostatic device, or other control, as appropriate.

3) Efficacy of fibrin sealant products may be tested by using either hemostasis endpoints or other measures of clinical benefit, depending on the indications sought.

IV. Comments

The agency will review all submitted comments and consider them in the preparation of any final guidance document. Two copies of any comment should be submitted, except that individuals may submit one copy. Comments are to be identified with the docket number found in brackets in the heading of this document. Comments received are available for public examination in the Dockets Management Branch (address above) between 9 a.m. and 4 p.m., Monday through Friday.

Health Care Financing Administration

HCFA–2005-NC

RIN 0938–AI39

Medicaid Program; State Allotments for Payment of Medicare Part B Premiums for Qualifying Individuals: Federal Fiscal Year 1998

AGENCY: Health Care Financing Administration (HCFA), HHS.

ACTION: Notice with Comment Period.

SUMMARY: Section 4732 of the Balanced Budget Act of 1997 (Public Law 105–33) amended the Social Security Act to provide for two additional eligibility groups of low-income Medicare beneficiaries for whom Medicaid payment can be made for Medicare Part B premiums during the period beginning January 1998 and ending December 2002. This notice announces the Federal fiscal year 1998 State allotments that are available to pay Medicare Part B premiums for these two new eligibility groups and describes the methodology used to determine each State's allotment.

DATES: *Effective Date:* This is a major rule under 5 U.S.C. section 804(2). As indicated in the preamble of this notice, pursuant to section 5 U.S.C. section 553(b)(B), for good cause we find that prior notice and comment procedures are unnecessary and impracticable. Pursuant to 5 U.S.C. section 808(2), this notice is effective January 1, 1998, for allotments for payment of Medicare Part B premiums for individuals in calendar year 1998 from the allocation for fiscal year 1998.

Comment Date: Written comments will be considered if we receive them at the appropriate address, as provided below, no later than 5 p.m. on March 27, 1998.

ADDRESSES: Mail written comments (one original and three copies) to the following address: Health Care Financing Administration, Department of Health and Human Services, Attention: HCFA–2005–NC, P.O. Box 7517, Baltimore, MD 21207–0517, or

If you prefer, you may deliver your written comments (one original and three copies to one of the following addresses:

Room 309–G, Hubert H. Humphrey Building, 200 Independence Avenue, SW, Washington, DC 20201, or

Room C5–09–26, 7500 Security Boulevard, Baltimore, MD 21244–1850.

Because of staffing and resource limitations, we cannot accept comments by facsimile (FAX) transmission. In commenting, please refer to file code HCFA–2005–NC. Comments received timely will be available for public inspection as they are received, generally beginning approximately 3 weeks after the publication of a document, in Room 309-G of the Department's offices at 200 Independence Avenue, SW, Washington DC, on Monday through Friday of each week from 8:30 a.m. to 5 p.m. (phone: (202) 690–7890).

Copies: To order copies of the **Federal Register** containing this document, send your request to: New Orders, Superintendent of Documents, P.O. Box 37194, Pittsburgh, PA 15250–7954. Specify the date of the issue requested and enclose a check or money order payable to the Superintendent of Documents, or enclose your Visa or Master Card number and expiration date. Credit card orders can also be placed by calling the order desk at (202) 512–1800 or by faxing to (202) 512–2250. The cost for each copy is $8.00. As an alternative, you can view and photocopy the **Federal Register** document at most libraries designated as Federal Depository Libraries and at many other public and academic libraries throughout the country that receive the **Federal Register**.

This **Federal Register** document is also available from the **Federal Register** online database through GPO Access, a service of the U.S. Government Printing Office. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http:/ /www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest (no password required). Dial-in users should use communications software and modem to call (202) 512-1661; type swais, then login as guest (no password required).

FOR FURTHER INFORMATION CONTACT: Miles McDermott, (410) 786–3722

SUPPLEMENTARY INFORMATION:

I. Background

Section 1902 of the Social Security Act (the Act) sets forth the requirements for State plans for medical assistance. Prior to August 5, 1997, section 1902(a)(10)(E) of the Act specified that the State Medicaid plan must provide for Medicare cost-sharing for three eligibility groups of low-income Medicare beneficiaries. These three groups included qualified Medicare beneficiaries (QMBs), specified low-income Medicare beneficiaries (SLMBs), and qualified disabled and working individuals (QDWIs).

A QMB is an individual entitled to Medicare Part A with income at or below the Federal poverty line and resources below $4,000 for an individual and $6,000 for a couple. A SLMB is an individual who meets the QMB criteria, except that his or her income is between a State established level (at or below the Federal poverty line) and 120 percent of the Federal poverty line. A QDWI is an individual who is entitled to enroll in Medicare Part A, whose income does not exceed 200 percent of the Federal poverty line for a family of the size involved, whose resources do not exceed twice the amount allowed under the Supplementary Security Income (SSI) program, and who is not otherwise eligible for Medicaid. The definition of Medicare cost-sharing at section 1905(p)(3) of the Act includes payment for premiums for Medicare Part B.

Section 4732 of the Balanced Budget Act of 1997 (BBA), enacted on August 5, 1997, amended section 1902(a)(10)(E) of the Act to require States to provide for Medicaid payment of the Medicare Part B premiums for two additional eligibility groups of low-income Medicare beneficiaries, referred to as qualifying individuals (QIs). Specifically, a new section 1902(a)(10)(E)(iv)(I) of the Act is added, under which States must pay the full amount of the Medicare Part B premium for selected qualifying individuals who would be QMBs but for the fact that their income level is at least 120 percent but less than 135 percent of the Federal poverty line for a family of the size involved. These individuals cannot otherwise be eligible for medical assistance under the approved State Medicaid plan.

The second group of QIs, added under section 1902(a)(10)(E)(iv)(II) of the Act, includes Medicare beneficiaries who would be QMBs except that their income is between 135 percent and 175 percent of the Federal poverty line for a family of the size involved, who are not otherwise eligible for Medicaid under the approved State plan. These QIs are eligible for a portion of Medicare cost-sharing consisting only of a percentage of the increase in the Medicare Part B premium attributable to the shift of Medicare home health coverage from Part A to Part B (as provided in section 4611 of the BBA).

The BBA also added a new section 1933 to the Act to provide for Medicaid payment of Medicare Part B premiums for QIs. (The previous section 1933 is redesignated as section 1934.) Section 1933(a) specifies that a State plan must provide, through a State plan amendment, for medical assistance to pay for the cost of Medicare cost-sharing on behalf of qualifying individuals who are selected to receive assistance.

Section 1933(b) of the Act sets forth the rules that States must follow in selecting QIs and providing payment for Medicare Part B premiums. Specifically, the State must permit all qualifying individuals to apply for assistance and must select individuals on a first-come, first-served basis (that is, the State must select QIs in the order in which they apply). Under section 1933(b)(2)(B) of the Act, in selecting persons who will receive assistance in years after 1998, States must give preference to those individuals who received assistance as QIs, QMBs, SLMBs, or QDWIs in the last month of the previous year and who continue to be (or become) QIs. Under section 1933(b)(4), persons selected to receive assistance in a calendar year are entitled to receive assistance for the remainder of the year, but not beyond, as long as they continue to qualify. The fact that an individual is selected to receive assistance at any time during the year does not entitle the individual to continued assistance for any succeeding year. Because the State's allotment is limited by law, section 1933(b)(3) of the Act provides that the State must limit the number of QIs so that the amount of assistance provided during the year is approximately equal to the State's allotment for that year.

VOL 63 ISS 16 JA 26 1998 UMI

Section 1933(c) of the Act limits the total amount of Federal funds available for payment of Part B premiums each fiscal year and specifies the formula that is to be used to determine an allotment for each State from this total amount. For States that execute a State plan amendment in accordance with section 1933(a) of the Act, a total of $1.5 billion is allocated over 5 years as follows: $200 million in FY 1998; $250 million in FY 1999; $300 million in FY 2000; $350 million in FY 2001; and $400 million in FY 2002.

The Federal matching rate for Medicaid payment of Medicare Part B premiums for qualifying individuals is 100 percent for expenditures up to the amount of the State's allotment. No Federal matching funds are available for expenditures in excess of the State allotment amount. Administrative expenses associated with the payment of Medicare Part B premiums for QIs remain at the 50 percent matching level and are not part of the State's allotment.

The amount appropriated for each fiscal year is to be allocated among States according to the formula set forth in section 1933(c)(2) of the Act. The formula provides for an amount to each State that is to be based on each State's share of the Secretary's estimate of the ratio of: (1) an amount equal to the sum of (a) twice the total number of individuals who meet all but the income requirements for QMBs, whose incomes are at least 120 percent but less than 135 percent of the Federal poverty line, and who are not otherwise eligible for Medicaid, and (b) the total number of individuals in the State who meet all but the income requirements for QMBs, whose incomes are at least 135 percent but less than 175 percent of the Federal poverty line, and who are not otherwise eligible for Medicaid, to (2) the sum of all of these individuals under item (1) for all eligible States.

II. Provisions of this Notice

This notice announces the availability of individual State allotments for Federal fiscal year 1998 for the Medicaid payment of Medicare Part B premiums for qualifying individuals identified under sections 1902(a)(10)(E)(iv) (I) and (II) of the Act.

In this notice, we are not applying precisely the statutory formula to determine the individual State allotments. A precise application of the allocation formula in the statute would require us to determine State-specific estimates of the number of individuals who:

- Are entitled to Medicare Part A;
- Have incomes in the poverty level ranges specified;
- Have assets not exceeding twice the amount allowed under the SSI program; and
- Would not be eligible for Medicaid but for the provisions of section 1902(a)(10)(E) of the Act regarding QIs.

Section 4732(c)(2) of the BBA allows HCFA to take an estimate of the ration of the relevant numbers. We have not been able to locate any available current data that would permit us to directly produce the estimates specified in the statute. As an alternative to direct measurement, we believe that estimates might be derived from models of income, assets, and State Medicaid eligibility. Estimates could be constructed using available data sources; however such an approach would be very time-consuming and resource-intensive and may still not produce credible State-level estimates. Consequently, we are approximating the required estimates by using data from the U.S. Census Bureau on the number of individuals who, according to its March Current Population Survey (CPS), are Medicare beneficiaries, have incomes in the appropriate ranges, and are not enrolled in Medicaid.

In order to reduce the variability of State-level estimates derived from CPS data, we have used a moving average of the most recent 3 years of available data. For the FY 1998 allotments shown in the table below, we have averaged CPS data for the years 1994 through 1996. Specifically, the Federal fiscal year 1998 allotments have been calculated as follows:

A_T=Total amount to be allocated

$M1_i$=3-year average of the number of Medicare beneficiaries in state i who are not enrolled in Medicaid and whose incomes are at least 120 percent but less than 135 percent of Federal poverty line

$M2_i$=3-year average of the number of Medicare beneficiaries in State i who are not enrolled in Medicaid and whose incomes are at least 135 percent but less than 175 percent of Federal poverty line.

Then, the allotment reserved for State *i* is determined by the following formula:

$$A_i = \left[\frac{2 \cdot M1_i + M2_i}{\sum_j \left(2 \cdot M1_j + M2_j\right)}\right] \cdot A_T.$$

The resulting allotments are shown by State in the table below.

ESTIMATED STATE ALLOTMENTS FOR MEDICAID PAYMENTS OF MEDICARE PART B PREMIUMS

III. Waiver of Advance Public Comment and 30-Day Delay in Effective Date

We ordinarily publish an advance notice in the **Federal Register** for a notice containing substantive rules to provide a period for public comment. However, we may waive that procedure if we find good cause that notice and comment are impractical, unnecessary, or contrary to the public interest. In addition, we also normally provide a delay of 30 days in the effective date. However, if adherence to this procedure would be impractical, unnecessary, or contrary to public interest, we may waive the delay in the effective date.

We are adopting this notice as a final with comment period without publication of a proposed notice because of the need to notify individual States in advance of the limitations with Federal matching funds in their Medicaid expenditures for payment of Medicare Part B premiums for qualifying individuals. Publication of a proposed notice with a 60-day comment period prior to publication of a final notice would, we believe, be contrary to the public interest. The law is specific regarding the total amount available for Medicare Part B premiums for qualifying individuals and the formula that is to be used to determine individual State allotments. Therefore, we find good cause to waive issuance of a proposed notice and to issue the notice as final.

Also, because States can begin making payments for Medicare Part B premiums for qualifying individuals as early as January 1, 1998, we are not making the effective date of the notice the usual 30 days after publication. For the reasons discussed above, we find good cause to waive the usual 30-day delay.

Although we are publishing this as a final notice, we are providing a 60-day period for public comment. Because of the large number of items of correspondence we normally receive, we are not able to acknowledge or respond to the comments individually. However, if we decide that changes are necessary as a result of our consideration of timely comments, we will issue an additional notice and respond to the comments in that notice.

IV. Effect of the Contract with America Advancement Act

Normally, under 5 U.S.C. section 801, as added by section 251 of Public Law 104–121, the effective date of a major rule is delayed 60 days for Congressional review. This has been determined to be a major rule under 5 U.S.C. section 804(2). However, as indicated in section III of this notice with comment period, we have found that good cause exists to dispense with prior notice and comment procedures since they are unnecessary and impracticable under the circumstances. Pursuant to 5 U.S.C. section 808(2), a rule shall take effect at such time as the Federal agency promulgating the rule determines if it finds, for good cause, that prior notice and comment procedures are unnecessary or impracticable. Accordingly, under the exemption provided in 5 U.S.C. section

VOL 63 ISS 16 JA 26 1998 UMI

808(2), this notice with comment period is effective January 1, 1998, for allotments for payments of Medicare Part B premiums for individuals in calendar year 1998 from the allotment for fiscal year 1998.

V. Regulatory Impact Statement

We have examined the impact of this notice with comment period as required by Executive Order 12866 and the Regulatory Flexibility Act (RFA) (Pub. L. 96–354). Executive Order 12866 directs agencies to assess all costs and benefits of available regulatory alternatives and, when regulation is necessary, to select regulatory approaches that maximize net benefits (including potential economic, environmental, public health and safety effects; distributive impacts; and equity). The RFA requires agencies to analyze options for regulatory relief for small businesses. For purposes of the RFA, States and individuals are not considered to be small entities.

This notice with comment period implements provisions of the Balanced Budget Act of 1997 to allocate, among the States, Federal funds to provide Medicaid payment for Medicare Part B premiums for two additional groups of low-income Medicare beneficiaries. The total amount of Federal funds available during a Federal fiscal year and the formula for determining individual State allotments are specified in the law. We have applied the statutory formula for the State allotments except for the use of specified data. Because the data specified in the law were not currently available, we have used comparable data from the U.S. Census Bureau on the number of possible qualifying individuals in the States.

We believe that the statutory provisions implemented in this notice with comment period will have a positive effect on States and individuals. Federal funding at the 100 percent matching rate is available for Medicare cost-sharing for Medicare Part B premium payments for qualifying individuals and a greater number of low-income Medicare beneficiaries will be eligible to have their Medicare Part B premiums paid under Medicaid.

Section 1102(b) of the Social Security Act requires us to prepare a regulatory impact analysis for any notice that may have a significant impact on the operations of a substantial number of small rural hospitals. Such an analysis must conform to the provisions of section 603 of the RFA. For purposes of section 1102(b) of the Act, we define a small rural hospital as a hospital that is located outside a Metropolitan Statistical Area and has fewer than 50 beds.

We are not preparing analyses for either the RFA or section 1102(b) of the Act because we have determined and certify that this notice with comment period will not have a significant economic impact on a substantial number of small entities or a significant impact on the operations of a substantial number of small rural hospitals.

In accordance with the provisions of Executive Order 12866, this notice with comment period was reviewed by the Office of Management and Budget.

Authority: Sections 1902(a)(10), 1933 of the Social Security Act (42 U.S.C. 1396a), and Public Law 105–33.

BILLING CODE 4120–01–P

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Institute on Drug Abuse; Notice of Closed Meetings

Pursuant to Section 10(d) of the Federal Advisory Committee Act, as amended (5 U.S.C. Appendix 2), notice is hereby given of the following National Institute on Drug Abuse (NIDA) Initial Review Group and Special Emphasis Panel meetings.

Purpose/Agenda: To review and evaluate grant applications.

Name of Committee: Neurophysiology and Neuroanatomy Research Subcommittee.
Date: February 9–11, 1998.
Time: 8:30 a.m.
Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.
Contact Person: Gamil Debbas, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–2620.

Name of Committee: Human Development Research Subcommittee.
Date: February 10, 1998.
Time: 9:00 a.m.
Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.
Contact Person: Kesinee Nimit, M.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–9042.

Name of Committee: Basic Behavioral Science Research Subcommittee.
Date: February 10–12, 1998.
Time: 8:30 a.m.
Place: Key Bridge Marriott Hotel, 1401 Lee Highway, Arlington, VA 22209.
Contact Person: Mark Swieter, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–42, Telephone (301) 443–2620.

Name of Committee: Epidemiology and Prevention Research Subcommittee.
Date: February 10–12, 1998.
Time: 8:30 a.m.
Place: Bethesda Marriott Hotel, 5151 Pooks Hill Road, Bethesda, MD 20814.
Contact Person: Raquel Crider, Ph.D., Scientific Review Administrator, Office Of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–9042.

Name of Committee: Molecular, Cellular and Chemical Neurobiology Research Subcommittee.
Date: February 10–12, 1998.
Time: 8:30 a.m.
Place: Ritz-Carlton Hotel at Pentagon City, 250 South Hayes Street, Arlington, VA 22202.
Contact Person: Rita Liu, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–9042.

Name of Committee: NIDA Special Emphasis Panel (Molecular, Cellular and Chemical Neurobiology).
Date: February 12, 1998.
Time: 9:00 a.m.
Place: Ritz-Carlton Hotel at Pentagon City, 250 South Hayes Street, Arlington, VA 22202.
Contact Person: Mary C. Custer, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–2620.

Name of Committee: Neuropharmacology Research Subcommittee.
Date: February 17–19, 1998.
Time: 8:30 a.m.
Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.
Contact Person: Syed Husain, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–2620.

Name of Committee: Treatment Research Subcommittee.
Date: March 2–4, 1998.
Time: 8:30 a.m.
Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.
Contact Person: Kesinee Nimit, M.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–9042.

Name of Committee: NIDA Special Emphasis Panel (Training and Career Development).
Date: March 2–4, 1998.
Time: 8:30 a.m.

Place: Residence Inn by Marriott, 7335 Wisconsin Avenue, Bethesda, MD 20814.
Contact Person: Mark Swieter, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–42, Telephone (301) 443–2620.

Name of Committee: Health Service Research Subcommittee.
Date: March 3–4, 1998.
Time: 8:30 a.m.
Place: Key Bridge Marriott Hotel, 1401 Lee Highway, Arlington, VA 22209.
Contact Person: Raquel Crider, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–9042.

Name of Committee: AIDS Biomedical and Clinical Research Subcommittee.
Date: March 10–11, 1998.
Time: 8:30 a.m.
Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.
Contact Person: Gamil Debbas, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–2620.

Name of Committee: NIDA Special Emphasis Panel (Centers).
Date: March 17, 1998.
Time: 8:30 a.m.
Place: Double Tree Hotel, 1750 Rockville Pike, Rockville, MD 20852.
Contact Person: Mary C. Custer, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–22, Telephone (301) 443–2620.

Name of Committee: AIDS Behavioral Research Subcommittee.
Date: March 17–18, 1998.
Time: 8:30 a.m.
Place: Sheraton-National Hotel, 900 South Orme Street, Arlington, VA 22204.
Contact Person: Khursheed Asghar, Ph.D., Scientific Review Administrator, Office of Extramural Program Review, National Institute on Drug Abuse, 5600 Fishers Lane, Room 10–42, Telephone (301) 443–2620.

The meetings will be closed in accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5, U.S.C. The applications and/or proposals and the discussions could reveal confidential trade secrets or commercial property such as patentable material and personal information concerning individuals associated with the applications and/or proposals, disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

National Library of Medicine; Notice of Meeting of the Biomedical Library Review Committee

Pursuant to Pub. L. 92–463, notice is hereby given of the meeting of the Biomedical Library Review Committee on March 4–5, 1998, convening at 8:30 a.m. in the Board Room of the National Library of Medicine, Building 38, 8600 Rockville Pike, Bethesda, Maryland.

The meeting on March 4 will be open to the public from 8:30 a.m. to approximately 11 a.m. for the discussion of administrative reports and program developments. Attendance by the public will be limited to space available. Individuals who plan to attend and need special assistance, such as sign language interpretation or other reasonable accommodations, should contact Dr. Sharee Pepper at 301–496–4253 two weeks before the meeting.

In accordance with provisions set forth in secs. 552b(c)(4) and 552b(c)(6), Title 5 U.S.C., and sec. 10(d) of Pub. L. 92–463, the meeting on March 4, will be closed to the public for the review, discussion, and evaluation of individual grant applications from 11 a.m. to approximately 5 p.m., and on March 5 from 8:30 a.m. to adjournment. These applications and the discussion could reveal confidential trade secrets or commercial property, such as patentable material, and personal information concerning individuals associated with the applications, disclosure of which would constitute a clearly unwarranted invasion of person privacy.

Dr. Sharee Pepper, Health Scientist Administrator, Extramural Programs, National Library of Medicine, 8600 Rockville Pike, Bethesda, Maryland 20894, telephone number: 301–496–4253, will provide summaries of the meeting, rosters of the committee members, and other information pertaining to the meeting.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration

Agency Information Collection Activities: Submission for OMB Review; Comment Request

Periodically, the Substance Abuse and Mental Health Services Administration (SAMHSA) will publish a list of information collection requests under OMB review, in compliance with the Paperwork Reduction Act (44 U.S.C.

VOL 63 ISS 16 JA 26 1998 UMI

Chapter 35). To request a copy of these documents, call the SAMHSA Reports Clearance Officer on (301) 443–0525.

(1) Substance Abuse Prevention and Treatment Block Grant—45 CFR Part 96; Extension With No Change

This interim final rule provides guidance to States regarding the Substance Abuse Prevention and Treatment Block Grant legislation. The rule implements the reporting and recordkeeping requirements of 42 U.S.C. 300x 21–35 & 51–64 by specifying the content of the States' annual report on and application for block grant funds. The reporting burden hours will be counted towards the total burden for the FY 1999 SAPT Block Grant Application Format for which separate OMB approval will be requested. The total annual reporting and recordkeeping burden estimate is shown below:

	No. of respondents	Responses/respondent	Hours/response	Total hour burden
Reporting Burden—45 CFR 96				
Annual Report:				
96.122(f)	60	1	152	9120
96.134(d)	60	1	16	960
State Plan:				
96.122(g)	60	1	162	9720
96.124(c)(1)	60	1	40	2400
96.127(b)	60	1	8	480
96.131(f)	60	1	8	480
96.133(a)	60	1	80	4800
Waivers [1]:				
96.132(d)	60	1	16	960
96.134(b)	60	1	40	2400
96.135(d)	60	1	8	480
Total Reporting Burden	60	1	530	31,800
Recordkeeping Burden—45 CFR 96				
96.129(a)(13)	60	1	16	960

[1] For the purpose of burden calculation, it is assumed that all States would apply for each waiver. In reality it expected that only a small number will apply.

(2) Tobacco Regulation for Substance Abuse Prevention and Treatment—45 CFR 96; Extension With No Change

This final rule provides guidance to States regarding compliance with section 1926 of the Public Health Service Act related to sale and distribution of tobacco to minors. The final rule implements section 1926 by specifying the content of the State's annual report on the provisions of the rule and application for block grant funds. The reporting burden shown below represents the average total hours to assemble, format, and produce the block grant provision on minors' access to tobacco, in accordance with the requirements of 45 CFR 96. These burden hours will be counted towards the total burden for the FY 1999 SAPT Block Grant Application Format for which separate approval will be requested.

	No. of respondents	Responses/respondent	Hours/response	Total hour burden
Annual Report:				
96.122(f)	59	1	0	[1]0
96.130(e)(1–3)	59	1	15	885
State Plan:				
96.122(g)(21)	0	0	0	[2]0
96.130(e)(4, 5)	59	1	14	826
96.130(g)	59	1	5	295
Total			34	2,006

[1] This section describes requirements for the first applicable year which has passed for all States. Therefore, no burden is associated with this section.
[2] This section duplicates the information collection language in section 96.130(e). The burden is shown for 96.130(e).

Written comments and recommendations concerning the proposed information collection should be sent on or before February 25, 1998 to: Daniel Chenok, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: January 19, 1998.

Richard Kopanda,

Executive Officer, SAMHSA.

BILLING CODE 4162–20–M

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Substance Abuse and Mental Health Services Administration, Agency Information Collection Activities Under Emergency Review by the Office of Management and Budget (OMB)

The Substance Abuse and Mental Health Services Administration has submitted the following request (see below) for emergency OMB review under the Paperwork Reduction Act (44 U.S.C. Chapter 35). OMB approval has been requested by February 1, 1998. A copy of the information collection plans may be obtained by calling the SAMHSA Reports Clearance Officer on (301) 443–0525.

Title: Questions for Callers to NCADI in Response to ONDCP Media Campaign.

OMB Number: 0930–new.

Frequency: On occasion.

Affected public: Individuals.

Number of respondents: 36,750.

Estimated time per respondent: 40 seconds.

Total burden hours: 404.

In order to monitor the volume of calls to the National Clearing House on Drug and Alcohol Information (NCADI) generated by Phase I of ONDCP's National Youth Anti-Drug Media Campaign, SAMHSA will ask callers to NCADI several questions to determine how the caller got the NCADI number, the age of the caller and whether the caller plans to use requested materials with a child. The information collected will help NCADI prepare for the nationwide phase of the ONDCP campaign.

Written comments and recommendations concerning the proposed information collection should be sent within one week of this notice to: Daniel Chenok, Office of Information and Regulatory Affairs, Human Resources and Housing Branch, Office of Management and Budget, New Executive Office Building, Room 10235, Washington, DC 20503.

Dated: January 19, 1998.

Richard Kopanda,

Executive Officer, SAMHSA.

BILLING CODE 4162–20–M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

[Docket No. 4281–N–01]

Delegation of Authority

AGENCY: Office of the Secretary, HUD.

ACTION: Notice of delegation of authority.

SUMMARY: This notice delegates to the Assistant Secretary for Community Planning and Development the Secretary's authority to designate two additional urban Empowerment Zones, pursuant to 26 U.S.C. § 1391, as amended by Title IX, Subtitle F, Chapter 1, Section 951 (Additional Empowerment Zones) of the Taxpayer Relief Act of 1997, Public Law 105–34, 111 Stat. 885, approved August 5, 1997.

EFFECTIVE DATE: January 7, 1998.

FOR FURTHER INFORMATION CONTACT: Michael T. Savage, Deputy Director, Office of Economic Development, Department of Housing and Urban Development, 451 Seventh Street, S.W., Room 7136, Washington, D.C. 20410–0400, Telephone Number (202) 708–2290. Persons with hearing or speech impairments may also utilize HUD's TTY Number at (202) 708–1455 or the Federal Information Relay Service's TTY Number at (800) 877–8339. Aside from the "800" number, the telephone and TTY numbers listed are not toll-free.

SUPPLEMENTARY INFORMATION: Title XIII, Subchapter C, Part I, Section 1391 (Empowerment Zones, Enterprise Communities and Rural Development Investment Areas) of the Omnibus Budget Reconciliation Act of 1993, Public Law 103–66, 107 Stat. 543, approved August 10, 1993, codified as 26 U.S.C. § 1391, *et seq.*, authorized the designation of an aggregate of nine Empowerment Zones and 95 Enterprise Communities. Under this Act, the Secretary of Housing and Urban Development was authorized to designate up to six urban Empowerment Zones and up to 65 urban Enterprise Communities, and the Secretary of Agriculture was authorized to designate up to three rural Empowerment Zones and up to 30 rural Enterprise Communities.

On December 21, 1994, President Clinton announced the urban areas that were designated by the department of Housing and Urban Development as Empowerment Zones and Enterprise Communities, and the rural areas that were designated by the Department of Agriculture as Empowerment Zones and Enterprise Communities. On that date, President Clinton also announced the designation of two Supplemental Empowerment Zones and four Enhanced Enterprise Communities. In a notice published in the **Federal Register** on February 23, 1995 at 60 FR 10018, the Department of Housing and Urban Development announced the jurisdictions designated as urban Empowerment Zones, urban Supplemental Empowerment Zones, urban Enhanced Enterprise Communities, and urban Enterprise Communities.

Title IX, Subtitle F, Chapter 1, Section 951 (Additional Empowerment Zones) of the Taxpayer Relief Act of 1997, Public Law 105–34, 111 Stat. 885, approved August 5, 1997, amended 26 U.S.C. § 1391 to allow the Secretary of Housing and Urban Development to designate two additional urban Empowerment Zones. This Act also increased from 750,000 to one million the maximum aggregate population of all urban Empowerment Zones. The designation of the two additional urban Empowerment Zones is to be made within 180 days of the August 5, 1997 enactment of the Act, and will not take effect before January 1, 2000.

Accordingly, the Secretary delegates authority as follows:

Section A. Authority Delegated

The Secretary of the Department of Housing and Urban Development delegates to the Assistant Secretary for Community Planning and Development the authority to designate two additional urban Empowerment Zones, pursuant to 26 U.S.C. § 1391, as amended by Title IX, Subtitle F, Chapter 1, Section 951 (Additional Empowerment Zones) of the Taxpayer Relief Act of 1997, Public Law 105–34, 111 Stat. 885, approved August 5, 1997.

Section B. Authority Excepted

The authority delegated under Section A does not include the power to sue or be sued.

Authority: Section 7(d), Department of Housing and Urban Development Act, 42 U.S.C. § 353(d).

Dated: January 7, 1998.

Andrew Cuomo,

Secretary of Housing and Urban Development.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[WO–220–1060–00–24 1A]

Wild Horse and Burro Advisory Board; Meeting

AGENCY: Bureau of Land Management, Interior.

ACTION: Announcement of meeting.

SUMMARY: The Bureau of Land Management (BLM) announces that the Wild Horse and Burro Advisory Board will conduct a meeting on matters pertaining to management and protection of wild, free-roaming horses and burros on the Nation's public lands.

DATES: The advisory board will meet on February 9, 1998, from 7:30 a.m. to 5:30 p.m. local time. On February 10, 1998,

VOL 63 ISS 16 JA 26 1998 UMI

the advisory board will participate in a field trip from 5:00 a.m. to 4:30 p.m. local time.

Submit written comments no later than close of business February 13, 1998.

ADDRESSES: The advisory board will meet in the Reno Hilton, Reno, Nevada.

Send written comments to Bureau of Land Management, WO–610, Mail Stop 406 LS, 1849 C Street, NW, Washington, DC 20240. See **SUPPLEMENTARY INFORMATION** section for electronic access and filing address.

FOR FURTHER INFORMATION CONTACT: Mary Knapp, Wild Horse and Burro Public Affairs Specialist, (202) 452–5176. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service at 1–800–877–8339 between 8:00 a.m. and 4:00 p.m. Eastern time, Monday through Friday, excluding Federal holidays.

SUPPLEMENTARY INFORMATION:

I. Public Meeting

Under the authority of 43 CFR part 1784, the Wild Horse and Burro Advisory Board advises the Secretary of the Interior, the Director of the BLM, the Secretary of Agriculture, and the Chief, Forest Service, on matters pertaining to management and protection of wild, free-roaming horses and burros on the Nation's public lands. The tentative agenda for the meeting is:

Monday, February 9, 1998

—Welcome by BLM Nevada State Director Bob Abbey and BLM Director Pat Shea;
—Fact-finders reports on specific issues related to the wild horse and burro program;
—Discussion of science issues;
—Updates on several reports reviewing the wild horse and burro program;
—Report on the adoption program; and
—Presentation of comments by members of the public.

Tuesday, February 10, 1998

—Field trip to the Kama Mountain Herd Management Area to observe a gather and the immuno-contraception process.

The meeting is open to the public. The advisory board will make detailed minutes of the meeting. BLM will make the minutes available to interested parties who contact the individual listed under **FOR FURTHER INFORMATION CONTACT.**

Under the Federal advisory committee management regulations (41 CFR 101–6.1015(b)(2)), in exceptional circumstances an agency may give less than 15 days notice of a committee meeting if the reasons for doing so are included in the committee meeting notice published in the **Federal Register**. In this case, BLM made commitments with regard to scheduling the first meeting of the advisory committee based on the approval of the charter within a time frame. Delays in obtaining approval of the charter, which required the signature of two Cabinet secretaries, will result in publication of the meeting notice 14 days prior to the committee meeting.

II. Public Comment Procedures

Members of the public may make oral statements to the advisory board on February 9, 1998 at the appropriate point in the agenda, which is anticipated to occur at 3:30 p.m. local time. Persons wishing to make statements should register with BLM by noon on February 9, 1998, at the meeting location. Depending on the number of speakers, the advisory board may limit the length of presentations. Speakers should address specific wild horse and burro-related topics listed on the agenda. Speakers must submit a written copy of their statement to the address listed in the **ADDRESSES** section or bring a written copy to the meeting.

Participation in the advisory board meeting is not a prerequisite for submittal of written comments. BLM invites written comments from all interested parties. Your written comments should be specific and explain the reason for any recommendation. BLM appreciates any and all comments, but those most useful and likely to influence decisions on management and protection of wild horses and burros are those that are either supported by quantitative information or studies or those that include citations to and analysis of applicable laws and regulations. Except for comments provided in electronic format, commenters should submit two copies of their written comments where feasible. BLM will not necessarily consider comments received after the time indicated under the **DATES** section or at locations other than that listed in the **ADDRESSES** section.

In the event there is a request under the Freedom of Information Act (FOIA) for a copy of your comments, we intend to make them available in their entirety, including your name and address (or your e-mail address if you file electronically). However, if you do not want us to release your name and address (or e-mail address) in response to a FOIA request, you must state this prominently at the beginning of your comment. We will honor your wish to the extent allowed by law. All submissions from organizations or businesses, and from individuals identifying themselves as representatives or officials of organization or businesses, will be released in their entirety, including names and addresses (or e-mail addresses).

Electronic Access and Filing Address

Commenters may transmit comments electronically via the Internet to: mknapp@wo.blm.gov. Please submit comments as an ASCII file and void the use of special characters or encryption. Please include the identifier "WH&B" in the subject of your message and your name and address in the body of your message.

Dated: January 22, 1998.

Pat Shea,

Director, Bureau of Land Management.

DEPARTMENT OF THE INTERIOR

Bureau of Land Management

[OR–020–05–1430–01: G–0078]

Realty Action; Oregon

AGENCY: Bureau of Land Management (BLM), DOI.

ACTION: Notice of Realty Action, Lease of Public Land in Harney County, Oregon.

SUMMARY: The following described public land is being considered for lease under Section 302 of the Federal Land Policy and Management Act of 1976, (43 U.S.C. 1732), at not less than fair market value.

Willamette Meridian

T.20S., R.29E.,
Sec. 34, S½NE¼SE¼SE¼SW¼, SE¼SE¼SE¼SW¼.

The area described aggregates 3.75 acres, more or less, in Harney County, Oregon.

The purpose of the lease would be to authorize a longstanding occupancy use. The term of the proposed lease would be for the lifetime of the proponents, Alan and Ethel Bossuot, who own improvements on the property. The improvements include a cabin, outbuildings, a bridge and corrals, which have existed on the property for at least 40 years. The improvements were originally placed on public land inadvertently by the Bossuots and their predecessors. For these reasons, the land would not be offered for lease on a competitive basis.

The lease would be subject to Federal, State, and local ordinances applicable to the premises in addition to other conditions deemed necessary to protect the public interest.

The proposal conforms with the Three Rivers Resource Management Plan. Based on a review of this plan and other factors, the land has been determined suitable for lease under the above cited authority.

DATES: For a period of 45 days from the date of publication of this notice in the **Federal Register** interested persons may submit comments regarding the proposed lease to the Three Rivers Resource Area Manager at the address described below. Comments will be considered in the NEPA analysis to be prepared for this proposal.

ADDRESSES: Comments should be submitted to the Three Rivers Resource Area Manager, HC 74–12533, Hwy 20 West, Hines, Oregon 97738.

FOR FURTHER INFORMATION CONTACT: Detailed information concerning this proposal is available from Craig M. Hansen, Area Manager or Skip Renchler, Realty Specialist, Three Rivers Resource Area at the above address, phone (541) 573–4400.

Dated: January 14, 1998.

Craig M. Hansen,

Area Manager.

National Park Service

Whiskeytown Unit, Whiskeytown-Shasta-Trinity National Recreation Area; Operation of Marina Services

SUMMARY: The National Park Service will shortly be releasing a concession Prospectus to continue the operation of marina services at the Whiskeytown Unit of the Whiskeytown-Shasta-Trinity National Recreation Area located in northern California. The existing business includes related services such as food, merchandise, and camping and is located in two separate sections of the Whiskeytown Unit. Most services are provided seasonally from approximately the last week in May to the first week in September. The annual gross receipts average about $500,000. The new contract will be for 10 years and will require an improvement program estimated to cost about $178,800. There is an existing concessioner that has operated satisfactorily under the existing contract and has a right of preference in renewal.

SUPPLEMENTARY INFORMATION: The cost for purchasing a Prospectus is $30.00. Parties interested in obtaining a copy should send a check or money order, NO CASH, payable to "National Park Service" to the following address: National Park Service, Pacific Great Basin Support Office, Office of Concession Program Management, 600 Harrison Street, Suite 600, San Francisco, California 94107–1372, "Mail Room Do Not Open".

Please include a mailing address indicating where to send the prospectus. Inquiries may be directed to Ms. Teresa Jackson, Office of Concession Program Management at (415) 427–1369.

Dated: January 12, 1998.

John J. Reynolds,

Regional Director, Pacific West Region.

Draft Environmental Impact Statement; Backcountry and Wilderness Plan for Joshua Tree National Park, California; Extension of Public Comment Period

SUMMARY: Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969 (Pub. L. 91–190 as amended), the National Park Service, Department of the Interior, has prepared a Draft Environmental Impact Statement assessing alternatives for, and potential impacts of, a proposed Backcountry and Wilderness Management Plan for Joshua Tree National Park, California. In deference to public interest expressed to date from local governmental agencies, organizations, and other interested parties, the original 90 day public comment period has been extended for one month. Written comments on the draft document must now be received or post-marked not later than February 28, 1998, and should be directed to the Superintendent, Joshua Tree National Park, 74485 National Park Drive, Twentynine Palms, California, 92277.

Dated: January 15, 1998.

Subsistence Resource Commission Meeting

AGENCY: National Park Service, Interior.

ACTION: Subsistence Resource Commission meeting.

SUMMARY: The Superintendent of Denali National Park and the Chairperson of the Denali Subsistence Resource Commission announce a forthcoming meeting of the Denali National Park Subsistence Resource Commission.

The following agenda items will be discussed:

(1) Call to order by the Chair.
(2) Roll call and confirmation of quorum.
(3) Superintendent's welcome and introductions.
(4) Approval of minutes of last meeting.
(5) Additions and corrections to the agenda.
(6) New Business:
  a. Review federal subsistence programs.
  b. Individual customary and traditional determination process.
  c. Natural and cultural resource studies.
  d. Agency reports.
(7) Old Business:
  a. Draft Subsistence Management Plan.
  b. ATC access.
  c. Harvest reports.
(8) Public and other agency comments.
(9) Set time and place of next SRC meeting.
(10) Adjournment.

DATES: The meeting will be held Friday, February 13, 1998. The meeting will begin at 9 a.m. and end at 6 p.m.

LOCATION: The meeting will be held at North Star Inn, Conference Room, Healy, Alaska.

FOR FURTHER INFORMATION CONTACT: Steve Martin, Superintendent or Hollis Twitchell, Subsistence Coordinator, Denali National Park, PO Box 9, Denali Park, Alaska 99755. Phone (907) 683–2294.

SUPPLEMENTARY INFORMATION: The Subsistence Resource Commissions are authorized under Title VIII, Section 808, of the Alaska National Interest Lands Conservation Act, Public Law 96–487, and operate in accordance with the provisions of the Federal Advisory Committees Act.

Paul R. Anderson,

Regional Director.

INTERNATIONAL TRADE COMMISSION

[Investigation No. 337–TA–74]

Certain Rotatable Photograph and Card Display Units, and Components Therefor; Notice of Rescission of Exclusion Order

AGENCY: U.S. International Trade Commission.

ACTION: Notice.

SUMMARY: Notice is hereby given that the U.S. International Trade Commission has rescinded the exclusion order previously issued in the above-captioned investigation.

FOR FURTHER INFORMATION CONTACT: T. Spence Chubb, Supervisory Attorney, Office of Unfair Import Investigations, U.S. International Trade Commission, telephone (202) 205–2575.

AUTHORITY: The authority for rescinding the exclusion order in this investigation is contained in section 337 of the Tariff Act of 1930, as amended, 19 U.S.C. 1337, and in § 210.76 of the Commission's rules of practice and procedure, 19 CFR 210.76 (1997).

SUPPLEMENTARY INFORMATION: The Commission issued its exclusion order in this investigation on November 21, 1980, based upon a finding that section 337 had been violated by several entities. The order directed the exclusion from entry into the United States of products that infringed two U.S. patents, a registered trademark, and a common law trademark. The two patents at issue have since expired. The Commission has recently obtained information that the complainants are no longer in business and have no interest in maintaining the two trademarks that are covered by the exclusion order. Accordingly, the Commission determined under section 337(k)(1), 19 U.S.C. 1337(k)(1), that the conditions that led to the issuance of the exclusion order no longer exist. The Commission has also determined to waive the procedural provisions of 19 CFR 210.76 for rescission of Commission orders.

Copies of the Commission's order and all other nonconfidential documents filed in connection with this investigation are or will be available for inspection during official business hours (8:45 a.m. to 5:15 p.m.) in the Office of the Secretary, U.S. International Trade Commission, 500 E Street, SW., Washington, DC 20436, telephone (202) 205–2000. Hearing-impaired individuals are advised that information on this matter can be obtained by contacting the Commission's TDD terminal at (202) 205–1810. Persons with mobility impairments who will need special assistance in gaining access to the Commission should contact the Office of the Secretary at (202) 205–2000. General information concerning the Commission may also be obtained by accessing its internet server (http://www.usitc.gov or ftp://ftp.usitc.gov).

Issued: January 16, 1998.

By order of the Commission.

Donna R. Koehnke,

Secretary.

Notice of Lodging of Consent Decree Pursuant to the Clean Air Act

In accordance with Departmental policy, 28 CFR 50.7, notice is hereby given that a consent decree in *United States* v. *A. Steiert & Sons, Inc.*, Civ. A. No. 98–0104, was lodged on January 9, 1998, with the United States District Court for the Eastern District of Pennsylvania. The consent decree resolves the claims of the United States under Sections 106(a), 107(a), and 113(g)(2) of the Comprehensive Environmental Response, Compensation, and Liability Act, as amended ("CERCLA"), for reimbursement of response costs incurred at the North Penn Area 2 Superfund Site located in Hatfield Township, Montgomery County, Pennsylvania and for declaratory judgment as to liability that will be binding in actions to recover further response costs related to the Site. The consent decree obligates A. Steiert & Sons, Inc. to pay $58,000 in reimbursement of response costs incurred and to be incurred by EPA in responding to contamination at the Site.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed consent decree. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, D.C., 20530, and should refer to *United States* v. *A. Steiert & Sons, Inc.*, DOJ Ref. # 90–11–3–805A.

The consent decree may be examined at the office of the United States Attorney, 616 Chestnut Street, Philadelphia, Pennsylvania 19106; the Region III Office of the Environmental Protection Agency, 841 Chestnut Street, Philadelphia, PA; and at the Consent Decree Library, 1120 G Street, NW 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the consent decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW, 4th Floor, Washington, D.C. 20005. In requesting a copy please refer to the referenced case and enclose a check in the amount of $7.00 (25 cents per page reproduction cost), payable to the Consent Decree library.

Joel M. Gross,

Chief, Environmental Enforcement Section, Environment and Natural Resources Division.

DEPARTMENT OF JUSTICE

Notice of Consent Decree Under The Clean Water Act

Notice is hereby given that a consent decree in *United States* v. *Atlantic Pipeline Co. And Sun Pipeline Co.* Civil

VOL 63 ISS 16 JA 26 1998 UMI

Action No. 96–583 (W.D. Pa.), was lodged with the United States District Court for the Western District of Pennsylvania on December 30, 1997.

In this action the United States sought civil penalties under Section 311(b)(3) of the Clean Water Act, 33 U.S.C. § 1321(b)(3) for a discharge of gasoline from a pipeline into a pond and unnamed tributary of the West Branch of Richard Run near the Village of Robinson, Pennsylvania in May 1994. The consent decree provides that the defendants will pay a civil penalty of $40,000 to the United States. The defendants have already paid a civil penalty of $40,000 to the Commonwealth of Pennsylvania regarding the subject discharge.

The Department of Justice will accept written comments relating to the proposed Consent Decree for thirty (30) days from the date of publication of this notice. Please address comments to the Assistant Attorney General, Environment and Natural Resources Division, Department of Justice, P.O. Box 7611, Ben Franklin Station, Washington, D.C. 20044 and refer to *United States* v. *Atlantic Pipeline Co. And Sun Pipeline Co.*, DJ Ref. #90–5–1–1–4317.

Copies of the proposed Consent Decree may be examined at the Office of the United States Attorney, Western District of Pennsylvania, 633 U.S. Post Office and Courthouse, Pittsburgh, PA 15219; the Region III Office of the Environmental Protection Agency, 841 Chestnut Building, Philadelphia, Pennsylvania 19107; and at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202) 624–0892. A copy of the Consent Decree may also be obtained in person or by mail at the Consent Decree Library, 1120 G Street, N.W., 4th Floor, Washington, D.C. 20005, (202–624–0892). When requesting a copy by mail, please enclose a check in the amount of $3.75 (twenty-five cents per page reproduction costs) payable to the "Consent Decree Library."

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Notice of Lodging of Consent Decree Pursuant to the Comprehensive Environmental Response, Compensation, and Liability Act

In accordance with Departmental policy, 28 CFR § 50.7, notice is hereby given that a proposed Settlement Order in *United States* v. *City and County of San Francisco, CA, et al.*, No. 97–10030–ST (D. Oregon), was lodged on September 30, 1997, with the United States District Court for the District of Oregon. With regard to the Defendants, the Consent Decree resolves a claim filed by the United States on behalf of the United States Environmental Protection Agency ("EPA") pursuant to the Comprehensive Environmental Response, Compensation and Liability Act, *as amended*, 42 U.S.C. §§ 9601, *et seq.*

The United States entered into the Settlement Order in connection with the Environmental Pacific Corporation Site located in Amity, Yamill County, Oregon, approximately 42 miles southwest of Portland. The Settlement Order provides that the Settling Defendant will reimburse the United States a total of $815.89 for past costs incurred by the United States at the Site.

The Department of Justice will receive, for a period of thirty (30) days from the date of this publication, comments relating to the proposed Settlement Order. Comments should be addressed to the Assistant Attorney General for the Environment and Natural Resources Division, Department of Justice, Washington, DC 20530, and should refer to *United States* v. *City and County of San Francisco, CA, et al.*, DOJ Ref. #90–11–2–1080B.

The proposed Settlement Order may be examined at the office of the United States Attorney, 888 SW. 5th Avenue, Portland, Oregon 97204; the Region 10 office of the Environmental Protection Agency, 1200 Sixth Avenue, Seattle, Washington; and at the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005, (202) 624–0892. A copy of the proposed Consent Decree may be obtained in person or by mail from the Consent Decree Library, 1120 G Street, NW., 4th Floor, Washington, DC 20005. In requesting a copy refer to the referenced case and enclose a check in the amount of $5.75 (25 cents per page reproduction costs), payable to the Consent Decree Library.

BILLING CODE 4410–15–M

DEPARTMENT OF JUSTICE

Federal Bureau of Prisons

Notice of Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Privatized Corrections Contracting Mandate

AGENCY: Federal Bureau of Prisons, Department of Justice.

ACTION: Notice of Intent to Prepare a Draft Environmental Impact Statement (DEIS).

SUMMARY:

Proposed Action: The U.S. Department of Justice, Federal Bureau of Prisons (Bureau) has been given the responsibility for accommodating within the Federal Prison system inmates currently housed by the District of Columbia's Department of Corrections (DCDC). In doing so, the Bureau has been mandated by Congress in the D.C. Revitalization Act to seek private contractors to accommodate a portion of the DCDC's inmate population. Over the next several months, the Bureau will prepare Request for Proposals to be sent to prospective contractors requesting proposals to house in private contract facilities approximately 2,200 DCDC sentenced felons by December 31, 1999 and at least 50 percent of all DCDC sentenced felons by September 30, 2003.

To ensure compliance with the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau is undertaking preparation of a Program Draft Environmental Impact Statement (DEIS). Topics to be studied as part of the DEIS include, but are not limited to: services, cultural resources, land uses, social and economic factors, hazardous materials, air and noise quality, among others. In furtherance of NEPA, the Bureau will host a Scoping Meeting which all interested persons are invited to attend. The purpose of this Scoping Meeting is to afford the public, regulatory agency representatives, and elected officials an opportunity to learn about and voice their interests and environmental concerns regarding the Bureau's implementation of the required privatization action.

The Scoping Meeting is being held to provide for timely public comments and understanding of Federal plans and programs with possible environmental consequences required by NEPA. The Scoping Meeting will be held 7:00 P.M., Wednesday, January 28, 1998 at St. Luke's Church (church hall meeting room), 4925 East Capitol Street, SE., Washington, DC.

Alteratives: In developing the DEIS, the options of "no action" and "alternative sites" for the proposed facility will be fully and thoroughly examined.

Scoping Process: During the preparation of the DEIS, there will be numerous other opportunities for public involvement.

DEIS Preparation: Public notice will be given concerning the availability of the DEIS for public review and comment.

Address: Questions concerning the proposed action and the DEIS can be answered by: David J. Dorworth, Chief, Site Selection & Environmental Review Branch, Federal Bureau of Prisons, 320 First Street, N.W., Washington, D.C. 20534, Telephone: (202) 514–6470, Telefacsimile: (202) 616–6024, ddorworth@BOP.gov.

Dated: January 21, 1998.

Jeff B. Ratliff,

Acting Chief, Site Selection and Environmental Review Branch.

BILLING CODE 4410–05–M

DEPARTMENT OF LABOR

Employment and Training Administration

Revised Schedule of Remuneration for the UCX Program

Under Section 8521(a)(2) of title 5 of the United States Code, the Secretary of Labor is required to issue from time to time a Schedule of Remuneration specifying the pay and allowances for each pay grade of members of the military services. The schedules are used to calculate the base period wages and benefits payable under the program of Unemployment Compensation for Ex-servicemembers (UCX Program).

The revised schedule published with this Notice reflects increases in military pay and allowances which were effective in January 1998.

Accordingly, the following new Schedule of Remuneration, issued pursuant to 20 CFR 614.12, applies to "First Claims" for UCX which are effective beginning with the first day of the first week which begins after April 4, 1998.

Pay grade	Monthly rate
(1) Commissioned Officers:	
0–10	$11,402
0–9	11,364
0–8	10,462
0–7	9,457
0–6	8,082
0–5	6,773
0–4	5,556
0–3	4,491
0–2	3,586
0–1	2,713
(2) Commissioned Officers With Over 4 Years Active Duty As An Enlisted Member Or Warrant Officer:	
0–3E	5,146
0–2E	4,282
0–1E	3,549
(3) Warrant Officers:	
W–5	6,035
W–4	5,154
W–3	4,309
W–2	3,666
W–1	3,176
(4) Enlisted Personnel:	
E–9	4,672
E–8	3,958
E–7	3,457
E–6	3,026
E–5	2,588
E–4	2,156
E–3	1,897
E–2	1,791
E–1	1,571

The publication of this new Schedule of Remuneration does not revoke any prior schedule or change the period of time any prior schedule was in effect.

Signed at Washington, DC., on January 15, 1998.

Raymond J. Uhalde,

Acting Assistant Secretary of Labor.

BILLING CODE 4510–30–M

PENSION AND WELFARE BENEFITS ADMINISTRATION

[Application No. D–10429]

Notice of Proposed Individual Exemption to Amend and Replace Prohibited Transaction Exemption (PTE) 96–14 Involving Morgan Stanley & Co. Incorporated (MS&Co) and Morgan Stanley Trust Company (MSTC), Located in New York, NY

AGENCY: Pension and Welfare Benefits Administration, U.S. Department of Labor.

ACTION: Notice of proposed individual exemption to modify and replace PTE 96–14.

SUMMARY: This document contains a notice of pendency before the Department of Labor (the Department) of a proposed individual exemption which, if granted, would amend and replace PTE 96–14 (61 FR 10032, March 12, 1996). PTE 96–14, as clarified by a Notice of Technical Correction dated June 4, 1996 (61 FR 28243), permits the lending of securities to MS&Co and to any other U.S. registered broker-dealers affiliated with MSTC (the Affiliated Broker-Dealers; collectively, the MS Broker-Dealers) by employee benefit plans with respect to which the MS Broker-Dealer who is borrowing such securities is a party in interest or for which MSTC acts as directed trustee or custodian and securities lending agent. In addition, PTE 96–14 permits MSTC to receive compensation in connection with securities lending transactions. These transactions are described in a notice of pendency that was published in the **Federal Register** on August 11, 1995 at 60 FR 41118. PTE 96–14 is effective as of March 12, 1996.

If granted, the proposed exemption would replace PTE 96–14 but would incorporate by reference the facts, representations and virtually all of the conditions that are contained in the notice, the final exemption and the technical correction. However, Condition (9) of PTE 96–14, which has been redesignated herein as Condition (12), would be amended. Condition (9) of PTE 96–14 provides that—

> Only plans whose total assets have a market value of at least $50 million will be permitted to lend securities to the MS Broker-Dealers. In the case of 2 or more plans maintained by a single employer or controlled group of employers, the $50 million requirement may be met by aggregating the assets of such plans if the assets are commingled for investment purposes in a single master trust;

The applicants have requested that this condition be modified to allow two or more plans which are maintained by the same employer, controlled group of corporations or employee organization (the Related Plans) as well as two or more plans which are not maintained by the same employer, controlled group of corporations or employee organization (the Unrelated Plans), whose assets are invested in a single, commingled investment vehicle that is managed by a fiduciary which is independent of the MS Broker-Dealers, to aggregate their assets within the pooled investment vehicle in order to satisfy the $50 million investment threshold for lending securities to MS Broker-Dealers. However, the fiduciary exercising investment discretion over the pooled vehicle, particularly if the fiduciary is an outside manager, must possess some minimum level of investor sophistication by satisfying an "outside business" test.

In addition, the Department has decided to revise certain of the conditions contained in PTE 96–14. In this regard, the Department has added several new conditions to the pendency notice relating to such matters as disclosures, compensation, outside

VOL 63 ISS 16 JA 26 1998 UMI

borrowers and recordkeeping. The Department has also modified certain of the existing conditions and provided definitions of the terms "affiliate" and "control."

The proposed exemption would affect participants and beneficiaries of, and fiduciaries with respect to plans engaging in securities lending transactions with the MS Broker-Dealers.

EFFECTIVE DATE: If granted, the proposed exemption would be effective as of March 12, 1996.

DATES: Written comments and requests for a public hearing should be received by the Department on or before March 27, 1998.

ADDRESSES: All written comments and requests for a public hearing (preferably, three copies) should be sent to the Office of Exemption Determinations, Pension and Welfare Benefits Administration, Room N–5649, U.S. Department of Labor, 200 Constitution Avenue, NW., Washington, DC 20210, Attention: Application No. D–10429. The application pertaining to the proposed exemption and the comments received will be available for public inspection in the Public Documents Room of the Pension and Welfare Benefits Administration, U.S. Department of Labor, Room N–5507, 200 Constitution Avenue, NW., Washington, DC 20210.

FOR FURTHER INFORMATION CONTACT: Ms. Jan D. Broady, Office of Exemption Determinations, Pension and Welfare Benefits Administration, U.S. Department of Labor, telephone (202) 219–8881. (This is not a toll-free number.)

SUPPLEMENTARY INFORMATION: Notice is hereby given of the pendency before the Department of a proposed exemption that would amend and replace PTE 96–14. PTE 96–14 provides an exemption from certain prohibited transaction restrictions of section 406 of the Employee Retirement Income Security Act of 1974 (the Act) and from the sanctions resulting from the application of section 4975 of the Internal Revenue Code of 1986 (the Code), as amended, by reason of section 4975(c)(1) of the Code. The proposed exemption was requested in an application filed on behalf of MS&Co and MSTC (collectively, the Applicants) pursuant to section 408(a) of the Act and section 4975(c)(2) of the Code, and in accordance with the procedures set forth in 29 CFR part 2570, subpart B (55 FR 32836, August 10, 1990). Effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type requested to the Secretary of Labor. Accordingly, this proposed exemption is being issued solely by the Department.

Specifically, PTE 96–14 provides exemptive relief from sections 406(a)(1)(A) through (D) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, with respect to the lending of securities to MS&Co and to any other MS Broker-Dealers by employee benefit plans with respect to which the MS Broker-Dealer who is borrowing such securities is a party in interest or for which MSTC acts as a directed trustee or custodian and securities lending agent and to the receipt of compensation by MSTC in connection with these transactions, provided certain enumerated conditions are met.

Subsequent to the granting of PTE 96–14, the Applicants informed the Department that the specific wording of Condition (9) of the exemption would preclude master trusts, group trusts, bank collective investment funds, insurance company pooled separate accounts and other commingled investment vehicles from lending securities to the MS Broker-Dealers unless each plan participating therein had assets with an aggregate fair market value of at least $50 million. However, the Applicants note that Representation 25 of the Summary of Facts and Representations of the proposed exemption states that the intent of the $50 million restriction is to ensure that any lending to the MS Broker-Dealers will be monitored by an independent fiduciary of above average experience and sophistication in matters relating to securities lending. To the extent that the purpose of this restriction is to ensure the sophistication of the fiduciary who is making the lending decision on behalf of plans, the Applicants believe that the commingled investment vehicles whose total assets have an aggregate market value of at least $50 million and which are managed by a fiduciary who is independent of the MS Broker-Dealers should also be permitted to lend securities to such broker-dealers, provided that such commingled entities have not been formed for the sole purpose of making loans of securities. Although the Department agrees with the Applicant, it has proposed certain additional requirements for pooled arrangements involving the assets of either Related Plans or Unrelated Plans. These additional requirements are as follows:

A. Related Plans

With respect to two or more plans, which are maintained by the same employer, controlled group of corporations or employee organization, whose assets are invested in a master trust or any other form of plan asset look-through entity, which entity is engaged in securities lending arrangements with the MS Broker-Dealers, the Department notes that the $50 million threshold may be satisfied by aggregating the assets of the investing plans within the pooled vehicle. In this regard, the Department also notes that an employer may retain an independent investment manager to manage all or a portion of plan assets invested in a master trust. Under these circumstances, the fiduciary must have total assets under its management and control, exclusive of the $50 million threshold amount attributable to plan investment in the commingled entity, which are in excess of $100 million.

B. Unrelated Plans

For two or more plans which are not maintained by the same employer, controlled group of corporations or employee organization, whose assets are invested in a group trust or other plan asset look-through entity, which entity is engaged in securities lending arrangements with the MS Broker-Dealers, the $50 million threshold will apply to the aggregate assets of such entity so long as the fiduciary responsible for making the investment decision on behalf of the group trust or other plan assets look-through entity is not the sponsoring employer, a member of the controlled group of corporations, the employee organization, or an affiliate, and has full investment responsibility [1] with respect to the plan assets invested therein. Also, the fiduciary must have total assets under its management and control, exclusive of the $50 million threshold amount attributable to plan investment in the commingled entity, which are in excess of $100 million.

Accordingly, Condition (9) of PTE 96–14, which has been redesignated herein as Condition (12), has been revised to read as follows:

(12) Only plans with total assets having an aggregate market value of at least $50 million will be permitted to lend securities to the MS Broker-Dealers; provided however that—

(a) In the case of two or more plans which are maintained by the same employer, controlled group of corporations or employee organization (the Related Plans), whose assets are commingled for investment purposes in a single master trust or any other entity the assets of which are "plan assets" under 29 CFR 2510.3–101 (the Plan Asset Regulation), which entity is engaged in securities lending arrangements with the MS Broker-Dealers, the foregoing $50 million requirement shall be deemed satisfied if such trust or other entity has aggregate assets which are in excess of $50 million; provided that, if the fiduciary responsible for making the investment decision on behalf of such master trust or other entity is not the employer or an affiliate of the employer, such fiduciary has total assets under its management and control, exclusive of the $50 million threshold amount attributable to plan investment in the commingled entity, which are in excess of $100 million, or

(b) In the case of two or more plans which are not maintained by the same employer, controlled group of corporations or employee organization (the Unrelated Plans), whose assets are commingled for investment purposes in a group trust or any other form of entity the assets of which are "plan assets" under the Plan Asset Regulation, which entity is engaged in securities lending arrangements with the MS Broker-Dealers, the foregoing $50 million requirement shall be deemed satisfied if such trust or other entity has aggregate assets which are in excess of $50 million; provided that the fiduciary responsible for making the investment decision on behalf of such group trust or other entity—

(i) Is neither the sponsoring employer, a member of the controlled group of corporations, the employee organization, nor an affiliate,

(ii) Has full investment responsibility with respect to plan assets invested therein, and

(iii) Has total assets under its management and control, exclusive of the $50 million threshold amount attributable to plan investment in the commingled entity, which are in excess of $100 million;

(In addition, none of the entities described above must be formed for the sole purpose of making loans of securities.)

As previously noted, in addition to the foregoing modifications, the Department has determined to revise certain of the conditions contained in PTE 96–14. In this regard, the Department has revised or added new conditions in Section I of the proposal pertaining to (a) The arm's length nature of each loan of securities by a client-plan to an MS Broker-Dealer (Condition 2); (b) approval of the general terms of the securities loan agreement by an independent fiduciary (Condition 3); (c) disclosures concerning the financial condition of the MS Broker-Dealer (Condition 7); (d) the compensation paid to a client-plan for lending securities (Condition 8); (e) indemnification and holding harmless of the client-plan by the MS Broker-Dealer against all losses, damages, liabilities, costs and expenses (Condition 10); (f) a requirement that MSTC will not make a securities loan to any MS Broker-Dealer on any day on which the market value of the securities proposed to be loaned, when added to the market value of all client-plan securities subject to outstanding loans to MS Broker-Dealers, exceeds 50 percent of the market value of all client-plan securities that are subject to securities loans, including the market value of securities proposed to be loaned to the MS Broker-Dealer (Condition 13); (g) the receipt of monthly reports by a client-plan's independent fiduciary relating to securities lending transactions engaged in by the client-plan (Condition 16); and (h) a general recordkeeping requirement that is to be complied with by MS&Co and its affiliates (Section II). In addition, the Department has defined the terms "affiliate" and "control" in Section III.

The new or revised language, which has been incorporated herein, appears in the Summary of Facts and Representations underlying PTE 96–14 as well as in the original exemption application. For language that did not appear in these documents, the Department consulted with the Applicants before making the revisions. This new or modified language is set forth as follows:

Section I. Covered Transactions

(New or Revised Conditions)

(2) The terms of each loan of securities by a client-plan to the MS Broker-Dealer will be at least as favorable to such plan as those of a comparable arm's length transaction between unrelated parties;

(3) Any arrangement for MSTC to lend plan securities to the MS Broker-Dealers will be approved in advance by a plan fiduciary who is independent of MSTC and the MS Broker-Dealers; (In this regard, the independent fiduciary also will approve the general terms of the securities loan agreement between the client-plan and the MS Broker-Dealer, the specific terms of which are negotiated and entered into by MSTC which will act as a liaison between the lender and the borrower to facilitate the lending transaction.)

(7) Prior to entering into a loan agreement, the MS Broker-Dealer will furnish its most recent publicly-available audited and unaudited financial statements to MSTC, which, in turn, will provide the statements to the client-plan before the plan is asked to approve the terms of the loan agreement. The loan agreement will contain a requirement that the MS Broker-Dealer must promptly notify lenders at the time of a loan of any material adverse changes in its financial condition since the date of the most recently furnished financial statements. If any such changes have taken place, MSTC will not make any further loans to the MS Broker-Dealer unless an independent fiduciary of the client-plan approves the loan in view of the changed financial condition;

(8) In return for lending securities, the client-plan either will —

(a) Receive a reasonable fee, which is related to the value of the borrowed securities and the duration of the loan, or

(b) Have the opportunity to derive compensation through the investment of cash collateral; (Under such circumstances, the client-plan may pay a loan rebate or similar fee to the borrowing MS Broker-Dealer, if such fee is not greater than the fee the client-plan would pay in a comparable arm's length transaction with an unrelated party.)

(10) The MS Broker-Dealer will indemnify and hold harmless each lending client-plan against any and all losses, damages, liabilities, costs and expenses (including attorney's fees) incurred by such plan in connection with the lending of securities to the MS Broker-Dealers;

(13) No loan of securities will be made by MSTC as securities lending agent to any MS Broker-Dealer on any day on which the market value of the securities proposed to be loaned, when added to the market value of all client-plan securities subject to outstanding loans to MS Broker-Dealers, exceeds 50 percent of the market value of all client-plan securities subject to securities loans, including the market value of securities proposed to be loaned to the MS Broker-Dealer. (For purposes of this paragraph, market value shall be determined in U.S. dollars, based on the last preceding business day's closing prices of the securities and the last preceding business day's closing foreign exchange rates, if applicable.);

(16) Each client-plan will receive monthly reports with respect to securities lending transactions so that an independent fiduciary of a client-plan may monitor such transactions with the MS Broker-Dealer;

Section II. General Conditions

(1) The MS Broker-Dealers will maintain, or cause to be maintained, for a period of six years from the date of such transactions, in a manner that is convenient and accessible for audit and examination, such records as are necessary to enable the persons described in paragraph (2) to determine whether the conditions of the exemption have been met, except that—

(a) A prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the MS Broker-Dealers, the records are lost or destroyed prior to the end of the six year period, and

(b) No party in interest other than the MS Broker-Dealers shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for examination as required below by paragraph (2);

(2) Notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (1) are unconditionally available at their customary location during normal business hours by—

(a) Any duly authorized employee or representative of the Department, the Internal Revenue Service or the Securities and Exchange Commission (the SEC),

[1] For purposes of this exemption, the term "full investment responsibility" means that the fiduciary responsible for making the investment decision has and exercises discretionary management authority over all of the assets of the group trust or other plan assets look-through entity.

VOL 63 ISS 16 JA 26 1998 UMI

(b) Any fiduciary of a participating client-plan or any duly authorized representative of such fiduciary, and

(c) Any contributing employer to any participating client-plan or any duly authorized employee representative of such employer;

(3) None of the persons described above in paragraphs (b)-(c) of paragraph (2) are authorized to examine the trade secrets of MS&Co or its affiliates or commercial or financial information which is privileged or confidential.

Section III. Definitions.

For purposes of this proposed exemption,

(1) An "affiliate" of a person includes—

(a) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with such other person;

(b) Any officer, director, or partner, employee or relative (as defined in section 3(15) of the Act) of such other person; and

(c) Any corporation or partnership of which such other person is an officer, director or partner.

(2) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

Notice To Interested Persons

Notice of the proposed exemption will be mailed by first class mail to each plan participating in securities lending arrangements with the MS Broker-Dealers within 30 days of the publication of the notice of pendency in the **Federal Register**. The notice will contain a copy of the notice of proposed exemption as published in the **Federal Register** and a supplemental statement, as required pursuant to 29 CFR 2570.43(b)(2). The supplemental statement will inform interested persons of their right to comment on and/or to request a hearing with respect to the pending exemption. Written comments and hearing requests are due within 60 days of the publication of the proposed exemption the **Federal Register**.

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions of the Act and the Code, including any prohibited transaction provisions to which the exemption does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which require, among other things, a fiduciary to discharge his or her duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirements of section 401(a) of the Code that the plan operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) The proposed exemption, if granted, will not extend to transactions prohibited under section 406(b)(3) of the Act and section 4975(c)(1)(F) of the Code;

(3) Before an exemption can be granted under section 408(a) of the Act and section 4975(c)(2) of the Code, the Department must find that the exemption is administratively feasible, in the interest of the plan and of its participants and beneficiaries and protective of the rights of participants and beneficiaries of the plan;

(4) This proposed exemption, if granted, will be supplemental to, and not in derogation of, any other provisions of the Act and the Code, including statutory or administrative exemptions. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(5) This proposed exemption, if granted, is subject to the express condition that the Summary of Facts and Representations set forth in the notice of proposed exemption relating to PTE 96–14, as amended by this notice, accurately describe, where relevant, the material terms of the transactions to be consummated pursuant to this exemption.

Written Comments and Hearing Requests

All interested persons are invited to submit written comments or requests for a hearing on the pending exemption to the address above, within 30 days after the publication of this proposed exemption in the **Federal Register**. All comments will be made a part of the record. Comments received will be available for public inspection with the referenced applications at the address set forth above.

Proposed Exemption

Based on the facts and representations set forth in the application, the Department is considering granting the requested exemption under the authority of section 408(a) of the Act and section 4975(c)(2) of the Code and in accordance with the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, August 10, 1990).

Section I. Covered Transactions

If the exemption is granted, the restrictions of sections 406(a)(1)(A) through (D) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply, effective March 12, 1996, to the lending of securities to Morgan Stanley & Co. Incorporated (MS&Co) and to any other U.S. registered broker-dealers affiliated with Morgan Stanley Trust Company (the Affiliated Broker-Dealer; collectively, the MS Broker-Dealers) by employee benefit plans with respect to which the MS Broker-Dealer who is borrowing such securities is a party in interest or for which Morgan Stanley Trust Company (MSTC) acts as directed trustee or custodian and securities lending agent and to the receipt of compensation by MSTC in connection with these transactions, provided that the following conditions are met:

(1) Neither MS&Co nor MSTC will have any discretionary authority or control over a client-plan's assets involved in the transaction or renders investment advice (within the meaning of 29 CFR 2510.3–21(c)) with respect to those assets;

(2) The terms of each loan of securities by a client-plan to the MS Broker-Dealer will be at least as favorable to such plan as those of a comparable arm's length transaction between unrelated parties;

(3) Any arrangement for MSTC to lend plan securities to the MS Broker-Dealers will be approved in advance by a plan fiduciary who is independent of MSTC and the MS Broker-Dealers;[2] (In this regard, the independent fiduciary also will approve the general terms of the securities loan agreement between the client-plan and the MS Broker-Dealer, the specific terms of which will be negotiated and entered into by MSTC which will act as a liaison between the lender and the borrower to facilitate the lending transaction.)

(4) A client-plan may terminate the arrangement at any time without penalty on five business days notice;

(5) The client-plans will receive collateral consisting of cash, securities issued or guaranteed by the U.S. Government or its agencies or instrumentalities, bank letters of credit or other collateral permitted under PTE 81–6 (46 FR 7527, January 23, 1981) or any successor, from the MS Broker-Dealers by physical delivery, book entry in a securities depository, wire transfer or similar means by the close of business on or before the day the loaned securities are delivered to the MS Broker-Dealers;

(6) The market value of the collateral will initially equal at least 102 percent of the market value of the loaned securities and, if the market value of the collateral falls below 100 percent, the MS Broker-Dealers will deliver additional collateral on the following day such that the market value of the collateral will again equal 102 percent;

(7) Prior to entering into a loan agreement, the MS Broker-Dealer will furnish its most recent publicly-available audited and unaudited financial statements to MSTC, which, in turn, will provide the statements to the client-plan before the plan is asked to approve the terms of the loan agreement. The loan agreement will contain a requirement that the MS Broker-Dealer must promptly notify lenders at the time of a loan of any material adverse changes in its financial condition since the date of the most recently furnished financial statements. If any such changes have taken place, MSTC will not make any further loans to the MS Broker-Dealer unless an independent fiduciary of the client-plan approves the loan in view of the changed financial condition;

(8) In return for lending securities, the client-plan either will—

(a) Receive a reasonable fee, which is related to the value of the borrowed securities and the duration of the loan, or

(b) Have the opportunity to derive compensation through the investment of cash collateral. (Under such circumstances, the client-plan may pay a loan rebate or similar fee to the borrowing MS Broker-Dealer, if such fee is not greater than the fee the Client Plan would pay in a comparable arm's length transaction with an unrelated party.)

(9) All procedures regarding the securities lending activities will, at a minimum, conform to the applicable provisions of Prohibited Transaction Exemption (PTE) 81–6 and PTE 82–63 (47 FR 14804, April 6, 1992);

(10) The MS Broker-Dealer will indemnify and hold harmless each lending client-plan against any and all losses, damages, liabilities, costs and expenses (including attorney's fees) incurred by such plan in connection with the lending of securities to the MS Broker-Dealers;

(11) The client-plan will receive the equivalent of all distributions made to holders of the borrowed securities during the term of the loan, including, but not limited to, cash dividends, interest payments, shares of stock as a result of stock splits and rights to purchase additional securities, or other distributions;

(12) Only plans with total assets having an aggregate market value of at least $50 million will be permitted to lend securities to the MS Broker-Dealers; provided, however that—

(a) In the case of two or more plans which are maintained by the same employer, controlled group of corporations or employee organization (the Related Plans), whose assets are commingled for investment purposes in a single master trust or any other entity the assets of which are "plan assets" under 29 CFR 2510.3–101 (the Plan Asset Regulation), which entity is engaged in securities lending arrangements with the MS Broker-Dealers, the foregoing $50 million requirement shall be deemed satisfied if such trust or other entity has aggregate assets which are in excess of $50 million; provided that, if the fiduciary responsible for making the investment decision on behalf of such master trust or other entity is not the employer or an affiliate of the employer, such fiduciary has total assets under its management and control, exclusive of the $50 million threshold amount attributable to plan investment in the commingled entity, which are in excess of $100 million, or

(b) In the case of two or more plans which are not maintained by the same employer, controlled group of corporations or employee organization (the Unrelated Plans), whose assets are commingled for investment purposes in a group trust or any other form of entity the assets of which are "plan assets" under the Plan Asset Regulation, which entity is engaged in securities lending arrangements with the MS Broker-Dealers, the foregoing $50 million requirement shall be deemed satisfied if such trust or other entity has aggregate assets which are in excess of $50 million; provided that the fiduciary responsible for making the investment decision on behalf of such group trust or other entity—

(i) Is neither the sponsoring employer, a member of the controlled group of corporations, the employee organization, nor an affiliate,

(ii) Has full investment responsibility with respect to plan assets invested therein, and

(iii) Has total assets under its management and control, exclusive of the $50 million threshold amount attributable to plan investment in the commingled entity, which are in excess of $100 million; (In addition, none of the entities described above must be formed for the sole purpose of making loans of securities.)

(13) No loan of securities will be made by MSTC as securities lending agent to any MS Broker-Dealer on any day on which the market value of the securities proposed to be loaned, when added to the market value of all client-plan securities subject to outstanding loans to MS Broker-Dealers, exceeds 50 percent of the market value of all client-plan securities subject to securities loans, including the market value of securities proposed to be loaned to the MS Broker-Dealer. (For purposes of this paragraph, market value shall be determined in U.S. dollars, based on the last preceding business day's closing prices of the securities and the last preceding business day's closing foreign exchange rates, if applicable.);

(14) With regard to the "exclusive borrowing" agreement, the MS Broker-Dealer will directly negotiate the agreement with a plan fiduciary who is independent of the MS Broker-Dealers and MSTC, and such agreement may be terminated by either party to the agreement at any time;

(15) Prior to any plan's approval of the lending of its securities to an MS Broker-Dealer, a copy of this exemption (and the notice of pendency) will be provided to the client-plan;

(16) Each client-plan will receive monthly reports with respect to securities lending transactions so that an independent fiduciary of a client-plan may monitor such transactions with the MS Broker-Dealer;

Section II. General Conditions

(1) MS Broker-Dealers will maintain, or cause to be maintained, for a period of six years from the date of such transactions, in a manner that is convenient and accessible for audit and examination, such records as are necessary to enable the persons described in paragraph (2) to determine whether the conditions of this exemption have been met, except that —

(a) A prohibited transaction will not be considered to have occurred if, due to circumstances beyond the control of the MS Broker-Dealers, the records are lost or destroyed prior to the end of the six year period, and

(b) No party in interest other than the MS Broker-Dealers shall be subject to the civil penalty that may be assessed under section 502(i) of the Act, or to the taxes imposed by section 4975(a) and (b) of the Code, if the records are not maintained, or are not available for

[2] The Department, herein, is not providing exemptive relief for securities lending transactions engaged in by primary lending agents, other than MSTC, beyond that provided pursuant to Prohibited Transaction Exemption (PTE) 81–6 (46 FR 7527, January 23, 1981, as amended at 52 FR 18754, May 19, 1987) and PTE 82–63 (47 FR 14804, April 6, 1982).

VOL 63 ISS 16 JA 26 1998 UMI

examination as required below by paragraph (2);

(2) Notwithstanding any provisions of subsections (a)(2) and (b) of section 504 of the Act, the records referred to in paragraph (1) are unconditionally available at their customary location during normal business hours by —

(a) Any duly authorized employee or representative of the Department, the Internal Revenue Service or the Securities and Exchange Commission (the SEC),

(b) Any fiduciary of a participating client-plan or any duly authorized representative of such fiduciary, and

(c) Any contributing employer to any participating client-plan or any duly authorized employee representative of such employer;

(3) None of the persons described above in paragraphs (b)-(c) of paragraph (2) are authorized to examine the trade secrets of MS&Co or its affiliates or commercial or financial information which is privileged or confidential.

Section III. Definitions

For purposes of this proposed exemption,

(1) An "affiliate" of a person includes—

(a) Any person directly or indirectly through one or more intermediaries, controlling, controlled by, or under common control with such other person;

(b) Any officer, director, or partner, employee or relative (as defined in section 3(15) of the Act) of such other person; and

(c) Any corporation or partnership of which such other person is an officer, director or partner.

(2) The term "control" means the power to exercise a controlling influence over the management or policies of a person other than an individual.

EFFECTIVE DATE: If granted, this proposed exemption will be effective as of March 12, 1996.

The availability of this proposed exemption is subject to the express condition that the material facts and representations contained in the application for exemption are true and complete and accurately describe all material terms of the transactions. In the case of continuing transactions, if any of the material facts or representations described in the applications change, the exemption will cease to apply as of the date of such change. In the event of any such change, an application for a new exemption must be made to the Department.

For a more complete statement of the facts and representations supporting the Department's decision to grant PTE 96–14, refer to the proposed exemption, grant notice and technical correction notice which are cited above.

Signed at Washington, D.C., this 21st day of January, 1998.

Ivan L. Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, Department of Labor.

[FR Doc. 98–1789 Filed 1–23–98; 8:45 am]

BILLING CODE 4510–29–P

DEPARTMENT OF LABOR

Pension and Welfare Benefits Administration

[Prohibited Transaction Exemption 98–04; Exemption Application No. D–10472, et al.]

Grant of Individual Exemptions; Pentair Retirement Savings and Stock Incentive Plan (the Plan), et al.

AGENCY: Pension and Welfare Benefits Administration, Labor.

ACTION: Grant of individual exemptions.

SUMMARY: This document contains exemptions issued by the Department of Labor (the Department) from certain of the prohibited transaction restrictions of the Employee Retirement Income Security Act of 1974 (the Act) and/or the Internal Revenue Code of 1986 (the Code).

Notices were published in the **Federal Register** of the pendency before the Department of proposals to grant such exemptions. The notices set forth a summary of facts and representations contained in each application for exemption and referred interested persons to the respective applications for a complete statement of the facts and representations. The applications have been available for public inspection at the Department in Washington, D.C. The notices also invited interested persons to submit comments on the requested exemptions to the Department. In addition the notices stated that any interested person might submit a written request that a public hearing be held (where appropriate). The applicants have represented that they have complied with the requirements of the notification to interested persons. No public comments and no requests for a hearing, unless otherwise stated, were received by the Department.

The notices of proposed exemption were issued and the exemptions are being granted solely by the Department because, effective December 31, 1978, section 102 of Reorganization Plan No. 4 of 1978 (43 FR 47713, October 17, 1978) transferred the authority of the Secretary of the Treasury to issue exemptions of the type proposed to the Secretary of Labor.

Statutory Findings

In accordance with section 408(a) of the Act and/or section 4975(c)(2) of the Code and the procedures set forth in 29 CFR Part 2570, Subpart B (55 FR 32836, 32847, August 10, 1990) and based upon the entire record, the Department makes the following findings:

(a) The exemptions are administratively feasible;

(b) They are in the interests of the plans and their participants and beneficiaries; and

(c) They are protective of the rights of the participants and beneficiaries of the plans.

Pentair Retirement Savings and Stock Incentive Plan (the Plan) Located in St. Paul, MN

[Prohibited Transaction Exemption No. 98–04; Application No. D–10472]

Exemption

The restrictions of sections 406(a) and 406 (b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1) (A) through (E) of the Code, shall not apply to the past sale by the Plan (the Sale) of the Plan's remaining interest (the Interest) in two guaranteed investment contracts (the GICs) of Confederation Life Insurance Company (CL) to Pentair, Inc. (Pentair), the sponsoring employer and a party in interest with respect to the Plan; provided the following conditions were met:

(1) the Sale was a one-time transaction for cash;

(2) the Plan received no less than the fair market value of the Interests at the time of the Sale;

(3) the Plan and its participants and beneficiaries have not incurred any expenses or any losses from the Sale; and

(4) any future distributions from the GICs that exceed the consideration paid by Pentair to the Plan for the Interests shall be paid to the Plan and allocated to the respective accounts of the affected Plan participants.

EFFECTIVE DATE: This proposed exemption will be effective on June 13, 1997.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the Notice of Proposed Exemption published on November 24, 1997, at 62 FR 62639.

FOR FURTHER INFORMATION CONTACT: Mr. C. E. Beaver of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

Robert H. Herzog Profit Sharing Plan (the Plan) Located in Santa Barbara, California

[Prohibited Transaction Exemption 98–05; Exemption Application No. D–10494]

Exemption

The sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the cash sale (the Sale) of a certain residential condominium (the Property) by the Plan [1] to Robert H. Herzog (Mr. Herzog), a disqualified person with respect to the Plan, provided that the following conditions are met:

(a) The Sale is a one-time transaction for cash;

(b) The terms and conditions of the Sale are at least as favorable to the Plan as those obtainable in an arm's length transaction with an unrelated party;

(c) The Plan receives the fair market value of the Property at time of the Sale; and

(d) The Plan is not required to pay any commissions, costs or other expenses in connection with the Sale. For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the notice of proposed exemption published on November 24, 1997 at 62 FR 62641.

FOR FURTHER INFORMATION CONTACT: Mr. James Scott Frazier of the Department, telephone (202) 219–7222. (This is not a toll-free number.)

CoreStates GIC and BIC Fund (the Fund) Located in Philadelphia, Pennsylvania

[Prohibited Transaction Exemption No. 98–06; Application No. D–10522]

Exemption

The restrictions of sections 406(a) and 406(b)(1) and (b)(2) of the Act and the sanctions resulting from the application of section 4975 of the Code, by reason of section 4975(c)(1)(A) through (E) of the Code, shall not apply to the sale (the Sale) by the Fund of the Fund's remaining interest in two Guaranteed Investment Contracts (the GICs) of Confederation Life Insurance Company (CL) to CoreStates Bank, N.A. (the Bank), a party in interest with respect to the Fund; provided (1) the Sale was a one-time transaction for cash, (2) the Fund received no less than the fair market value of the GICs at the time of the Sale, (3) the Fund and its participants and beneficiaries did not incur any costs or expenses with respect to the Sale, and (4) any future distributions from the GICs that exceed the consideration paid to the Fund by the Bank in the Sale shall be paid to the Fund and allocated to the respective accounts of the affected employee benefit plans.

EFFECTIVE DATE: This exemption will be effective as of December 31, 1997.

For a more complete statement of the facts and representations supporting the Department's decision to grant this exemption, refer to the Notice of Proposed Exemption published on November 24, 1997, at 62 FR 62641.

FOR FURTHER INFORMATION CONTACT: Mr. C. E. Beaver of the Department, telephone (202) 219–8881. (This is not a toll-free number.)

General Information

The attention of interested persons is directed to the following:

(1) The fact that a transaction is the subject of an exemption under section 408(a) of the Act and/or section 4975(c)(2) of the Code does not relieve a fiduciary or other party in interest or disqualified person from certain other provisions to which the exemptions does not apply and the general fiduciary responsibility provisions of section 404 of the Act, which among other things require a fiduciary to discharge his duties respecting the plan solely in the interest of the participants and beneficiaries of the plan and in a prudent fashion in accordance with section 404(a)(1)(B) of the Act; nor does it affect the requirement of section 401(a) of the Code that the plan must operate for the exclusive benefit of the employees of the employer maintaining the plan and their beneficiaries;

(2) These exemptions are supplemental to and not in derogation of, any other provisions of the Act and/or the Code, including statutory or administrative exemptions and transactional rules. Furthermore, the fact that a transaction is subject to an administrative or statutory exemption is not dispositive of whether the transaction is in fact a prohibited transaction; and

(3) The availability of these exemptions is subject to the express condition that the material facts and representations contained in each application are true and complete and accurately describe all material terms of the transaction which is the subject of the exemption. In the case of continuing exemption transactions, if any of the material facts or representations described in the application change after the exemption is granted, the exemption will cease to apply as of the date of such change. In the event of any such change, application for a new exemption may be made to the Department.

Signed at Washington, D.C., this 21st day of January, 1998.

Ivan Strasfeld,

Director of Exemption Determinations, Pension and Welfare Benefits Administration, Department of Labor.

BILLING CODE 4510–29–P

[1] Because Mr. Herzog is the only participant in the Plan, there is no jurisdiction under 29 CFR § 2510.3–3(b). However, there is jurisdiction under Title II of the Act pursuant to section 4975 of the Code.

NATIONAL CREDIT UNION ADMINISTRATION

Sunshine Act Meeting; Notice of Previously Held Emergency Meeting

TIME AND DATE: 2:24 p.m., Wednesday, January 21, 1998.

PLACE: Board Room, 7th Floor, Room 7047, 1775 Duke Street, Alexandria, Virginia 22314–3428.

STATUS: Closed.

MATTER CONSIDERED:

1. The ERB Report and Possible Personnel Actions Resulting From That Report. Closed pursuant to exemptions (2) and (6).

The Board voted unanimously that Agency business required that a meeting be held with less than the usual seven days advance notice, that it be closed to the public, and that earlier announcement of this was not possible.

The Board voted unanimously to close the meeting under the exemptions stated above. Acting General Counsel James Engel certified that the meeting could be closed under those exemptions.

FOR FURTHER INFORMATION CONTACT: Becky Baker, Secretary of the Board, Telephone (703) 518–6304,

Becky Baker,

Secretary of the Board.

BILLING CODE 7535–01–M

NUCLEAR REGULATORY COMMISSION

Cancellation of Proposed Generic Communication Control Rod Insertion Problems

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of cancellation.

VOL 63 ISS 16 JA 26 1998 UMI

SUMMARY: The Nuclear Regulatory Commission (NRC) is canceling a bulletin supplement that requests addressees to take actions to ensure the continued operability of the control rods. The proposed bulletin supplement was endorsed by the Committee to Review Generic Requirements (CRGR) and subsequently published in the **Federal Register** for public comment (62 FR 27629, May 20, 1997). The NRC considered comments received from interested parties in the final evaluation of the proposed bulletin supplement. Furthermore, the staff has received substantial additional data and data analysis from fuel manufacturers and owner's groups regarding the incomplete rod insertion (IRI) issue. Licensees, as well as fuel manufacturers and owner's groups, have informed the NRC of efforts to eliminate the IRI problem, including redesign of the fuel assemblies and improved core management. The staff expects these efforts to be successful, and the staff will follow this issue by monitoring plant operations through normal inspections and reporting activities.

BILLING CODE 7590–01–P

POSTAL SERVICE

Privacy Act of 1974; System of Records

AGENCY: Postal Service.

ACTION: Notice of modifications to an existing system of records and the addition of new routine uses to that and another existing system of records.

SUMMARY: The purpose of this document is to publish notice of modifications to existing system of records USPS 050.040, Finance Records—Uniform Allowance Program and the addition of new routine uses to that system and to system of records USPS 050.020, Finance Records—Payroll System. The modifications to USPS 050.040 are prompted by changes in the Postal Service's procedures for providing monetary allowances to postal employees purchasing authorized uniforms. The modifications to USPS 050.020 are prompted by requirements of the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (Pub. L. 104–193). That Act requires agencies to report new-hire and wage data to the Department of Health and Human Services which will use the data to locate individuals to establish paternity and enforce child support obligations.

DATES: Any interested party may submit written comments on the proposed amendments and additions. This proposal will become effective without further notice on March 27, 1998, unless comments received on or before that date result in a contrary determination.

ADDRESSES: Written comments on this proposal should be mailed or delivered to: PAYROLL ACCOUNTING/RECORDS, UNITED STATES POSTAL SERVICE, 475 L'ENFANT PLAZA SW RM 8831, WASHINGTON DC 20260–5243.

Copies of all written comments will be available at the above address for public inspection and photocopying between 8:00 a.m. and 4:45 p.m., Monday through Friday.

FOR FURTHER INFORMATION CONTACT: Betty E. Sheriff, (202) 268–2608.

SUPPLEMENTARY INFORMATION: Pursuant to recent changes in the Postal Service uniform program, the Postal Service will disclose data from its system USPS 050.040, Finance Records—Uniform Allowance Program to contractors who provide uniform distribution and postal payment card services.

The Postal Service uniform program requires certain employees to wear prescribed uniforms in performing their duties. These employees are entitled to a uniform allowance to purchase authorized uniform items which meet Postal Service specifications. As a result of recent changes in the uniform allowance program, employees will purchase uniform items from a centralized distribution firm using a purchasing card issued by a financial institution. The proposed system modifications support those changes by expanding the "system location" to include contractor facilities and by adding a routine use permitting disclosure to contract distribution firms and financial institutions to provide uniform items and purchasing card services, respectively.

Pursuant to Public Law 104–193, the Personal Responsibility and Work Opportunity Reconciliation Act of 1996, the Postal Service will disclose data from its system USPS 050.020, Finance Records—Payroll System to the Office of Child Support Enforcement (OCSE), Administration for Children and Families, Department of Health and Human Services (DHHS) for use in its Federal Parent Locator System (FPLS) and Federal Tax Offset System, DHHS/OCSE No. 09–90–0074. Information on this system was last published at 61 FR 38754, July 25, 1996.

FPLS is a computerized network through which states may request location information from federal and state agencies to find non-custodial parents and/or their employers for purposes of establishing paternity and securing support. Effective October 1, 1997, the FPLS will be enlarged to include the Directory of New Hires, a database containing information on employees commencing employment, quarterly wage data on private and public sector employees, and information on unemployment compensation benefits. Effective October 1, 1998, the FPLS will be expanded to include a Federal Case Registry. The Federal Case Registry will contain abstracts on all participants involved in child support enforcement cases. When the Federal Case Registry is instituted, its files will be matched on an ongoing basis against the files in the National Directory of New Hires to determine if an employee is a participant in a child support case anywhere in the country. If the FPLS identifies a person as being a participant in a state child support case, that state will be notified of the participant's current employer. State requests to the FPLS for location information will also continue to be processed after October 1, 1998.

The data to be disclosed by the Postal Service to the FPLS include employee name, social security number, address, date of birth, and employment information such as date of hire and work location.

In addition, names and social security numbers submitted by the Postal Service to the FPLS will be disclosed by the OCSE to the Social Security Administration for verification to ensure that the social security number provided is correct. The data disclosed by the Postal Service to the FPLS also will be disclosed by the OCSE to the Secretary of the Treasury for verifying claims for the advance payment of earned income tax credit or to verify an employment claim on a tax return.

Addition of the routine uses to USPS 050.020 and USPS 050.040 is proposed in accordance with the Privacy Act (5 U.S.C. 552a(b)(3)). The Privacy Act permits the disclosure of information about individuals without their consent for a routine use when the information's use will be compatible with the purpose for which the information was originally collected. Data within USPS 050.040 is kept for the purpose of funding the procurement of uniforms. Disclosure of this information to financial institutions and uniform distribution firms, each providing services related to purchasing uniform items, is consistent and compatible with that purpose. Similarly, since the proposed uses of the data within USPS 050.020 are required by Public Law 104–193, they are necessary and proper uses and therefore compatible uses which meet Privacy Act requirements.

The system modifications and additions are not expected to have any undue effect on individual privacy rights. The modifications to USPS 050.040 do not alter the scope or character of information collected by the system. The contract financial institutions and uniform distribution firms have been made subject to the Privacy Act in accordance with subsection (m) and are required to apply appropriate protections subject to the audit and inspection of the Postal Inspection Service. Records within USPS 050.040 and 050.020 continue to be kept in a secured environment, with automated data processing physical and administrative security and technical software applied to data on computer media. Paper records are kept in a secured area of post offices and are made available internally on an official need-to-know basis.

Postal Service records disclosed to the OCSE will be accomplished by Connect:Direct, hardcopy medium, or other means ensuring the security of the data. The FPLS will ensure the data's integrity to the greatest extent practicable by validating names and social security numbers with Social Security Administration records and the Postal Service will be notified of any invalid, incomplete, and corrected social security numbers.

USPS Privacy Act system 050.020 was last published in its entirety in the **Federal Register** on December 4, 1992 (57 FR 57515–57519) and was amended on November 22, 1993 (58 FR 61718–61719) and June 12, 1996 (61 FR 29774). USPS Privacy Act system 050.040 was last published in its entirety in the **Federal Register** on October 26, 1989 (54 FR 43669–43670). The Postal Service proposes amending these systems as shown below.

USPS 050.020

SYSTEM NAME:

Finance Records—Payroll System, 050.020.

BILLING CODE 7710–12–P

SECURITIES AND EXCHANGE COMMISSION

[Release No. 35–26815]

Filings Under the Public Utility Holding Company Act of 1935, as Amended ("Act")

January 16, 1998.

Notice is hereby given that the following filing(s) has/have been made with the Commission pursuant to provisions of the Act and rules promulgated thereunder. All interested persons are referred to the application(s) and/or declaration(s) for complete statements of the proposed transaction(s) summarized below. The application(s) and/or declaration(s) and any amendments thereto is/are available for public inspection through the Commission's Office of Public References.

Interested persons wishing to comment or request a hearing on the application(s) and/or declaration(s) should submit their views in writing by February 9, 1998, to the Secretary, Securities and Exchange Commission, Washington, D.C. 20549, and serve a copy on the relevant applicant(s) and/or declarant(s) at the address(es) specified below. Proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. Any request for hearing shall identify specifically the issues of fact or law that are disputed. A person who so requests will be notified of any hearing, if ordered, and will receive a copy of any notice or order issued in the matter. After said date, the application(s) and/or declaration(s), as filed or as amended, may be granted and/or permitted to become effective.

VOL 63 ISS 16 JA 26 1998 UMI

National Fuel Gas Company et al. (70–9153)

National Fuel Gas Company ("NFG"), a gas registered holding company, and each of its wholly owned subsidiaries, National Fuel Gas Distribution Corporation ("Distribution"), a gas utility company, and NFG's nonutility subsidiaries, National Fuel Gas Supply Corporation ("Supply"), Utility Constructors, Inc. ("UCI"), Highland Land & Minerals, Inc. ("Highland"), Leidy Hub, Inc. ("Leidy"), Horizon Energy Development, Inc. ("Horizon"), Data-Track Account Services, Inc. ("Data-Track") and Seneca Independence Pipeline Company ("Seneca Independence"), each of 10 Lafayette Square, Buffalo, New York 14203, Seneca Resources Corporation ("Seneca Resources"), Niagara Independence Marketing Company ("Niagara Marketing") and Niagara Energy Trading Inc. ("Niagara Energy"), each of 1201 Louisiana Street, Suite 400, Houston, Texas 77002, and National Fuel Resources, Inc. ("NFR") of 165 Lawrence Bell Drive, Suite 120, Williamsville, New York 14221 (collectively, "Applicants"), have filed an application-declaration ("Application") under sections 6(a), 7, 9(a), 10, 12(b), 12(f), 32 and 33 of the Act, and rule 53 under the Act requesting authorization to engage in various financing and related transactions for the period from the effective date of an order in this matter through December 31, 2002 ("Authorization Period"). The Applicants, other than NFG, are sometimes referred to collectively as "Subsidiaries."

The authorization would be subject to the following conditions: (1) with respect to long-term debt financing activities (a) NFG's long-term debt must be rated investment grade by at least one nationally recognized statistical rating organization, as that term is used in Rule 15c3–1(c)(2)(vi)(F) under the Securities Exchange Act of 1934 and (b) NFG's common equity, as reflected in its most recent Form 10–K or Form 10–Q, does not fall below 30% of its consolidated capitalization; (2) the effective cost of money for debt may not exceed 300 basis points over the interest rate on U.S. Treasury securities of a comparable term; (3) the effective cost of money for preferred stock and other fixed income securities may not exceed 500 basis points over the interest rate on 30-year U.S. Treasury securities; (4) the maturity of debt may not be more than 50 years; (5) issuance expenses in connection with an offering of securities, including any underwriting fees, commissions or other similar compensation, may not exceed 5% of the principal or total amount of the securities being issued; and (6) the aggregate amount of external debt and equity financing to be issued by NFG during the Authorization Period will not exceed (a) $750 million of short-term borrowings outstanding at any one time and (b) $2 billion of long-term debt and equity outstanding at any one time, excluding any common stock issued under the NFG Rights Plan.[1] The value of debt securities will equal the aggregate principal amount of the debt securities while the value of equity securities will equal the consideration received by NFG at the time the equity securities are issued. In addition, proceeds from the sale of securities by NFG in external financing transactions will be used by NFG for general corporate purposes including (i) the financing of capital expenditures of NFG and its Subsidiaries, (ii) the financing of inventories and other working capital requirements, (iii) the acquisition, retirement or redemption of securities issued by NFG that qualifies for the exemption in rule 42 or a successor rule and/or (iv) investments in exempt wholesale generators ("EWGs"), as defined in section 32 of the Act, foreign utility companies ("FUCOs"), as defined in section 33 of the Act, and energy-related companies and gas related companies, each as defined in rule 58. Any deviation from these conditions would require further Commission approval.

The proposed transactions and the proposed participation of the various Applicants are described below.

1. External Financing by NFG

NFG proposes to issue and sell short-term securities, with a term not to exceed 270 days, aggregating not more than $750 million outstanding at any one time during the Authorization Period. NFG also proposes to issue and sell long-term securities aggregating not more than $2 billion outstanding at any one time through the Authorization Period. Securities may be issued through underwriters or dealers, directly to a limited number of purchasers or a single purchaser,[2] through agents, in exchange for securities of other companies, the acquisition of which is separately authorized by the Commission or exempt under section 32, 33 or 34 or rule 58, as applicable, and/or through compensation, benefits and incentive plans, customer stock purchase plans and dividend reinvestment plans (collectively, "Stock Issuance Plans"). NFG also proposes to engage in interest rate swaps and similar hedging instruments.

a. Short-term Debt

NFG proposes to issue short-term debt, consisting of borrowings under its credit facilities and the issuance of commercial paper and/or other forms of short-term financing. NFG represents that in no case will the outstanding balance of all short-term borrowings exceed $750 million during the Authorization Period. With respect to its short-term borrowings, NFG proposes that the authorizations requested in this proceeding supersede the short-term borrowing authorization contained in Commission order, dated December 28, 1995 ("December 1995 Order").[3]

Commercial paper will be sold by NFG in domestic or foreign commercial paper markets directly or through dealers and placement agents at prevailing discount rates or prevailing coupon rates at the date of issuance for commercial paper of comparable quality and terms. NFG anticipates that the commercial paper will then be resold at a discount to corporate and institutional investors, which may include commercial banks, insurance companies, pension funds, investment trusts, mutual funds, foundations, colleges and universities, finance companies and nonfinancial corporations. Foreign commercial paper may also be sold to individual investors.

Back-up lines of credit for 100% of the outstanding amount of commercial paper are generally required by credit rating agencies. NFG currently has a committed credit facility which provides support for its commercial paper program.

NFG proposes to establish credit facilities with banks and/or other financial institutions and to issue and sell, from time to time, short-term notes. These notes will bear interest at rates comparable to, or lower than, those available through other forms of short-term borrowing with similar terms requested in this proceeding, and will have a term of not more than 270 days. NFG requests authority to incur, as necessary, commitment or similar fees not to exceed one-half of one percent (.50%) of the average daily credit facility available, and/or compensating balances not to exceed twenty percent (20%) of the credit facility established.

NFG further requests authorization to amend its commercial paper program or credit facilities without further Commission authorization, provided that the term of any borrowing under the program or facility does not extend beyond 270 days from its date of issuance or borrowing.

NFG states that it may engage in other types of short-term financing, which would include bank borrowings and other short-term securities issued under a mortgage or indenture, as it deems appropriate at the time of issuance. The term of these short-term borrowings will not exceed 270 days.

b. Long-term Securities

NFG proposes to issue and sell long-term securities which would consist of any combination of long-term debt, debt having terms in excess of 270 days, common stock, preferred stock or other equity securities. The aggregate principal amount of long-term debt securities and the value of the consideration received from the issuances of equity securities under the Application during the Authorization Period will not exceed $2 billion at any one time outstanding.

Long-term debt securities would include, but not be limited to, debentures, convertible debt, subordinated debt, medium-term notes, bank borrowings and securities with call or put options. Long-term debt securities would have the designation, aggregate principal amount, maturity, interest rate(s) or methods of determining the same, interest payment terms, redemption provisions, non-refunding provisions, sinking fund terms, conversion or put terms, U.S. dollar or foreign currency denominations, security and subordination provisions, and other terms and conditions as NFG may determine at the time of issuance. Medium-term notes would be issued under the Indenture, dated as of October 15, 1994, between NFG and The Bank of New York, Trustee, as amended ("Indenture"). Debentures and other long-term securities may be issued under the Indenture or under a mortgage or other indenture.

Equity securities would include common stock (including the rights with respect to such common stock), including common stock issued by Stock Issuance Plans under prior Commission orders[4] during the Authorization Period and future Stock Issuance Plans authorized by the Commission, preferred stock, other preferred securities, options and/or warrants convertible into common or preferred stock and common and/or preferred stock issued upon the exercise of convertible debt, rights, options, warrants and/or similar securities.

From time to time during the Authorization Period, NFG may adopt other similar Stock Issuance Plans. For instance, a direct stock purchase plan with a dividend reinvestment feature that allows sales to persons not already shareholders may be implemented. NFG proposes to issue shares of common stock under existing plans and similar plans or plan funding arrangements it may adopt and to engage in other sales of is shares of common stock for reasonable business purposes without the requirement of prior Commission authorization during the Authorization Period. With respect to issuances of long-term securities, NFG proposes that the authorizations requested in this proceeding supersede the authorizations contained in the Existing Common Stock Authorizations, except that the grants of common stock and rights to purchase common stock under the 1997 Award and Option Plan may be issued through December 12, 2006.[5]

c. Hedging Transactions

NFG proposes to enter into hedging transactions ("Hedge Program") related to all or a portion of existing or anticipated financing, including floating rate debt or fixed rate debt, using interest rate swaps, caps, floors, collars, ceilings, options and forwards (collectively, "Derivative Transactions") with counterparties during the Authorization Period, in notional (i.e., principal) amounts aggregating not in excess of the amount of debt outstanding at any one time.

NFG proposes to use two different swap strategies. Under one swap strategy, NFG would agree to make payments of interest to a counterparty, payable periodically. The interest would be payable at a variable or floating rate index and would be calculated on a notional amount. In return, the counterparty would agree to make payments to NFG based upon the same notional amount and at an agreed upon fixed interest rate. This would be a "floating-to-fixed swap" on NFG's part. Under another swap strategy, NFG would pay a fixed interest rate and receive a variable interest rate on a notional amount. This would be a "fixed-to-floating swap" on NFG's part.

NFG also proposes to enter into an anticipatory interest rate hedging program ("Anticipatory Hedge Program") using Derivative Transactions within a limited time prior to the issuance of short- or long-term debt securities. The Hedge Program will be used to fix and/or limit the interest rate risk exposure of any new issuance through: (1) a forward sale of exchange-traded U.S. Treasury futures contracts, U.S. Treasury securities and/or a forward swap (each a "Forward Sale"); (2) the purchase of put options on U.S. Treasury securities ("Put Options Purchase"); (3) a Put Options Purchase in combination with the sale of call options on U.S. Treasury securities ("Zero Cost Collar"); or (4) some combination of a Forward Sale, Put Options Purchase and/or Zero Cost Collar.

The program may be executed on-exchange ("On-Exchange Trades") with brokers through the opening of futures and/or options positions traded on the Chicago Board of Trade, the opening of over-the-counter positions with one or more counterparties ("Off-Exchange Trades") or a combination of On-Exchange-Trades and Off-Exchange-Trades") or a combination of On-Exchange-Trades and Off-Exchange-Trades. NFG will determine the optimal

[1] The terms and conditions of this authorization are contained in Holding Co. Act Release No. 26532 (June 12, 1996).

[2] If underwriters are used in the sale of the securities, these securities will be acquired by the underwriters for their own account and may be resold from time to time in one or more transactions, including negotiated transactions, at a fixed public offering price or at varying prices determined at the time of sale. The securities may be offered to the public either through underwriting syndicates (which may be represented by managing underwriters) or directly by one or more underwriters acting alone. The securities may be sold directly by NFG or through agents designated by NFG from time to time. If dealers are used in the sale of any securities, these securities will be sold to the dealers and any dealer may then resell the securities to the public at fixed prices or varying prices to be determined by the dealer at the time of resale. NFG may also sell securities to agents acting as principal. These agents may sell the securities to the public at fixed prices or varying prices to be determined by the agent at the time of resale. If equity securities are being sold in an underwritten offering, NFG may grant the underwriters an over-allotment option permitting the purchase from NFG of additional equity securities (an additional 15% under present guidelines), at the same price as the equity securities then being offered, for the sole purpose of covering over-allotments.

Securities issued by NFG may be sold under "delayed delivery contracts" which permit the underwriters or agents to locate buyers who will agree to buy the securities at an agreed price on the trade date but accept delivery at a later date. Debt securities may also be sold through the use of medium-term notes and similar programs or in transactions under which securities are sold to initial purchasers and then resold by the initial purchasers (typically, investment banks or similar institutions) in transactions covered by rule 144A or another exemption under the Securities Act of 1933 ("Securities Act") or under Regulation S under the Securities Act.

[3] *See* Holding Co. Act Release No. 26443.

[4] *See* Holding Co. Act Release Nos. 26670 (Feb. 18, 1997) ("February 1997 ORder"), 26655 (Jan. 24, 1997), 26394 (Oct. 19, 1995), 26261 (Mar. 30, 1995), 26176 (Nov. 30, 1994), 25753 (Mar. 5, 1993) and 24793 (Dec. 28, 1988) (collectively, "Existing Common Stock Authorizations").

[5] The 1997 Award and Option Plan under the February 1997 Order authorizes awards granting the right to purchase up to 1,900,000 shares of common stock through December 12, 2006.

VOL 63 ISS 16 JA 26 1998 UMI

structure of the Anticipatory Hedge Program at the time of execution. NFG may decide to lock in interest rates and/or limit its exposure to interest rate increases. All open positions under the Anticipatory Hedge Program will be closed on or prior to the date of the new issuance and NFG will not, at any time, take possession of the underlying U.S. Treasury securities.

All transactions entered into under the Hedge Program will be bona fide hedges and will meet the criteria established by the Financial Accounting Standards Board in order to qualify for hedge accounting treatment, and NFG will comply with the financial disclosure requirements associated with hedging transactions.

NFG proposes that the authorizations requested in this proceeding with respect to hedging transactions, including the Hedge Program and the Anticipatory Hedge Program, supersede the authorizations to engage in hedging transactions contained in the December 1995 Order.

d. Other Securities

In addition to the specific securities for which NFG seeks authorization in this proceeding, NFG also proposes to issue other types of securities ("Other Securities") that it deems appropriate during the Authorization Period. NFG requests that the Commission reserve jurisdiction over the issuance of Other Securities. NFG also undertakes that it will file a post-effective amendment in this proceeding describing the general terms of the proposed Other Securities and obtain a supplemental order of the Commission authorizing the issuances of Other Securities.

2. Intrasystem Financing by Subsidiaries

The Subsidiaries propose various financing transactions between NFG and the Subsidiaries and among the Subsidiaries.

a. Money Pool

Under the December 1995 Order, NFG, Distribution, Supply, Seneca Resources, Highland, Leidy, Horizon, Data-Track, NFR and UCI ("Current Money Pool Participants") were authorized to engage in a money pool arrangement ("Money Pool") through December 31, 2000. The Current Money Pool Participants now propose to continue to participate in, and incur short-term borrowings from, the Money Pool through the Authorization Period. NFG proposes to add Seneca Independence, Niagara Marketing and Niagara Energy as new participants to the Money Pool. NFG further proposes that the authorizations requested in this proceeding with respect to the Money Pool supersede the authorizations for the current Money Pool contained in the December 1995 Order.

At certain times during the year, NFG and certain Subsidiaries generate surplus funds. Each Subsidiary may contribute excess funds to the Money Pool from time to time. The Applicants propose that the Subsidiaries borrow short-term funds from the Money Pool and that the maximum amount of Money Pool borrowings outstanding for each Subsidiary will be determined by NFG and the Subsidiaries in accordance with business needs. Subsidiary borrowings from the Money Pool would be used to provide financing for general corporate purposes, including the temporary financing of inventories and other working capital requirements and construction spending.

NFG will administer the Money Pool and coordinate the system's short-term borrowings but cannot borrow surplus funds generated by the Subsidiaries. NFG will match, to the extent possible, the short-term cash surpluses and borrowing requirements of the Subsidiaries.

The sources of funding for the Money Pool may consist of surplus funds of NFG and/or of its Subsidiaries, proceeds from NFG's sale of commercial paper, borrowings under credit facilities, borrowings by NFG from banks or other financial institutions and/or issuances of other securities. Amounts borrowed by NFG under the $750 million short-term borrowing authorization requested in this proceeding would be included in the Money Pool.

Subsidiary requests for short-term loans will be met first from available surplus funds of the other Subsidiaries, and then from NFG corporate funds, if available. In the event these sources of funds are insufficient, borrowings outside the system will be made by NFG through the issuance and sale of commercial paper, borrowings under credit facilities, other borrowing facilities with banks or other financial institutions and/or issuances of other securities. These borrowings will not exceed $750 million during the Authorization Period.

The interest rate on Subsidiary borrowings consisting solely of internal funds from the Money Pool will be the same rate charged on high-grade unsecured 30-day commercial paper sold through dealers by major corporate issuers. Borrowings consisting wholly or in part of funds obtained through the sale of commercial paper or borrowings from banks or other financial institutions will pay interest at a rate equal to NFG's net cost for these borrowings.

The Applicants state that none of the internal subsidiary funds (surplus funds of the Subsidiaries available in the Money Pool) will be used for the acquisition of an interest in an EWG or a FUCO except (a) investment by Horizon of up to $150 million and (b) investment by NFR or through a subsidiary, if formed, of up to $25 million.

b. Internal Nonutility Securities

National requests on behalf of the Subsidiaries, other than Distribution ("Nonutility Subsidiaries"), authorization to issue and sell securities of any type that are not otherwise exempt or authorized by Commission order ("Internal Nonutility Securities") to NFG and other Nonutility Subsidiaries during the Authorization Period. NFG requests that the Commission reserve jurisdiction over the issuances of Internal Nonutility Securities. NFG also undertakes that it will file a post-effective amendment in this proceeding describing the general terms of the proposed Internal Nonutility Securities and obtain a supplemental order of the Commission authorizing the issuances of Internal Nonutility Securities.

3. External Financing by Subsidiaries

NFG also requests authorization for the Nonutility Subsidiaries to issue and sell securities of any type that are not otherwise exempt or authorized by Commission order, including guarantees (collectively, "External Nonutility Securities"), to persons other than NFG, including banks, insurance companies and other financial institutions during the Authorization Period. NFG requests that the Commission reserve jurisdiction over the issuance of External Nonutility Securities. NFG also undertakes that it will file a post-effective amendment in this proceeding describing the general terms of the proposed External Nonutility Securities and obtain a supplemental order of the Commission authorizing the issuances of External Nonutility Securities.

Distribution also proposes to issue and sell debt securities of any type that are not otherwise exempt or authorized by Commission order to persons other than NFG, including banks, insurance companies and other financial institutions, in an aggregate principal amount which will not exceed $250 million during the Authorization Period.

4. Financing Entities

NFG and the Nonutility Subsidiaries propose to organize new corporations, trusts, partnerships or other entities created for the purpose of facilitating financings. These entities will issue to third parties interests in such entities or other securities authorized or issued under an exemption. Additionally, request is made for: (a) The issuance of debentures or other evidences of indebtedness by NFG or Nonutility Subsidiaries to a financing entity in return for the proceeds of the financing, and (b) the acquisition by NFG and Nonutility Subsidiaries of voting interests or equity securities issued by the financing entity to establish such Applicant's ownership of the financing entity. NFG and the Nonutility Subsidiaries also propose to enter into guarantees and expense agreements with the corresponding financing entities, under which they would agree to pay all amounts payable relating to the securities issued by the financing entity. The amount of any guarantees provided to financing entities will not exceed $250 million in the aggregate at any one time during the Authorization Period.

5. Guarantees by National

NFG is currently authorized to guarantee up to $500 million of obligations under Commission order dated November 12, 1993 (HCAR No. 25922) ("November 1993 Order"). NFG now proposes to guarantee securities of, and provide other forms of credit support with respect to obligations of, its Subsidiaries in an aggregate amount not to exceed $2 billion at any time during the Authorization Period. The $2 billion of guarantees is in addition to any financing requested in the Application. The terms and conditions of any guarantee will be negotiated on a case by case basis as the need arises. NFG proposes that the guarantee authorization requested in this proceeding supersede and replace the guarantee authorization granted in the November 1993 Order.

Guarantees and other forms of credit support provided by NFG on behalf of any EWG, FUCO or rule 58 company will be subject to the limitations of rule 53 or rule 58, as applicable.

6. Acquisition of EWGs, FUCOs and Rule 58 Companies

NFG proposes to use some or all of the proceeds of the financings for which authorization is requested in this proceeding to invest in EWGs and FUCOs in an aggregate amount which, when added to NFG's aggregate investment, as defined in rule 53(a)(1), would not exceed 50% of NFG's consolidated retained earnings, as defined in rule 53(a)(1). NFG proposes that the authorization to invest in EWGs and FUCOs requested in this Application supersede the authorization applicable to EWG and FUCO investments contained in Commission order dated August 29, 1995 (HCAR No. 26364).

NFG also proposes to use some or all of the proceeds of the financings for which authorization is requested in this proceeding to make investments in energy-related companies and gas-related companies under rule 58.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

Margaret H. McFarland,

Deputy Secretary.

BILLING CODE 8010–01–M

SECURITIES AND EXCHANGE COMMISSION

[Rel. No. IC–22999; 812–10676]

SSgA Funds and State Street Bank and Trust Company, Notice of Application

January 14, 1998.

AGENCY: Securities and Exchange Commission ("SEC").

ACTION: Notice of application for an order under section 6(c) of the Investment Company Act of 1940 (the "Act") for an exemption from sections 13(a)(2), 13(a)(3), 18(f)(1), 22(f), and 22(g) of the Act and rule 2a–7 thereunder; under sections 6(c) and 17(b) of the Act for an exemption from sections 17(a)(1) and (2) of the Act; and pursuant to section 17(d) of the Act and rule 17d–1 thereunder.

SUMMARY OF APPLICATION: Applicants SSgA Funds and State Street Bank and Trust Company ("State Street") request an order that would permit SSgA Funds to enter into deferred compensation arrangements with certain of their directors.

FILING DATES: The application was filed on May 22, 1997 and amended on November 26, 1997. Applicants have agreed to file an amendment during the notice period, the substance of which is included in this notice.

HEARING OR NOTIFICATION OF HEARING: An order granting the application will be issued unless the SEC orders a hearing. Interested persons may request a hearing by writing to the SEC's Secretary and serving applicants with a copy of the request, personally or by mail. Hearing requests should be received by the SEC by 5:30 p.m. on February 9, 1998 and should be accompanied by proof of service on the applicants, in the form of an affidavit or, for lawyers, a certificate of service. Hearing requests should state the nature of the writer's interest, the reason for the request, and the issues contested. Persons who wish to be notified of a hearing may request notification by writing to the SEC's Secretary.

ADDRESSES: Secretary, SEC, 450 Fifth Street, N.W., Washington, D.C. 20549. SSgA Funds, Two International Place, 35th Floor, Boston, Massachusetts 02110; State Street, 225 Franklin Street, Boston, Massachusetts 02110.

FOR FURTHER INFORMATION CONTACT: David W. Grim, Staff Attorney, at (202) 942–0571, or Nadya B. Roytblat, Assistant Director, at (202) 942–0564 (Division of Investment Management, Office of Investment Company Regulation).

SUPPLEMENTARY INFORMATION: The following is a summary of the application. The complete application may be obtained for a fee from the SEC's Public Reference Branch (tel. 202–942–8090).

Applicants' Representations

1. SSgA Funds is an open-end management investment company registered under the Act and comprised of several investment portfolios. State Street serves as investment adviser to each portfolio of SSgA Funds. Applicants request that the relief also apply to all registered investment companies or series of these companies now or in the future advised by State Street or any entity under common control with or controlled by State Street (these registered investment companies, together with SSgA Funds, the "Funds").[1]

2. Each member of the board of trustees of SSgA Funds (collectively, the "Trustees") who is not an employee of State Street or Frank Russell Investment Management Company[2] or any of their affiliates (each, an "Eligible Trustee") receives annual fees from SSgA Funds which collectively are, and are expected to continue to be, insignificant in comparison to the total net assets of SSgA Funds. No Trustee who is an employee of State Street or Frank Russell Investment Management

[1] Each Fund that currently intends to rely on the requested relief has been named as an applicant. Any other existing or future Fund that relies on the order will comply with the terms and conditions of the application.

[2] Frank Russell Investment Management Company is the administrator of SSgA Funds.

VOL 63 ISS 16 JA 26 1998 UMI

Company or any of their affiliates receives any remuneration from SSgA Funds.

3. SSgA Funds proposes to adopt a formal Deferred Compensation Plan (the "Plan"). The Plan permits individual Eligible Trustees to elect to defer receipt of all or a portion of their fees, thereby also enabling them to defer payment of income taxes on such fees. The Plan may be amended from time to time by the Trustees, as long as such amendments are not inconsistent with the relief granted to applicants pursuant to the application.

4. An Eligible Trustee will be able to defer fees, but must so elect with respect to all of the Funds for which he or she serves as a Trustee. The election is to be made by execution of a notice of election to defer compensation ("Notice of Election"). Such election generally must be made prior to January 1 of each calendar year for which compensation is to be deferred.

5. Under the Plan, the deferred fees will be credited to a book entry account established by each Fund (the "Deferred Fee Account") as of the date such fees would have been paid to the Trustee. SSgA Funds proposes to use returns on shares ("Underlying Securities") of certain designated Funds and of other investment companies that are not affiliated with State Street designated from time to time by the Trustees (the "Eligible Funds") to determine the amount of earnings and gains or losses allocated to a Trustee's Deferred Fee Account. The value of the Deferred Fee Account as of any date would be periodically adjusted by treating the Deferred Fee Account as though an equivalent dollar amount had been invested and reinvested in the Underlying Securities. The Underlying Securities for a Deferred Fee Account will be shares of any of the Eligible Funds as the participating Trustee designates in his or her Notice of Election. The Trustee may change his or her designation quarterly. Each Deferred Fee Account will be credited or charged with book adjustments representing all interest, dividends, and other earnings and all gains and losses that would have been realized had the account been invested in the Underlying Securities.

6. The Plan provides that a participating Fund's obligation to make payments from a Deferred Fee Account will be a general obligation of the Fund and payments made pursuant to the Plan will be made from the Fund's general assets and property. With respect to the obligations created under the Plan, the relationship of the Trustee to the participating Fund will be that of a general unsecured creditor.

7. The Plan also provides that the participating Fund will be under no obligation to the Trustee to purchase, hold, or dispose of any Underlying Securities. If the Fund chooses to purchase investments in order to cover its obligations under the Plan, any and all Underlying Securities will continue to be part of the general assets and property of the Fund.

8. Each Fund intends generally, and with respect to any Fund that is a money market fund and that values its assets using either the amortized cost or penny rounding method (a "Money Market Fund") hereby undertakes, to purchase and maintain Underlying Securities in an amount equal to the deemed investments of the Deferred Fee Accounts of its Trustees.[3] All purchases and sales of Underlying Securities will be within the limitations imposed by section 12(d)(1) of the Act.

9. Under the Plan, the Trustee's deferred fees generally will be distributed in whole or in part on a date specified in the Trustee's Notice of Election, which date may not be sooner than the earlier of the first business day of January following the termination of the Trustee's service as a trustee or one year following the deferral election. Payments will be made in a lump sum or in installments as elected by the Trustee at the time of executing the Notice of Election. In the event of the Trustee's death, amounts payable to him or her under the Plan thereafter will be payable to his or her designated beneficiary; in other circumstances, the Trustee's right to receive payments generally will be nontransferable.

10. The Plan will not obligate any Fund to retain the services of a Trustee, nor will it obligate any Fund to pay any (or any particular level of) Trustee's fees to any Trustee. Rather, it will merely permit a Trustee to elect to defer receipt of all or part of the Trustee's fees that he or she would otherwise receive.

Applicants' Legal Analysis

1. Applicants request an order under section 6(c) for an exemption from sections 13(a)(2), 13(a)(3), 18(f)(1), 22(f), and 22(g) and rule 2a–7 to the extent necessary to permit the Funds to offer deferred fee arrangements to the Eligible Trustees; under sections 6(c) and 17(b) for an exemption from sections 17(a) (1) and (2) to permit each Fund to sell its shares to and redeem its shares from other Funds as part of the deferred fee arrangements; and pursuant to section 17(d) and rule 17d–1 to permit the Funds to effect joint transactions incident to the deferred fee arrangements.

2. Section 6(c) provides that the SEC may exempt any person, security, or transaction from any provision of the Act, if and to the extent that such exemption is necessary or appropriate in the public interest and consistent with the protection of investors and the purposes fairly intended by the policy and provisions of the Act.

3. Section 18(f)(1) generally prohibits a registered open-end investment company from issuing senior securities. Section 13(a)(2) requires that a registered investment company obtain shareholder authorization before issuing any senior security not contemplated by the recitals of policy in its registration statement. Applicants assert that the Plan raises none of the concerns underlying section 18(f). Applicants state that, in all cases, the liabilities for deferred fees are expected to be *de minimis* in relation to Fund net assets. Applicants submit that the Plan would not induce speculative investments by any Fund or provide opportunity for manipulative allocation of a Fund's expenses and profits; that control of each Fund would not be affected; and that the Plan would not confuse investors or convey a false impression of safety.

4. Section 22(f) prohibits undisclosed restrictions on the transferability or negotiability of redeemable securities issued by open-end investment companies. Applicants state that the restriction on transferability of a Trustee's benefits under the Plan would be clearly set forth in the Plan, would be included primarily to benefit the participating Trustee, and would not adversely affect the interests of the Trustee, the Fund, or any shareholder of any Fund.

5. Section 22(g) prohibits registered open-end investment companies from issuing any of their securities for services or for property other than cash or securities. Applicants believe that the Plan would provide for deferral of payment of Trustee fees and thus should be viewed as being issued not in return for services but in return for a Fund's not being required to pay such fees on a current basis.

6. Section 13(a)(3) provides that no registered investment company shall, unless authorized by the vote of a majority of its outstanding voting securities, deviate from any investment policy that is changeable only if authorized by shareholder vote. Applicants request relief from section 13(a)(3) only with respect to Funds that have a fundamental investment restriction prohibiting investments in securities of investment companies (the "Restriction Funds"). Applicants submit that it is appropriate to enable the Restriction Funds to invest in Underlying Securities without a shareholder vote. Applicants note that the value of the Underlying Securities is expected to be *de minimis* in relation to the total net assets of each Restriction Fund. Furthermore, applicants state that the value of the Underlying Securities held by each Restriction Fund will at all times equal the value of each Restriction Fund's obligations to pay deferred fees. Accordingly, applicants submit that changes in the value of the Underlying Securities will not affect the value of shareholders' investments in the Restriction Fund. Applicants also represent that appropriate disclosure regarding the Plan will be included in the statement of additional information of each Fund.

7. Rule 2a–7 imposes certain restrictions on the investments of money market funds that use the amortized cost method or penny-rounding method of computing their per share price. Applicants state that the requested exemption would permit each Money Market Fund in question to achieve an exact matching of Underlying Securities with the deemed investments of the Deferred Fee Accounts, thereby ensuring that the deferred fee arrangements will not affect net asset value. Applicants assert that the amounts involved in all cases will be *de minimis* in relation to total net assets of each Money Market Fund and will have no effect on the per share net asset value of the Money Market Fund.

8. Sections 17(a) (1) and (2) generally prohibit an affiliated person of a registered investment company from selling any security to, or purchasing any security from, such company. Section 2(a)(3)(C) provides that an affiliated person of another person includes any person directly or indirectly controlling, controlled by, or under common control with, such other person. Applicants submit that because the Funds share the same or an affiliated investment manager, generally the same Trustees, and many of the same officers, each Fund might be deemed to be under common control with all other Funds, and therefore each Fund might be deemed to be an affiliated person of every other Fund. Applicants believe that the sale of securities issued by the Funds pursuant to the Plan does not implicate Congress's concerns in enacting section 17(a). Applicants assert that such sales of securities merely would facilitate the matching of a Fund's liability for deferred Trustees' fees with the Underlying securities that would determine the amount of such Fund's liability.

9. Section 17(b) authorizes the SEC to exempt a proposed transaction from section 17(a) if evidence establishes that: (1) the terms of the transaction, including the consideration to be paid or received, are reasonable and fair and do not involve overreaching; (b) the transaction is consistent with the policy of each registered investment company concerned; and (c) the transaction is consistent with the general purposes of the Act. Because section 17(b) may apply only to a specific proposed transaction, applicants also request an order under section 6 (c) to permit a series of transactions between Funds contemplated by the Plan. Applicants represent that their application meets the standards of section 6(c) and 17(b).

10. Applicants state that because purchases of shares of any open-end Fund pursuant to the Plan are made at net asset value, the terms of the deferred fee arrangements are reasonable and fair and do not involve overreaching on the part of any person concerned. Applicants also submit that, because the purchase of shares of another Fund would not be made for investment purposes, but solely to match the Fund's liability for deferred fees, the purchase of the shares would not be inconsistent with the policies of each of the Funds. Applicants assert that in addition, because the number of shares pursuant to the deferred fee arrangements will be *de minimis* in relation to the size of each Fund, none of the Act's concerns with affiliated sales and purchases of Fund shares would be implicated.

11. Section 17(d) of the Act prohibits affiliated persons of registered investment companies, acting as principal, from effecting any transaction in which such registered investment company is a joint or joint and several participant with such person in contravention of rules and regulations prescribed by the SEC. Rule 17d–1 under the Act provides that the SEC may approve a transaction subject to section 17(d) after considering whether the participation of such registered investment company is consistent with the provisions, policies, and purposes of the Act and the extent to which such participation is on a basis different from or less advantageous than that of other participants. Because the Plan may be deemed to be a joint arrangement within the meaning of rule 17d–1, applicants request relief under section 17(d) and rule 17d–1 to the extent that these provisions may be applicable to the Plan. Applicants submit that the participating Trustee would neither directly nor indirectly receive a benefit that would otherwise inure to the Funds or any of their shareholders. Applicants submit that the effect of the Plan merely would be to defer the payment of fees that the Funds otherwise would be obligated to pay on a current basis.

Applicants' Condition

Applicants agree that the order granting the requested relief shall be subject to the following condition:

1. With respect to the requested relief from rule 2a–7, any Money Market Fund will buy and hold Underlying Securities (other than its own shares) that determine the performance of Deferred Fee Accounts to achieve an exact match between such Fund's liability to pay deferred fees and the assets that offset that liability.

For the Commission, by the Division of Investment Management, under delegated authority.

Margaret H. McFarland,

Deputy Secretary.

[FR Doc. 98–1792 Filed 1–23–98; 8:45 am]

BILLING CODE 8010–01–M

[3] Although a Fund's shares may serve as an Underlying Security with respect to deferred fees earned by a Trustee, it is not anticipated that a Fund will purchase its own shares. Rather, monies equal to the amount credited to the Deferred Fee Account with respect to the Fund's own shares will be invested as part of the general investment operations of that Fund.

TENNESSEE VALLEY AUTHORITY

Sunshine Act Meeting

AGENCY HOLDING THE MEETING: Tennessee Valley Authority (Meeting No. 1500).

TIME AND DATE: 9 a.m. (CST), January 28, 1998.

PLACE: Centerville City Hall, 102 East Swan, Centerville, Tennessee.

STATUS: Open.

Agenda

Approval of minutes of meeting held on December 9, 1997.

New Business

C—Energy

C1. Contract with Foster Wheeler Energy Corporation for pendant reheater replacements for Cumberland Fossil Plant, Units 1 and 2 boilers.

E—Real Property Transactions

E1. Abandonment of easement rights affecting 2.76 acres of the Hohenwald-Mt. Pleasant 46–kV Transmission Line easement in Lewis County, Tennessee (Tract No. HMP–30).

E2. Abandonment of easement rights affecting 5.03 acres of the Bull Run-Solway and Bull Run-Solway No. 2 Transmission Line easements in Knox County, Tennessee (Tract Nos. BRSW–

VOL 63 ISS 16 JA 26 1998 UMI

36, –37, –38, and –39 and BAST–27, –28, –29, and –30).

E3. Sale of noncommercial, nonexclusive permanent easement to Lea Anne Law for construction and maintenance of recreational water-use facilities affecting 0.30 acre of Tellico Lake shoreline in Monroe County, Tennessee (Tract No. XTELR–200RE).

E4. Grants of permanent easements to the City of Decatur for highway improvement projects affecting approximately 4.26 acres of land on Wheeler Lake in Morgan County, Alabama (Tract Nos. XTWR–104H and XTWR–105H).

E5. Sale of a nonexclusive permanent easement to the Waterworks Board of the Town of Section, Alabama, for a road affecting approximately 0.51 acre of land on Guntersville Lake in Jackson County, Alabama (Tract No. XGR–747H).

E6. Sale of a permanent easement to Brooks Fiber Communications of Tennessee, Inc., for installation and maintenance of a fiber optic cable affecting approximately 3 acres of land on Melton Hill Lake in Anderson County, Tennessee (Tract No. XMHR–58E).

E7. Modification of a release and grant of easement affecting approximately 0.03 acre of former TVA land on Norris Lake in Union County, Tennessee (Tract No. XNR–236:S–12).

E8. Grant of a permanent easement to the State of Tennessee for State Route 1 (U.S. 70) highway improvement project affecting approximately 0.36 acre of land on Kentucky Lake in Humphreys County, Tennessee (Tract No. XTGIR–147H).

Unclassified

F1. Approval to file condemnation cases in connection with permanent easements and rights-of-way for the following power transmission lines: Pickwick Dam-Memphis, Fayette County, Tennessee; and Portland-Westmoreland, Sumner County, Tennessee; and Booneville-Plumrose, Prentiss County, Mississippi.

Information Items

1. Amendments to the provisions of the TVA Savings and Deferral Retirement Plan and New Trust Agreement between the TVA Retirement System Board and Fidelity Management Trust Company.

2. Approval of pricing arrangements for the Real Time Pricing program.

3. Approval to file condemnation cases for the following transmission lines: Carriage House-Madison West Section, Jackson, Tennessee; Freeport-Miller, DeSoto County, Mississippi; Freeport-Miller Tap to Mitchell, DeSoto County, Mississippi; and Maury-Radnor Tap to Rally Hill, Maury County, Tennessee.

4. Approval for TVA Nuclear to enter into a contract in which Westinghouse Electric Corporation would purchase from TVA a space reactor coolant pump internals package located at the Watts Bar Nuclear Plant Unit 2.

5. Approval to award a fixed-price contract with Foster Wheeler Energy Corporation for intermediate waterwalls for the Cumberland Fossil Plant Units 1 and 2 boilers.

6. Approval of the Chief Financial Officer's proposed retention of new power proceeds and nonpower proceeds and payments to the U.S. Treasury in March 1998, pursuant to Section 26 of the TVA Act.

7. Approval of New Labor Relations Agreements Between TVA and Local 544, Service Employees' International Union, AFL–CIO.

8. Approval of the Chief Financial Officer's proposed financial statements for Fiscal Year 1997.

9. Approval of new Labor Relations agreements between TVA and the Engineering Association, Incorporated.

10. Approval of TVA contributions to the cost of TVA-sponsored medical coverage for TVA retirees—additional interim payment for retirees over 65, and delegation of authority to the Senior Vice President, Human Resources, or a designated representative, to take all actions necessary to implement the program.

11. Approval of revisions to the Competitive Indexed Rate program.

12. Approval of revisions to the Competitive Indexed Rate program at Powell Valley Electric Cooperative.

13. Delegation of authority to publish proposed and final regulations for TVA to implement Title IX of the Education Amendments of 1972.

14. Approval of revisions to the Competitive Indexed Rate program and of a contract for such arrangements with a customer that has been served by the City of Bristol, Virginia.

15. Approval for attainment of Fiscal 1997 Performance Incentive Plan Goals and proposed Fiscal 1997 Performance Incentive Plan awards for eligible represented and excluded employees and manager and specialist employees in pay groups 1–11.

16. Approval of amendment to Supplemental Executive Retirement Plan.

17. Approval for the sale of TVA Power Bonds and TVA subordinated debt.

18. Approval of recommendations resulting from the 62nd Annual Wage Conference, 1997—Construction Project Agreement Wage Rates.

19. Approval of amendment to the Performance Incentive Plan.

20. Approval to purchase subbituminous coal for various TVA fossil plants and rail transportation services.

For more information: Please call TVA Public Relations at (423) 632–6000, Knoxville, Tennessee. Information is also available at TVA's Washington Office (202) 898–2999.

Dated: January 21, 1998.

Edward S. Christenbury,

General Counsel and Secretary.

BILLING CODE 8120–08–M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

Reports, Forms and Recordkeeping Requirements Agency Information Collection Activity Under OMB Review

AGENCY: Office of the Secretary, DOT.

ACTION: Notice and request for comments.

SUMMARY: In compliance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected burden. The **Federal Register** Notice with a 60-day comment period soliciting comments on the following collection of information was published on September 30, 1997, [62 FR 51175].

DATES: Comments must be submitted on or before February 25, 1998.

FOR FURTHER INFORMATION CONTACT: Judith Street, ABC–100; Federal Aviation Administration; 800 Independence Avenue, SW.; Washington, DC 20591; Telephone number (202) 267–9895.

SUPPLEMENTARY INFORMATION:

Federal Aviation Administration (FAA)

Title: Certification: Pilots and Flight Instructors.

OMB Control Number: 2120–0021.

Type of Request: Extension of currently approved collection.

Affected Public: Individuals.

Form(s): 8710–1.

Abstract: The FAA is empowered to issue airmen certificates to properly qualified persons. This clearance request covers the burden imposed on airmen directly responsible for the control of aircraft. 14 CFR part 61 prescribes requirements for pilot and flight instructor certificates. 14 CFR part 143 prescribes requirements for ground instructors. Information collected is used to determine compliance and applicant eligibility.

Annual Estimated Burden Hours: The current burden for this collection is estimated to be 252,140 hours.

ADDRESSES: Send comments to the Office of Information and Regulatory Affairs, Office of Management and Budget, 725–17th Street, NW., Washington, DC 20503, Attention FAA Desk Officer.

Comments are Invited on: Whether the proposed collection of information is necessary for the proper performance of the functions of the Department, including whether the information will have practical utility; the accuracy of the Department's estimate of the burden of the proposed information collection; ways to enhance the quality, utility and clarity of the information to be collected; and ways to minimize the burden of the collection of information on respondents, including the use of automated collection techniques or other forms of information technology.

Issued in Washington, DC on January 20, 1998.

Phillip A. Leach,

Clearance Officer, United States Department of Transportation.

BILLING CODE 4910–62–P

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

Draft Environmental Impact Statement; Letcher County, Kentucky

AGENCY: Federal Highway Administration (FHWA), DOT.

ACTION: Notice of Withdrawal of Draft Environmental Impact Statement (DEIS).

SUMMARY: The FHWA is issuing this notice to advise the public that a final environmental impact statement (FEIS) will not be prepared for the proposed highway project in Letcher County, Kentucky. This is a formal withdrawal of the draft environmental document from the public record.

FOR FURTHER INFORMATION CONTACT: Jesse A. Story, Division Administrator, Federal Highway Administration, 330 W. Broadway, John C. Watt Federal Building, Frankfort, Kentucky 40602, Telephone: (502) 223–6720.

SUPPLEMENTARY INFORMATION: The FHWA in cooperation with the Kentucky Transportation Cabinet (KYTC) will not prepare a Final Environmental Impact Statement (FEIS) on the proposal to improve U.S. 119 in Letcher County, Kentucky. The original DEIS for the improvements (SSP 067 0119 009–018 018 D) was approved for pubic circulation on August 4, 1994. The scope of this project was identified as a 12-mile long major reconstruction and relocation of US 119 from Partridge, Kentucky to Whitesburg, Kentucky. Several new alternates were evaluated in this DEIS.

Based on an evaluation of the potentially significant environmental consequences and coupled with public and resource agency comments, the KYTC has reevaluated the proposed project and has determined that a reduced scope of work to provide a basic replacement of the two-lane facility with safety upgrades would substantially meet the purpose and need for the project. Since the reduced scope of work for the proposed project essentially negates the information contained in the DEIS, the FHWA is withdrawing the August 4, 1994 DEIS. The FHWA anticipates that no significant impacts will result from the proposed actions and that a FONSI will be issued.

Authority: 23 U.S.C. 315; 49 CFR 1.48.

Issued on: January 16, 1998.

Jesse A. Story,

Division Administrator, Frankfort, Kentucky.

Maritime Administration

[Docket No. MARAD–98–3330]

Information Collection Available for Public Comments and Recommendations

ACTION: Notice and Request for Comments.

SUMMARY: In accordance with the Paperwork Reduction Act of 1995 this notice announces the Maritime Administration's (MARAD's) intentions to request extension of approval for three years of a currently approved information collection.

DATES: Comments should be submitted on or before March 27, 1998.

FOR FURTHER INFORMATION CONTACT: Patricia Ann Thomas, Office of Maritime Labor, Training and Safety, MAR–250, Room 7302, 400 Seventh Street, S.W., Washington, D.C. 20590. Telephone number 202–366–2646 or fax number 202–493–2288. Copies of this collection can also be obtained from that office.

SUPPLEMENTARY INFORMATION:

Title of Collection: Merchant Marine Medals and Awards.

Type of Request: Extension of a currently approved information collection.

OMB Control Number: 2133–0506.

Form Number: No form is required for this collection.

Expiration Date of Approval: September 30, 1998.

Summary of Collection of Information: This information collection provides the Maritime Administration with a method for documenting and processing requests for merchant marine medals and decorations to masters, officers, and crew members of U.S. ships in recognition of their service in areas of danger during World War II, Korean War, Vietnam War and Operation DESERT STORM and the replacement of previously issued awards.

Need and Use of the Information: The information collection is used by MARAD personnel to process and verify requests for service awards. The issuance of awards is based upon requests from the public.

Description of Respondents: Eligible merchant seamen.

Annual Responses: 2500 responses.

Annual Burden: 2500 hours.

Comments: Signed, written comments should refer to the docket number that appears at the top of this document and must be submitted to the Docket Clerk, U.S. DOT Dockets, Room PL–401, 400 Seventh Street, S.W., Washington, D.C. 20590–0001. Specifically, address whether this information collection is necessary for proper performance of the function of the agency and will have practical utility, accuracy of the burden estimates, ways to minimize this burden, and ways to enhance quality, utility, and clarity of the information to be collected. All comments received will be available for examination at the above address between 10 a.m. and 5 p.m., e.t. Monday through Friday, except Federal Holidays. An electronic version of this document is available on the World Wide Web at http:/dms.dot.gov.

Dated: January 20, 1998.

By Order of the Maritime Administrator.

Joel C. Richard,

Secretary.

BILLING CODE 4910–81–P

DEPARTMENT OF TRANSPORTATION

National Highway Traffic Safety Administration

[Docket No. NHTSA–97–3122; Notice 2]

Dan Hill & Associates, Inc.; Grant of Application for Temporary Exemption From Federal Motor Vehicle Safety Standard No. 224

This document grants the application by Dan Hill & Associates, Inc., of Norman, Oklahoma, for a one-year temporary exemption from Motor Vehicle Safety Standard No. 224 *Rear Impact Protection*. The basis of the application was that compliance would cause substantial economic hardship to a manufacturer that has tried in good faith to comply with the standard.

Notice of receipt of the application was published on November 21, 1997, and an opportunity afforded for comment (62 FR 62398).

The applicant manufactures and sells a horizontal discharge trailer ("Flow Boy") that is used in the road construction industry to deliver asphalt and other road building materials to the construction site. The Flow Boy is designed to connect with and latch onto various paving machines ("pavers"). The Flow Boy, with its hydraulically controlled horizontal discharge system, discharges hot mix asphalt at a controlled rate into a paver which overlays the road surface with asphalt material.

Standard No. 224 requires, effective January 26, 1998, that all trailers with a GVWR of 4536 Kg or more, including Flow Boy trailers, be fitted with a rear impact guard that conforms to Standard No. 223 *Rear impact guards*. Installation of the rear impact guard will prevent the Flow Boy from connecting to the paver. Thus, Flow Boy trailers will no longer be functional and contractors will be forced to use standard dump body trucks or trailers with their inherent limitations.

The applicant, which manufactured 81 Flow Boy trailers in 1996 (plus 21 other trailers), asked for a one-year exemption in order to explore the feasibility of a rear impact guard that will allow the Flow Boy trailer to connect to a conventional paver. In the absence of an exemption, it believes that approximately 60 percent of its work force would have to be laid off. Its gross revenues would decrease by $6,000,000 (these have averaged $13,885,000 over its 1994, 1995, and 1996 fiscal years). Present studies show that the placement of the retractable rear impact guard would likely catch excess asphalt as it was discharged into the pavement hopper. Further, the increased cost of the Flow Body would likely cause contractors to choose the cheaper alternative of dump trucks. Finally, the applicant asserted that the increased weight of the retractable rear impact guard would significantly decrease the payload of the Flow Boy.

Applicant sent its Product Specialist to Germany in 1994 to view underride protection guards installed by a German customer on Flow Boy trailers but the technology proved inapplicable because of differences between German and American pavers. Manufacturers of paving machines are not interested in redesigning their equipment to accommodate a Flow Boy with a rear impact guard. The applicant has contacted a British manufacturer of a retractable rear impact guard but the information received to date does not look encouraging. If an exemption is granted, the applicant will continue to explore the feasibility of a retractable rear guard that allows connection with a paver.

The applicant believes that an exemption would be in the public interest and consistent with traffic safety objectives because the Flow Boy aids in the construction of the national road system. It spends very little of its operating life on the highway and the likelihood of its being involved in a rear-end collision is minimal. In addition, the design of the Flow Boy is such that the rear tires act as a buffer and reduce the likelihood of impact with the trailer.

No comments were received in response to the **Federal Register** notice.

The applicant differs from the usual hardship petitioner in that it is a corporation whose net revenues are positive and healthy. The hardship to be borne in this instance is the effect of a denial upon the company. The applicant's production is limited in number; it produced 102 trailers in 1996, of which 86 are of the type for which exemption is sought. This is approximately 85 percent of its production. Although the remaining trailer types appear to contribute a proportionally greater part of the company's gross revenues, these revenues would decline by a significant percentage. There is also the economic cost, not discussed by the company, of maintaining unused manufacturing facilities and settling accounts with suppliers for goods ordered and canceled.

The company's efforts to comply appear to have been stymied by the unacceptability of a redesign of the Flow Boy to its consumers. Its application indicates that, for the past three years, it has looked at home and abroad in search of a solution that meets both safety and market needs. It will continue to do so if granted an exemption.

The applicant has argued that an exemption is in the public interest because the Flow Boy aids in construction of the national highway system. While the company did not quantify its work force, it estimated that approximately 60 percent of it would have to be laid off in the wake of a denial. Thus, the company could have argued that continued full employment of its work force is also in the public interest.

Finally, the company believes that an exemption is consistent with objectives of motor vehicle safety because the Flow Boy spends very little of its operating life on the highway and the likelihood of it being involved in a rear-end collision is minimal. NHTSA understands this to mean that proportion of time spent in transit on the roads from one job site to another will be small in comparison with the time spent at rest at construction sites amidst other road equipment. This indicates that the exposure of a Flow Boy without a rear underride guard to a potential crash situation will be reduced. The small number of trailers that may be produced under the exemption, less than 100, further reduces the crash potential.

In consideration of the foregoing, it is hereby found that requiring compliance with Standard No. 224 as of its effective date would cause substantial economic hardship to a manufacturer that has tried in good faith to comply with the standard. It is also found that an exemption would be in the public interest and consistent with the objectives of motor vehicle safety. Accordingly, the company of Dan Hill & Associates is hereby granted NHTSA Temporary Exemption No. 98–1 from 49 CFR 571.224 Motor Vehicle Safety Standard No. 224 *Rear Underride Protection*, expiring February 1, 1999.

Authority: 49 U.S.C. 30113, 49 CFR part 555; delegation of authority at 49 CFR 1.50.

Issued on January 20, 1998.

Ricardo Martinez,

Administrator.

DEPARTMENT OF TRANSPORTATION

Surface Transportation Board

[STB Finance Docket No. 33542]

CSX Transportation, Inc.—Trackage Rights Exemption—Consolidated Rail Corporation and Indiana Harbor Belt Railroad

Consolidated Rail Corporation (Conrail), as owner, and Indiana Harbor Belt Railroad Company (IHB), as operator,[1] have agreed to grant overhead trackage rights to CSX Transportation, Inc. (CSXT), to operate its trains, locomotives, cars, and equipment with CSXT's own crews over Conrail's Kankakee Line between Michigan Avenue, Indiana Harbor, IN, milepost 0.0±, and Osborn, IN, milepost 4.8±, at the connection between Conrail's Kankakee Line and the Norfolk and Western Railway Company, a total distance of approximately 4.8 miles. The trackage rights are restricted to bridge traffic only between the termini of the trackage rights for trainload movements of finished automobiles and associated empty equipment to and from the Ford Mixing Center in the Calumet Yard area.

The transaction is expected to be consummated on January 19, 1998, the effective date of the exemption.

As a condition to this exemption, any employees affected by the trackage rights will be protected by the conditions imposed in *Norfolk and Western Ry. Co.—Trackage Rights—BN*, 354 I.C.C. 605 (1978), as modified in *Mendocino Coast Ry., Inc.—Lease and Operate*, 360 I.C.C. 653 (1980).

This notice is filed under 49 CFR 1180.2(d)(7). If the notice contains false or misleading information, the exemption is void *ab initio*. Petitions to revoke the exemption under 49 U.S.C. 10502(d) may be filed at any time. The filing of a petition to revoke will not automatically stay the transaction.

An original and 10 copies of all pleadings, referring to STB Finance Docket No. 33542, must be filed with the Surface Transportation Board, Office of the Secretary, Case Control Unit, 1925 K Street, N.W., Washington, DC 20423–0001 and served on: Charles M. Rosenberger, Senior Counsel, CSX Transportation, Inc., 500 Water Street, J-150, Jacksonville, FL 32202.

Decided: January 16, 1998.

By the Board, David M. Konschnik, Director, Office of Proceedings.

Vernon A. Williams,

Secretary.

[FR Doc. 98–1755 Filed 1–23–98; 8:45 am]

BILLING CODE 4915–00–P

[1] Pursuant to a trackage rights agreement, dated April 9, 1906, Conrail granted trackage rights to IHB to operate over portions of its railroad, including that portion of the Kankakee Line which CSXT will acquire upon the effective date of this exemption. Since IHB acts as agent on behalf of Conrail in the performance of supervision, control and maintenance of this line of railroad, IHB is included as a party to the trackage rights agreement.

DEPARTMENT OF EDUCATION

[CFDA No. 84.037]

Office of Postsecondary Education; Availability of the Federal Perkins Loan and National Direct Student Loan Programs Directory of Designated Low-Income Schools For Teacher Cancellation Benefits For the 1997–98 School Year

ACTION: Notice of availability of the Federal Perkins Loan and National Direct Student Loan Programs Directory of Designated Low-Income Schools for Teacher Cancellation Benefits for the 1997–98 School Year.

SUMMARY: The Secretary announces that the 1997–98 Federal Perkins Loan and National Direct Student Loan Programs Directory of Designated Low-Income Schools (Directory) is now available. Under the Federal Perkins Loan and National Direct Student Loan programs, a borrower may have repayment of his or her loan deferred and a portion of his or her loan canceled if the borrower teaches full-time for a complete academic year in a designated elementary or secondary school having a high concentration of students from low-income families. In the 1997–98 Directory, the Secretary lists, on a State-by-State and Territory-by-Territory basis, the schools in which a borrower may teach during the 1997–98 school year to qualify for deferment and cancellation benefits.

DATES: The Directory is currently available.

ADDRESSES: Information concerning specific schools listed in the Directory may be obtained from Sherraine Green, Systems Administration Branch, Campus-Based Programs Systems Division, Office of Postsecondary Education, U.S. Department of Education, 600 Independence Avenue, SW., (Regional Office Building 3, Room 4621), Washington, DC 20202–5447, Telephone (202) 708–5182. Information concerning deferment and cancellation of a National Direct or Federal Perkins loan may be obtained from Sylvia Ross or Gail McLarnon, Program Specialists, Campus-Based Loan Programs Section, Loans Branch, Policy Development Division, Office of Postsecondary Education, U.S. Department of Education, 600 Independence Avenue, SW., (Regional Office Building 3, Room 3045), Washington, DC 20202–5447, Telephone (202) 708–8242. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339 between 8 a.m. and 8 p.m., Eastern time, Monday through Friday.

Individuals with disabilities may obtain this document in an alternate format (e.g., Braille, large print, audiotape, or computer diskette) to the contact person listed in the preceding paragraph.

Electronic Access to This Document

Anyone may view this document, as well as all other Department of Education documents published in the **Federal Register**, in text or portable document format (pdf) on the World Wide Web at either of the following sites:

http://ocfo.ed.gov/fedreg.htm
http://www.ed.gov/news.html

To use the pdf you must have the Adobe Acrobat Reader Program with Search, which is available free at either of the previous sites. If you have questions about using the pdf, call the U.S. Government Printing Office toll free at 1–888–293–6498.

FOR FURTHER INFORMATION CONTACT: Directories are available at (1) each institution of higher education participating in the Federal Perkins Loan Program, (2) each of the fifty-seven (57) State and Territory Departments of Education, (3) each of the major Federal Perkins Loan billing services, and (4) the U.S. Department of Education, including its regional offices.

SUPPLEMENTARY INFORMATION: The Secretary selects the schools that qualify the borrower for deferment and cancellation benefits under the procedures contained in the Federal Perkins Loan program regulation in 34 CFR 674.53, 674.54 and 674.55.

The Secretary has determined that, for the 1997–98 academic year, full-time teaching in the schools set forth in the 1997–98 Directory qualifies a borrower for deferment and cancellation benefits.

The Secretary is providing the Directory to each institution participating in the Federal Perkins Loan Program. Borrowers and other interested parties may check with their lending institutions, the appropriate State or Territory Department of Education, regional offices of the Department of Education, or the Office of Postsecondary Education of the Department of Education concerning the identity of qualifying schools for the 1997–98 academic year. The Office of Postsecondary Education retains, on a permanent basis, copies of past Directories.

Dated: January 14, 1998.

David A. Longanecker,

Assistant Secretary for Postsecondary Education.

REMINDERS

The items in this list were editorially compiled as an aid to Federal Register users. Inclusion or exclusion from this list has no legal significance.

RULES GOING INTO EFFECT JANUARY 26, 1998

AGRICULTURE DEPARTMENT
Rural Utilities Service
Rural development:
Distance learning and telemedicine loan and grant program; correction; published 1-26-98

ENVIRONMENTAL PROTECTION AGENCY
Air quality implementation plans; approval and promulgation; various States:
Illinois; published 11-26-97
Air quality implementation plans; √A√approval and promulgation; various States; air quality planning purposes; designation of areas:
Tennessee; published 11-25-97

FEDERAL COMMUNICATIONS COMMISSION
Radio stations; table of assignments:
Hawaii; published 12-18-97
Missouri; published 1-5-98
New York; published 12-19-97
Texas; published 12-22-97

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
Acquisition regulations:
Contract administration; miscellaneous amendments; published 1-26-98

SECURITIES AND EXCHANGE COMMISSION
Electronic Data Gathering, Analysis, and Retrieval System (EDGAR):
Flier Manual—
Update and incorporation by reference; published 1-23-98

TRANSPORTATION DEPARTMENT
Coast Guard
Ports and waterways safety:
Vessels bound for ports and places; international safety management code verification status; published 12-11-97

TRANSPORTATION DEPARTMENT
National Highway Traffic Safety Administration
Motor vehicle safety standards:
Rear impact guards; petition denied; published 1-26-98
Rear impact guards; rear impact protection; published 1-24-96

TREASURY DEPARTMENT
Currency and foreign transactions; financial reporting and recordkeeping requirements:
Bank Secrecy Act; implementation—
Funds transmittals by financial institutions; conditional exceptions to full compliance with safe harbor provisions of Travel Rule; published 1-26-98

COMMENTS DUE NEXT WEEK

AGRICULTURE DEPARTMENT
Agricultural Marketing Service
Cherries (tart) grown in—
Michigan et al.; comments due by 2-5-98; published 1-21-98
Tart cherries grown in Michigan et al.; comments due by 2-5-98; published 1-6-98

AGRICULTURE DEPARTMENT
Animal and Plant Health Inspection Service
Interstate transportation of animals and animal products (quarantine):
Brucellosis in cattle and bison—
State and area classifications; comments due by 2-2-98; published 12-4-97
Plant-related quarantine, domestic:
Karnal bunt disease—
Approved alternative treatments; comments due by 2-3-98; published 12-5-97

AGRICULTURE DEPARTMENT
Food Safety and Inspection Service
Meat and poultry inspection:
Pathogen reduction; hazard analysis and critical control point (HACCP) systems—
Generic HACCP models and guidance materials; availability; comments due by 2-2-98; published 11-3-97

COMMERCE DEPARTMENT
National Oceanic and Atmospheric Administration
Fishery conservation and management:
Magnuson Act provisions; comments due by 2-5-98; published 1-6-98
West Coast States and Western Pacific fisheries—
West Coast salmon; comments due by 2-2-98; published 12-3-97

COMMODITY FUTURES TRADING COMMISSION
Commodity option transactions:
Futures-style margining of options traded on regulated futures exchanges; comments due by 2-2-98; published 12-19-97

Civilian health and medical program of uniformed services (CHAMPUS):
Payments due from persons unaware of eligibility loss; collection waiver; comments due by 2-2-98; published 12-4-97

ENVIRONMENTAL PROTECTION AGENCY
Air quality implementation plans; approval and promulgation; various States:
Alabama; comments due by 2-6-98; published 1-7-98
Indiana; comments due by 2-5-98; published 1-6-98
Drinking water:
National primary and secondary drinking water regulations—
Disinfectants and disinfection byproducts; data availability; comments due by 2-3-98; published 11-3-97
Interim enhanced surface water treatment; disease-causing organisms, protection against; data availability; comments due by 2-3-98; published 11-3-97
Pesticides; tolerances in food, animal feeds, and raw agricultural commodities:
Fluorine compounds; comments due by 2-3-98; published 12-5-97
Maleic hydrazide; comments due by 2-3-98; published 12-5-97
Pyrimethanil; comments due by 2-2-98; published 12-2-97
Sodium chlorate; comments due by 2-2-98; published 12-3-97

EXPORT-IMPORT BANK
Freedom of Information Act and Privacy Act; implementation; comments due by 2-2-98; published 12-4-97

FEDERAL COMMUNICATIONS COMMISSION
Common carrier services:
Competitive bidding procedures
Spectrum auction program; minority-based and gender-based designated entity provisions, etc.; comments due by 2-6-98; published 1-7-98
Radio stations; table of assignments:
Florida; comments due by 2-2-98; published 12-18-97
Mississippi; comments due by 2-2-98; published 12-18-97
Oklahoma; comments due by 2-2-98; published 12-18-97
Texas; comments due by 2-2-98; published 12-18-97
Television broadcasting:
Cable television systems—
Program access proceeding; complaint resolution; comments due by 2-2-98; published 1-13-98

FEDERAL DEPOSIT INSURANCE CORPORATION
Freedom of Information Act; implementation; comments due by 2-2-98; published 1-2-98
Risk-based capital:
Recourse and direct credit substitutes; comments due by 2-3-98; published 11-5-97

FEDERAL RESERVE SYSTEM
Risk-based capital:
Recourse and direct credit substitutes; comments due by 2-3-98; published 11-5-97

HEALTH AND HUMAN SERVICES DEPARTMENT
Food and Drug Administration
Food for human consumption:

Food labeling—
Baking powder, baking soda, pectin; reference amount and serving size; comments due by 2-2-98; published 11-18-97

HEALTH AND HUMAN SERVICES DEPARTMENT
Health Care Financing Administration
Medicare:
Medicare+Choice plans and risk-sharing contractors; user fee collection; comments due by 2-2-98; published 12-2-97

INTERIOR DEPARTMENT
Fish and Wildlife Service
Endangered and threatened species:
Kauai cave wolf spider and Kauai cave amphipod; comments due by 2-3-98; published 12-5-97

INTERIOR DEPARTMENT
Hearings and Appeals Office, Interior Department
Hearings and appeals procedures:
Stay of decisions; comments due by 2-6-98; published 12-8-97

INTERIOR DEPARTMENT
Surface Mining Reclamation and Enforcement Office
Permanent program and abandoned mine land reclamation plan submissions:
Kansas; comments due by 2-4-98; published 1-20-98
Louisiana; comments due by 2-6-98; published 1-7-98
Maryland; comments due by 2-4-98; published 1-20-98
Oklahoma; comments due by 2-5-98; published 1-6-98

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION
Acquisition regulations:
Contruction contracts, dismantling, demolishing, or removing improvements; equitable adjustments; comments due by 2-6-98; published 12-8-97

NATIONAL CREDIT UNION ADMINISTRATION
Credit unions:
Investment and deposit activities
Broker-dealer provisions revised; comments due by 2-2-98; published 12-4-97
Mergers or conversions of federally-insured credit unions—
Plain English disclosure statement; comments due by 2-2-98; published 12-4-97
Voluntary termination or conversion of insured status; disclosure forms amended; comments due by 2-2-98; published 12-4-97

PANAMA CANAL COMMISSION
Canal tolls rates and vessel measurement rules:
Small vessels transiting Canal, fixed minimum toll rate; comments due by 2-6-98; published 1-5-98

PERSONNEL MANAGEMENT OFFICE
Health benefits; Federal employees:
Minimum salary requirement removed; comments due by 2-5-98; published 1-6-98

RAILROAD RETIREMENT BOARD
Railroad Retirement Act:
Creditable railroad compensation; comments due by 2-2-98; published 12-4-97

SECURITIES AND EXCHANGE COMMISSION
Securities:
Disclosure documents; household delivery; comments due by 2-2-98; published 11-20-97

SOCIAL SECURITY ADMINISTRATION
Organization and procedures:
Social security numbers for aliens; information collection from State Department and Immigration and Naturalization Service; comments due by 2-2-98; published 12-2-97

TRANSPORTATION DEPARTMENT
Coast Guard
Boating safety:
Recreational boating education; federal requirements; comments due by 2-2-98; published 10-23-97
Recreational boating—
Personal flotation devices; Federal requirements; comments due by 2-2-98; published 9-25-97

TRANSPORTATION DEPARTMENT
Computer reservation systems, carrier-owned; comments due by 2-3-98; published 1-23-98

TRANSPORTATION DEPARTMENT
Federal Aviation Administration
Airworthiness directives:
de Havilland; comments due by 2-4-98; published 1-5-98
Aerospatiale; comments due by 2-6-98; published 12-23-97
Airbus; comments due by 2-6-98; published 1-7-98
Allison Engine Co.; comments due by 2-6-98; published 12-8-97
Bombardier; comments due by 2-6-98; published 12-8-97
Dassault; comments due by 2-4-98; published 1-5-98
Eurocopter France; comments due by 2-2-98; published 12-3-97
General Electric Co.; comments due by 2-6-98; published 12-8-97
Pratt & Whitney; comments due by 2-6-98; published 12-8-97
Raytheon; comments due by 2-4-98; published 12-3-97
Class D airspace; comments due by 2-3-98; published 12-5-97

TRANSPORTATION DEPARTMENT
Federal Railroad Administration
Railroad power brakes and drawbars:
Train and locomotive power braking systems; advanced technology use; two-way end-of-train telemetry devices; comments due by 2-2-98; published 1-16-98

TRANSPORTATION DEPARTMENT
National Highway Traffic Safety Administration
National Driver Register problem driver pointer system; procedures for participating in and receiving data from system:
Coast Guard Commandant; authorization to request and receive information; comments due by 2-2-98; published 12-2-97

TREASURY DEPARTMENT
Comptroller of the Currency
Risk-based capital:
Recourse and direct credit substitutes; comments due by 2-3-98; published 11-5-97

TREASURY DEPARTMENT
Fiscal Service
Marketable book-entry Treasury bills, notes, and bonds; sale and issue; uniform offering circular:
Fungible stripped interest components for Treasury inflation-indexed securities; comments due by 2-6-98; published 12-8-97

TREASURY DEPARTMENT
Internal Revenue Service
Income taxes:
Cafeteria plans; tax treatment; cross reference; comments due by 2-5-98; published 11-7-97

TREASURY DEPARTMENT
Thrift Supervision Office
Risk-based capital:
Recourse and direct credit substitutes; comments due by 2-3-98; published 11-5-97

LIST OF PUBLIC LAWS

The List of Public Laws for the 105th Congress, First Session, has been completed. It will resume when bills are enacted into Public Law during the second session of the 105th Congress, which convenes on January 27, 1998.

Note: A Cumulative List of Public Laws was published in the **Federal Register** on December 31, 1997.

Public Laws Electronic Notification Service (PENS)

PENS is a free electronic mail notification service for newly enacted public laws. To subscribe, send E-mail to **LISTPROC@ETC.FED.GOV** with the message:

SUBSCRIBE PUBLAWS-L FIRSTNAME LASTNAME

Note: This service is strictly for E-mail notification of new public laws only. The text of laws is not available through this service. We cannot respond to specific inquiries sent to this address.

VOL 63 ISS 16 JA 26 1998 UMI

CFR CHECKLIST

This checklist, prepared by the Office of the Federal Register, is published weekly. It is arranged in the order of CFR titles, stock numbers, prices, and revision dates.

An asterisk (*) precedes each entry that has been issued since last week and which is now available for sale at the Government Printing Office.

A "●" precedes each entry that is now available on-line through the Government Printing Office's *GPO Access* service at http://www.access.gpo.gov/nara/cfr. For information about *GPO Access* call 1-888-293-6498 (toll free).

A checklist of current CFR volumes comprising a complete CFR set, also appears in the latest issue of the LSA (List of CFR Sections Affected), which is revised monthly.

The annual rate for subscription to all revised volumes is $951.00 domestic, $237.75 additional for foreign mailing.

Mail orders to the Superintendent of Documents, Attn: New Orders, P.O. Box 371954, Pittsburgh, PA 15250–7954. All orders must be accompanied by remittance (check, money order, GPO Deposit Account, VISA, Master Card, or Discover). Charge orders may be telephoned to the GPO Order Desk, Monday through Friday, at **(202) 512–1800** from 8:00 a.m. to 4:00 p.m. eastern time, or FAX your charge orders to **(202) 512–2250**.

Complete set (one-time mailing)		247.00	1997
Complete set (one-time mailing)		264.00	1996

[1] Because Title 3 is an annual compilation, this volume and all previous volumes should be retained as a permanent reference source.

[2] The July 1, 1985 edition of 32 CFR Parts 1–189 contains a note only for Parts 1–39 inclusive. For the full text of the Defense Acquisition Regulations in Parts 1–39, consult the three CFR volumes issued as of July 1, 1984, containing those parts.

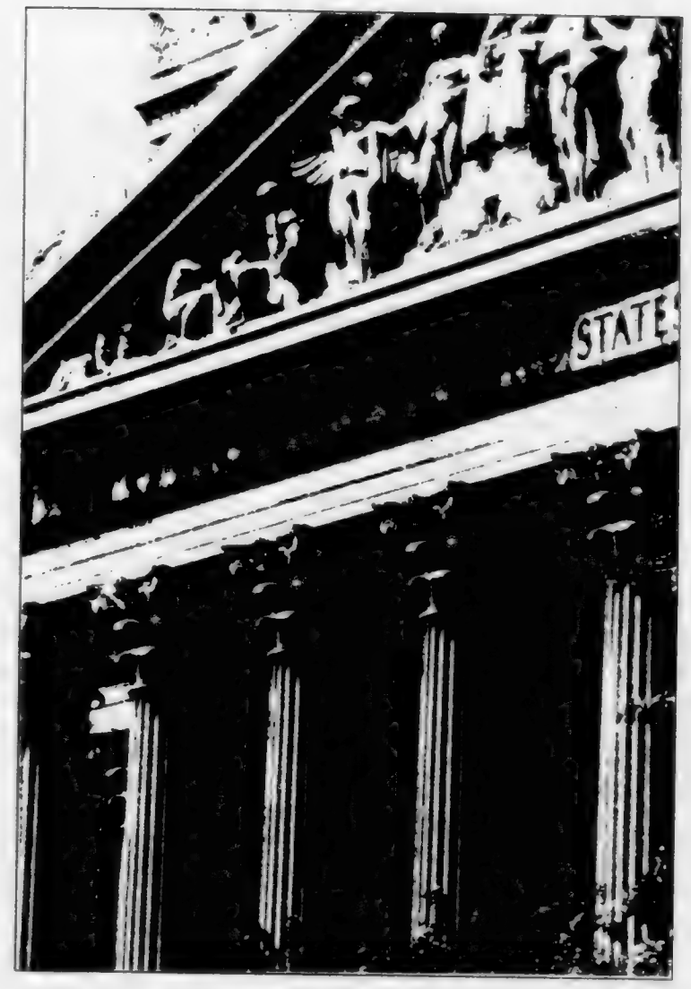
[3] The July 1, 1985 edition of 41 CFR Chapters 1–100 contains a note only for Chapters 1 to 49 inclusive. For the full text of procurement regulations in Chapters 1 to 49, consult the eleven CFR volumes issued as of July 1, 1984 containing those chapters.

[4] No amendments to this volume were promulgated during the period Apr. 1, 1990 to Mar. 31, 1997. The CFR volume issued April 1, 1990, should be retained.

[5] No amendments to this volume were promulgated during the period July 1, 1996 to June 30, 1997. The volume issued July 1, 1996, should be retained.

Would you like to know...

if any changes have been made to the Code of Federal Regulations or what documents have been published in the Federal Register without reading the Federal Register every day? If so, you may wish to subscribe to the *LSA (List of CFR Sections Affected)*, the *Federal Register Index*, or both.



LSA • List of CFR Sections Affected

The LSA (List of CFR Sections Affected) is designed to lead users of the Code of Federal Regulations to amendatory actions published in the Federal Register. The LSA is issued monthly in cumulative form. Entries indicate the nature of the changes—such as revised, removed, or corrected.
$27 per year.

Federal Register Index

The index, covering the contents of the daily Federal Register, is issued monthly in cumulative form. Entries are carried primarily under the names of the issuing agencies. Significant subjects are carried as cross-references.
$25 per year.

A finding aid is included in each publication which lists Federal Register page numbers with the date of publication in the Federal Register

The authentic text behind the news . . .

The Weekly Compilation of **Presidential Documents**

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue includes a Table of Contents, lists of acts approved by the President, nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements. Indexes are published quarterly.

Published by the Office of the Federal Register, National Archives and Records Administration.

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Administration, Washington, DC 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, DC 20402.

The Federal Register provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The seal of the National Archives and Records Administration authenticates this issue of the Federal Register as the official serial publication established under the Federal Register Act. 44 U.S.C. 1507 provides that the contents of the **Federal Register** shall be judicially noticed.

The Federal Register is published in paper, 24x microfiche and as an online database through *GPO Access*, a service of the U.S. Government Printing Office. The online edition of the **Federal Register** on *GPO Access* is issued under the authority of the Administrative Committee of the Federal Register as the official legal equivalent of the paper and microfiche editions. The online database is updated by 6 a.m. each day the **Federal Register** is published. The database includes both text and graphics from Volume 59, Number 1 (January 2, 1994) forward. Free public access is available on a Wide Area Information Server (WAIS) through the Internet and via asynchronous dial-in. Internet users can access the database by using the World Wide Web; the Superintendent of Documents home page address is http://www.access.gpo.gov/su_docs/, by using local WAIS client software, or by telnet to swais.access.gpo.gov, then login as guest, (no password required). Dial-in users should use communications software and modem to call (202) 512–1661; type swais, then login as guest (no password required). For general information about *GPO Access*, contact the *GPO Access* User Support Team by sending Internet e-mail to gpoaccess@gpo.gov; by faxing to (202) 512–1262; or by calling toll free 1–888–293–6498 or (202) 512–1530 between 7 a.m. and 5 p.m. Eastern time, Monday–Friday, except for Federal holidays.

The annual subscription price for the **Federal Register** paper edition is $555, or $607 for a combined **Federal Register**, Federal Register Index and List of CFR Sections Affected (LSA) subscription; the microfiche edition of the **Federal Register** including the Federal Register Index and LSA is $220. Six month subscriptions are available for one-half the annual rate. The charge for individual copies in paper form is $8.00 for each issue, or $8.00 for each group of pages as actually bound; or $1.50 for each issue in microfiche form. All prices include regular domestic postage and handling. International customers please add 25% for foreign handling. Remit check or money order, made payable to the Superintendent of Documents, or charge to your GPO Deposit Account, VISA, MasterCard or Discover. Mail to: New Orders, Superintendent of Documents, P.O. Box 371954, Pittsburgh, PA 15250–7954.

There are no restrictions on the republication of material appearing in the **Federal Register**.

How To Cite This Publication: Use the volume number and the page number. Example: 60 FR 12345.

FEDERAL REGISTER WORKSHOP

THE FEDERAL REGISTER: WHAT IT IS AND HOW TO USE IT

FOR: Any person who uses the Federal Register and Code of Federal Regulations.
WHO: Sponsored by the Office of the Federal Register.
WHAT: Free public briefings (approximately 3 hours) to present:
1. The regulatory process, with a focus on the Federal Register system and the public's role in the development regulations.
2. The relationship between the Federal Register and Code of Federal Regulations.
3. The important elements of typical Federal Register documents.
4. An introduction to the finding aids of the FR/CFR system.
WHY: To provide the public with access to information necessary to research Federal agency regulations which directly affect them. There will be no discussion of specific agency regulations.

Rules and Regulations

Federal Register
Vol. 63, No. 17
Tuesday, January 27, 1998

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each week.

Farm Service Agency

7 CFR Part 783

Commodity Credit Corporation

7 CFR Part 1478

RIN 0560–AF17

Tree Assistance Program

AGENCIES: Farm Service Agency and Commodity Credit Corporation, USDA.

ACTION: Final rule.

SUMMARY: The purpose of this final rule is to adopt as final, with change, the interim rule published in the **Federal Register** on September 29, 1997 (62 FR 50850). This final rule sets forth the regulations necessary for implementing the 1997 Tree Assistance Program (TAP). The Act Making Emergency Supplemental Appropriations for Recovery from Natural Disasters for the fiscal year ending September 30, 1997 (the Act), authorized TAP assistance to small orchardists to replace or rehabilitate trees and vineyards damaged by natural disasters. Due to limited funds appropriated for this program, the losses for which reimbursement is sought are limited to natural disasters that occurred between October 1, 1996, and September 30, 1997. Cost-share assistance may not exceed 100 percent of the eligible replacement or rehabilitation costs and may be based on average costs or the actual costs for the replanting practices, as determined by the Deputy Administrator for Farm Programs.

EFFECTIVE DATE: Final rule effective January 26, 1998.

FOR FURTHER INFORMATION CONTACT: David M. Nix, Production, Emergencies, and Compliance Division (PECD), Farm Service Agency (FSA), USDA, 1400 Independence Avenue, SW., STOP 0517, Washington, DC 20012–0517, telephone (202) 690–4091, e-mail address: dnix@wdc.fsa.usda.gov.

SUPPLEMENTARY INFORMATION:

Executive Order 12866

This final rule has been determined to be not significant and was not reviewed by the Office of Management and Budget (OMB) under Executive Order 12866.

Regulatory Flexibility Act

The Regulatory Flexibility Act is not applicable to this rule because the Farm Service Agency (FSA) is not required by 5 U.S.C. 553 or any other provision of law to publish a notice of proposed rulemaking with respect to the subject matter of this rule.

Environmental Evaluation

An Environmental Evaluation with respect to the Tree Assistance Program has been completed. It has been determined that this action is not expected to have a significant impact on the quality of the human environment. In addition, it has been determined that this action will not adversely affect environmental factors such as wildlife habitat, water quality, air quality, and land use and appearance. Accordingly, neither an Environmental Assessment nor an Environmental Impact Statement is needed.

Executive Order 12372

This program is not subject to the provisions of Executive Order 12372, which require intergovernmental consultation with State and local officials. See the Notice related to 7 CFR part 3015, subpart V, published at 48 FR 29115 (June 24, 1983).

Executive Order 12988

This rule has been reviewed in accordance with Executive Order 12988. The provisions of this rule preempt State law to the extent that such laws are inconsistent with the provisions of this rule. The provisions of this rule are retroactive to October 1, 1996. Before any judicial action may be brought regarding the provisions of this rule, the administrative remedies must be exhausted.

Executive Order 12612

It has been determined that this rule does not have sufficient Federalism implications to warrant the preparation of a Federalism Assessment. The provisions contained in this rule will not have a substantial direct effect on States or their political subdivisions or on the distribution of power and responsibilities among the various levels of government.

Unfunded Mandates Reform Act of 1995

This rule contains no Federal mandates under the regulatory provisions of Title II of the Unfunded Mandates Reform Act of 1995 (UMRA) for State, local, and tribal governments or the private sector. Therefore, this rule is not subject to the requirements of sections 202 and 205 of the UMRA regulations.

Discussion of Changes

No comments were received in response to the interim rule issued on September 29, 1997. However, during the administration of this program, FSA discovered a need for clarification regarding duplication of benefits which will be set forth in this final rule.

Clarification provides if an owner is eligible to receive payments under this part, catastrophic risk protection crop insurance program (7 CFR part 402), and non-insured crop disaster assistance program (7 CFR part 1437) for the same tree or vine loss, the eligible owner must choose whether to receive the other program benefits or payments under this part.

List of Subjects in 7 CFR Parts 783 and 1478

Disaster assistance, Grant programs—agriculture.

Accordingly, the interim rule set forth at 7 CFR part 783 which was published September 29, 1997, is adopted as a final rule with the following change:

PART 783—1997 TREE ASSISTANCE PROGRAM

1. The authority citation for part 783 continues to read as follows:

Authority: Pub. L. 105–18, 111 Stat. 158.

2. Section 783.8 paragraph (c) is revised to read as follows:

§ 783.8 Application process.

* * * * *

(c) If an owner is eligible to receive payments under this part and the catastrophic risk protection crop insurance program (7 CFR part 402), or

VOL 63 ISS 17 JA 27 1998 UMI

the noninsured crop disaster assistance program (7 CFR part 1437) for the same tree or vine loss, the eligible owner must choose whether to receive the other program benefits or payments under this part. The eligible owner cannot receive both. However, if the other program benefits are not available until after the eligible owner has received benefits under this part, the eligible owner may obtain the other program benefits if the eligible owner refunds the total amount of the payment received prior to receiving the other program benefits. If the eligible owner purchased additional coverage insurance, as defined in 7 CFR 400.651, or is eligible for emergency loans, the eligible owner will be eligible for assistance under such program, and this part as long as the amount received for the loss under the additional coverage or the emergency loan together with the amount received from the other programs does not exceed the amount of the actual loss of the eligible owner.

Signed at Washington, D.C., on January 20, 1998.

Bruce R. Weber,

Acting Administrator, Farm Service Agency and Acting Executive Vice President, Commodity Credit Corporation.

RIN 1115–AD59

Procedures for Filing a Derivative Petition (Form I–730) for a Spouse and Unmarried Children of a Refugee/Asylee

AGENCY: Immigration and Naturalization Service, Justice.

ACTION: Final rule.

SUMMARY: This final rule amends the Immigration and Naturalization Service (Service) regulations by providing specific guidelines on the procedures which must be followed by a refugee or asylee to bring his/her spouse and unmarried, minor child(ren) (derivatives) into the United States. This rule responds to the family reunification needs of refugees by establishing an equitable and consistent derivative policy for refugees which parallels the current derivative procedures for asylees. This rule also amends asylum regulations by removing from the definition of qualifying relationship child(ren) born to, or legally adopted by, the principal alien and spouse after approval of the principal alien's asylum application.

DATES: This rule is effective February 26, 1998.

FOR FURTHER INFORMATION CONTACT: Suzy Nguyen or Ramonia Law-Hill, Senior Adjudications Officer, Adjudications Division, Immigration and Naturalization Service, 425 I Street, NW., Room 3214, Washington, DC 20536, telephone (202) 514–5014.

SUPPLEMENTARY INFORMATION: On July 9, 1996, the Service published a proposed rule in the **Federal Register** at 61 FR 35984, providing procedures that must be followed by a refugee or asylee to bring his or her spouse and unmarried, minor child(ren) (derivatives) into the United States.

The proposed rule was designed to respond more fully to the family reunification needs of refugees, while establishing specific guidelines on the derivative policy for both refugees and asylees. First, the proposed rule allowed the Service to use the refugee's date of admission into the United States to determine accompanying or following-to-join eligibility for his/her spouse and unmarried, minor child(ren). A refugee would be able to file a Form I–730, Refugee/Asylee Relative Petition, for his/her spouse and/or each individual child if the relationship predates the refugee's date of admission to the United States, rather than the date of interview or tentative approval date of the application. This eligibility would extend to a child who is *in utero* on the date of the refugee's admission to the United States but is born after the refugee's admission as a refugee.

Second, the proposed rule imposed a 1-year time limit from the date of the principal refugee's admission to the United States within which he or she must file a Form I–730 for his/her spouse and/or each individual child, unless the Service determined that the filing period should be extended for humanitarian reasons. Similarly, the principal asylee would be required to file a Form I–730 for each qualifying family member within 1 year of the date on which he or she was granted asylum status, unless the Service determines that the filing period should be extended for humanitarian reasons.

Third, the proposed rule required that only an alien who was admitted to the United States as a principal refugee would be eligible to file the Form I–730 for accompanying or following-to-join benefits for his/her spouse and/or unmarried, minor child(ren). Those individuals who derived their refugee status from the principal refugee would not be eligible to file a Form I–730.

Fourth, the proposed rule would amend the asylum regulations by requiring that, for purposes of filing a Form I–730, the asylee's relationship to a child must have existed at the time of approval of the asylum application.

Finally, the proposed rule added certain documentary and evidentiary requirements for filing a Form I–730, such as requiring that a separate Form I–730 be filed for each individual qualifying family member and that a photograph of the derivative be included. These proposed regulations served to clarify the Service's accompanying and following-to-join policy for Service officers and the general public by standardizing refugee and asylee derivative procedures.

The Immigration and Naturalization Service allowed a 60-day public comment period which ended on September 9, 1996. The Service received 19 comments on the proposed rule. The following is a discussion of those comments and the Service's response.

Discussion of Comments

Using the Principal Refugee's Date of Admission To Determine Derivative Eligibility

The Service proposed that the principal refugee's date of admission into the United States be used to determine accompanying or following-to-join eligibility for his/her derivatives. Current regulations require that the refugee's relationship to the spouse or child exist prior to the tentative approval date of the principal's application for refugee status. Furthermore, according to the proposed rule, if the refugee proves that he/she is the parent of a child who was born after the refugee's admission to the United States, but who was *in utero* on the date of refugee's admission as a refugee, the child shall be eligible to accompany or follow-to-join the refugee.

Fourteen commenters praised and supported the Service's decision to use the principal refugee's date of admission rather than date of tentative approval. In addition, three commenters supported the Service's proposed rule pertaining to children *in utero*. Only one commenter was in opposition, claiming that the change would invite exploitation and fraud.

The Service has carefully considered the one commenter's concern regarding the possibility of fraud. The Service feels that the proposed rule contains certain evidentiary and documentary requirements (such as requiring a recent photograph of the spouse or child and

requiring evidence of the claimed relationship as set forth in 8 CFR part 204) which may reduce the risk of fraud and exploitation. Furthermore, the current interpretation of derivative eligibility for refugees has created confusion for Service officers, attorneys and representatives, refugees, and the general public. The Service believes that this rule will alleviate inconsistencies in determining eligibility that has been encountered due to the difficulty in determining the date of tentative approval of the principal refugee's application. In addition, the current interpretation is too restrictive because it requires a refugee to meet a heavier burden for establishing a relationship with his/her spouse and/or child(ren) than is required by regulation for a citizen or lawful permanent resident of the United States. Moreover, the Service believes that this rule reflects the intent of Congress by enhancing family reunification for refugees.

One Year Filing Requirement

The proposed rule required that a separate Form I–730 must be filed for each qualifying derivative within 1 year of the principal refugee's admission to the United States, unless the Service determines that the filing period should be extended for humanitarian reasons. Similarly, the proposed rule required that a separate Form I–730 for each qualifying derivative must be filed within 1 year of the date on which the principal asylee was granted asylum status, unless the Service determines that the filing period should be extended for humanitarian reasons.

Twelve commenters opposed the 1-year time limit. Ten of those claimed that 1 year is too short or unrealistic. Two commenters suggested a minimum of 3 years, and one suggested that a more reasonable time limit would be when the refugee/asylee becomes eligible for U.S. Citizenship. Seven commenters argued that there is no time restriction imposed in the Immigration and Nationality Act ("the Act") and that, therefore, the Service should not set a time limit. Others noted that, since this is a newly imposed time limit, the Service should ensure that refugees and asylees are well informed of this filing requirement. Only one commenter agreed that the 1-year time limit was reasonable.

Derivative benefits for refugees and asylees are intended to expediently reunite families in order for them to make the difficult transition to a new life with the support of their immediate family members by avoiding lengthy delays due to visa quotas. The timely filing of Form I–730 will expedite the reunification of refugee families. At the moment, Service regulations on derivative benefits for refugee and asylees contain no time limitation. As a result, there are individuals who had entered the United States in the late 1970s or early 1980s as refugees who did not file Form I–730 petitions for their derivatives until ten or more years after their admission. Such filings no longer serve the purpose for which they were originally intended and, instead, only serve to deplete limited refugee admission numbers and refugee resettlement monies needed for currently emerging refugee populations. In determining the filing time limitation for Form I–730, the Service acknowledges that it must be responsive to the needs of the applicant base.

After careful consideration of the comments received, the Service is modifying the proposed rule with regard to the 1-year time limit. Accordingly, the final rule requires that the Form I–730 must be filed within *2 years* of the date of admission to the United States for a refugee, or within 2 years of the grant of asylum for an asylee. Although the Service believes that 1 year is a reasonable time limit for refugees and asylees to file the Form I–730, the Service would like to acknowledge and address the commenters' concerns by adopting this change. Therefore, the filing of the Form I–730 within 2 years of admission as a refugee or grant of asylum will serve to notify the Service of a refugee's or asylee's intent to have his/her derivative(s) join him/her in the United States. The Service has also carefully reviewed the provisions of section 207(c)(2) of the Act and has determined that the establishment of a filing period does not violate the language or intent of that section of the Act.

Five commenters argued that, since the proposed rule did not define which "humanitarian reasons" warranted an extension of the filing deadline, this would lead to arbitrary and conflicting decisions by Service officers, or create a large category of applicants under this exception. On the contrary, the Service believes that defining the specific qualifying "humanitarian reasons" would only act to restrict severely the category and shut the door on applicants who need this exception most. As with other immigration benefits, applications should be decided on a case-by-case basis. Likewise, although humanitarian exceptions are used throughout other Service regulations, the term is not defined so that individuals with exceptional cases are not shut out. The Service will make continual assessments of the processing of the I–730 petitions, particularly in the early stages of the promulgation of this rule, and provide guidance to Service officers, if necessary, in order to ensure uniformity in the decision process.

Ten commenters noted that the Service should have some type of grandfather clause to allow petitioners whose Forms I–730 were denied under the old regulations to refile or reopen their cases. Five commenters pointed out that, although the introductory comment to the proposed rule had indicated that refugees and asylees in the United States for more than 1 year when the regulation becomes effective would be given 1 year to file, this provision was not put in the proposed regulation itself. Furthermore, the proposed rule failed to address refugees and asylees who have been in the United States for less than 1 year at the time the regulation becomes effective.

The Service agrees with the commenters who expressed the need for some type of grandfather clause. The Service is also grateful to those commenters who spotted the inadvertent omission. In response to these comments, the Service is including a grandfather clause in the final rule which allows all persons admitted as refugees or granted asylum prior to the effective date of the final rule to file the Form I–730 within 2 years of that effective date regardless of when they were admitted as a refugee or granted asylum. This will allow refugees and asylees an equal opportunity to apply for derivative benefits for their spouse and/or child(ren). A principal refugee who had previously submitted the Form I–730 but was denied because of current regulations requiring the relationship with his/her derivative(s) to have existed prior to the tentative approval date of his/her application for refugees status should reapply by submitting Form I–730 for each individual derivative within 2 years of the effective date of the final rule. It is noted that petitioners must reapply in these situations since the Service will not *sua sponte* reopen previously denied files. In order to better inform the general public, the Service is including the grandfather clause in the instructions part of the revised Form I–730 to inform all potential refugee and asylee petitioners that they have either 2 years from the date on which the final rule becomes effective or 2 years after the date of admission (for refugees) or grant of asylum (for asylees), whichever is later, to file the Form I–730.

VOL 63 ISS 17 JA 27 1998 UMI

Only the Principal Refugee May File a Form I–730

Similar to current regulations, the proposed rule required that the Form I–730 be filed by the principal refugee. Individuals who have derived their refugee status from the principal refugee are not eligible to file a Form I–730.

Ten commenters opposed the Service's requirement that only the principal refugee may file the Form I–730. Four commenters claimed that, because of the refugee registration systems used overseas, certain refugees may be inadvertently labeled as a derivative when he/she does not fit the definition of a derivative spouse or child and, in fact, should be considered a principal for the purposes of filing the Form I–730. Two commenters argued that any refugee who does not meet the statutory definition of a "derivative" should be allowed to file the Form I–730. Several commenters stated that if the purpose of the principal applicant rule is to deter fraud, then it is overbroad and, as such, violates the intent and language of the Act. One commenter expressed the need for a humanitarian exception in the case where the principal refugee is deceased or incapacitated, becomes abusive, or abandons his/her family after the derivative spouse has reached the United States, in order to allow the derivative spouse to petition for their mutual child(ren). Another commenter stated that the regulation should allow for the child of an unmarried parent to accompany or follow-to-join him/her even if the parent had obtained his/her refugee status on a derivative basis.

The Service has carefully considered their comments and has reviewed the language of the Act at sections 207 (c)(1) and (c)(2). The requirement that only the principal refugee may file for accompanying of following-to-join benefits for his/her spouse and/or child(ren) may be ascertained from the language of sections 207 (c)(1) and (c)(2) of the Act. Section 207(c)(2) provides for the admission of spouses and children (as defined in section 101(b)(1) (A), (B), (C), (D), or (E) of the Act) of a refugee qualifying for admission under section 207(c)(1) of the Act. Accordingly, only a principal refugee, admitted under section 207(c)(1) of the Act, may file a Form I–730 on behalf of his or her spouse or child(ren). The Service already regards persons admitted under section 207 who do not meet the statutory definition of a spouse or child to be principals for the purpose of filing an I–730 petition.

Eight commenters stated that the proposed rule was confusing in its use of the terms "principal refugee," "principal applicant," and "principal alien." The Service agrees with these comments and has removed the term "principal applicant" from the final rule in order to avoid any confusion.

Eligible and Ineligible Relatives of a Refugee/Asylee

The Service listed in proposed § 207.7(b) relatives of refugees who are ineligible for accompanying or following-to-join benefits, which included: a spouse or child who has previously been granted asylee or refugee status; an adopted child, if the adoption took place after the child became 16 years old, or if the child has not been in the legal custody and living with the parent(s) for at least 2 years; a stepchild, if the marriage that created this relationship took place after the child became 18 years old; a husband or wife if each/both were not physically present at the marriage ceremony and the marriage was not consummated, or if the U.S. Attorney General has determined that such alien has attempted or conspired to enter into a marriage for the purpose of evading immigration laws; and a parent, sister, brother, grandparent, grandchild, nephew, niece, uncle, aunt, cousin or in-law.

Six commenters put forth various arguments for the inclusion of certain relatives as eligible accompanying or following-to-join derivatives of a refugee or asylee. Four commenters stated that some type of exclusion should be made for a child of a derivative child. Two commenters claimed that relatives listed in proposed § 207.7(b)(6) (i.e., parent, sibling, grandparent/child, nephew/niece, uncle/aunt, cousin, and in-law) should be included as derivative refugees when they are dependent on the principal refugee and reside in his/her household. One commenter argued that barring the mother of the principal alien's child because the principal was not married to the child's mother is harsh and irrelevant. Another claimed that eligible "accompanying derivative" should include relatives of the principal petitioner's spouse, or the principal petitioner's child. One commenter pointed out that many children in agrarian or less-developed societies are customarily adopted without legal formalities; therefore, people should be allowed to present proof that they were the actual custodial guardian of the child for the requisite minimum of 2 years, to petition for the child as a derivative refugee, and then complete the legal adoption formalities in the United States.

The Service has carefully considered these comments. However, section 207(c)(2) of the Act clearly specifies that only a "spouse or child (as defined in section 101(b)(1) (A), (B), (C), (D), or (E))" of a refugee shall be eligible for accompanying or following-to-join benefits. Accordingly, the Service has deemed ineligible those relatives who do not fit the statutory definition of a spouse and child as defined in sections 101(a)(35) and 101(b)(1) (A), (B), (C), (D), or (E), respectively, of the Act.

Evidentiary and Documentary Requirements

The proposed rule required that a separate Form I–730 must be filed for each qualifying family member, which must also include a recent photograph of this family member. The petitioning refugee or asylee has the burden to establish by a preponderance of the evidence that the person for whom he/she is petitioning is an eligible spouse or child. The evidence to establish the claimed relationship for a spouse or unmarried, minor child as set forth in 8 CFR part 204 must be submitted with the Form I–730; where possible, this will consist of the documents specified in § 204.2(a)(1)(i)(B), (a)(1)(iii)(B), (a)(2), (d)(2), and (d)(5). No fee is charged for filing a Form I–730 petition.

Three commenters opposed the proposed requirement that a separate Form I–730 must be filed for each family member. Four commenters claimed that the photograph requirement is too restrictive and unrealistic. Six commenters argued that the heightened evidence needed to prove spousal relationship should only apply in situations where Congress has expressed the fear of marriage fraud, which would not include refugees cases. In addition, five commenters stated that the "where possible" language of the proposed rule is vague and, therefore, may result in arbitrary decisions by Service officers.

The Service has carefully considered the comments. However, the Service believes that the evidentiary and documentary requirements are reasonable. First, having a separate Form I–730 for each family member will enhance efficiency and facilitate Service processing of the petition, especially in cases where there are many derivatives and/or they are residing in different geographic locations. Since each derivative has a separate I–730, each petition may be processed on its own without having to wait for the rest of the family members. Second, the photograph required of each derivative need not meet Alien Documentation Identification and Telecommunication System (ADIT) specifications. The Service believes that it is not overly burdensome to require a non-ADIT photograph. Third, the Service believes that adopting the standard of evidence set forth in 8 CFR part 204 to establish a claimed relationship for a spouse or minor, unmarried child is a reasonable requirement in light of the risk of fraudulent petitions.

Finally, petitioners should note that although there is no appeal from the denial of a petition filed on Form I–730, the denial shall be without prejudice to the consideration of a new petition or motion to reopen the refugee or asylee relative petition proceeding, if the petitioner establishes eligibility for accompanying or following-to-join benefits. This is consistent with other types of applications for immigration benefits where no administrative appeal is available, but the applicant may submit a new application or a motion to reopen in the case of a denial (e.g., 8 CFR 204.2(a)(1)(iii)(D)).

Regulatory Flexibility Act

The Commissioner of the Immigration and Naturalization Service, in accordance with the Regulatory Flexibility Act (5 U.S.C. 605(b)), has reviewed this regulation and, by approving it, certifies that this rule will not have a significant economic impact on a substantial number of small entities. This rule is administrative in nature and merely imposes specific regulatory restraints, which parallel procedures currently found in asylum regulations. This rule will not result in an annual effect on the economy of $100 million or more or adversely and materially affect a sector of the economy, or cause major increases in costs or prices for consumers, or have other adverse effects on the economy in terms of productivity, competition jobs, the environment, public health, or safety. Furthermore, the affected parties are not small entities, and the impact of the regulation is not an economic one.

Executive Order 12866

This rule is considered by the Department of Justice, Immigration and Naturalization Service, to be a "significant regulatory action" under Executive Order 12866, section 3(f), Regulatory Planning and Review. Accordingly, this regulation has been submitted to and, approved by, the Office of Management and Budget.

Executive Order 12612

The regulations proposed herein will not have substantial direct effects on the States, on the relationship between the National Government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Executive Order 12988 Civil Justice Reform

This rule meets the applicable standards set forth in sections 3(a) and 3(b)(2) of E.O. 12988.

Unfunded Mandates Reform Act of 1995

This rule will not result in the expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more in any 1 year, and it will not significantly or uniquely affect small governments. Therefore, no actions were deemed necessary under the provisions of the Unfunded Mandates Reform Act of 1995.

Small Business Regulatory Enforcement Fairness Act of 1996

This rule is not a major rule as defined by section 804 of the Small Business Regulatory Enforcement Fairness Act of 1996. This rule will not result in an annual effect on the economy of $100 million or more; a major increase in costs or prices; or significant adverse effects on competition, employment, investment, productivity, innovation, or on the ability of United States-based companies to compete with foreign-based companies in domestic and export markets.

Form I–730

The revised Form I–730 has been included at the end of this final rule to allow the public to duplicate the form from the **Federal Register** until the form is printed and distributed worldwide.

Paperwork Reduction Act

The information collection requirement (Form I–730) contained in this rule has been submitted to and approved by the Office of Management and Budget under the provisions of the Paperwork Reduction Act. The clearance number for this collection is contained in 8 CFR 299.5

List of Subjects

8 CFR Part 207

Immigration, Refugees, Reporting and recordkeeping requirements.

8 CFR Part 208

Administrative practice and procedure, Aliens, Immigration, Reporting and recordkeeping requirements.

8 CFR Part 299

Immigration, Reporting and recordkeeping requirements.

Accordingly, chapter I of title 8 of the Code of Federal Regulations is amended as follows:

PART 207—ADMISSION OF REFUGEES

1. The authority citation for part 207 continues to read as follows:

Authority: 8 U.S.C. 1101, 1103, 1151, 1157, 1159, 1182, 8 CFR part 2.

§§ 207.7 and 207.8 [Redesignated as § 207.8 and § 207.9]

2. Sections 207.7 and 207.8 are redesignated as § 207.8 and § 207.9 respectively.

3. A new § 207.7 is added to read as follows:

§ 207.7 Derivatives of refugees.

(a) *Eligibility.* A spouse, as defined in section 101(a)(35) of the Act, and/or child(ren), as defined in section 101(b)(1)(A), (B), (C), (D), or (E) of the Act, shall be granted refugee status if accompanying or following-to-join the principal alien. An accompanying derivative is a spouse or child of a refugee who is in the physical company of the principal refugee when he or she is admitted to the United States, or a spouse or child of a refugee who is admitted within 4 months following the principal refugee's admission. A following-to-join derivative, on the other hand, is a spouse or child of a refugee who seeks admission more than 4 months after the principal refugee's admission to the United States.

(b) *Ineligibility.* The following relatives of refugees are ineligible for accompanying or following-to-join benefits:

(1) A spouse or child who has previously been granted asylee or refugee status;

(2) An adopted child, if the adoption took place after the child became 16 years old, or if the child has not been in the legal custody and living with the parent(s) for at least 2 years;

(3) A stepchild, if the marriage that created this relationship took place after the child became 18 years old;

(4) A husband or wife if each/both were not physically present at the marriage ceremony, and the marriage was not consummated (section 101(a)(35) of the Act);

VOL 63 ISS 17 JA 27 1998 UMI

(5) A husband or wife if the U.S. Attorney General has determined that such alien has attempted or conspired to enter into a marriage for the purpose of evading immigration laws; and

(6) A parent, sister, brother, grandparent, grandchild, nephew, niece, uncle, aunt, cousin or in-law.

(c) *Relationship.* The relationship of a spouse and child as defined in sections 101(a)(35) and 101(b) (1)(A), (B), (C), (D), or (E), respectively, of the Act, must have existed prior to the refugee's admission to the United States and must continue to exist at the time of filing for accompanying or following-to-join benefits and at the time of the spouse or child's subsequent admission to the United States. If the refugee proves that the refugee is the parent of a child who was born after the refugee's admission as a refugee, but who was *in utero* on the date of the refugee's admission as a refugee, the child shall be eligible to accompany or follow-to-join the refugee. The child's mother, if not the principal refugee, shall not be eligible to accompany or follow-to-join the principal refugee unless the child's mother was the principal refugee's spouse on the date of the principal refugee's admission as a refugee.

(d) *Filing.* A refugee may request accompanying or following-to-join benefits for his/her spouse and unmarried, minor child(ren) (whether the spouse and children are in or outside the United States) by filing a separate Form I–730 Refugee/Asylee Relative Petition, for each qualifying family member with the designated Service office. The Form I–730 may only be filed by the principal refugee. Family members who derived their refugee status are not eligible to file the Form I–730 on behalf of their spouse and child(ren). A separate Form I–730 must be filed for each qualifying family member before February 28, 2000 or within 2 years of the refugee's admission to the United States, whichever is later, unless the Service determines that the filing period should be extended for humanitarian reasons. There is no time limit imposed on a family member's travel to the United States once the Form I–730 has been approved, provided that the relationship of spouse or child continues to exist and approval of the Form I–730 petition has not been subsequently revoked. There is no fee for filing this petition.

(e) *Evidence.* Documentary evidence consists of those documents which establish that the petitioner is a refugee, and evidence of the claimed relationship of the petitioner to the beneficiary. The burden of proof is on the petitioner to establish by a preponderance of the evidence that any person on whose behalf he/she is making a request under this section is an eligible spouse or unmarried, minor child. Evidence to establish the claimed relationship for a spouse or unmarried, minor child as set forth in 8 CFR part 204 must be submitted with the request for accompanying or following-to-join benefits. Where possible this will consist of the documents specified in § 204.2(a (1)(i)(B), (a)(1)(iii)(B), (a)(2), (d)(2), and (d)(5) of this chapter. In addition, a recent photograph of each derivative must accompany the Form I–730. The photograph must clearly identify the derivative, and will be made part of the derivative's immigration record for identification purposes.

(f) *Approvals.* (1) *Spouse or child in the United States.* When a spouse or child of a refugee is in the United States and the Form I–730 is approved, the Service will notify the refugee of such approval on Form I–797, Notice of Action. Employment will be authorized incident to status.

(2) *Spouse or child outside the United States.* When a spouse or child of a refugee is outside the United States and the Form I–730 is approved, the Service will notify the refugee of such approval on Form I–797. The approved Form I–730 will be sent by the Service to the Department of State for forwarding to the American Embassy or Consulate having jurisdiction over the area in which the refugee's spouse or child is located.

(3) *Benefits.* The approval of the Form I–730 shall remain valid for the duration of the relationship to the refugee and, in the case of a child, while the child is under 21 years of age and unmarried, provided also that the principal's status has not been revoked. However, the approved Form I–730 will cease to confer immigration benefits after it has been used by the beneficiary for admission to the United States as a derivative of a refugee. To demonstrate employment authorization, the Service will issue a Form I–94, Arrival-Departure Record, which also reflects the derivative's current status as a refugee, or the derivative may apply under § 274a.12(a) of this chapter, using Form I–765, Application for Employment Authorization, and a copy of the Form I–797.

(g) *Denials.* If the spouse or child of a refugee is found to be ineligible for derivative status, a written notice explaining the basis for denial shall be forwarded to the principal refugee. There shall be no appeal from this decision. However, the denial shall be without prejudice to the consideration of a new petition or motion to reopen the refugee or asylee relative petition proceeding, if the refugee establishes eligibility for the accompanying or following-to-join benefits contained in this part.

PART 208—PROCEDURES FOR ASYLUM AND WITHHOLDING OF REMOVAL

4. The authority citation for part 208 continues to read as follows:

Authority: 8 U.S.C. 1103, 1158, 1226, 1252, 1282; 8 CFR part 2.

5. In § 208.19, paragraphs (b), (c), (d), and (f) are revised to read as follows:

§ 208.19 Admission of asylee's spouse and children.

* * * * *

(b) *Relationship.* The relationship of spouse and child as defined in sections 101(a)(35) and 101(b)(1) of the Act must have existed at the time the principal alien's asylum application was approved and must continue to exist at the time of filing for accompanying or following-to-join benefits and at the time of the spouse or child's subsequent admission to the United States. If the asylee proves that the asylee is the parent of a child who was born after asylum was granted, but who was *in utero* on the date of the asylum grant, the child shall be eligible to accompany or follow-to-join the asylee. The child's mother, if not the principal asylee, shall not be eligible to accompany or follow-to-join the principal asylee unless the child's mother was the principal asylee's spouse on the date the principal asylee was granted asylum.

(c) *Spouse or child in the United States.* When a spouse or child of an alien granted asylum is in the United States, but was not included in the asylee's application, the asylee may request accompanying or following-to-join benefits for his/her spouse or child by filing for each qualifying family member a separate Form I–730, Refugee/Asylee Relative Petition, and supporting evidence, with the designated Service office, regardless of the status of that spouse or child in the United States. A recent photograph of each derivative must accompany the Form I–730. The photograph must clearly identify the derivative, and will be made part of the derivative's immigration record for identification purposes. Additionally, a separate Form I–730 must be filed by the asylee for each qualifying family member before February 28, 2000, or within 2 years of the date in which he/she was granted asylum status, whichever is later, unless it is determined by the Service that this

period should be extended for humanitarian reasons. Upon approval of the Form I–730, the Service will notify the asylee of such approval on Form I–797, Notice of Action. Employment will be authorized incident to status. To demonstrate employment authorization, the Service will issue a Form I–94, Arrival-Departure Record, which also reflects the derivative's current status as an asylee, or the derivative may apply under § 274a.12(a) of this chapter, using Form I–765, Application for Employment Authorization, and a copy of the Form I–797. The approval of the Form I–730 shall remain valid for the duration of the relationship to the asylee and, in the case of a child, while the child is under 21 years of age and unmarried, provided also that the principal's status has not been revoked. However, the approved Form I–730 will cease to confer immigration benefits after it has been used by the beneficiary for admission to the United States as a derivative of an asylee.

(d) *Spouse or child outside the United States.* When a spouse or child of an alien granted asylum is outside the United States, the asylee may request accompanying or following-to-join benefits for his/her spouse or child(ren) by filing a separate Form I–730 for each qualifying family member with the designated Service office, setting forth the full name, relationship, date and place of birth, and current location of each such person. A recent photograph of each derivative must accompany the Form I–730. The photograph must clearly identify the derivative, and will be made part of the derivative's immigration record for identification purposes. A separate Form I–730 for each qualifying family member must be filed before February 28, 2000, or within 2 years of the date in which the asylee was granted asylum status, whichever is later, unless the Service determines that the filing period should be extended for humanitarian reasons. When the Form I–730 is approved, the Service will notify the asylee of such approval on Form I–797. The approved Form I–730 shall be forwarded by the Service to the Department of State for delivery to the American Embassy or Consulate having jurisdiction over the area in which the asylee's spouse or child is located. The approval of the Form I–730 shall remain valid for the duration of the relationship to the asylee and, in the case of a child, while the child is under 21 years of age and unmarried, provided also that the principal's status has not been revoked. However, the approved Form I–730 will cease to confer immigration benefits after it has been used by the beneficiary for admission to the United States as a derivative of an asylee.

(f) *Burden of proof.* To establish the claimed relationship of spouse or child as defined in sections 101(a)(35) and 101(b)(1) of the Act, evidence must be submitted with the request as set forth in part 204 of this chapter. Where possible this will consist of the documents specified in § 204.2 (a)(1)(i)(B), (a)(1)(iii)(B), (a)(2), (d)(2), and (d)(5) of this chapter. The burden of proof is on the principal alien to establish by a preponderance of the evidence that any person on whose behalf he or she is making a request under this section is an eligible spouse or child.

OMB No. 1115-0121

Refugee/Asylee Relative Petition

INSTRUCTIONS

Read these instructions carefully. If you do not follow the instructions, the Immigration and Naturalization Service (INS) may have to return your petition, which may delay final action. If more space is needed to complete an answer, continue on a separate sheet of paper.

1. Who Can File This Petition?

If you have been admitted to the United States as a refugee or if you have been granted status in the United States as an asylee, **within the previous two years and as the principal applicant**, you may file this petition. A separate Form I-730 must be filed for each family member.

You are **not** eligible to file this petition if:

1) You were granted status in the United States as a derivative beneficiary or as an accompanying or following-to-join family member; or
2) You were admitted to the United States as a refugee more than two years ago (see *NOTE); or
3) You were granted status in the United States as an asylee more than two years ago (see *NOTE).

***NOTE**: The requirement that the Refugee/Asylee Relative Petition must be filed within two years of your admission as a refugee or grant of asylum does not go into effect until two years after the effective date of the final rule entitled *Procedures for Filing a Derivative Petition (Form I-730) for a Spouse and Unmarried Children of a Refugee/Asylee*.

2. Who Is Eligible For Accompanying Or Following-To-Join Benefits?

Your **spouse** and/or your **unmarried children under twenty-one (21) years of age**, whether in or outside of the United States, are eligible for accompanying or following-to-join benefits based on this petition **provided** that the family member(s) qualify under the conditions described below.

- If you are a refugee: The relationship between you and your relative must have existed on the date you were admitted to the United States as a refugee and must continue to exist. If the person you are filing for is a child who was conceived but not yet born on the date you were admitted to the United States, the relationship will be considered to exist as of the date you were admitted to the United States. (The mother of such child is not an eligible relative unless the mother was married to the principal refugee when the refugee was admitted to the United States.)

- If you are an asylee: The relationship between you and your relative must have existed on the date you were granted asylum in the United States and must continue to exist. If the person you are filing for is a child who was conceived but not yet born on the date you were granted asylum in the United States, the relationship will be considered to exist as of the date you were granted asylum in the United States. (The mother of such child is not an eligible relative unless the mother was married to the principal asylee when the asylee was granted asylum in the United States.)

- In all cases, if the family member you are filing for is your child, the child must continue to be unmarried and under 21 years of age.

- A spouse or child must be otherwise admissible as an immigrant (for refugee relatives) or not subject to the mandatory bars of 8 CFR 208.19 (for asylee relatives).

A petition may not be approved for the following people:

- A spouse or child who has previously been granted refugee or asylee status.

- An adopted child, if the adoption took place after the child became 16 years old, or if the child has not been in the legal custody and living with the adoptive parent(s) for at least two years.

- A stepchild, if the marriage that created this relationship took place after the child became 18 years old.

- A husband or wife, if each was not physically present at the marriage ceremony and the marriage was not consummated.

- A husband or wife, if it is determined that such alien has attempted or conspired to enter into a marriage for the purpose of evading immigration laws.

- A parent, sister, brother, grandparent, grandchild, nephew, niece, uncle, aunt, cousin, or in-law.

3. What Documents Need To Be Submitted?

Certain documents are required to be submitted with this petition to show that you are eligible to file this petition and to show that a relationship exists between you and your relative. (If the documents described below are not available, see Sections 4 and 5 of these instructions.)

- In all cases, submit **evidence of your status as a refugee or asylee** in the United States.

- In all cases, submit a recent, clear **photograph** of the family member you are filing for.

- If you are petitioning for your **husband** or **wife**, submit your marriage certificate. If you and/or your spouse were ever previously married to other people, submit evidence of the legal termination of the previous marriage(s). Evidence of any legal name change must also be submitted, if applicable.

- If you are petitioning for your **child** and you are the **natural mother**, whether the child was born in or out of wedlock, submit the child's birth certificate showing both the child's name and your name. Evidence of any legal name change must also be submitted if the names on the birth certificate do not match the names on the petition.

- If you are petitioning for your **child** and you are the **natural father**, submit the child's birth certificate showing both the child's name and your name. If you were married to the child's mother, submit your marriage certificate. If you and/or the child's mother were ever previously married to other people, submit evidence of the legal termination of the previous marriage(s). If you were not married to the child's mother, submit evidence that the child was legitimated by the civil authorities. If the child was not legitimated by the civil authorities, submit evidence that a bona fide parent/child relationship exists or existed between you and the child. Evidence of a bona fide parent/child relationship should prove that you have emotional and financial ties to the child, and that you have shown genuine concern and interest in the child's support, instruction, and general welfare. Such evidence may include (but is not limited to) the following:
  1) Money order receipts;
  2) Canceled checks showing financial support of the child;
  3) Income tax returns in which you claim the child as a dependent and member of your household;
  4) Medical or insurance records which include the child as a dependent;
  5) School records for the child;
  6) Correspondence between you and the child; and
  7) Notarized affidavits of reliable persons who are knowledgeable about the relationship.

  Evidence of any legal name change must also be submitted, if applicable.

- If you are petitioning for your **stepchild**, whether the child was born in or out of wedlock, submit the child's birth certificate and the marriage certificate between you and the child's natural parent. If you and/or the child's natural parent were ever previously married to other people, submit evidence of the legal termination of the previous marriage(s). Evidence of any legal name changes must also be submitted, if applicable.

- If you are petitioning for your **adopted child**, submit a certified copy of the adoption decree and evidence that you resided together with the child for at least two years. If you were granted legal custody of the child prior to the adoption, submit a certified copy of the court order granting custody. Evidence of any legal name changes must also be submitted, if applicable.

IMPORTANT NOTE: In all cases, you should submit one legible photocopy of each required document to the INS. Where a copy of a document is submitted, the INS may at any time require that the original document be submitted for review. Documents in a foreign language must be accompanied by a complete English translation. The translator must certify that the translation is accurate and that he or she is competent to translate. Original documents submitted when not required will remain a part of the record.

VOL 63 ISS 17 JA 27 1998 UMI

4. What If A Document Is Not Available?

If the documents described above are not available from the civil authorities, you can submit the following, as **secondary evidence**, along with a statement from the appropriate civil authority certifying that the required document(s) is(are) not available.

- **Church record**: A certificate under the seal of the church where the baptism, dedication, or comparable rite occurred within two months after birth, showing the date and place of the child's birth, the date of the religious ceremony, and the names of the child's parents.
- **School record**: A letter from the authorities of the school(s) attended, showing the date of admission to the school, the child's date and place of birth, and the names of both parents, if shown in the school records.
- **Census record**: State or federal census record showing name, place of birth, and date of birth or the age of the person(s) listed.

5. What If Secondary Evidence Is Not Available?

If the secondary evidence described above is not available, you can submit affidavits. If you submit affidavits, they must overcome the absence of primary and secondary evidence.

- **Affidavits**: Submit written statements sworn to or affirmed by two persons who were living at the time and who have personal knowledge of the event you are trying to prove: for example, the date and place of birth, marriage or death. The persons making the affidavits need not be citizens of the United States. Each affidavit should contain the following information regarding the person making the affidavit: his or her full name, address, date and place of birth and his or her relationship to you (if any); full information concerning the event; and complete details concerning how the person acquired the knowledge of the event.

6. How To Prepare This Form?

- Type or print clearly in black or blue ink.
- Answer all questions completely and accurately. If any item does not apply, please write "N/A".
- If you need extra space to complete any item, attach a separate continuation sheet. Indicate the item number, and date and sign each sheet.

7. Where To File This Form?

Send this form along with the required supporting evidence to the following address:

INS
Nebraska Service Center
P. O. Box 87730
Lincoln, NE 68501-7730

8. What Are The Penalties For Committing Marriage Fraud Or Submitting False Information Or Both?

- Title 8, United States Code, Section 1325, states that any individual who knowingly enters into a marriage contract for the purpose of evading any provision of the immigration laws shall be imprisoned for not more than five years, or fined not more than $250,000, or both.
- Title 18, United States Code, Section 1001, states that whoever willfully and knowingly falsifies a material fact, makes a false statement or makes use of a false document will be fined up to $10,000 or imprisoned up to five years, or both.

9. The INS Authority For Collecting This Information:

The INS requests the information on the form to carry out the immigration laws contained in Title 8, United States Code, Sections 1157(c)(2) and 1158(b)(3). The INS needs this information to determine whether a person is eligible for immigration benefits. The information you provide may also be disclosed to other federal, state, local, and foreign law enforcement and regulatory agencies during the course of the investigation required by the INS. You do not have to give this information. However, if you refuse to give some or all of it, your petition may be denied.

10. Paperwork Reduction Act Notice.

A person is not required to respond to a collection of information unless it displays a currently valid OMB control number. The public reporting burden for this collection of information is estimated to average 35 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to: U.S. Department of Justice, Immigration and Naturalization Service, Policy Directives and Instructions Branch (Room 5307), Washington, DC 20536.

b. ☐ Yes (Please explain on a separate paper.)

Part 5. Signature.

Read the information on penalties in the instructions before completing this section and sign below. If someone helped you to prepare this petition, he or she must complete Part 6.

I certify or, if outside the United States, I swear or affirm, under penalty of perjury under the laws of the United States of America, that this petition and the evidence submitted with it, is all true and correct. I authorize the release of any information from my record which the Immigration and Naturalization Service needs to determine eligibility for the benefit I am seeking.

Signature | Print Name | Date | Daytime Telephone # ( )

Please Note: If you do not completely fill out this form, or fail to submit the required documents listed in the instructions, your relative may not be found eligible for the requested benefit and this petition may be denied.

Part 6. Signature of person preparing form if other than Petitioner above. (Sign Below)

I declare that I prepared this petition at the request of the above person and it is based on all of the information of which I have knowledge.

Signature | Print Name | Date | Daytime Telephone # ( )

FEDERAL RESERVE SYSTEM

12 CFR Parts 207, 220, 221 and 224

[Regulations G, T, U and X]

Securities Credit Transactions; List of Marginable OTC Stocks; List of Foreign Margin Stocks

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule; determination of applicability of regulations.

SUMMARY: The List of Marginable OTC Stocks (OTC List) is composed of stocks traded over-the-counter (OTC) in the United States that have been determined by the Board of Governors of the Federal Reserve System to be subject to the margin requirements under certain Federal Reserve regulations. The List of Foreign Margin Stocks (Foreign List) is composed of foreign equity securities that have met the Board's eligibility criteria under Regulation T. The OTC List and the Foreign List are published four times a year by the Board. This document sets forth additions to and deletions from the previous OTC List and the previous Foreign List.

EFFECTIVE DATES: *Regulations G and U (12 CFR parts 207 and 221):* February 9, 1998–March 31, 1998; *Regulations T and X (12 CFR parts 220 and 224):* February 9, 1998–January 1, 1999.

FOR FURTHER INFORMATION CONTACT: Peggy Wolffrum, Securities Regulation Analyst, Division of Banking Supervision and Regulation, (202) 452–2781, Board of Governors of the Federal Reserve System, Washington, D.C. 20551. For the hearing impaired *only*, contact Diane Jenkins, Telecommunications Device for the Deaf (TDD) at (202) 452–3544.

SUPPLEMENTARY INFORMATION: Listed below are the deletions from and additions to the Board's OTC List, which was last published on October 27, 1997 (62 FR 55495), and became effective November 10, 1997. A copy of the complete OTC List is available from the Federal Reserve Banks.

The OTC List includes those stocks traded over-the-counter in the United States that meet the criteria in Regulations G, T and U (12 CFR Parts 207, 220 and 221, respectively). This determination also affects the applicability of Regulation X (12 CFR Part 224). These stocks have the degree of national investor interest, the depth and breadth of market, and the availability of information respecting the stock and its issuer to warrant regulation in the same fashion as exchange-traded securities. The OTC List also includes any OTC stock designated for trading in the national market system (NMS security) under rules approved by the Securities and Exchange Commission (SEC). Additional OTC stocks may be designated as NMS securities in the interim between the Board's quarterly publications. They will become automatically marginable upon the effective date of their NMS designation. The names of these stocks are available at the SEC and at the National Association of Securities Dealers, Inc.

In order to determine the loan value of stock and other collateral under Regulations G and U, lenders must be able to determine whether a particular stock is a *margin stock*,[1] a term which is currently defined to include *OTC margin stock*. The definition of *OTC margin stock* in Regulations G and U states that "[a]n OTC stock is not considered to be an *OTC margin stock* unless it appears on the Board's periodically published list of OTC margin stocks." The OTC List provides the names of these stocks.

Pursuant to amendments recently adopted by the Board (see 63 FR 2805, January 16, 1998) lenders subject to Regulation G will become subject to Regulation U on April 1, 1998 and Regulation G will be removed from the Code of Federal Regulations. Also on April 1, 1998, the definition of *margin stock* in the revised Regulation U will no longer include *OTC margin stock* and the definition of *OTC margin stock* will be removed from the revised Regulation U.

With the extension of Regulation U on April 1, 1998 to cover lenders currently subject to Regulation G, and the elimination of the concept and accompanying definition of *OTC margin stock* in the revised Regulation U, lenders subject to Regulation U will no longer be bound by the OTC List published today. Instead, as of April 1, 1998, lenders subject to the revised Regulation U will be bound by the revised definition of *margin stock*, which continues to include "[a]ny OTC security designated as qualified for trading in the National Market System under a designation plan approved by the Securities and Exchange Commission (NMS security)." In other words, on April 1, 1998, all lenders subject to the revised Regulation U will no longer use the OTC List to determine whether an OTC stock is subject to the 50 percent loan value limitation when used as collateral for a purpose loan. To determine whether an OTC stock is subject to this limitation, a Regulation U lender will need to determine whether the stock trades in the National Market tier of the Nasdaq Stock Market. The names of these stocks are available at the SEC and at the National Association of Securities Dealers, Inc. and can also be determined by consulting the internet at *http://www.nasdaq.com*.

Lenders subject to Regulation T and borrowers subject to Regulation X who are required under § 224.3(a) to conform credit they obtain to Regulation T will continue to use the OTC List until publication of the next OTC List, anticipated for May 1998. The definition of *OTC margin stock* will be retained in Regulation T until January 1, 1999. The Board will cease publication of the OTC List at that time.

Also listed below are the deletions from and additions to the Foreign List, which was last published on October 27, 1997 (62 FR 55495), and became effective November 10, 1997. The Foreign List is used solely by lenders subject to Regulation T. A copy of the complete Foreign List is available from the Federal Reserve Banks.

Public Comment and Deferred Effective Date

The requirements of 5 U.S.C. 553 with respect to notice and public participation were not followed in connection with the issuance of this amendment due to the objective character of the criteria for inclusion and continued inclusion on the Lists specified in 12 CFR 207.6(a) and (b), 220.17(a), (b), (c) and (d), and 221.7(a) and (b). No additional useful information would be gained by public participation. The full requirements of 5 U.S.C. 553 with respect to deferred effective date have not been followed in connection with the issuance of this amendment because the Board finds that it is in the public interest to facilitate investment and credit decisions based in whole or in part upon the composition of these Lists as soon as possible. The Board has responded to a request by the public and allowed approximately a two-week delay before the Lists are effective.

List of Subjects

12 CFR Part 207

Banks, Banking, Credit, Margin, Margin requirements, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

12 CFR Part 220

Banks, Banking, Brokers, Credit, Margin, Margin requirements,

[1] The equivalent term in Regulation T is *margin security*. Regulation X incorporates Regulations G, T, and U in section 224.3 and therefore also incorporates the definitions in Regulations G, T, and U.

Investments, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

12 CFR Part 221

Banks, Banking, Credit, Margin, Margin requirements, National Market System (NMS Security), Reporting and recordkeeping requirements, Securities.

12 CFR Part 224

Banks, Banking, Borrowers, Credit, Margin, Margin requirements, Reporting and recordkeeping requirements, Securities.

Accordingly, pursuant to the authority of sections 7 and 23 of the Securities Exchange Act of 1934, as amended (15 U.S.C. 78g and 78w), and in accordance with 12 CFR 207.2(k) and 207.6 (Regulation G), 12 CFR 220.2 and 220.17 (Regulation T), and 12 CFR 221.2(j) and 221.7 (Regulation U), there is set forth below a listing of deletions from and additions to the OTC List and the Foreign List.

[Docket No. 97–CE–151–AD; Amendment 39–10292; AD 98–01–14]

RIN 2120–AA64

Airworthiness Directives; Cessna Aircraft Company Model 182S Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Final rule; request for comments.

SUMMARY: This document publishes in the **Federal Register** an amendment adopting Airworthiness Directive (AD) 98–01–14, which was sent previously to all known U.S. owners and operators of Cessna Aircraft Company (Cessna) Model 182S airplanes. This AD requires replacing the left and right Aeroquip engine exhaust mufflers (P/N 71379–1254017–8) with an FAA-approved equivalent part. Reports of carbon monoxide gas entering the cabin heating system and the cabin of the Cessna Model 182S airplanes prompted this action. This condition, if not corrected, could result in passenger and pilot injury with consequent loss of control of the airplane.

DATES: Effective February 23, 1998, to all persons except those to whom it was made immediately effective by priority letter AD 98–01–14, issued December 30, 1997, which contained the requirements of this amendment.

Comments for inclusion in the Rules Docket must be received on or before March 27, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Central Region, Office of the Regional Counsel, Attention: Rules Docket 97–CE–151–AD, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

Service information that applies to this AD may be obtained from The Cessna Aircraft Company, P.O. Box 7706, Wichita, Kansas 67277, telephone (316) 941–7550, facsimile (316) 942–9008.

FOR FURTHER INFORMATION CONTACT: Mr. Paul Pendleton, Aerospace Engineer, Wichita Aircraft Certification Office, 1801 Airport Road, Rm. 100, Mid-Continent Airport, Wichita, Kansas 67209, telephone (316) 946–4128; facsimile (316) 946–4407.

SUPPLEMENTARY INFORMATION:

Discussion

On December 30, 1997, the FAA issued priority letter AD 98–01–14, which applies to Cessna 182S airplanes. Cessna Aircraft Company has recently reported that a quality control problem exists with Aeroquip engine exhaust mufflers installed on certain Cessna Model 182S airplanes. Nineteen Cessna Model 182S airplanes are equipped with these mufflers.

The problem was discovered during a delivery flight from the manufacturing facility. Following this incident, three operators have reported cracked mufflers during use, and two similar failures occurred at Cessna's facility during production acceptance flight tests. Cessna subsequently pressure-tested the Aeroquip muffler assemblies, which revealed that 7 out of 10 mufflers showed gas leak paths through defective weldments.

These inadequate or failed weldments will permit exhaust gas (including carbon monoxide) leakage from the muffler, and consequently into the airplane's cabin and cockpit area.

Cessna reports that 19 of these Model 182S airplanes are directly affected. The serial numbers for these models are 18280050 through 18280060, 18280062, 18280063, 18280066, 18280067 through 18280070, and 18280083. All other Cessna Model 182S airplanes were manufactured with Cessna mufflers, part number (P/N) 1254017–8. After examining the circumstances and reviewing all information related to the situation described above, the FAA has determined that AD action should be taken to prevent carbon monoxide gas from entering the airplane's cabin heating system and cabin, which, if not corrected, could result in passenger and pilot injury with consequent loss of control of the airplane.

Relevant Service Information

Cessna Aircraft Company Service Bulletin No. SB97–78–01, dated

VOL 63 ISS 17 JA 27 1998 UMI

December 23, 1997, titled "Engine Exhaust Muffler Inspection" pertains to the subject of this priority letter AD.

The FAA's Determination and Explanation of the AD

Since an unsafe condition (carbon monoxide leakage into the cabin area) has been identified that is likely to exist or develop in other Cessna Model 182S airplanes of the same type design, the FAA issued priority letter AD 98–01–14 to prevent carbon monoxide gas from entering the airplane's cabin heating system and cabin, which, if not corrected, could result in passenger and pilot injury with consequent loss of control of the airplane. The AD requires replacing the left and right Aeroquip engine exhaust mufflers (P/N 71379–1254017–8) with an FAA-approved equivalent part.

Determination of the Effective Date of the AD

Since it was found that immediate corrective action was required, notice and opportunity for prior public comment thereon were impracticable and contrary to the public interest, and good cause existed to make the AD effective immediately by individual letters issued on December 30, 1997, to all known U.S. operators of Cessna Model 182S airplanes. These conditions still exist, and the AD is hereby published in the **Federal Register** as an amendment to section 39.13 of the Federal Aviation Regulations (14 CFR 39.13) to make it effective as to all persons.

Comments Invited

Although this action is in the form of a final rule that involves requirements affecting immediate flight safety and, thus, was not preceded by notice and opportunity to comment, comments are invited on this rule. Interested persons are invited to comment on this rule by submitting such written data, views, or arguments as they may desire. Communications should identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered, and this rule may be amended in light of the comments received. Factual information that supports the commenter's ideas and suggestions is extremely helpful in evaluating the effectiveness of the AD action and determining whether additional rulemaking action would be needed.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the rule that might suggest a need to modify the rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report that summarizes each FAA-public contact concerned with the substance of this AD will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this rule must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket No. 97–CE–151–AD." The postcard will be date stamped and returned to the commenter.

Regulatory Impact

The regulations adopted herein will not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this final rule does not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

The FAA has determined that this regulation is an emergency regulation that must be issued immediately to correct an unsafe condition in aircraft, and is not a "significant regulatory action" under Executive Order 12866. It has been determined further that this action involves an emergency regulation under DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979). If it is determined that this emergency regulation otherwise would be significant under DOT Regulatory Policies and Procedures, a final regulatory evaluation will be prepared and placed in the Rules Docket. A copy of it, if filed, may be obtained from the Rules Docket at the location provided under the caption **ADDRESSES**.

List of Subjects in 14 CFR Part 39

Air transportation, Aircraft, Aviation safety.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration amends part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding a new airworthiness directive (AD) to read as follows:

98–01–14 Cessna Aircraft Company. Amendment 39–10292; Docket No. 97–CE–151–AD.

Applicability: Model 182S airplanes (all serial numbers), certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (d) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated in the body of this AD, unless already accomplished, except to those operators receiving this action by priority letter issued December 30, 1997, which made these actions effective immediately upon receipt.

To prevent carbon monoxide gas from entering the airplane's cabin heating system and cabin, which, if not corrected, could result in passenger and pilot injury with consequent loss of control of the airplane, accomplish the following:

(a) For Cessna Model 182S airplanes with serial numbers 18280050 through 18280060, 18280062, 18280063, 18280066, 18280067 through 18280070, and 18280083: Prior to further flight after the effective date of this AD, replace the left and right engine exhaust mufflers with an FAA-approved equivalent part in accordance with the appropriate Cessna maintenance manual.

(b) For all Cessna Model 182S airplanes: After the effective date of this AD, no person may install any Aeroquip engine exhaust muffler, part number 71379–1254017–8, on any airplane.

Note 2: Cessna Aircraft Company Service Bulletin No. SB97–78–01, dated December 23, 1997, titled "Engine Exhaust Muffler Inspection" pertains to the subject of this AD.

(c) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

(d) An alternative method of compliance or adjustment of the compliance time that provides an equivalent level of safety may be approved by the Manager, Wichita Aircraft Certification Office, 1801 Airport Road, Rm. 100, Mid-Continent Airport, Wichita, Kansas 67209. The request shall be forwarded through an appropriate FAA Maintenance Inspector, who may add comments and then send it to the Manager, Wichita Aircraft Certification Office.

Note 3: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Wichita Aircraft Certification Office.

(e) Copies of the relative service information may be obtained from The Cessna Aircraft Company, P.O. Box 7706, Wichita, Kansas 67277. Copies of this document also may be inspected at the FAA, Central Region, Office of the Regional Counsel, Room 1558, 601 E. 12th Street, Kansas City, Missouri 64106.

(f) This amendment (39–10292) becomes effective on February 23, 1998, to all persons except those persons to whom it was made immediately effective by priority letter AD 98–01–14, issued December 30, 1997, which contained the requirements of this amendment.

Issued in Kansas City, Missouri, on January 20, 1998.

Carolanne L. Cabrini,

Acting Manager, Small Airplane Directorate, Aircraft Certification Service.

DEPARTMENT OF TRANSPORTATION

Federal Highway Administration

National Highway Traffic Safety Administration

23 CFR Part 1260

[NHTSA–97–3196]

RIN 2125–AE17

Certification of Speed Limit Enforcement

AGENCY: Federal Highway Administration (FHWA) and National Highway Traffic Safety Administration (NHTSA), Department of Transportation.

ACTION: Final rule.

SUMMARY: Section 205(d) of the National Highway System Designation Act of 1995 repealed the National Maximum Speed Limit (NMSL) Compliance Program. It made the repeal effective on December 8, 1995, but provided that the Governors of certain States could delay the effective date of the repeal. All possible delay periods have now passed. This Final Rule provides that 23 CFR part 1260, which contains the procedures for implementing the NMSL, is now rescinded.

EFFECTIVE DATE: January 27, 1998.

FOR FURTHER INFORMATION CONTACT: In FHWA, Janet Coleman, Office of Highway Safety, 202–366–4668; or Raymond W. Cuprill, Office of the Chief Counsel, 202–366–1377. In NHTSA, Garrett Morford, Police Traffic Services Division, 202–366–9790; or Heidi L. Coleman, Office of the Chief Counsel, 202–366–1834.

SUPPLEMENTARY INFORMATION:

Background

The 55 mph National Maximum Speed Limit (NMSL) was first instituted in 1974 as a temporary conservation measure in response to the oil embargo imposed by certain oil-producing nations. Because of the reduction in traffic fatalities that accompanied the institution of the speed limit, it was made permanent in 1975.

In 1978, Congress amended the law to require that, in addition to posting and enforcing the speed limit, States would have to achieve specific levels of compliance. In April 1987, Congress passed legislation that allowed States to post 65 mph maximum speed limits on rural Interstate highways. In December 1987, the President approved legislation enacting a limited demonstration program, that allowed the posting of speed limits as high as 65 mph on certain rural non-Interstate highways through the end of FY 1991.

The Intermodal Surface Transportation Efficiency Act of 1991 (ISTEA) made the demonstration program permanent, and allowed other rural non-Interstate highways that were not a part of the demonstration program to be posted at the 65 mph speed limit, provided they met certain criteria.

ISTEA also required the Secretary of Transportation to publish a rule to establish speed limit compliance requirements on 65 mph roads, in addition to 55 mph roads, and to include a formula for determining compliance by the States.

FHWA and NHTSA had shared responsibility for the implementation of the NMSL compliance program since 1980. To implement this program and the requirements of ISTEA, the agencies promulgated a joint regulation, 23 CFR part 1260.

On November 28, 1995, the President signed into law the National Highway System Designation Act of 1995 (NHS Act). Section 205(d) of the NHS Act repealed the NMSL compliance program, as set forth in 23 U.S.C. §§ 141(a) and 154.

The NHS Act made the repeal effective on December 8, 1995, but provided some States with an option to delay this effective date. In any State in which the legislature was not in session on November 28, 1995, the Governor could declare, before December 8, 1995, that the legislature was not in session and that the State preferred to delay the effective date until after the State's legislature next convenes. In accordance with the NHS Act, such a declaration would delay the effective date of the repeal of the NMSL until the 60th day following the date on which the legislature next convenes. Five States decided to exercise the option: Kansas, Louisiana, Mississippi, Missouri and Ohio.

Accordingly, as provided in the NHS, on December 8, 1995, the NMSL was repealed for all States other than these five States. In those five States, it remained in effect until the 60th day following the date on which the legislature of that State next convened.

The agencies published a final rule in the **Federal Register** on March 20, 1996, 61 FR 11305, which rescinded the regulation for all States except the five which had delayed the effective date until after their legislatures next convened. That final rule added an applicability section to Part 1260 (section 1260.4), making the regulation applicable only to those five States. In addition, sections of the regulation that pertained to speed monitoring, certification requirements and compliance standards were deleted from the regulation because they were no longer applicable to any State. This removed the information collection requirement for all States at that time.

The expiration of the 60-day period has now occurred for all States. Since Part 1260 no longer applies to any State, the regulation is being rescinded in its entirety.

Regulatory Analyses and Notices

Civil Justice Reform

This final rule will not have any preemptive or retroactive effect. It imposes no requirements on the States, but rather removes regulatory obligations that are no longer authorized by statute.

Executive Order 12866 (Regulatory Planning and Review) and DOT Regulatory Policies and Procedures

The agencies have analyzed the effect of this action and determined that it is not significant within the meaning of Executive Order 12866 or of Department of Transportation regulatory policies and procedures. This final rule imposes no additional burden on the public. Regulatory obligations have been removed since they are no longer authorized by statute. Therefore, a regulatory evaluation is not required and was not prepared.

Regulatory Flexibility Act

In compliance with the Regulatory Flexibility Act, the agencies have evaluated the effects of this action on

VOL 63 ISS 17 JA 27 1998 UMI

small entities. Based on the evaluation, we certify that this action will not have a significant economic impact on a substantial number of small entities. Accordingly, the preparation of a Regulatory Flexibility Analysis is unnecessary.

Paperwork Reduction Act

The Office of Management and Budget (OMB) had approved the information collection requirements associated with 23 CFR part 1260 (OMB Clearance No. 2125–0027). By rescinding all of part 1260, the information collection requirement, as that term is defined by OMB in 5 CFR part 1320, remains at zero.

National Environmental Policy Act

The agencies have analyzed this action for the purpose of compliance with the National Environmental Policy Act and have determined that it will not have a significant effect on the human environment.

Executive Order 12612 (Federalism)

This action has been analyzed in accordance with the principles and criteria contained in Executive Order 12612. There are no federalism implications pursuant to Executive Order 12612 since regulatory obligations are being rescinded because they are no longer authorized under current law. Under these circumstances, the preparation of a Federalism Assessment is not warranted.

Notice and Comment

The agencies find that prior notice and opportunity for comment are unnecessary under 5 U.S.C. 553(b)(3)(B) because the agencies are not exercising discretion in a way that could be meaningfully affected by public comment. Instead, this rescission of the agencies' speed limit compliance regulations is mandated by Section 205(d) of the NHS Act. Therefore, notice and opportunity for comment are not required under the regulatory policies and procedures of the Department of Transportation.

In addition, good cause exists to dispense with the 30-day delayed effective date requirement of 5 U.S.C. 553(d) because this final rule "grants or recognizes an exemption or relieves a restriction" in accordance with 5 U.S.C. 553(d)(1). In repealing the NMSL regulation for all States, all Federal speed limit provisions are terminated. Consequently, the agencies are proceeding directly to a final rule which is effective upon its date of publication.

List of Subjects in 23 CFR Part 1260

Grant programs—transportation, Highway and roads, Motor vehicles, Traffic regulations.

In consideration of the foregoing, Part 1260 of Title 23, Code of Federal Regulations, is removed.

Issued on: January 12, 1998.

Kenneth R. Wykle,

Administrator, Federal Highway Administration.

Ricardo Martinez,

Administrator, National Highway Traffic Safety Administration.

Filing Requirements for Returns Claiming the Foreign Tax Credit

AGENCY: Internal Revenue Service (IRS), Treasury.

ACTION: Final Regulation.

SUMMARY: This document contains a final regulation relating to the substantiation requirements for taxpayers claiming foreign tax credits. The regulation is necessary to provide guidance to U.S. taxpayers who claim foreign tax credits.

DATES: *Effective date:* This regulation is effective January 27, 1998.

Applicability date: These regulations are applicable for tax returns whose original due date falls on or after January 1, 1988.

FOR FURTHER INFORMATION CONTACT: Joan Thomsen, (202) 622–3850 (not a toll-free call).

SUPPLEMENTARY INFORMATION:

Background

On January 13, 1997, the IRS published in the **Federal Register** a notice of proposed rulemaking (REG–208288–90), 62 FR 1700, relating to the filing requirements for returns claiming the foreign tax credit (the "proposed regulation").

Written comments responding to the proposed regulation were received. A public hearing was requested and scheduled but was later canceled when the one requester withdrew the request to testify. After consideration of all of the written comments, the proposed regulation under section 905(b) is adopted as revised by this Treasury Decision.

Summary of Comments and Final Regulations

The commenters argued that the "interim credit" notion incorporated in the proposed regulations from *Continental Illinois*, T.C. Memo 1991–66, 61 T.C.M. (CCH) 1916 (1991), *aff'd in part and rev'd in part*, 998 F.2d 513, 516–17 (7th Cir. 1993), was misapplied and that the proposed amendment to § 1.905–2(b)(3) denied district directors the flexibility to find compliance with section 905(b) unless the taxpayer produces receipts (or other direct evidence of payment) in order to prove that the taxes actually were paid to the foreign government. They argued that, even if the district director should be able to require such proof in cases such as *Continental Illinois*, district directors must have the flexibility to accept lesser proof. They argued that a portfolio holder of publicly-traded foreign securities, for example, will not be able to obtain proof in the form of receipts evidencing that the issuer of the securities actually paid the withheld taxes to the foreign government.

The comment letters are correct that the regulations historically have allowed the district director flexibility to determine that section 905(b) is satisfied without the production of tax receipts evidencing that the tax has been paid to the foreign government. Treasury and the IRS did not intend that the amendment to § 1.905–2(b)(3), as proposed, deny the district director the flexibility to accept secondary evidence of the foreign tax payment where it has been established to the satisfaction of the district director that it is impossible to furnish a receipt for such foreign tax payment. The amendment was merely intended to clarify that proof of the act of withholding through secondary evidence is not, per se, equivalent to proof of payment of the foreign tax. Treasury and the IRS have now concluded, however, that such clarification is not necessary. *Continental Illinois* v. *Commissioner*, *supra*.

Therefore, in response to comments, the proposed regulation is finalized without its proposed amendment to § 1.905–2(b)(3). Thus, the final regulations are identical to the final regulations currently in effect, except § 1.905–2(a)(2) no longer requires a foreign receipt or return to be attached to a Form 1116 or Form 1118.

Treasury and the IRS will continue to review the foreign tax credit substantiation rules to assure that they are functioning adequately. For

example, Treasury and the IRS are concerned that U.S. holders of foreign securities, including American Depositary Receipts ("ADRs"), may be claiming foreign tax credits in situations where an intermediary in the chain of ownership between the holder of a foreign security or an ADR and the issuer of the security (or the security underlying the ADR) has taken actions inconsistent with the ownership of the underlying security by the person claiming the credit, such as a disposition of such security. One approach to address this issue would involve modifying the substantiation, documentation and reporting rules with respect to payments on such securities and taxes withheld therefrom. For example, in order for a U.S. owner to be entitled to a credit for foreign taxes imposed on income with respect to a security, financial intermediaries (including custodians) could be required to substantiate that they have not taken any action inconsistent with beneficial ownership of the relevant security by such U.S. owner.

It should be noted that portfolio investors are not necessarily entitled to foreign tax credits for the full amount indicated on the Form 1099 as foreign taxes paid. Portfolio investors are only entitled to a foreign tax credit for the amount of tax that is legally owed, which may not be the same as the amount withheld. If, for example, a portfolio investor is entitled to a refund of foreign tax withheld because of a reduced treaty withholding rate, the investor is only entitled to a foreign tax credit for the reduced amount, whether or not the investor files a refund claim with the foreign tax authorities. The IRS has made changes to the Form 1116 Instructions and Publication 514 to clarify this point and intends to make similar changes to the Form 1118 Instructions.

Explanation of Provisions

Section 1.905–2(a)(1), 1.905–2(b)(1), (2), and (3), and 1.905–2(c)

Sections 1.905–2(a)(1), 1.905–2(b)(1), (2) and (3), and 1.905–2(c) are unchanged from the current final regulations.

Section 1.905–2(a)(2)

Under former § 1.905–2(a)(2), taxpayers generally were required to attach to their income tax returns either (1) the receipt for the foreign tax payment or (2) a foreign tax return for accrued foreign taxes. Section 1.905–2(a)(2) removes the requirement that the documentation be attached to the income tax return. The regulation now provides that such evidence of payment of foreign taxes must be presented to the district director upon request.

Special Analyses

It has been determined that this Treasury decision is not a significant regulatory action as defined in Executive Order 12866. Therefore, a regulatory assessment is not required. It has also been determined that section 553(b) of the Administrative Procedures Act (5 U.S.C. chapter 5) does not apply to this regulation, and because the regulation does not impose a collection of information on small entities, the Regulatory Flexibility Act (5 U.S.C. chapter 6) does not apply. Pursuant to section 7805(f) of the Internal Revenue Code, the notice of proposed rulemaking preceding this regulation was submitted to the Chief Counsel for Advocacy of the Small Business Administration for comment on its impact on small business.

Drafting Information: The principal author of this regulation is Joan Thomsen of the Office of the Associate Chief Counsel (International), IRS. However, other personnel from the IRS and Treasury Department participated in their development.

List of Subjects in 26 CFR Part 1

Income taxes, Reporting and recordkeeping requirements.

Adoption of Amendments to the Regulations

Accordingly, 26 CFR part 1 is amended as follows:

PART 1—INCOME TAXES

Paragraph 1. The authority citation for 26 CFR part 1 continues to read in part as follows:

Authority: 26 U.S.C. 7805 * * *

Par. 2. Section 1.905–2 is amended by revising the second through fourth sentences in paragraph (a)(2) to read as follows:

§ 1.905–2 Conditions of allowance of credit.

(a) * * *

(2) * * * Except where it is established to the satisfaction of the district director that it is impossible for the taxpayer to furnish such evidence, the taxpayer must provide upon request the receipt for each such tax payment if credit is sought for taxes already paid or the return on which each such accrued tax was based if credit is sought for taxes accrued. The receipt or return must be either the original, a duplicate original, or a duly certified or authenticated copy. The preceding two sentences are applicable for returns whose original due date falls on or after January 1, 1988. * * *

* * * * *

Michael P. Dolan,

Deputy Commissioner of Internal Revenue.

Approved: January 13, 1998.

Donald C. Lubick,

Acting Assistant Secretary of the Treasury.

BILLING CODE 4830–01–U

DEPARTMENT OF LABOR

Occupational Safety and Health Administration

29 CFR Part 1926

[Docket No. S–205]

RIN 1218–AA40

Safety Standards for Scaffolds Used in the Construction Industry (Aerial Lifts); Effective Date and Office of Management and Budget Control Numbers Under Paperwork Reduction Act

AGENCY: Occupational Safety and Health Administration, Labor.

ACTION: Final rule; amendment; announcement of effective date and OMB approval of information collection requirements.

SUMMARY: This document announces the effective date of a provision in the Occupational Safety and Health Administration's construction standard for scaffolds that addresses manufacturer certification of "field modified" aerial lifts. The document also adds an entry to display that the collection of information has been approved by the Office of Management and Budget under the Paperwork Reduction Act of 1995.

EFFECTIVE DATE: The amendment in this final rule and § 1926.453(a)(2), published at 61 FR 46026, are effective January 27, 1998.

FOR FURTHER INFORMATION CONTACT: Laurence Davey, Directorate of Construction, Occupational Safety and Health Administration, U.S. Department of Labor, Room N–3621, 200 Constitution Avenue, NW., Washington, DC 20210, telephone (202) 219–7198.

SUPPLEMENTARY INFORMATION: In the August 30, 1996, **Federal Register** at 61 FR 46026, *et seq.*, OSHA revised the standards for scaffolds in construction; codified as subpart L of 29 CFR part 1926. The effective date for the revised subpart was November 29, 1996. However, in that same document, at 61

VOL 63 ISS 17 JA 27 1998 UMI

FR 46026 and 46103–46104, the Agency announced its intent to request Office of Management and Budget (OMB) approval for a provision addressing aerial lifts in § 1926.453(a)(2). OSHA stated that the effective date for § 1926.453(a)(2) would be announced in the **Federal Register** at a later date, once OSHA received approval for the information collection requirements in that provision from OMB. The aerial lift provisions contain a requirement for manufacturer certification of "field modified" aerial lifts, which was previously codified in § 1926.556, and which was redesignated at § 1926.453(a)(2) in the final rule.

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. 3501–3520), OMB has approved the information collection and assigned OMB control number 1218–0216, which expires on October 31, 2000. Under 5 CFR 1320.5(b), an Agency may not conduct or sponsor a collection of information unless: (1) The collection displays a valid control number, and (2) the agency informs potential persons who may respond to the collections of information that such persons are not required to respond to the collection of information unless it displays a currently valid OMB control number. Accordingly, now that OMB has approved the collections in § 1926.453(a)(2), OSHA is codifying the current OMB control number into § 1926.5, which is the central section in which OSHA displays its approved collections under the Paperwork Reduction Act. The effective date of § 1926.453(a)(2) is January 27, 1998.

Authority and Signature

This document was prepared under the direction of Charles N. Jeffress, Assistant Secretary of Labor for Occupational Safety and Health, U.S. Department of Labor, 200 Constitution Avenue, N.W., Washington, DC 20210.

List of Subjects in 29 CFR Part 1926

Construction; Occupational safety and health; Reporting and recordkeeping requirements.

Signed at Washington, D.C., this 15th day of January, 1998.

Charles N. Jeffress,

Assistant Secretary of Labor.

Accordingly, the Occupational Safety and Health Administration amends 29 CFR part 1926 as set forth below.

PART 1926—[AMENDED]

1. The authority citation for subpart A of part 1926 continues to read as follows:

Authority: Section 107, Contract Work Hours and Safety Standards Act (Construction Safety Act) (40 U.S.C. 333); secs. 4, 6, 8, Occupational Safety and Health Act of 1970 (29 U.S.C. 653, 655, 657); Secretary of Labor's Order 12–71 (36 FR 8754), 8–76 (41 FR 25059), or 1–90 (55 FR 9033), as applicable; 29 CFR part 1911.

§ 1926.5 [Amended]

2. In § 1926.5, the table is amended by adding the entry "§ 1926.453(a)(2).....1218–0216" in numerical order.

[FR Doc. 98–1788 Filed 1–26–98; 8:45 am]

BILLING CODE 4510–26–M

POSTAL SERVICE

39 CFR Part 20

Expansion of Global Priority Mail

AGENCY: Postal Service.

ACTION: Final rule.

SUMMARY: On March 29, 1996, the Postal Service published in the **Federal Register**, 61 FR 14025, an interim rule with a request for comments which expanded Global Priority Mail service by increasing the number of acceptance points, increasing the number of destination countries, and adding weight variable rates for items weighing up to 4 pounds. The Postal Service now adopts the interim regulations, with amendments, as final.

EFFECTIVE DATE: January 27, 1998.

FOR FURTHER INFORMATION CONTACT: R. Jay Thabet, (202) 268–2269.

SUPPLEMENTARY INFORMATION: On March 29, 1996, the Postal Service published an interim rule expanding Global Priority Mail and requesting comments, 61 FR 14025. Global Priority Mail is an expedited airmail letter service providing fast, reliable, and economical delivery of all items mailable as letters or merchandise up to 4 pounds. Global Priority Mail items receive priority handling in the United States and destination countries. Service is limited to the 34 destination countries identified in the International Mail Manual 226.2. Service is available from designated post offices identified in the International Mail Manual 226.32.

The weight limit for Global Priority Mail items is 4 pounds. The Postal Service offers two sizes of preprinted flat-rate envelopes. The rates for these envelopes are based on a geographic rate zone regardless of the actual weight. Although these envelopes are valid for weights of up to 4 pounds, the practical limitations of the envelopes limit the weight to less than 4 pounds.

The interim rule increased the number of post offices where Global Priority Mail would be available, increased the number of destination countries, and added variable weight-based rates to increase customer convenience.

The Postal Service received one letter containing nine comments on the interim rule.

Comment one suggests that, for those states where all post offices within the state are on the list of acceptance sites, just the state should be listed without showing the different facilities. This suggestion does not take into account that there may arise a case where a post office within a state may not be able to accept Global Priority Mail at some time in the future. The present system of listing the acceptance facilities allows the Postal Service to delete post offices when appropriate.

Comment two suggests that ZIP Codes be listed in numerical order rather than in alphabetical order of the acceptance facility. While both numerical and alphabetical listings are valid, neither is more valid than the other. The Postal Service elects to retain the alphabetical listing.

Comment three states that, in New York State, Postal Codes 117/118 are no longer listed as acceptance sites, whereas they were listed as acceptance sites for the original test. This was a typographical error; ZIP Codes 117/118 are acceptance sites.

Comment four asks for an explanation of certain abnormalities in the rate structure for variable weights and the volume rates. The differences between weight steps does not have to be equal or linear or based totally on cost changes. The competitions' rates for similar products are a factor. The size and weight of the volume the USPS most wants to attract is another factor in the determination of weight level increases.

Comment five asks for an explanation for the relationship between rates for Canadian and European destinations. The expected traffic to each country group, the competition that we face going to that country group, and the cost to get into each country group were factors used to determine rates. In the example cited, competitors' rates and delivery costs in the country were the most influential.

Comment six states that the relationship between the flat rate envelopes and the variable weight rate should be clarified and the relationship between the flat rate envelope and the volume rate should be clarified. The flat rate developed for envelopes that the Postal Service provides is independent

of the variable weight rate and the volume rate. The Postal Service developed the flat rates as a convenience for the customer. To receive either the variable weight or volume rate options, the customer must provide the appropriate packaging. The envelopes the Postal Service provides are for the convenience of the customer and are not eligible for either the variable weight or volume rate options.

Comment seven suggests a change in wording to Chapter 2 of the International Mail Manual, part 226.62, to read * * * * sticker rate must have the DEC–10 sticker affixed to the address side of the package, for clarification purposes. The Postal Service accepts this comment and revises Chapter 2 of the International Mail Manual, part 226.62.

Comment eight notes that section 226.82 of the International Mail Manual does not state where the single piece rate packages can be mailed. In light of this comment the Postal Service revises Chapter 2 of the International Mail Manual, part 226.82, to state that single piece variable weight option may be deposited in the normal manner of deposit for Global Priority Mail.

Comment nine questions the legality of not providing Global Priority Mail service from every post office under the jurisdiction of the United States Postal Service. The United States Postal Service provides service throughout the entire United States as mandated by 39 USC 3623(d). There are some products and services that are not available at all postal retail units. Acceptance of passport applications is an example. In the case of Global Priority Mail, the service is offered at all post offices from which transportation is available which allows the mailpiece to reach the appropriate airmail facility in time to make the scheduled airline departure on the day after the mailpiece is deposited. If the transportation network at a given post office does not allow for the mailpiece to leave the United States on the day after deposit, that post office does not accept Global Priority Mail. This restriction is in place to preserve the integrity of a premium service for which the customer pays a premium fee.

A transmittal letter making the changes in the pages of the International Mail Manual will be published and transmitted automatically to subscribers. Notice of issuance of the transmittal letter will be published in the **Federal Register** as provided by 39 CFR 20.3.

The Postal Service amends part 226 of the International Mail Manual, which is incorporated by reference in the Code of Federal Regulations. See 39 CFR 20.1.

List of Subjects in 39 CFR Part 20

Foreign relations, Incorporation by reference, International postal services.

PART 20—[AMENDED]

The authority citation for 39 CFR Part 20 continues to read as follows:

Authority: 5 U.S.C. 552(a); 39 U.S.C. 401, 407, 408.

2. The International Mail Manual is amended to incorporate part 226, Global Priority Mail, as follows:

226 Global Priority Mail

226.1 General

226.11 Definition

Global Priority Mail is an expedited airmail letter service providing fast, reliable, and economical delivery of all items mailable as letters or merchandise up to 4 pounds. Global Priority Mail items receive priority handling in the United States and in destination countries. Service is available only to destination countries identified in 226.2, from post offices identified in 226.3.

226.12 Permissible Items

All items sent as letter class mail (see 221.1) are accepted in Global Priority Mail provided that the contents are mailable and fit securely in the envelope. Global Priority Mail items may contain dutiable merchandise unless the country of destination specifically prohibits dutiable merchandise in letters (see 224.51). Any item that is prohibited in international mail is prohibited in Global Priority Mail. Refer to the "Country Conditions of Mailing" in the Individual Country Listings for individual country prohibitions.

226.13 Packaging

Items must fit comfortably within the flat-rate envelope without distorting or bursting the container. Do not use excessive tape to keep the envelopes from bursting. Use only one piece of tape to secure the flap.

226.2 Availability

Global Priority Mail is available to the following countries. Countries specifically identified will have service only to specific cities within those countries, as noted below:

COUNTRIES OF DESTINATION

Western Europe	Pacific Rim	North America	South America	Middle East
Austria	Australia	Canada	Brazil [4]	Israel.[6]
Belgium	China [2]	Mexico [3]	Chile [5]	Saudi Arabia.[7]
Denmark	Hong Kong			
Finland	Japan			
France (including Monaco)	Korea, Republic of			
Germany	New Zealand			
Great Britain and Northern Ireland [1]	Philippines			
Iceland	Singapore			
Ireland	Taiwan			
Liechtenstein	Thailand			
Luxembourg	Vietnam			
Netherlands, The				
Norway				
Portugal				
Spain				
Sweden				
Switzerland				

[1] Includes England, Northern Ireland, Scotland, Wales, Guernsey, Jersey, and the Isle of Man.
[2] Destinations in China are limited to Beijing, Dalian, Guangzhou, Qingdao, Shanghai, Shenzhen, Suzhou, Tianjin, Wuxi, Xiamen, and Zhuhai ONLY.

VOL 63 ISS 17 JA 27 1998 UMI

[3] Destinations in Mexico are limited to Mexico City, Guadalajara, and Monterrey ONLY.
[4] Destinations in Brazil are limited to Sao Paulo and Rio de Janeiro ONLY.
[5] Destinations in Chile are limited to Santiago, Valparaiso, and Viña del Mar ONLY.
[6] Destinations in Israel are limited to Jerusalem, Tel Aviv, and Haifa ONLY.
[7] Destinations in Saudi Arabia are limited to Riyadh, Jeddah, and Dammam ONLY.

226.3 Mailing Locations

226.31 Acceptance Offices and Pickup Service Locations

Global Priority Mail service is available only through the designated post offices and the additional post offices listed in 226.32. Pickup Service is available for an additional fee. (See 226.83.)

226.32 Service Areas

Service is available only from the metropolitan areas as defined by the ZIP Code ranges shown in Exhibit 226.32. If Global Priority Mail is presented at a non-participating retail unit, advise the customer that the item cannot be accepted as Global Priority Mail. Refer customer to the nearest Global Priority Mail retail acceptance unit. Within these service areas, prepaid items may be given to carriers, deposited in Express Mail collection boxes, or mailed at post offices, stations, and branches.

226.4 Postage

226.41 Flat-Rate Envelopes Postage

Each Global Priority Mail flat-rate envelope is charged at a flat rate. The rate is based on the geographic rate zone regardless of its actual weight. Postage is required for each piece. (See Exhibit 226.41.)

Exhibit 226.41

FLAT-RATE ENVELOPE POSTAGE RATES

Destination	Small	Large
Western Europe and Middle East	$3.75	$5.95
Canada and Mexico	3.75	5.95
Pacific Rim and South America	4.95	5.95
Weight Limit 4 Lbs.		

226.42 Variable Weight Option Postage—Single Piece Rates

Global Priority Mail variable weight rates are calculated in half (or fraction thereof) increments based on the weight of each piece the destination geographic rate zone up to four pounds. (See Exhibit 226.42.)

Exhibit 226.42

VARIABLE WEIGHT STICKER OPTION—SINGLE PIECE RATES

Weight level	Western Europe and Middle East	Pacific Rim and South America	Canada and Mexico
½ lb	$7.00	$8.00	$5.95
1.0 lb	10.50	12.50	10.00
1.5 lbs	12.50	16.95	13.50
2.0 lbs	15.00	21.00	16.50
2.5 lbs	17.50	23.95	18.00
3.0 lbs	19.95	27.25	19.50
3.5 lbs	22.00	31.50	21.00
4.0 lbs	24.75	34.50	22.50
Weight Limit 4 Lbs.			

226.43 Global Priority Mail Sticker—Volume Rates

226.431 Minimum Quantity Requirement

The mailer must have a minimum of five or more pieces to one or more Global Priority Mail countries. The minimum does not apply to each geographic zone rate. (See Exhibit 226.43.)

226.432 Mailing Statement

Postage for volume rate mail and permit imprint must be computed on PS Form 3653, Global Priority Mail Statement of Mailings.

Exhibit 226.43

VARIABLE WEIGHT STICKER OPTION—VOLUME RATES

Weight level	Western Europe and Middle East	Pacific Rim and South America	Canada and Mexico
½ lb	$5.95	$6.95	$5.00
1.0 lb	8.50	10.00	7.50
1.5 lbs	10.00	13.50	10.00
2.0 lbs	12.00	16.95	12.50
2.5 lbs	14.00	19.25	13.50
3.0 lbs	16.95	21.95	14.50
3.5 lbs	19.95	25.50	15.50
4.0 lbs	22.50	27.75	16.50
Weight Limit 4 Lbs.			

226.5 Payment Methods

226.51 Postage Payment Methods

Nonidentical weight piece mailings must have the applicable postage affixed by adhesive stamps, meter stamps or if presented at a post office, postal validation imprinter (PVI labels). Identical weight piece mailings may be paid by meter stamps, adhesive stamps, PVI labels or permit imprint subject to certain standards. To use permit imprint, the mailing must consist of 200 or more pieces and be of identical weight. The 200-piece criterion for permit imprint applies to both volume rate and flat-rate mail. Mailers may use permit imprint with nonidentical weight items only if authorized by the USPS under a Manifest Mailing System (MMS), in DMM P710.

226.52 Postal Marking Related to Volume Rate Postage

When pieces are paid at the volume rate and paid by stamps or meter impression, each piece must be legibly marked with the words "Volume Rate Global Priority Mail." If stamps are used the endorsement must appear on the address side of each piece and must be applied by a printing press, hand stamp or other similar printing device. If meter impression is used the endorsement must be in the ad plate or the slug area. If part of the slug, the abbreviation GPM Vol. Rate may be used. See DMM P030.4.14 for specification of size requirements.

226.53 Permit Imprint Content and Format

All permit imprints on Global Priority Mail must show city and state, "Global Priority Mail," U.S. Postage Paid, and permit number. They may show the mailing date, amount of postage paid or the number of ounces for each postage.

226.54 Meter Stamps Content

At a minimum, a meter stamp must show the month, day, and year in the postmark, city and state designation of the licensing post office, the number, and the amount of postage. See DMM P030.4.6.

226.6 Preparation Requirements

226.61 Addressing

All items must bear the complete delivery address of the addressee and the full name (no abbreviations) of the destination country. See 122.

226.62 Marking

Global Priority Mail items must be mailed in special envelopes (EP–15A, EP–15B) or with the Global Priority Mail sticker (DEC–10) provided by the Postal Service. (These supplies may be obtained by calling 800–222–1811.) Unmarked pieces are subject to the applicable LC/AO airmail regular rates and treatment. Pieces paid at the Global Priority Mail sticker rate must have the DEC–10 sticker affixed to the address side of the package.

226.63 Customs

A green customs label must be affixed if the package is 16 ounces or more, regardless of its contents. Only documents and correspondence under 16 ounces do not require a customs form.

226.7 Size and Weight Limits

226.71 Size Limits

226.711 Flat-Rate Envelope Sizes

a. Small Size—6 x 10 inches.
b. Large Size—9½ x 12½ inches.

226.712 Package Sizes for Variable Weight Option

a. Minimum length and height: 5½ x 3½ inches.
b. Minimum depth (thickness): .007 inches.
c. Maximum length: 24 inches.
d. Maximum length, height, depth (thickness) combined: 36 inches.

226.713 Rolls

a. Minimum length: 4 inches.
b. Minimum length plus twice the diameter combined: 6¾ inches.
c. Maximum length: 36 inches.
d. Maximum length plus twice the diameter combined: 42 inches.

226.72 Weight Limit

Items sent as Global Priority Mail in envelopes and the variable weight option must not exceed 4 pounds.

226.73 Special Services

Mailers may obtain certificates of mailing (see NO TAG). No other special services such as registry, insurance, restricted delivery, return receipt, or recorded delivery are available.

226.8 Mailer Preparation

226.81 Mailer Requirement

Global Priority Mail claimed at the volume rate must be separated by geographic rate zone (Western Europe, Pacific Rim, and Canada) when presented to the business mail entry unit unless otherwise authorized by the USPS. All pieces in a permit imprint mailing and metered mail must be facing the same direction.

226.82 Deposit of Mail

Global Priority Mail pieces paid by permit imprint and pieces claimed at the Global Priority Mail volume rates must be deposited at a business mail acceptance unit as authorized by the postmaster in the designated Global Priority Mail sites for weighing. Single piece variable weight option may be deposited in the normal manner of deposit for Global Priority Mail. Flat-rate envelopes with postage affixed may be deposited in any Express Mail Street collection box or other such place where Express Mail is accepted. Metered mail must be deposited in locations under the jurisdiction of the licensing post office except as permitted under DMM P030.

226.83 Pickup Service

On call and scheduled pickup service are available for Global Priority Mail from the designated Global Priority Mail acceptance cities. There is a charge of $4.95 for each pickup stop, regardless of the number of pieces picked up. (See DMM D010 for standards of pickup service.) Pickup is not available for Global Priority Mail pieces if paid by permit imprint or claimed at the volume rate.

46 CFR Part 382

[Docket No. R–158]

RIN 2133–AB19

Determination of Fair and Reasonable Guideline Rates for the Carriage of Bulk and Packaged Preference Cargoes on U.S.-Flag Commercial Vessels

AGENCY: Maritime Administration, Department of Transportation.

ACTION: Final rule.

SUMMARY: The regulations at 46 CFR part 382 prescribe the administrative procedures and methodology for determining fair and reasonable rates for the carriage of dry and liquid bulk and packaged preference cargoes on United States commercial cargo vessels. MARAD is issuing this rule to prescribe cost averaging as the methodology used for determining rates and to implement conforming procedural changes. MARAD is also reducing information collection under these regulations.

DATES: This final rule is effective January 29, 1998.

FOR FURTHER INFORMATION CONTACT: Michael P. Ferris, Director, Office of Costs and Rates, Maritime Administration, Washington, DC 20590, Tel. (202) 366–2324.

SUPPLEMENTARY INFORMATION: Section 901(b)(1) of the Merchant Marine Act of 1936 (the Act), as amended (46 App. U.S.C. 1241(b)), cited as the Cargo Preference Act of 1954, requires that at least 50 percent of any equipment, materials or commodities purchased by the United States or for the account of any foreign nation without provision for reimbursement, or acquired as the result of funds or credits from the United States, shall be transported on privately owned U.S.-flag commercial vessels, to the extent that such vessels are available at fair and reasonable rates. In 1985, section 901 was amended to exclude certain programs from the application of cargo preference and to raise the U.S.-flag share to 75 percent on certain others. Upon request, MARAD provides fair and reasonable rates (also referred to as guideline rates) to U.S. shipper agencies. Section 901(b)(2) of the Act provides the authority for MARAD (by delegation from the Secretary of Transportation) to issue regulations governing the administration of section 901(b)(1). In 1989, MARAD issued regulations at 46 CFR part 382 ("Rule"), that initially became effective on January 1, 1990.

Under the 1990 Rule, MARAD established fair and reasonable rates, so-called guideline rates, based on each individual vessel's costs which applied to the ocean borne portion of cargo transportation. The guideline rate consisted of four components: (1) Operating costs; (2) capital costs; (3) port and cargo handling costs; and (4) brokerage and overhead. The operating cost component of the guideline rate for each participating vessel reflected actual historical vessel operating costs escalated to the current period by utilizing factors for wage and non-wage costs. All eligible annual operating costs are added together for each vessel and divided by the total number of operating days for that vessel to yield a daily operating cost.

Each vessel's actual reported fuel consumption at sea and in port forms the basis of the guideline rate's fuel cost segment. The actual fuel consumption of each vessel is multiplied by the corresponding projected number of voyage days at sea and in port to calculate total units of fuel consumed.

VOL
63
ISS
17
JA
27
1998
UMI

Current fuel prices are applied to fuel consumed to produce the fuel segment of the operating cost component. MARAD then adds the totals of the fuel and non-fuel operating cost segments to produce the operating cost component for the voyage.

The capital cost component is presently calculated individually for each participating bulk vessel and consists of an allowance for depreciation and interest, plus a reasonable return on investment. Depreciation is calculated by the straight-line method, based on a 20-year vessel economic life and utilizing a residual value of 2.5 percent. However, if the owner acquired an existing vessel, the vessel is depreciated by the straight-line method over the remaining period of its 20-year economic life, but not fewer than 10 years. Capitalized improvements are depreciated straight-line over the remainder of the 20-year period, but not fewer than 10 years.

For the purpose of calculating interest expense, MARAD assumes that original vessel indebtedness is 75 percent of the owner's capitalized vessel cost and that principal payments are made in equal annual installments over a 20-year period. To compute the interest cost, the owner's actual interest rate is applied to the constructed outstanding debt on the vessel. Where the owner has a variable interest rate, MARAD uses the owner's rate prevailing at the time of calculation, and if there is no interest rate available, MARAD selects an appropriate interest rate.

MARAD allows a return on capital cost (investment), with two components, return on equity and return on working capital. The rate of return is based upon a five-year average of the most recent rates of return for a cross section of transportation industry companies, including maritime companies. Equity in the vessel is assumed to be the vessel's constructed net book value less constructed indebtedness. Working capital is the dollar amount necessary to cover operating and voyage expenses. The annual depreciation, interest, return on equity and return on working capital are divided by 300 operating days to determine a daily amount. The total of these elements is multiplied by estimated voyage days to determine the capital cost component used in the fair and reasonable rate calculation.

The port and cargo handling cost component of the guideline rate is determined for each voyage on the basis of the actual cargo tender terms for the commodity, load and discharge ports, and lot size. Costs used to determine the port and cargo cost component are based on the most current data from all available sources and verified from data received on completed cargo preference voyages. The brokerage and overhead component of the guideline rate is the aggregate of the cost components for operating, capital and port and cargo handling, multiplied by an 8.5 percent allowance for broker's commissions and overhead. The total of these four components is then divided by cargo tons (which cannot be less than 70 percent of the vessel's cargo deadweight) to determine the guideline rate.

Under the 1990 rule, whenever a vessel carries preference cargo and subsequently transports additional cargo prior to its return to the United States, MARAD reexamines the guideline rate that it calculated for the preference voyage. This reexamination may result in the recalculation of the original guideline rate, incorporating the additional voyage itinerary, costs and revenues which occurred as a result of the carriage of the additional cargo. If a vessel is scrapped or sold after discharging a preference cargo, MARAD adjusts the guideline rate to reflect the termination of the voyage after discharge. If the rate received by the operator for the preference cargo exceeds the adjusted guideline rate for the one-way voyage, MARAD informs the shipper agency who may then require the operator to repay the difference in the ocean freight.

Advance Notice of Proposed Rulemaking

MARAD decided that revising the Rule could encourage development of a modern and efficient merchant marine and reduce government-wide cargo preference shipping costs. As a result, on April 19, 1995, MARAD issued an Advance Notice of Proposed Rulemaking (ANPRM) (60 FR 19559), soliciting comments from the public. In the ANPRM, MARAD identified three alternative methodologies, in addition to the existing rate methodology, that it was considering. The three alternatives were: Foreign Market, Cost Averaging, and Market Based.

Seven sets of comments were received in response to the ANPRM. Commenters represented U.S. shipper agencies, vessel operators and industry associations. Comments were offered in support of, and in opposition to all four alternatives, with no clear consensus. Commenters generally supported the need for guideline rate reform and were unanimous that any methodology must encourage investment in efficient vessels.

Public Meetings

After an initial review of the comments received on the ANPRM, MARAD believed it would be beneficial to meet with interested parties. MARAD held two meetings. On July 12, 1995, members of the shipping community and other interested parties met with MARAD. On July 14, 1995, MARAD met on the same subject with representatives of the United States Department of Agriculture (USDA) and the United States Agency for International Development (AID), the major government shipper agencies.

As a result of MARAD's experience in determining guideline rates and the information received from the ANPRM and meetings with interested parties, on February 28, 1997, MARAD published a Notice of Proposed Rulemaking (NPRM) to amend the Rule in order to improve the fair and reasonable rate-making process. The following is a discussion of proposed changes to 46 CFR part 382 and the comments that were received during the comment period.

Comments

Eight groups submitted comments in response to the NPRM of February 28, 1997. The respondents were the American Institute of Certified Public Accountants (AICPA), four U.S.-flag operators that frequently carry preference cargoes, a U.S. liner operator, the U.S. Agency for International Development (AID), and United States Department of Agriculture's Foreign Agricultural Service (USDA). To facilitate discussion of the comments, they will be discussed by subject matter.

General

General comments ran the gamut from supporting most of the proposals in the NPRM to urging MARAD not to adopt the rule. Some questioned the need for guideline rates or changes to the current procedures and their legality. One operator contended that when at least three bids are received for a preference cargo the lowest should be assumed to be fair and reasonable. Another operator conjectured that averaging will introduce arbitrary biases and that it is unfair for operators to be expected to accept low rates when the market is poor but still be held to ceiling rates if the market improves. The same operator postulated that some operators would not be able to recover costs at the averaging rate. In addition, several operators were concerned that their knowledge of their competitors' cost structure was insufficient for them to know how the averaging system would affect their rates.

The averaging methodology for calculating fair and reasonable guideline rates is supported by the legislative history of Section 901(b)(1) of the Act (Pub. L. 83–664 or the Cargo Preference Act of 1954).

The Cargo Preference Act of 1954 requires government agencies to take such steps as may be necessary and practicable to assure that at least 50 percent (75 percent for specified bulk agricultural products) of the gross tonnage of certain government-sponsored cargoes, "which may be transported on ocean vessels shall be transported on privately-owned United States-flag commercial vessels, to the extent such vessels are available at fair and reasonable rates for United States-flag commercial vessels."

House Report No. 80, 84th Cong., 1st Sess. 3 (1955) sets out the reasons for passage of the Cargo Preference Act of 1954, as follows:

> Without some form of assurance of participation by United States-flag vessels in the transportation of relief and aid cargoes, it became clear that the shipping of the recipient and other maritime nations with lower operating costs would be able to underbid American-flag vessels and eventually transport much, if not all, of these cargoes to the irreparable detriment of the American merchant marine.

H.R. Rep. No. 80 also addressed administration of the Cargo Preference Act of 1954 and, as relevant here, discussed the meaning of "fair and reasonable rates." The question of how "fair and reasonable rates for United States-flag commercial vessels" should be calculated was referred to the Comptroller General of the United States by the House Merchant Marine and Fisheries Committee. The Comptroller General advised the Committee in a letter dated February 17, 1955, (B–95832), that—

> "fair and reasonable rates" as used in Pub. L. 664 * * * would appear to call for reasonable compensation to the operator, including a fair profit. However, it seems apparent that the statute contemplates *average* "fair and reasonable rates," which may or may not be profitable, or even compensatory, to a high-cost operator.

Quoted in H. Rep. No. 80, *supra*, p. 18 (Emphasis in original).

The Committee agreed with the Comptroller General's construction of the law and added,

> * * * it should be understood that at any one particular time market rates may be considerably less than [the fair and reasonable rate ceiling], in which event the chartering agency should feel free to exercise sound business judgment to secure the lowest rates possible for the Government.

H. Rep. No. 80, *Supra* p. 18.

MARAD has sought to develop a cost-based system which rewards efficiency while holding rates in check during peak periods. Guideline rate procedures have never guaranteed profitability and the Agency believes that the Comptroller's opinion means that full cost (plus profit) recovery in the guideline rate is not required for all vessels. MARAD also believes that the averaging methodology is fully consistent with the Act and that it will be rare that an operator does not recover its costs after efficiently executing a preference voyage at the full guideline rate.

MARAD's goal in revising the Rule is to encourage a modern and efficient merchant marine while reducing government-wide cargo preference costs. A United States General Accounting Office (GAO) report entitled *CARGO PREFERENCE REQUIREMENTS—Objectives Not Significantly Advanced When Used in the U.S. Food Aid Programs*, published in September 1994, concluded that food aid programs were paying higher shipping rates because guideline rate procedures allowed less efficient operators to charge higher rates. The report hypothesized that using average operating costs for similar sized ships instead of an individual ship's operating costs "should reduce food aid transportation costs." MARAD believes that changing the Rule to use average costs will be effective in encouraging efficient operation. In addition, administrative and technical changes made to the rule will help reduce time spent on the program by all parties in a period of scarce resources.

Finally, comments were received that relate to how the averaging system will affect each individual operator. One operator requested that MARAD consider providing operators with hypothetical rates based on recent cost information and also allow an additional comment period. Another requested that MARAD undertake a thorough effort to educate operators on the averaging process and its likely impact on guideline rates.

MARAD does not believe that an additional comment period will provide any significant benefit. However, before the final rule becomes effective, MARAD will contact each operator with current costs on file to explain the cost averaging system and discuss how it might affect rates. MARAD will also provide additional instructions and explanations in a brochure explaining guideline rate procedures to the general shipping community. In addition, MARAD will also provide the average category costs to operators and updates on an ongoing basis.

Averaging

MARAD proposed that the operating costs (including fuel consumption, capital costs and vessel speed) used in the construction of the guideline rate be averaged for all vessels within specific size categories. The averages would be computed twice a year, or more frequently, if necessary. The impact of the change to averaging would be a reduction in the guideline rate levels calculated for less efficient vessels and an increase in the guideline rate levels of the more efficient vessels. Although commenters generally supported the principle of averaging, it was unclear to one commenter whether capital costs would be averaged. Another believed that the rule should specify how MARAD will decide which vessels' costs will be averaged and develop a method to prevent use of irrelevant cost data. A third opposed averaging stating that it would be unpredictable and inefficient, penalizing newer vessels, capital improvements and steam-turbine driven vessels.

Under the averaging system, both vessel operating and capital costs will be averaged as will fuel consumption rates and vessel speed. Some wording changes have been made in the capital cost sections of the final rule to clarify that capital costs are averaged. In regard to steam-turbine vessels, it is true that any cost that is greater than the average creates a disadvantage to the operator of the higher cost vessel. MARAD shared the commenter's concern about impact on newer vessels that might enter the fleet and has provided a separate new vessel allowance. Because capital improvements are generally undertaken to create efficiencies in other cost areas, effective capital improvements should yield a long-term advantage to the operator.

Regarding the use of inappropriate data that could cause the average to be somehow distorted, MARAD will pay close attention to data provided to assure that it yields a meaningful average. Clearly, if a vessel carried preference cargo in this program during the prior year, it will be included in the average. For other vessels, an operator's program participation will be a factor in determining inclusion in the average. However, other factors such as the individual vessel's program participation and cost structure will also be considered.

Vessel Categories

MARAD proposed a four-category system based on cargo deadweight

VOL 63 ISS 17 JA 27 1998 UMI

capacity (CDWT) with the cargo capacity determining which category of costs were to be used. Six commenters raised issues concerning categories. The comments concerning categories fall into three basic areas: Mixing vessel types within a category, how and why the categories were selected, and alternative category suggestions.

Two commenters opposed assigning vessels to categories without regard to vessel type. One commenter stated that the cost structure of a LASH liner operation bears no resemblance to the cost structure of bulk operators. The other commenter argued that tug and barges are inappropriate for transoceanic voyages and should therefor not be included with vessels which are fully capable.

It is true that LASH liner operations have cost structures which are not comparable to bulk operations. However, from time to time LASH vessels have competed for and carried bulk and bagged commodities outside of liner operations. To the extent that LASH vessels are used outside of liner operations and subject to this rule, MARAD finds no reason to exclude this vessel type from the cost discipline that averaging by categories provides.

In regard to the appropriateness of transoceanic tug and barge movements, tugs and barges have regularly competed for transoceanic cargoes during the last several years. MARAD sees no reason why two vessel types competing for the same cargoes should not be subject to the same guideline rate methodology.

With respect to how size categories were selected, MARAD examined the sizes and costs of vessels that have carried preference cargo, the number of vessels of similar size, and the cargo amounts carried on individual voyages in the preference trade.

MARAD also considered the difference between vessel types (i.e., bulk carriers, tankers, tug/barges, and general cargo), and trading patterns in arriving at the proposed vessel categories. The analysis placed vessels in size categories where they compete primarily with each other and have similar aggregate cost structures.

MARAD's proposal to use cargo capacity rather than vessel size to determine which category of costs to use was not generally well received. Two commenters argued that the approach was less efficient and could result in inequities for cargoes just above and below the category break. After reviewing the comments and doing further analysis, MARAD has reconsidered this approach and now believes that categories based on vessel size would be the most effective and fair to all concerned because costs are more closely related to vessel deadweight than cargo deadweight.

One set of comments from industry and one from government proposed vessel category sizes different from MARAD's. Both proposed five different category sizes and one proposed categories broken down by vessel deadweight (DWT) in lieu of CDWT. MARAD's original proposal and the two alternatives are:

Category	MARAD (CDWT)	(CDWT) Alternative #1	(DWT) Alternative #2
I	<8,000 CDWT	<12,000 CDWT	<10,000 DWT.
II	8,000–19,999	12,000–24,999	10,000–19,999.
III	20,000–34,999	25,000–37,999	20,000–29,999.
IV	>35,000	38,000–50,000	30,000–49,999.
V	None	>50,000	=>50,000.

In response to the proposals, MARAD constructed guideline rates using the averaging method with all three different category size methods. The analysis showed a more even progression of rates from one cargo size to another using the MARAD categories and that there is little difference resulting from using CDWT instead of DWT to establish the MARAD categories. However, the review resulted in a modest shift in the break point between Category I and Category II from 8,000 CDWT to 10,000 DWT. Also, costs for vessels in the greater than 35,000 DWT category did not display major variations due to vessel size. Consequently, the final rule will have four categories based on vessel size.

Voyage Parameters

The parameters of the pro forma voyage used in the construction of the fair and reasonable guideline rate were addressed by five commenters. Three comments were received concerning MARAD's proposal for constructing voyages based upon MARAD selecting the most appropriate port range for the return leg of the preference voyage, rather than a return to the load port in all instances. Although one commenter objected to the change without stating a specific reason, two generally supported the change, as being in keeping with commercial practices. One suggested that the return leg always terminate in the U.S. Gulf, as that is where most cargo originates. The other suggested that the language in the rule be expanded to include specific reference to the practices of the owner and the prospects for subsequent employment.

MARAD believes that the method of voyage construction published in the NPRM can adequately address these concerns. Regarding always terminating in the U.S. Gulf, in certain circumstances, e.g., consecutive voyages from the U.S. West Coast, the U.S. Gulf would not be the appropriate termination area. The rule already authorizes MARAD to select "the most appropriate" port range, so expanding the language is not necessary.

Since speed would be averaged across vessel types, MARAD proposed that the separate weather delay factors in § 382.3(e)(6) be eliminated. However, one commenter pointed out that tug/barge units will still encounter greater weather delays than self propelled ships. As a result of comments received, MARAD reconsidered this item and the 10% delay factor for computing average speed for tugs has been retained in the final rule.

One commenter asserted that a critical problem with the transportation of bulk preference cargo is that the risk shifted to carriers by the use of "full berth terms" and other land-based transportation requirements in preference charter parties. In the NPRM, MARAD noted the differences in risk between load and discharge terms and indicated its intention to use delay factors which reflect the inherent risks, therefore no change has been made to the final rule.

Finally, a government commenter requested that MARAD continue to calculate one-way rates at the time of booking for vessels sold or scrapped prior to their return to the United States. The final rule continues to provide for a one-way rate, but with a more precise definition of the circumstances when it applies. The one-way rate will continue to be calculated at the same time as the full round-trip guideline rate.

Guideline Rate Adjustments

MARAD's proposal to eliminate backhaul adjustments elicited comments from three operators and two government shippers. The comments from the operators strongly favor MARAD's proposal, while the government shippers opposed it. MARAD believes the proposal to eliminate the backhaul adjustment provides the operator with a greater ability to increase its commercial carriage and U.S.-flag participation in the U.S. foreign trade. Further, MARAD believes that increased commercial carriage could help lower overall program costs, and therefore the proposal is unchanged in the final rule.

As a result of substitutions, voyage variations, add-on cargoes, and similar recalculations, MARAD averages two guideline rate calculations for each cargo actually fixed. MARAD intends to substantially reduce these recalculations and generally determine only one guideline rate for each preference cargo. The guideline rate based on the initially requested vessel and cargo will also be applicable to all other vessels in the same tonnage category that might actually carry the cargo and for cargo amounts plus or minus five percent of the original request. An exception would be made when a vessel eligible to receive the "new vessel allowance" is substituted for an older vessel, or vice versa.

Two government commenters and one operator also raised the issue of whether rates would be recalculated when an outbound commercial cargo is added on to a preference cargo. The government commenters argued that additional revenue sources should always trigger a recalculation. The other commenter noted that add-on commercial cargo is similar to the backhaul adjustment and its elimination from the guideline process would provide an incentive to bid on commercial cargo. MARAD will recalculate rates, if requested, for any add-on cargo which increases cargo size by more than five percent.

Cargo Size (Seventy Percent Limitation)

Three commenters provided views regarding MARAD's proposal to eliminate the seventy percent limitation in the current rule. This provision currently provides that, for the purposes of calculating guideline rates, calculated cargo tonnage shall not be less than 70 percent of the vessel's cargo capacity. All commenters agreed with MARAD's proposal noting that the seventy percent rule has limited competition. Therefore, § 382.3(f) of the final rule will provide that the determination of cargo tonnage in the guideline rate shall be based on the actual cargo tonnage booked or considered for booking on the voyage.

Capital Costs

Five changes designed to simplify or clarify rate calculations were proposed within this cost category. Comments pertaining to these changes and other issues related to capital cost were received from six of the eight commenters.

The first change adds a clarifying cross reference in § 382.3(b)(2)(ii). In the final rule the paragraph explicitly references paragraph (b)(2)(i) for the periods of depreciation to be used in determining interest expense in the guideline rate.

Three commenters expressed views on MARAD's second proposal, elimination of the 2.5 percent residual value in the calculation of depreciation. Although two commenters supported elimination, the third had a conceptional problem with the elimination of residual value in the depreciation calculation. Because MARAD believes that eliminating residual value simplifies the guideline rate process while conforming to industry practice, residual value is eliminated from the depreciation calculation in § 382.3(b)(2)(i) of the final rule.

The third proposed change to the capital cost calculation concerns situations where interest rates are not available for certain capitalized items. MARAD proposed the ten-year Treasury-bill (T-bill) rate plus one percent as an appropriate and readily available substitute. One commenter supported the change while a second contended that a change would probably result in a reduction for some operators. This concern is unfounded; the rate will not be substituted when the operator provides an interest rate. Accordingly, § 382.3(b)(2)(ii) is amended in the final rule to specify the ten-year T-bill rate plus one percent as the rate used in the fair and reasonable rate calculation when no interest rate is available or for vessels without mortgage debt.

The fourth proposed change, which was supported by the commenters who voiced a view, related to the interest rate used to calculate capital costs when an owner has a variable interest rate. In the final rule § 382.3(b)(2)(ii) has been amended to specify January 1 and July 1 as the dates on which the interest rates in effect would be used for the calculation of fair and reasonable rates.

The final proposed change to capital costs was the addition of a statement in the new § 382.3(b)(3) noting that the return on working capital is a voyage related capital cost element and thus not part of the averaged costs. This proposed change elicited comments from two persons. One agreed with the change. The second commenter appeared to misunderstand the proposal. The final rule includes the proposed change in new § 382.3(b)(3).

The rate of return used in the calculation of capital costs also elicited extensive responses from four commenters, even though no change was proposed. A government commenter objected to the "policy of guaranteeing" a return on investment, suggesting that if the "guarantee" cannot be eliminated, it be based on a rate of return for maritime companies only. The first part of this comment misinterprets the function of the fair and reasonable guideline rates in the preference market. Guideline rates provide a ceiling on market rates charged for the carriage of preference cargoes on U.S.-flag vessels. Far from "guaranteeing" a rate of return, a guideline rate limits the shipowner's profitability. In addition, the Comptroller's opinion specifically states that a reasonable profit should be included in the rate. Regarding the suggestion to base the rate of return on maritime companies only, MARAD believes that a maritime profitability index would be too narrow to assure a reasonable return during all periods.

In general, the three operator commenters expressed the opposite point of view from the above. They generally expressed the belief that a higher rate of return is necessary to compensate for a high risk investment in ocean shipping. One commenter suggested that the rate of return for working capital should be based on short term business loan rates such as prime plus a spread.

Although these comments have an element of truth, they also illustrate the dilemma of choosing an appropriate rate of return. MARAD believes that the suggestion to use a short term loan rate for the return on working capital is a reasonable suggestion. However, short-term loan rates are volatile and the suggestion ignores the question of a specific spread to use. In the end, the Agency believes the current procedures have worked well in the past and should continue to do so in the future. The final rule stipulates a rate of return on working capital and equity based on the five-year average of return on stockholders' equity for a cross section of transportation companies.

VOL 63 ISS 17 JA 27 1998 UMI

New Vessel Allowance

One goal of revising Part 382 has been to encourage newer and more efficient vessels to enter the cargo preference market. To this end, MARAD proposed including an allowance for acquisition capital in the guideline rates for both newly constructed vessels and vessels acquired prior to the fifth anniversary of their construction. The proposal provided that the allowance be included for a period of five years after acquisition by the owner. Comments were received from four persons on this provision. Commenters believed that the provision was insufficient and that a strong market would be necessary for the operator to benefit from the allowance. One commenter asserted that the allowance would only be received if MARAD paid it directly, while another supported the concept but only for newly constructed vessels. As a result of the comments, MARAD modified the new vessel allowance to provide a longer allowance period for newer vessel owners. In the final rule, the annual new vessel allowance will equal ten percent of the vessel's capitalized costs during the first year following construction or acquisition, and will decline by one percentage point each of the subsequent years until the vessel is ten years old. No allowance will be included for vessels more than ten years of age.

Information Collection Requirements

MARAD proposed reducing reporting and auditing requirements while continuing to recognize the agency's need for accurate cost and financial information. Two favorable comments were received on MARAD's proposals to reduce the amount and frequency of data reporting. To implement these two concepts, the final rule amends § 382.2(b)(8) to authorize aggregate schedule filings, and § 382.2(c) to change post-voyage filing to a semiannual requirement.

Two changes in reporting requirements were proposed to reduce the audit burden on operators, the Department of Transportation's Office of the Inspector General (OIG), and MARAD. The first change, intended to alleviate the need for auditing by the OIG, allowed an operator to have its submissions certified by an independent certified public accountant (CPA). One operator and the AICPA pointed out a problem with the specific phrase used by MARAD. The AICPA recommended replacement language specifying a report based on the independent CPA's performing an engagement consistent with professional standards, i.e., an attestation engagement. In addition, there was strong sentiment from three commenters for MARAD retaining the right to audit. It was never MARAD's intent to relinquish the right to request audits, but to alleviate some of the need for audit. However, it is MARAD's intention in deciding which operator's data to audit in any given year to factor the level of CPA review into its considerations. In consideration of the comments, the wording in § 382.2 of the final rule has been changed to include the language suggested by the AICPA.

The second proposed change in reporting requirements was to require the operator to use the accounting treatment it already uses for its own records and audited financial statements for its cost submissions to MARAD. One commenter believed that drydocking accruals should still be allowed even if a company expenses its drydocking costs. Another remarked that reporting consistency is critical when using averaging and MARAD should review the reported data and provide guidance to ensure consistent cost data. While it would be advantageous if all operators reported in the same manner and all operators accrued for drydocking costs, the Agency believes that the averaging process itself will even out the drydocking costs in much the same way as the accrual process.

MARAD also proposed three minor reporting changes. First, reporting the Official Coast Guard Identification Number (official number) would be required; second, the DWT requirement would be amended to require only summer DWT in metric tons and eliminate the requirement for Suez and Panama Canal net register tons; and, finally, the definition of "operating day" would be clarified. Only positive comments were received on these proposed changes and the proposals are included in the final rule.

Brokerage and Overhead

Part 382.3(b)(5)(d) specifies that "allowance for broker's commission and overhead of 8.5 percent shall be added to the sum of the operating cost component, the capital cost component, and the port and cargo handling cost component." Two comments were received on this component of the rate. The first questioned whether 8.5% is an appropriate allowance. The second was whether brokerage and overhead could be allowed on pass through items. MARAD believes that the 6% allowance for overhead costs that is added to the 2.5% brokerage included in guideline rates is still appropriate. Regarding brokerage and overhead on pass through items, fair and reasonable guideline rates are for ocean transportation only and an allowance in the guideline rate for inland transportation items is outside the scope of this rulemaking.

Total Revenue Rates

When more than one cargo has been booked on a vessel subject to the guideline rate regulations or when there are multiple load and/or discharge ports, calculating individual rates for particular parcels and/or destinations, as currently required by § 382.3(f) and (g), is impossible. Accordingly, MARAD proposed calculating a "Total Revenue Rate" when this occurs. The guideline rate would be calculated normally, but the final rate would be expressed as gross revenue for the total voyage, rather than as a rate per ton. If the revenue from the sum of the individual parcels does not exceed the total revenue calculated in the guideline, the individual rates would be considered fair and reasonable.

A shipper agency expressed concern that total revenue rates could result in inequities to recipients or shipper agencies if a high fixture and a low fixture combine to result in an acceptable total revenue. One operator expressed the belief that using a total revenue rate for combined parcels penalizes the operator for initiative in combining parcels and another asked that the calculation method be specified and shown by example. Responses to these concerns are drawn from experience with the total revenue concept, which has been used under waiver authority.

Experience to date has not shown operators frequently blending a high fixture rate with a low one. Typically, combining cargoes allows an operator to spread fixed costs more widely and bid a highly competitive rate for each cargo. Using the total revenue approach allows MARAD to combine the fixed costs for the whole voyage with the variable costs for the individual parcels. But because the voyage's fixed costs and the parcels' variable costs are not derived from the same tonnage, a rate per ton is not meaningful.

MARAD does not believe that total revenue rates penalize operators for combining cargoes. Total revenue rates actually reflect the practices of the operators when they combine cargoes. Using a total revenue approach simply requires comparing all the costs for all parcels to be carried on the voyage to the total revenue proposed in the operator's bids, thereby obviating the need to artificially allocate fixed costs to one cargo or the other.

As requested, an example of a total revenue rate follows:

CARGO

Cargo	Amount metric tons	Type	Terms	Load port	Discharge port
Rice	10,000	Bagged	FBT	Galveston, TX	Durban, South Africa.
Wheat	10,000	Bulk	VLFO (4000/1000) SHEX	New Orleans, LA	Beira, Mozambique.
Corn	10,000	Bulk	FBT	New Orleans, LA	Mombassa, Kenya.

VOYAGE

Port	Activity	Port time	Distance	Sea time	Port costs	Cargo costs
New Orleans, LA	Load wheat and corn	8.38			$35,000	$25,000
	Bunker	1.00				
Galveston, TX	Load rice	8.49	390	1.25	35,000	180,000
Durban, South Africa	Discharge rice	10.18	8234	28.32	25,000	100,000
Beira, Mozambique	Discharge wheat	12.73	702	2.24	25,000	0
Mombassa, Kenya	Discharge corn	8.49	1149	3.67	25,000	60,000
	Bunker	1.00		0.00		
U.S. Gulf	Return	0.00	9986	31.92	0	0
Total Days		48.25		85.40	145,000	385,000

FAIR AND REASONABLE RATE CALCULATION

Fuel Costs	$415,000
Vessel Operating Costs	$1,500,000
Port Costs	$145,000
Cargo Costs	$365,000
Other Cargo Costs	$20,000
Capital Costs	$740,000
Brokerage & Overhead	$270,725
Total	$3,455,725,000
Total Revenue Rate	$3,455,725
Average Rate per ton	$115.19

FIXTURE AND FAIR AND REASONABLE RATE COMPARISON

Cargo	Rate bid	Amount	Revenue	Fair and reasonable rate
Rice	$125.00	10,000	$1,250,000	
Wheat	90.00	10,000	900,000	
Corn	95.00	10,000	950,000	
Total		30,000	3,100,000	[1] $3,455,725
Average	103.33			

[1] Since voyage revenue is less than total revenue from the fair and reasonable rate, the individual bids are considered fair and reasonable.

The preceding example details the areas where costs vary and overlap. In order to provide individual rates, both direct and overall voyage costs must be allocated to each cargo. This is very difficult to accomplish fairly. Also, as this example illustrates, individual fixture rates can be higher or lower than the average rate, and yet the operator's total effort yields revenue that is fair and reasonable. The only unique aspect of the total revenue rate is the elimination of the step which divides the total allowable costs by the cargo tons to derive a rate per ton.

MARAD believes that the total revenue approach represents the best method for protecting the interests of all parties when cargoes are combined. Furthermore, combining cargoes has become increasingly common in the past two years. Consequently, in the final rule, § 382.3 (f) and (g) will allow the use of either a cost per ton or other measure that MARAD determines appropriate.

Revised Rate Methodology

The guideline or fair and reasonable rate established by MARAD, which applies only to the ocean borne portion of cargo transportation, consists of four components: (1) Operating costs; (2) capital costs; (3) port and cargo handling costs; and (4) brokerage and overhead. The operating cost component of the fair and reasonable rate will reflect average vessel operating costs for vessels within the specified size categories based on the historical data submitted in accordance with § 382.2 of this rule. MARAD will update the operating costs to the current period, utilizing escalation factors for wage and non-wage costs. The averages for each category of vessels will be calculated at least twice per year. To the extent vessels are time chartered or leased,

VOL 63 ISS 17 JA 27 1998 UMI

operators will submit both operating and capital costs, including all capitalized costs and interest rates for vessels subject to capital leases.

Vessel costs will be placed in categories based on the vessel's summer deadweight tons (DWT). The categories will be as follows:

Category I—Less than 10,000 DWT
Category II—10,000—19,999 DWT
Category III—20,000—34,999 DWT
Category IV—Greater than 35,000 DWT

All eligible annual operating costs for vessels within a category will be added together and divided by the total number of operating days for those vessels to yield a daily operating cost. The cost will be indexed to the current year and multiplied by estimated total voyage days to yield the operating cost segment for the voyage.

Fuel consumption will be determined on the basis of actual reported fuel consumption at sea and in port for vessels within the same category. The average fuel consumptions of vessels in the category will be multiplied by the projected number of voyage days at sea and in port to yield total fuel consumed. MARAD will obtain current spot market fuel prices from published sources at bunkering ports, consistent with sound commercial practice, and apply them to fuel consumed to produce the fuel segment of the operating cost component. The total of the fuel and non-fuel operating cost segments will be added together to yield the operating cost component for the voyage.

The capital cost component will be an average based on vessels in the applicable size category. It will consist of an allowance for depreciation and interest and a reasonable return on investment. Depreciation for vessels in a category will be straight-line based on a 20-year economic life. However, if the owner acquired an existing vessel, the vessel will be depreciated on a straight-line basis over the remaining period of its 20-year economic life, but not fewer than 10 years. Capitalized improvements will be depreciated straight-line over the remainder of the 20-year period, but not fewer than 10 years, commencing with the capitalization date for those improvements.

For the purpose of calculating interest expense, MARAD will assume that original vessel indebtedness is 75 percent of the owner's capitalized vessel costs and that principal payments are made in equal annual installments over the economic life of the vessel. To compute the interest cost, the owner's actual interest rates will be applied to the vessel's outstanding constructed debt, using the depreciation schedule in § 382.3(b)(2)(ii). Where the owner has a variable interest rate, the owner's rate prevailing when the average capital cost component is calculated will be used. In cases where there is no interest rate available, and for operators without vessel debt, MARAD will use the ten-year T-bill rate plus one percent.

Return on investment will have two components, return on equity and return on working capital. The rate of return will be based upon a five-year average of the most recent rates of return for a cross section of transportation industry companies, including maritime companies. Equity used will be the vessels' constructed net book values less constructed principal amounts. Working capital will be voyage based and be the dollar amount necessary to cover operating and voyage expenses.

A new vessel allowance will be included in the capital component of newly built vessels and vessels acquired when five years of age or less. This allowance, which will be paid until the vessel is ten years old, will equal ten percent of the vessel's capitalized costs during the first year following construction or acquisition, and will decline by one percentage point each of the subsequent years. The voyage allowance will be the annual amount divided by 300 operating days and multiplied by estimated voyage days.

The average annual depreciation, interest, and return on equity for vessels in the category will be divided by 300 operating days to determine a daily amount. The total of these elements will be multiplied by estimated voyage days and added to the return on working capital and the new vessel allowance to determine the capital cost component used in the fair and reasonable rate calculation.

The port and cargo handling cost component will be determined for each voyage on the basis of vessels in the category and the actual cargo tender terms for the commodity, load and discharge ports, and lot size. The costs will include applicable fees for wharfage and dockage of the vessel, canal tolls, cargo loading and discharging, and all other voyage costs associated with the transportation of preference cargo. Costs used to determine the port and cargo cost component will be based on the most current data from all available sources and verified from data received on completed cargo preference or commercial voyages.

To determine the brokerage and overhead component of the fair and reasonable rate, MARAD will add the cost components for operating, capital, and port and cargo handling and multiply that sum by an 8.5 percent allowance for broker's commissions and overhead. The total of these four components, expressed as total revenue or as a rate per ton, whichever is most applicable, will be the fair and reasonable rate.

If a vessel is scrapped or sold after discharging a preference cargo, and the vessel does not return to the United States as a U.S.-flag vessel, the guideline rate will be adjusted to reflect the termination of the voyage after cargo discharge. If the rate received by the operator for the preference cargo exceeds the adjusted guideline rate for the one-way voyage, the operator may be required to repay the difference in ocean freight to the shipper agency.

In special circumstances, certain procedures prescribed in this rule may be waived, provided the procedures adopted are consistent with the Act and with the intent of these regulations.

Rulemaking Analysis and Notices

Executive Order 12866 (Regulatory Planning and Review); DOT Regulatory Policies and Procedures; Pub. L. 104–121

This rulemaking is not considered an economically significant regulatory action under section 3(f) of E.O. 12866. It is not considered to be a major rule for purposes of Congressional review under Pub. L. 104–121. It is anticipated that savings to the Government of less than $1 million per year will result. Accordingly, the program will not have an annual effect on the economy of $100 million or more. While this rule does not involve any change in important Departmental policies, it is considered significant under DOT Regulatory Policies and Procedures and E.O. 12866 because it addresses a matter of considerable importance to the maritime industry and may be expected to generate significant public interest. Accordingly, the Office of Management and Budget has reviewed this rule.

When the NPRM was published, MARAD estimated the potential savings to the Government from this rulemaking by recalculating 167 rates for the years 1992 through 1995 using the revised methodology. This sample reflected the operators and countries in the complete data base. Extrapolating from the sample showed that averaging could have saved three million dollars in ocean freight for preference cargoes during the period. The comments received on the NPRM expressed concern that this analysis was flawed because it contained vessels which have since been either scrapped or withdrawn from the preference trade.

In response, MARAD recomputed the average costs for 1993 and 1994 using only vessels that are currently available for the preference trade. Table I shows the costs derived for each category from the reduced sample which were then used to calculate guideline rates using the averaging method. Table II summarizes the results of these calculations and shows the percentage savings that would have been realized using averaging.

TABLE I.—DAILY COSTS USED IN GUIDELINE RATE AVERAGES FOR CY 1993 AND 1994

Categories	Year	Operating costs	Capital costs	Fuel (at sea)*	Fuel (import)*	Speed (knots)	Sample size
Category I (<10,000 vdwt)	1993	$4,087	$1,224	$1,600	$222	6.25	8
	1994	3,321	1,294	1,600	195	6.25	8
Category II (10–19,999 vdwt)	1993	6,077	3,337	3,468	275	8.25	15
	1994	6,207	3,543	3,137	260	8.37	15
Category III (20–35,000 vdwt)	1993	11,447	5,435	3,270	443	12.66	4
	1994	10,686	4,604	4,366	674	13.79	6
Category IV (>35,000 vdwt)	1993	11,943	6,355	4,963	526	13.54	13
	1994	12,757	6,138	4,492	680	13.36	14

Extrapolating the estimated 1.05% savings based on actual fixtures during 1993 and 1994 to the period 1993 to August 1997, yields a savings of nearly one million dollars as a result of averaging. This savings estimate is approximately one-third the savings estimated with the ship mix used in the initial analysis. The reason for this is that declining levels of cargoes since 1994 have forced operators to bid very low rates to obtain cargoes, thus forcing many inefficient vessels out of the trade. Nevertheless, a million dollar savings is significant.

TABLE II.—SAVINGS IN SAMPLE RATES FROM USING AVERAGING SYSTEM FOR RATE CALCULATION

	Sample size	Fixture revenue	Averaging savings	Averaging vs guideline	Metric tons
Category I	18	6,098,662	($96,481)	($692,251)	91,956
Category II	22	20,953,285	0	($1,017,582)	296,068
Category III	10	20,155,736	($611,594)	($835,651)	224,247
Category IV	26	59,655,091	($416,255)	($429,445)	1,003,997
Sample total	76	106,862,774	($1,124,330)	($2,974,929)	1,616,268
			−1.05%	−2.32%	

Federalism

The Maritime Administration has analyzed this rulemaking in accordance with the principles and criteria contained in Executive Order 12612 and has determined that it would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

Regulatory Flexibility Act

The Maritime Administration certifies that this regulation would not have a significant economic impact on a substantial number of small entities. There are approximately twenty-five vessel operators that participate in this program, none of which are small entities.

Environmental Assessment

This final rule has no environmental impact and an environmental impact statement is not required under the National Environmental Policy Act of 1969.

Paperwork Reduction Act

This rulemaking reduces the current requirement for the collection of information. The Office of Management and Budget (OMB) has reviewed and approved the information collection and record keeping requirements (approval number 2133–0514) in the current rule under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 *et seq.*). Public comments were requested in the NPRM at 62 FR 9150, published February 28, 1997. Closing date for comments was April 29, 1997. No comments were received regarding this information collection. A subsequent 30-day notice was published July 21, 1997 by the Office of the Secretary of Transportation at 62 FR 39046. Comments were due on or before August 20, 1997. No comments were received as a result of this notice.

In accordance with the Paperwork Reduction Act of 1995, MARAD received an extension from OMB of approval for three years for this information collection.

Unfunded Mandates

Under the Unfunded Mandate Reform Act (Pub.L. 104–4) the Maritime Administration must consider whether this rule will result in an annual expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more (adjusted annually for inflation). The Act also requires that the Maritime Administration identify and consider a reasonable number of regulatory alternatives and, from those alternatives, select the least costly, most cost-effective, or least burdensome alternative that will achieve the objectives of the rule. As stated above, by this rule the Maritime Administration is reducing regulatory burden, i.e., collection of information, on the public. This final rule does not result in an annual expenditure by State, local and tribal governments, in the aggregate, or by the private sector, of $100 million or more and is the least burdensome alternative that will achieve the objective of the rule.

List of Subjects in 46 CFR Part 382

Agricultural commodities, Government procurement, Loan programs—foreign relations, Maritime carriers, Reporting and record keeping requirements.

VOL 63 ISS 17 JA 27 1998 UMI

Accordingly, 46 CFR Chapter II is hereby amended by revising part 382, to read as follows:

PART 382—DETERMINATION OF FAIR AND REASONABLE RATES FOR THE CARRIAGE OF BULK AND PACKAGED PREFERENCE CARGOES ON U.S.-FLAG COMMERCIAL VESSELS.

Sec.
382.1 Scope.
382.2 Data submission.
382.3 Determination of fair and reasonable rates.
382.4 Waivers.

Authority: 46 App. U.S.C. 1114, 1241(b); 49 CFR 1.66.

§ 382.1 Scope.

The regulations in this part prescribe the type of information that shall be submitted to the Maritime Administration (MARAD) by operators interested in carrying bulk and packaged preference cargoes, and the method for calculating fair and reasonable rates for the carriage of dry (including packaged) and liquid bulk preference cargoes on U.S.-flag commercial vessels, except vessels engaged in liner trades, which is defined as service provided on an advertised schedule, giving relatively frequent sailings between specific U.S. ports or ranges and designated foreign ports or ranges.

§ 382.2 Data submission.

(a) *General.* The operators shall submit information, described in paragraphs (b) and (c) of this section, to the Director, Office of Costs and Rates, Maritime Administration, Washington, D.C. 20590. To the extent a vessel is time chartered, the operator shall also submit operating expenses for that vessel. All submissions shall be certified by the operators. A further review based on the independent CPA performing an engagement consistent with professional standards, i.e., an attestation engagement, is recommended. Submissions are subject to verification, at MARAD's discretion, by the Office of the Inspector General, Department of Transportation. MARAD's calculations of the fair and reasonable rates for U.S.-flag vessels shall be performed on the basis of cost data provided by the U.S.-flag vessel operator, as specified herein. If a vessel operator fails to submit the required cost data, MARAD will not construct the guideline rate for the affected vessel, which may result in such vessel not being approved by the sponsoring Federal agency.

(b) *Required vessel information.* The following information shall be submitted not later than April 30, 1998, for calendar year 1997 and shall be updated not later than April 30 for each subsequent calendar year. In instances where a vessel has not previously participated in the carriage of cargoes described in § 382.1, the information shall be submitted not later than the same date as the offer for carriage of such cargoes is submitted to the sponsoring Federal agency, and/or its program participant, and/or its agent and/or program's agent, or freight forwarder.

(1) Vessel name and official number.

(2) Vessel DWT (summer) in metric tons.

(3) Date built, rebuilt and/or purchased.

(4) Normal operating speed.

(5) Daily fuel consumption at normal operating speed, in metric tons (U.S. gallons for tugs) and by type of fuel.

(6) Daily fuel consumption in port while pumping and standing, in metric tons (U.S. gallons for tugs) and by type of fuel.

(7) Total capitalized vessel costs (list and date capitalized improvements separately), and applicable interest rates for indebtedness (where capital leases are involved, the operator shall report the imputed capitalized cost and imputed interest rate).

(8) Operating cost information, to be submitted in the format stipulated in 46 CFR 232.1, on Form MA–172, Schedule 310. Operators are encouraged to provide operating cost information for similar vessels that the operator considers substitutable within a category, as defined in § 382.3(a)(1), in the aggregate on a single schedule. Information shall be applicable to the most recently completed calendar year.

(9) Number of vessel operating days pertaining to data reported in paragraph (b)(8) of this section for the year ending December 31. For purposes of this part, an operating day means any day on which a vessel or tug/barge unit is in a seaworthy condition, fully manned, and either in operation or standing ready to begin pending operations.

(c) *Required port and cargo handling information.* The port and cargo handling costs listed in this paragraph shall be provided semiannually for each cargo preference voyage terminated during the period. The report shall identify the vessel, cargo and tonnage, and round-trip voyage itinerary including dates of arrival and departure at port or ports of loading and discharge. The semiannual periods and the information to be submitted are as follows:

Period	Due date
April 1–September 30	January 1.
October 1–March 31	July 1.

(1) *Port expenses.* Total expenses or fees, by port, for pilots, tugs, line handlers, wharfage, port charges, fresh water, lighthouse dues, quarantine service, customs charges, shifting expenses, and any other appropriate port expense.

(2) *Cargo expense.* Separately list expenses or fees for stevedores, elevators, equipment, and any other appropriate expenses.

(3) *Extra cargo expenses.* Separately list expenses or fees for vacuvators and/or cranes, lightering (indicate tons moved and cost per ton), grain-to-grain cleaning of holds or tanks, and any other appropriate expenses.

(4) *Canal expenses.* Total expenses or fees for agents, tolls (light or loaded), tugs, pilots, lock tenders and boats, and any other appropriate expenses. Indicate waiting time and time of passage.

(d) *Other requirements.* Unless otherwise provided, operators shall use generally accepted accounting principles and MARAD's regulations at 46 CFR part 232, Uniform Financial Reporting Requirements, for guidance in submitting cost data. Notwithstanding the general provisions in 46 CFR 232.2(c) for MARAD program participants, each operator shall submit cost data in the format that conforms with the accounting practices reflected in the operator's trial balance and, if audited statements are prepared, the audited financial statements. Data requirements stipulated in paragraph (b) of this section that are not included under those reporting instructions shall be submitted in a similar format. If the operator has already submitted to MARAD, for other purposes, any data required under paragraph (b) of this section, its submission need not be duplicated to satisfy the requirements of this part.

(e) *Presumption of confidentiality.* MARAD will initially presume that the material submitted in accordance with the requirements of this part is privileged or confidential within the meaning of the Freedom of Information Act (FOIA), 5 U.S.C. 552(b)(4). In the event of a subsequent request for any portion of that data under the FOIA, MARAD will inform the submitter of such request and allow the submitter the opportunity to comment. The submitter shall claim or reiterate its claim of confidentiality at that time by memorandum or letter, stating the basis for such assertions of exemption from disclosure. The Freedom of Information Act Officer, or the Chief Counsel of MARAD, will inform the submitter of the intention to disclose any information claimed to be confidential, after the initial FOIA request, or after any appeal of MARAD's initial decision, respectively.

(Approved by the Office of Management and Budget under control number 2133–0514)

§ 382.3 Determination of fair and reasonable rate.

Fair and reasonable rates for the carriage of preference cargoes on U.S.-flag commercial vessels shall be determined as follows:

(a) *Operating cost component*—(1) *General.* An operating cost component for each category, based on average operating costs of participating vessels within a vessel size category, shall be determined, at least twice yearly, on the basis of operating cost data for the calendar year immediately preceding the current year that has been submitted in accordance with § 382.2. The operating cost component shall include all operating cost categories, as specified in 46 CFR 232.5, Form MA–172, Schedule 310, Operating Expenses. For purposes of these regulations, charter hire expenses are not considered operating costs. MARAD shall index such data yearly to the current period, utilizing the escalation factors for wage and non-wage costs used in escalating operating subsidy costs for the same period.

(2) *Fuel.* Fuel costs within each category shall be determined based on the average actual fuel consumptions, at sea and in port, and current fuel prices in effect at the time of the preference cargo voyage(s).

(3) *Vessel categories.* Vessels shall be placed in categories by deadweight capacities (DWT), as follows:

Group I—under 10,000 DWT
Group II—10,000—19,999 DWT
Group III—20,000—34,999 DWT
Group IV—35,000 DWT and over.

(b) *Capital Component*—(1) *General.* An average capital cost component for each category shall be constructed, at least twice yearly, consisting of vessel depreciation, interest, and return on equity.

(2) *Items included.* The capital cost component shall include:

(i) *Depreciation.* The owners' capitalized vessel costs, including capitalized improvements, shall be depreciated on a straight-line basis over a 20-year economic life, except vessels purchased or reconstructed when their age was greater than 10 years old. To the extent vessels are chartered or leased, the operator shall submit the capitalized cost of the vessel owner and imputed interest rate. If these items are not furnished, MARAD will construct these amounts. When vessels more than 10 years old are acquired, a depreciation period of 10 years shall be used. Capitalized improvements made to vessels more than 10 years old shall be depreciated over a 10-year period. When vessels more than 10 years old are reconstructed, MARAD will determine the depreciation period.

(ii) *Interest.* The cost of debt shall be determined by applying each vessel owner's actual interest rates to the outstanding vessel indebtedness. MARAD shall assume that original vessel indebtedness is 75 percent of the owners' capitalized vessel costs, including capitalized improvements, and that annual principal payments are made in equal installments over the economic life of the vessels as determined in accordance with paragraph (b)(2)(i) of this section. Where an operator uses a variable interest rate, the operator's actual interest rate at the time of calculation of the average capital cost component shall be used. The ten-year Treasury bill (T-bill) rate plus one percent on the first business day of the year or the first business day on or after July 1 shall be used for operators without vessel debt and when the actual rate is unavailable.

(iii) *Return on equity.* The rate of return on equity shall be computed in the same manner as described in paragraph (b)(3) of this section. For the purpose of determining equity, it shall be assumed that the vessel's constructed net book value, less outstanding constructed principal, is equity. The constructed net book values shall equal the owners' capitalized cost minus accumulated straight-line depreciation.

(3) *Return on working capital.* For each voyage a return on working capital shall be included as a voyage related capital cost element, and thus not part of the averaged costs. Working capital shall equal the dollar amount necessary to cover 100 percent of the averaged operating costs and estimated voyage costs for the voyage. The rate of return shall be based on an average of the most recent return of stockholders' equity for a cross section of transportation companies, including maritime companies.

(4) *New vessel allowance.* Newly constructed vessels and vessels acquired during or before their fifth year of age will receive an additional allowance for acquisition capital as part of the capital cost element. For the first year following construction or acquisition by the operator, a daily amount equal to ten percent of capitalized acquisition costs, divided by 300 operating days, shall be included. This amount shall be reduced by one percent of capitalized acquisition costs each subsequent year. No allowance shall be included after the tenth year following construction.

(5) *Voyage component.* The annual average depreciation, interest, and return on equity for vessels in each category shall be divided by 300 vessel operating days to yield the daily cost factors. Total voyage days shall be applied to the daily cost factors and totaled with the return on working capital and new vessel allowance for the voyage to determine the daily capital cost component.

(c) *Port and cargo handling cost component.* MARAD shall calculate an estimate of all port and cargo handling costs on the basis of the reported cargo tender terms. The port and cargo handling cost component shall be based on vessels in the category and the most current information available verified by information submitted in accordance with § 382.2(c), or as otherwise determinad by MARAD, such as by analysis of independent data obtained from chartering agencies.

(d) *Brokerage and overhead component.* An allowance for broker's commission and overhead expenses of 8.5 percent shall be added to the sum of the operating cost component, the capital cost component, and the port and cargo handling cost component.

(e) *Determination of voyage days.* The following assumptions shall be made in determining the number of preference cargo voyage days:

(1) The voyage shall be round-trip with the return in ballast to a port or port range selected by MARAD as the most appropriate, unless the vessel is scrapped or sold after discharge of the preference cargo and does not return to the United States as a U.S.-flag vessel. In this event, only voyage days from the load port to the discharge port, including time allowed to discharge, shall be included.

(2) Cargo is loaded and discharged as per cargo tender terms interpreted in accordance with the "International Rules For the Interpretation of Trade Terms" (INCOTERMS) published by the International Chamber of Commerce.

(3) Total loading and discharge time includes the addition of a factor to account for delays and days not worked.

(4) One extra port day is included at each anticipated bunkering port.

(5) An allowance shall be included for canal transits, when appropriate.

(6) Transit time shall be based on the average speed of vessels in the category. When calculating the vessels' average speed, individual vessel speeds will be

VOL 63 ISS 17 JA 27 1998 UMI

reduced by five percent for self-propelled vessels and ten percent for tugs/barges to account for weather conditions.

(f) *Determination of cargo carried.* The amount of cargo tonnage used to calculate the rate shall be based on the tender offer or charter party terms. In instances when separate parcels of preference cargo are booked or considered for booking on the same vessel, whether under a single program or different programs, a guideline rate shall be provided based on the combined voyage.

(g) *Total rate.* The guideline rate shall be the total of the operating cost component, the capital cost component, the port and cargo handling cost component, and the broker's commission and overhead component. The fair and reasonable rate can be expressed as total voyage revenue or be divided by the amount of cargo to be carried, as prescribed in paragraph (f) of this section, and expressed as cost per ton, whichever MARAD deems most appropriate.

§ 382.4 Waivers.

In special circumstances and for good cause shown, the procedures prescribed in this part may be waived in keeping with the circumstances of the present, so long as the procedures adopted are consistent with the Act and with the intent of this part.

By order of the Maritime Administrator.

Dated: January 21, 1998.

Joel C. Richard,

Secretary.

BILLING CODE 4910–81–P

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 54

[CC Docket No. 96–45; FCC 97–411]

Universal Service Support Mechanisms

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission authorized the Administrator of the universal service support mechanisms to require payment of quarterly contributions to universal service in equal monthly installments. This action was intended to ease contributor's cash flow problems.

EFFECTIVE DATE: February 26, 1998.

FOR FURTHER INFORMATION CONTACT: Diane Law, (202) 418–7400.

SUPPLEMENTARY INFORMATION:

I. Introduction

In this Third Order on Reconsideration (Order), we reconsider, on our own motion, the Commission's decisions governing the amount of money that may be collected during the first six months of 1998 for the federal universal service support mechanisms for schools and libraries and rural health care providers. We direct the administrator to collect only as much as required by demand, but in no event more than $25 million per quarter for the first and second quarters of 1998 to support the rural health care universal service support mechanism. We direct the administrator to collect only as much as required by demand, but in no event more than $625 million for the first six months of 1998, to support the schools and libraries universal service support mechanism. These actions will reduce the financial burdens on universal service contributors without jeopardizing the sufficiency of the support mechanisms. The Commission may revise the collection caps if we receive evidence of additional demand for services. The rules adopted in this Order will become effective February 26, 1998.

II. Background

1. In the *NECA Report and Order* (62 FR 41294 (Aug. 1, 1997)), the Commission established the administrative structure of the federal universal service support mechanisms. The Commission directed the National Exchange Carrier Association (NECA) to create an independent subsidiary, the Universal Service Administrative Company (USAC), to administer temporarily portions of the support mechanisms. The Commission also directed NECA to create two independent corporations, Schools and Libraries Corporation and Rural Health Care Corporation, to administer portions of the schools and libraries and rural health support mechanisms. USAC, Schools and Libraries Corporation, and Rural Health Care Corporation are required to submit to the Commission quarterly projections of demand and administrative expenses for their respective support mechanisms.

2. The schools and libraries and rural health care support mechanisms are newly created and have no historical data upon which to estimate accurately the demand for services in the initial months of the support mechanisms. The Commission specified that the administrator should collect $100 million per month for the first three months of 1998 for the schools and libraries support mechanism and "adjust future contribution assessments quarterly based on its evaluation of schools and library demand for funds, within the limits of the spending caps. . . ." The Commission further held that, between January 1, 1998 and June 30, 1998, the administrator "will only collect as much as required by demand, but in no case more than $1 billion." For the rural health care support mechanism, the Commission directed the administrator to collect $100 million for the first three months of 1998. In addition, the Commission instituted annual caps on both support mechanisms, $2.25 billion for the schools and libraries support mechanism and $400 million for the rural health care support mechanism. In setting forth a collection schedule, the Commission sought to ensure that "funds will be available as needed while avoiding the potential problems arising from the accumulation of large amounts of funds in a federal universal service fund."

III. Discussion

3. We conclude that we should adjust downward the rate of collections for the schools and libraries and rural health care support mechanisms during the first six months of 1998. We anticipate that this action will not jeopardize the sufficiency of the support mechanisms. The annual caps were designed to estimate the maximum, rather than the actual, amount of demand for the schools and libraries and rural health care universal service support mechanisms. Based on what we have learned about the status of preparatory arrangements being made by schools, libraries, and rural health care providers to obtain the benefit of the universal service support mechanisms, we have no reason to believe that demand will reach the maximum projection levels in the initial implementation stages of these new support mechanisms. We do not want to impose unnecessary financial burdens on service provider contributors to universal service by requiring the administrator to collect funds that exceed demand. We also wish to ensure the successful implementation of the schools and libraries and rural health care support mechanisms. Accordingly, we find that it better serves the public interest to reduce the collection amounts specified in the Order (62 FR 32862 (June 17, 1997)) for the first six months of 1998, as described below.

4. *Rural Health Care.* The rural health care support mechanism supports the difference, if any, between the urban and the rural rates for a telecommunications service of a bandwidth up to and including 1.544 Mbps. The rural health care support mechanism also provides limited support to health care providers that do not have toll-free access to the Internet. In the initial stages of implementing the rural health care support mechanism, we anticipate that demand will not exceed $25 million per quarter during the first six months of 1998. We therefore amend our previous decision, and direct the administrator to collect only as much as required by demand, but in no event more than $25 million per quarter for the first and second quarters of 1998 for the rural health care universal service support mechanism.

5. *Schools and Libraries.* The schools and libraries support mechanism provides discounts to eligible schools and libraries for commercially available telecommunications services, internal connections, and access to the Internet. Because many schools and libraries will not begin the installation of internal connections until the summer when students are not present in instructional buildings, we anticipate that initial demand for the schools and libraries support mechanism will not reach projected maximums. We therefore conclude that demand from schools and libraries in the second quarter of 1998 is unlikely to exceed substantially demand in the first quarter. Accordingly, we direct the administrator to collect only as much as required by demand, but in no event more than $625 million for the first six months of 1998.

IV. Procedural Matters

6. According to the Administrative Procedure Act, substantive rules shall not become effective until 30 days after their publication in the **Federal Register** unless there is good cause to waive that requirement. We find that good cause exists to waive the 30-day requirement because the rules adopted herein are critical to the expeditious and efficient implementation of the new federal universal service support mechanisms. The Commission's regulations implementing section 254 will take effect January 1, 1998. The rules adopted herein are necessary to calculate the first quarter 1998 universal service contribution factors and primarily affect the administrator of the support mechanisms. In order to collect contributions in February 1998, the administrator must know what the contribution factors will be before beginning the billing process in January 1998. The rules, therefore, do not place additional burdens on the administrator. They enable the administrator to carry out its existing responsibilities. In addition, certain carriers must file tariffs in December 1997 that reflect the contribution factors. Moreover, the rules adopted herein reduce the financial burdens imposed on universal service contributors by minimizing the amounts collected in the first six months of 1998. Thus, we find that good cause exists to make the rules adopted herein effective upon their publication in the **Federal Register.**

V. Supplemental Final Regulatory Flexibility Analysis

7. As required by section 603 of the Regulatory Flexibility Act (RFA), 5 U.S.C. 603, an Initial Regulatory Flexibility Analysis (IRFA) was incorporated in the Notice of Proposed Rulemaking and Order Establishing Joint Board (NPRM). In addition, the Commission prepared an IRFA in connection with the Recommended Decision, seeking written public comment on the proposals in the NPRM and Recommended Decision. (See 61 FR 63778, 63796). A Final Regulatory Flexibility Analysis (FRFA) was included in the *Order.* The Commission's Supplemental Final Regulatory Flexibility Analysis (SFRFA) in this Order conforms to the RFA, as amended.

A. Need for and Objectives of This Report and Order and the Rules Adopted Herein

8. The Commission is required by section 254 of the Act, as amended by the 1996 Act, to promulgate rules to implement promptly the universal service provisions of section 254. On May 8, 1997, the Commission adopted rules whose principle goal is to reform our system of universal service support mechanisms so that universal service is preserved and advanced as markets move toward competition. In this Order, we reconsider one aspect of those rules. In order to reduce financial burdens on all contributors to universal service, we reconsider, on our own motion, the amounts that will be collected during the first six months of 1998 for the schools, libraries, and rural health care support mechanisms.

B. Summary and Analysis of the Significant Issues Raised by Public Comments in Response to the IRFA

9. Other than those described in the *Order,* no additional comments were filed in response to the IRFAs described above.

C. Description and Estimates of the Number of Small Entities to Which the Rules Adopted in This Report and Order will Apply

10. Because the rules adopted herein apply to the administrator of the support mechanisms, the rules will not directly affect small entities. It is possible, however, that small entities will indirectly be affected by these rules. In the FRFA at paragraphs 890–922 of the *Order,* we described and estimated the number of small entities that would be affected by the new universal service rules. The rules adopted herein may apply to the same telecommunications carriers and entities affected by the universal service rules. We therefore incorporate by reference paragraphs 890–922 of the Order.

D. Summary Analysis of the Projected Reporting, Recordkeeping, and Other Compliance Requirements and Significant Alternatives and Steps Taken to Minimize the Significant Economic Impact on a Substantial Number of Small Entities Consistent With Stated Objectives

11. In the FRFA to the *Order,* we described the projected reporting, recordkeeping, and other compliance requirements and significant alternatives and steps taken to minimize significant economic impact on a substantial number of small entities consistent with stated objectives associated with the Administration section of the *Order.* Because the rules adopted herein may only marginally affect those requirements, we incorporate by reference paragraphs 980–981 of the *Order,* which describe those requirements and provide the following analysis of the new requirements adopted herein. Under the rules adopted herein, the administrator is instructed to collect during the first six months of 1998 no more than $625 million for the schools and libraries support mechanism and $50 million for the rural health care support mechanism.

VI. Ordering Clauses

12. Accordingly, *It is ordered* that, pursuant to the authority contained in sections 1–4, 201–205, 218–220, 254, 303(r), 403, and 405 of the Communications Act of 1934, as amended, 47 U.S.C. 151–154, 201–205, 218–220, 254, 303(r), 403, and 405, section 1.108 of the Commission's rules, 47 CFR 1.108, and section 553 of the Administrative Procedure Act, 5 U.S.C. 553, part 54 of the Commission's rules, 47 CFR part 54, is amended as set forth

VOL 63 ISS 17 JA 27 1998 UMI

in the rule changes, effective February 26, 1998.

Federal Communications Commission.

Magalie Roman Salas,

Secretary.

Rule Changes

For the reasons set forth in the preamble, part 54 of title 47 of the Code of Federal Regulations is amended as follows:

PART 54—UNIVERSAL SERVICE

1. The authority citation for part 54 continues to read as follows:

Authority: 47 USC Secs. 1, 4(i), 201, 205, 214, and 254 unless otherwise noted.

§ 54.507 Cap.

2. Section 54.507 is amended by revising the second sentence of paragraph (a) to read as follows:

(a) * * * First, no more than $625 million shall be collected or spent for the funding period from January 1, 1998 through June 30, 1998. * * *

* * * * *

§ 54.623 Cap.

3. Section 54.623 is amended by adding a new sentence at the end of paragraph (a) to read as follows:

(a) * * * No more than $50 million shall be collected or spent for the funding period from January 1, 1998 through June 30, 1998.

* * * * *

DATES: Effective March 2, 1998. A filing window for Channel 284A at Calhan, Colorado, will not be opened at this time. Instead, the issue of opening a filing window for this channel will be addressed by the Commission in a separate Order.

FOR FURTHER INFORMATION CONTACT: Nancy Joyner, Mass Media Bureau, (202) 418–2180. Questions related to the application filing process should be addressed to the Audio Services Division, (202) 418–2700.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order involving two consolidated, interrelated proceedings consisting of MM Docket No. 96–232 and MM Docket No. 97–35, adopted December 31, 1997, and released January 16, 1998. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC's Reference Center (Room 239), 1919 M Street, NW., Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, International Transcription Service, Inc., 1231 20th Street, NW., Washington, DC 20036, (202) 857–3800.

The Commission, at the request of Pueblo Broadcasters, Inc., reallots Channel 283C2 from Pueblo to Pueblo West, Colorado, as a Class C1 channel, and modifies the authorization for Station KYZX(FM), to specify operation on Channel 280C1 at Pueblo West, pursuant to the provisions of § 1.420 (g) and (i) of the Commission's Rules (MM Docket No. 96–232; RM–8868; RM–9055). The allotment of Channel 280C1 to Pueblo West will provide that community with its first local aural transmission service without depriving Pueblo of local FM service. Additionally, to accommodate the reallotment and upgrade at Pueblo West, Channel 283A is substituted for Channel 280A at Canon City, Colorado, and the license for Station KSTY(FM) is modified accordingly. The latter substitution will enable Station KSTY(FM) to increase its effective radiated power to six kilowatts and expand its coverage area. Further, in response to the counterproposal request of Pueblo Broadcasters, Inc., Channel 284A is allotted to Calhan, Colorado, rather than Channel 280A as requested by Calhan Radio, Inc., to provide a first local aural transmission service to that community, and to accommodate the allotment of Channel 280C1 to Pueblo West (MM Docket No. 97–35; RM–8900; RM–9056). Coordinates used for Channel 280C1 at Pueblo West are 38–34–52 and 104–31–52; coordinates used for Channel 283A at Canon City are 38–23–35 and 105–21–07; coordinates used for Channel 284A at Calhan are 39–01–42 and 104–15–44.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 97–45; RM–8961]

Radio Broadcasting Services; Tylertown, MS

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: The Commission, at the request of TRL Broadcasting Company, allots Channel 297A at Tylertown, Mississippi, as the community's second local FM service. *See* 62 FR 06929, February 14, 1997. Channel 297A can be allotted to Tylertown in compliance with the Commission's minimum distance separation requirements with a site restriction of 5.3 kilometers (3.3 miles) southeast in order to avoid short-spacing conflicts with the licensed operation of Station WBBU(FM), Channel 297A, Baker, Louisiana, and Station WKXI(FM), Channel 298C1, Magee, Mississippi. The coordinates for Channel 297A at Tylertown are 31–05–27 NL and 90–05–47 WL. With this action, this proceeding is terminated.

EFFECTIVE DATE: March 2, 1998. A filing window for Channel 297A at Tylertown, Mississippi, will not be opened at this time. Instead, the issue of opening a filing window for this channel will be addressed by the Commission in a subsequent order.

FOR FURTHER INFORMATION CONTACT: Pam Blumenthal, Mass Media Bureau, (202) 418–2180.

SUPPLEMENTARY INFORMATION: This is a synopsis of the Commission's Report and Order, MM Docket No. 97–45, adopted January 7, 1998, and released January 16, 1998. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Reference Center (Room 239), 1919 M Street, NW, Washington, DC. The complete text of this decision may also be purchased from the Commission's copy contractor, ITS, Inc., (202) 857–3800, 1231 20th Street, NW, Washington, DC 20036.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 73

[MM Docket No. 90–466; RM–7327, RM–7987, RM–7988, RM–8705]

Radio Broadcasting Services; Hondo, Hollywood Park, Dilley, Bandera, Pleasanton, Karnes City, TX

AGENCY: Federal Communications Commission.

ACTION: Final rule; petition for reconsideration.

VOL 63 ISS 17 JA 27 1998 UMI

SUMMARY: This document denies the petition for reconsideration filed by Reding Broadcasting Company of the Report and Order, 57 FR 56515 (November 30, 1992), in which the Commission dismissed Reding's counterproposal proposal requesting the substitution of 253C2 for Channel 252A at Pleasanton, Texas and the modification of Station KBUC-FM's (formerly KBOP-FM) license accordingly, the substitution of Channel 276A for Channel 252A at Bandera, Texas; the allotment of Channel 276C2 to Karnes City, Texas; and the substitution of Channel 290A for Channel 253A at Hondo, Texas. This document affirms the Report and Order's determination that Reding's counterproposal was unacceptable for filing because under the Commission's Rules and the FM Agreement between the United States and Mexico in effect at the time of filing, Reding's proposals for Channel 276A at Bandera, and Channel 290A at Hondo were short-spaced to Mexican FM allotments. With this action, this proceeding is terminated.

EFFECTIVE DATE: January 27, 1998.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

RIN 1018–AE59

Endangered and Threatened Wildlife and Plants; Emergency Rule To List the San Bernardino Kangaroo Rat as Endangered

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Emergency rule.

SUMMARY: The U.S. Fish and Wildlife Service (Service) exercises its emergency authority to determine the San Bernardino kangaroo rat (*Dipodomys merriami parvus*) to be an endangered species pursuant to the Endangered Species Act of 1973, as amended (Act). This subspecies occurs primarily in alluvial scrub habitats with appropriate vegetative cover and substrate composition. The historic range of the San Bernardino kangaroo rat has been reduced by approximately 96 percent due to agricultural and urban development. All of the remaining populations of the San Bernardino kangaroo rat are threatened by habitat loss, degradation, and fragmentation due to sand and gravel mining operations, flood control projects, urban development, and vandalism. In addition, the three largest remaining populations of the San Bernardino kangaroo rat are threatened by habitat loss resulting from a change in the natural stream flow regime including seasonal flooding and associated modification of plant succession patterns. The threat of vandalism to large portions of the remaining habitat may be imminent. Threats have been made indicating that habitat would be destroyed if the Service attempted to list the San Bernardino kangaroo rat. Because of the need to make protective measures afforded by the Act immediately available to this subspecies and its habitat, the Service finds that an emergency rule action is justified. This emergency rule provides Federal protection pursuant to the Act for this subspecies for a period of 240 days. A proposed rule to list the San Bernardino kangaroo rat, requesting data and comment from the public, is being published concurrently in this same **Federal Register** issue under the proposed rule section.

DATES: This emergency rule is effective on January 27, 1998, and expires on September 24, 1998.

ADDRESSES: The complete file for this rule is available for inspection, by appointment, during normal business hours at the U.S. Fish and Wildlife Service, Carlsbad Field Office, 2730 Loker Avenue West, Carlsbad, California 92008.

FOR FURTHER INFORMATION CONTACT: Field Supervisor, at the above address (telephone 760/431–9440).

SUPPLEMENTARY INFORMATION:

Background

The San Bernardino kangaroo rat (*Dipodomys merriami parvus*) is one of 19 recognized subspecies of Merriam's kangaroo rat (*D. merriami*), a widespread species distributed throughout arid regions of the western United States and northwestern Mexico (Hall 1981, Williams *et al.* 1993). In coastal southern California, *D. merriami* is the only species of kangaroo rat with four toes on each of its hind feet. The San Bernardino kangaroo rat has a body length of about 95 millimeters (mm) (3.7 inches (in)) and a total length of 230 to 235 mm (9 to 9.3 in). The hind foot measures less than 36 mm (1.4 in) in length. The body color is weakly ochraceous (yellow) with a heavy overwash of dusky brown. The tail stripes are medium to dark brown and the foot pads and tail hairs are dark brown. The animal's flanks and cheeks are dusky (Lidicker 1960). The San Bernardino kangaroo rat is considerably darker and much smaller than either of the other two subspecies of Merriam's kangaroo rat in southern California, *D. merriami merriami* and *D. merriami collinus*. Lidicker (1960) noted that the San Bernardino kangaroo rat is one of the most highly differentiated subspecies of *D. merriami* and that "it seems likely that it has achieved nearly species rank." This differentiation is likely due to its apparent isolation from other members of *D. merriami*.

The San Bernardino kangaroo rat, a member of the family Heteromyidae, was first described by Rhoades in 1894 under the name *Dipodomys parvus* from specimens collected by R.B. Herron in Reche Canyon, San Bernardino County, California (Hall 1981). Elliot reduced *D. parvus* to a subspecies of *D. merriami* (*D. merriami parvus*) in 1901. The San Bernardino kangaroo rat appears to be separated from Merriam's kangaroo rat (*D. merriami merriami*) at the northernmost extent of its range near Cajon Pass by a 8 to 13 kilometer (km) (5 to 8 mile (mi)) gap of unsuitable habitat. The San Bernardino kangaroo rat may have in the distant past also intergraded with *D. merriami collinus* to the south in the vicinity of Menifee (Lidicker 1960, Hall 1981).

The historical range of this subspecies extends from the San Bernardino Valley in San Bernardino County to the Menifee Valley in Riverside County (Lidicker 1960, Hall 1981). Within this range, the San Bernardino kangaroo rat was known from over 25 localities (McKernan 1993). From the early 1880's to the early 1930's, the San Bernardino kangaroo rat was a common resident of the San Bernardino and San Jacinto valleys of southern California (Lidicker 1960).

In most heteromyids, soil texture is a primary factor in determining species' distributions (Brown and Harney 1993). San Bernardino kangaroo rats are found primarily on sandy loam substrates, characteristic of alluvial fans and flood plains, where they are able to dig simple, shallow, burrows (McKernan 1997). Based on the distribution of suitable (i.e., sandy) soils and the historical collections of this subspecies, the historical range is thought to have encompassed an area of approximately 128,000 hectares (ha) (320,000 acres (ac)) (Service, unpub. GIS maps, 1997). Although the entire area of the historical range would not have been occupied due to variability in vegetation and soils, the San Bernardino kangaroo rat was widely distributed across this area. By the 1930's, the habitat had been reduced to approximately 11,200 ha (28,000 ac)(McKernan 1997).

Currently, the San Bernardino kangaroo rat occupies approximately 1,299 ha (3,247 ac) of suitable habitat divided unequally among seven locations, which are widely separated from one another (McKernan 1997). Four of these locations (City Creek (8 ha (20 ac)), Etiwanda (2 ha (5 ac)), Reche Canyon (2 ha (5 ac)), and South Bloomington (.8 ha (2 ac)) support only small, remnant, populations. The

VOL 63 ISS 17 JA 27 1998 UMI

remaining three locations (the Santa Ana River (690 ha (1,725 ac)), Lytle and Cajon washes (456 ha (1,140 ac)), and San Jacinto River (140 ha (350 ac)) contain the largest extant concentrations of kangaroo rats and blocks of suitable habitat.

The three largest remaining blocks of occupied habitat (i.e., Santa Ana River, Lytle/Cajon creeks, and San Jacinto River) (1,286 ha (3,215 ac)) are distributed across a mosaic of approximately 5,479 ha (13,697 ac) of typically suitable, alluvial soils, which are dominated by sage scrub and chaparral. Virtually all remaining vegetative associations (except about 1,286 ha (3,215 ac)) are more mature than the open, early successional habitat structure required by the San Bernardino kangaroo rat. Existing and proposed hydrological modifications eliminate habitat renewal and obstruct population recovery over these highly fragmented wash habitats (Hanes *et al.* 1989, McKernan 1997). Thus, the residual 4 percent of historical habitat (5,479 ha (13,697 ac)), supports only about 1,286 ha (3,215 ac), that are ever likely to provide habitat, absent habitat renewal through large-scale flood or intensive management intervention. It is estimated that 400 ha (1,000 ac) are likely to support suitable habitat in the future, considering that 54 percent of remaining flood plain habitats are proposed for development in the foreseeable future.

Currently, the San Bernardino kangaroo rat is found primarily associated with a variety of sage scrub vegetation, where the common element is the presence of sandy soils (McKernan 1997). Where the San Bernardino kangaroo rat occurs in alluvial scrub, the subspecies reaches its highest densities in early and intermediate seral stages (McKernan 1997). Alluvial scrub includes elements from chaparral, coastal sage, and desert communities. Three successional phases of alluvial scrub have been described: pioneer, intermediate, and mature alluvial scrub, depending on elevation and distance from the main channels, and the time since previous flooding (Smith 1980, Hanes *et al.* 1989). Vegetative cover generally increases with distance from the active stream channel. The pioneer, or youngest phase, is subject to frequent disturbance, and vegetation is usually disturbed by annual floods (Smith 1980, Hanes *et al.* 1989). The intermediate phase, defined as the area between the active channel and mature terraces, is subject to periodic flooding at longer intervals. The vegetation on intermediate terraces is relatively open, and supports the highest densities of the San Bernardino kangaroo rat. The mature phase is rarely affected by flooding and supports the highest plant cover (Smith 1980). These flood events break out of the main river channel randomly, resulting in a braided appearance to the floodplain. This dynamic nature to the habitat leads to a situation where not all the alluvial scrub habitat is suitable for the kangaroo rat at any point in time. The San Bernardino kangaroo rat, like other subspecies of Merriam's kangaroo rat, prefers open habitats characterized by low shrub canopy cover (mostly 7 to 22 percent) and rarely occurs in dense vegetation (McKernan 1997). The older seral stages of the floodplain often are not suitable for this subspecies.

The range of the San Bernardino kangaroo rat is partially overlapped by the distribution of the Stephens' kangaroo rat (*Dipodomys stephensi*) and is entirely overlapped by the range of the Pacific kangaroo rat (*D. simulans*). Where these species occur in proximity, they are usually concentrated in different areas. The Stephens' kangaroo rat typically is associated with open, arid, grassland associations (Lackey 1967, O'Farrell *et al.* 1986, O'Farrell and Uptain 1987, O'Farrell 1990), and occurs on a variety of soil types. The Pacific kangaroo rat typically inhabits denser shrub cover on a variety of soil types. All three of these species can be identified from one another based on morphological characters.

Home ranges for the Merriam's kangaroo rat average 0.33 hectares (ha) (0.8 ac) for males and 0.31 ha (0.8 ac) for females (Behrends *et al.* 1986). Long sallies (bursting movements) of 100 meters (m) (328 feet (ft)) or more beyond these ranges are not uncommon. Although outlying areas of their home ranges may overlap, adults actively defend small core areas near their burrows (Jones 1993). Home range overlap between males and between males and females is extensive, but female-female overlap is slight (Jones 1993).

McKernan (1993) has found pregnant San Bernardino kangaroo rat females from February through October, and immatures from April through September. Some females may produce more than one litter per year. Litter size averages between 2 and 3 young (Eisenberg 1993).

Similar to other kangaroo rats, the San Bernardino kangaroo rat is primarily granivorous and often stores large quantities of seeds in surface caches (Reichman and Price 1993). Green vegetation and insects are also important seasonal food sources. Insects, when available, have been documented to constitute as much as 50 percent of a kangaroo rat's diet (Reichman and Price 1993). Females are known to increase ingestion of foods with higher water content during lactation, presumably to compensate for the increased water loss associated with milk production (Reichman and Price 1993). *Dipodomys merriami* is known for its ability to live indefinitely without water on a diet consisting entirely of dry seeds (Reichman and Price 1993).

Previous Federal Action

The San Bernardino kangaroo rat was designated by the Service as a category 2 candidate species for Federal listing as endangered or threatened in 1991 (56 FR 58804). Category 2 comprised taxa for which information in the possession of the Service indicated that proposing to list as endangered or threatened was possibly appropriate, but for which conclusive data on biological vulnerability and threat(s) were not available to support a proposed rule. Based on a review of status and distribution of the San Bernardino kangaroo rat, the subspecies was upgraded to a category 1 candidate for listing in 1994 (59 FR 58982). Category 1 candidate species were those where the Service had sufficient information on biological vulnerability and threat(s) to support proposals to list them as endangered or threatened species. Upon publication of the February 28, 1996, notice of review (61 FR 7596), the Service ceased using category designations and included the San Bernardino kangaroo rat as a candidate species. The San Bernardino kangaroo rat was retained as a candidate species in the September 19, 1997, notice of review (62 FR 49401).

The processing of this proposed rule conforms with the Service's final listing priority guidance published in the **Federal Register** on December 5, 1996 (61 FR 64475) and extended on October 23, 1997 (62 FR 55268). The guidance clarifies the order in which the Service will process rulemakings. The guidance calls for giving highest priority to handling emergency situations (Tier 1), second highest priority (Tier 2) to resolving the listing status of the outstanding proposed listings, third priority (Tier 3) to new proposals to add species to the list of threatened and endangered plants and animals and fourth priority (Tier 4) to designating critical habitat and processing delistings and reclassifications. This emergency rule constitutes a Tier 1 action.

Summary of Factors Affecting the Species

Section 4 of the Act and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1) of the Act. These factors and their application to the San Bernardino kangaroo rat *(Dipodomys merriami parvus)* are as follows:

A. The Present or Threatened Destruction, Modification, or Curtailment of Its Habitat or Range

All occupied habitat of the subspecies, which encompasses approximately 1,300 ha (3,250 ac), is threatened by the direct and indirect effects of sand and gravel mining, highway construction, flood control operations, urban and industrial development, water conservation activities, and vandalism (McKernan 1997, Service unpub. GIS maps 1997).

Loss and fragmentation of San Bernardino kangaroo rat habitat is expected to continue as southern California's human population expands. In the 1950's, the population of Riverside and San Bernardino counties combined was about 400,000. Over 2.5 million people reside in this region, and by the year 2000, the human population of San Bernardino and Riverside counties is expected to increase to nearly 4 million (California Department of Finance 1993). Further habitat losses resulting from development or alteration of the landscape will likely have a significant adverse effect on the viability of remaining San Bernardino kangaroo rat populations. Additionally, habitat loss from intentional destruction of San Bernardino kangaroo rat habitat has been threatened if the species were to be listed.

Santa Ana River

The largest remaining population of the San Bernardino kangaroo rat occurs along the Santa Ana River. The flood plain terrace habitat encompasses about 1,637 ha (4,092 ac), of which approximately 690 ha (1,725 ac) are occupied by the San Bernardino kangaroo rat (McKernan 1997). The occupied habitat extends more or less continuously from the vicinity of Norton Air Force Base to the Greenspot Road Bridge north of Mentone (Service unpub. GIS maps 1997, McKernan 1997). Approximately 66 percent of flood plain terrace habitat is directly at risk due to the combined activities of the Army Corps of Engineers, United States Bureau of Land Management (BLM), San Bernardino Valley Water Conservation District, San Bernardino County Flood Control District, and two private sand mining operations (Service unpub. GIS maps 1997).

At least 80 percent of the remaining occupied habitat along the Santa Ana River is indirectly at risk because of the projected changes in hydrology due to Seven Oaks Dam (Service unpub. GIS maps 1997) being constructed by the Army Corps of Engineers (U.S. Army Corps of Engineers 1988). An indirect effect of operation of the Seven Oaks Dam will be the long-term succession of various stages of alluvial scrub, including much of a 775-acre mitigation area, into even aged stands of habitat scrub through time due to a reduction in scouring and deposition of fresh sands by floods. Curtailed hydrologic disturbance, where soil moisture is adequate, will allow shrub densities that exceed the low to moderate densities tolerated by the subspecies to develop (Hanes *et al.* 1989, McKernan 1997).

Past and ongoing activities of the San Bernardino County Flood Control District pose a threat to approximately 400 ha (1,000 ac) of alluvial scrub habitat in this area. Based on the distribution of soils and vegetative cover, approximately 176 ha (440 ac) of this area is occupied by the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). Activities that impact this subspecies and its habitat include the construction of levees and sediment removal. The area at risk due to these activities supports approximately 25 percent of the population along the Santa Ana River (Service unpub. GIS maps 1997, McKernan 1997).

The BLM and San Bernardino Valley Water Conservation District lands are managed, in part, for the development or operation of water spreading basins for groundwater recharge. Although the San Bernardino kangaroo rat can occupy portions of areas modified by spreading basins, the flooded area is essentially lost to this animal due to the periodic presence of standing water and the degradation of habitat. Based on the distribution of soils and vegetative cover, approximately 140 ha (350 ac) of this area is occupied by the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). The area affected by spreading basins represents approximately 20 percent of the population along the Santa Ana River (Service unpub. GIS maps 1997, McKernan 1997). The San Bernardino Valley Water Conservation District and BLM are coordinating with the Service and others to develop a regional conservation plan that attempts to reconcile conflicts among competing land uses, including the conservation of the San Bernardino kangaroo rat. However, this conservation plan has not been finalized and is not currently in effect. Though 371 ha (927 ac) of BLM land potentially are available for water percolation ponds, no ponds have been constructed recently.

Sand and gravel mining poses a significant and imminent threat to the San Bernardino kangaroo rat. Two sand mining operations collectively threaten approximately 552 ha (1,381 ac) of alluvial scrub habitat in this area (Lilburn 1997a and 1997b, P&D Technologies 1988, Service unpub. GIS maps 1997). Based on the distribution of soils and vegetative cover, a minimum of 150 ha (375 ac) of approved and proposed project areas is occupied by the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). The area affected by sand mining represents approximately 22 percent of the population along the Santa Ana River (Service unpub. GIS maps 1997, McKernan 1997).

One proposed sand and gravel mining expansion is expected to receive certification under the California Environmental Quality Act (CEQA) in the next 2–4 months. A grading permit would be issued shortly thereafter. This project would further fragment habitat. In addition, this operator has repeatedly and publicly threatened to destroy habitat if the Service proposes to list the kangaroo rat.

Additional impacts will occur due to a large pipeline project (P&D Technologies 1992). Approximately 60 ha (150 ac) of alluvial scrub in the Santa Ana River will be impacted by this project. Based on the distribution of soils and vegetative cover, a minimum of 24 ha (60 ac) of this project area is occupied by the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). This project has been reviewed and certified under the CEQA and, therefore, poses an imminent threat. The area directly threatened by this pipeline project represents 3 percent of the Santa Ana River population. The indirect effects of this project include further fragmentation of kangaroo rat habitat.

Other activities that threaten the San Bernardino kangaroo rat in this region include the closure of Norton Air Force Base (San Bernardino County) and the proposed development of this site into the San Bernardino International Airport (U.S. Department of the Air Force 1993). Habitat for the San Bernardino kangaroo rat on Norton Air Force Base will be reduced by

VOL 63 ISS 17 JA 27 1998 UMI

approximately 2 to 5 percent (Conservation Management Plan 1997).

Lytle and Cajon Creeks

The second largest remaining population of the San Bernardino kangaroo rat occurs along Lytle and Cajon creeks, from near Interstate 15 downstream on both drainages for approximately 8 km (5 mi) (McKernan 1997). This area contains approximately 2,688 ha (6,722 ac) of alluvial scrub habitat, of which approximately 456 ha (1,140 ac) are occupied. Of the alluvial scrub habitat, approximately 47 percent is directly threatened by the combined activities associated with sand mining operations, State Route 30, San Bernardino County Flood Control District, and urban development (e.g., The Villages at Lytle Creek) (Service unpub. GIS maps 1997). Based on an evaluation of soils and vegetative cover, a minimum of 34 percent of the occupied habitat in this area is threatened due to the combined effects of these activities (Service unpub. GIS maps 1997).

The joint draft environmental impact report for The Villages at Lytle Creek and a sand mining operation (T&B Planning Consultants 1996) describe some of the threats facing the San Bernardino kangaroo rat in this area. The proposed urban community, The Villages at Lytle Creek, will remove approximately 728 ha (1,821 ac) of alluvial scrub habitat (Michael Brandman Associates 1994, T&B Planning Consultants 1996). Based on the distribution of soils and vegetative cover, at least 132 ha (330 ac) of this project area is occupied by the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). In addition to the upland development, the document discloses the proposed channelization of a portion of Lytle Creek. The area affected by The Villages at Lytle Creek represents approximately 29 percent of the remaining occupied habitat of the Lytle/Cajon population.

Proposed improvements to State Route 30 also threaten the San Bernardino kangaroo rat in the Lytle and Cajon Creek area. Approximately 2.8 ha (7 ac) of habitat will be directly removed due to this project (San Bernardino Association of Governments 1996). Based on the distribution of soils and vegetative cover, all of the project area in this area (i.e., 2.8 ha (7 ac)) is occupied by the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). The area affected by State Route 30 represents approximately 0.1 percent of the occupied habitat in this area.

San Bernardino County Flood Control District (District) constructed a levee and parking lot for Glen Helen Regional Park. The construction of the levee continues to impact approximately 22 ha (55 ac) of habitat by precluding scouring events and the reestablishment of alluvial scrub vegetation. Given the attributes of the area, the entire site was likely occupied by the San Bernardino kangaroo rat prior to construction of the levee. The levee also threatens habitat occupied by the San Bernardino kangaroo rat on the opposite side of the Cajon Creek due to the alteration in the hydrological system. The levee likely will divert flood flows into the opposite bank and cause erosion of the Calmat conservation bank, which was established to help conserve listed and sensitive species in the area. The total amount of occupied habitat anticipated to be lost is, at a minimum, approximately 44 ha (110 ac) (Service unpub. GIS maps 1997). The area affected by flood control activities equates to approximately 10 percent of the occupied habitat in this area.

San Jacinto River

The third largest remaining population of San Bernardino kangaroo rat occurs in Riverside County. Here, the vast majority of alluvial floodplain has been impacted by flood control activities, agricultural and urban development, and sand and gravel mining in this area. Approximately 295 ha (737 ac) of alluvial scrub remains in this area and approximately 140 ha (350 ac) is occupied along the San Jacinto River.

Flood control activities that impact this species include grading of occupied habitat. Evidence of extensive grading exists throughout the remaining alluvial scrub vegetation within the flood control berms along the San Jacinto River in the vicinity of the City of San Jacinto (Arthur Davenport, Service, pers. obs. 1995). Flood control structures that impact this species include concrete channels and flood confining berms. The construction of a concrete channel appears to have isolated a small population of San Bernardino kangaroo rat located along Bautista Creek from the rest of the population along the San Jacinto River. The construction of berms too far into the flood plain is detrimental to the San Bernardino kangaroo rat in that the construction of the berms causes a loss of habitat by increasing the severity of scouring and land erosion.

Continuing, intermittent, agricultural activities, such as dry-land farming along the edges of the San Jacinto River in the vicinity of Hemet and the City of San Jacinto, also impact the San Bernardino kangaroo rat. Patches of suitable and occupied habitat occurring outside the flood control berms are occasionally disced due to agricultural activities (Arthur Davenport, pers. obs. 1995). Discing adversely affects the subspecies by destroying its burrows and habitat.

Urban and commercial development into the flood plain of the San Jacinto River continues to threaten the San Bernardino kangaroo rat. Although flood control berms have been in place for years, suitable and occupied habitat occurs outside the berms. Though degraded due to agricultural activities, occupied habitat outside the berms is critical to the maintenance of the species along the San Jacinto River because it provides a source population for recolonization of habitat within the berms following flood events.

The San Bernardino kangaroo rat is also impacted by the maintenance and expansion of spreading basins within its habitat. Maintenance of spreading basins results in the destruction of habitat and San Bernardino kangaroo rats that occur along the margins (Arthur Davenport, pers. obs. 1995). Similarly, the expansion of spreading basins results in a direct loss of suitable and occupied habitat. Eastern Municipal Water District has proposed "reconstructing" previously authorized groundwater recharge facilities in the San Jacinto River (U.S. Army Corps of Engineers 1997), including a new location for the recharge area. This project encompasses approximately 2.6 ha (6.5 ac) of alluvial scrub, and impacts approximately 2 percent of occupied habitat in the area (140 ha (350 ac)).

Both sand and gravel mining threaten the San Bernardino kangaroo rat in the San Jacinto River area. The operations of sand mining continue to impact occupied habitat. One mine site consists of 100 ha (250 ac) and occurs entirely in the flood plain of the San Jacinto River (Army Corps of Engineers 1996, Pre-discharge Notification 96–00397–RRS). Based on the distribution of soils and vegetative cover, a minimum of 40 ha (100 ac) of the project site is occupied by the San Bernardino kangaroo rat. Sand mining affects approximately 28 percent of the occupied habitat in the San Jacinto River area.

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes.

This factor is not known to be applicable.

C. Disease or Predation.

Disease is not known to be affecting the San Bernardino kangaroo rat at this time. However, fragmentation of habitat is likely to promote higher levels of predation by urban-associated animals (e.g., domestic cats) as the interface between natural habitat and urban areas is increased (Churcher and Lawton 1987). Domestic cats are known to be predators of native rodents (Hubbs 1951, George 1974), and predation by cats has been documented for the San Bernardino kangaroo rat (McKernan, pers. comm., 1994).

D. The Inadequacy of Existing Regulatory Mechanisms

The decline of the San Bernardino kangaroo rat is partially due to the inherent weakness of the existing laws and regulations that could serve to protect the animal and its habitat. Existing regulatory mechanisms that may provide some protection for the San Bernardino kangaroo rat include: (1) The CEQA and National Environmental Policy Act (NEPA); (2) the California Natural Community Conservation Planning Program; (3) the Surface Mining and Reclamation Act (SMCRA); (4) the Act in those cases where the San Bernardino kangaroo rat occurs in habitat occupied by other listed species; (5) the California Endangered Species Act (CESA); (6) conservation provisions under the Federal Clean Water Act; (7) land acquisition and management by Federal, State, or local agencies or by private groups and organizations; and (8) local laws and regulations. Many of these have limited protection authority since the San Bernardino kangaroo rat is not federally listed.

The majority of the known populations of the San Bernardino kangaroo rat occur on privately owned land. Local lead agencies responsible under CEQA and NEPA have made determinations that have, or would, adversely affect this taxon and its habitat. Examples of projects that have been completed or are currently undergoing the review process under CEQA and/or NEPA and will impact this species include Seven Oaks Dam, State Route 30 Improvement Project, Metropolitan Water District Inland Feeder Pipeline, Calmat Company, Sunwest Materials, Robertson's Ready Mix, San Jacinto Aggregates, and The Villages at Lytle Creek. Past, present, and proposed mitigation for impacts to this species and its habitat have been inadequate to stop or reverse its decline. CEQA decisions are also subject to over-riding social and economic considerations.

In 1991, the State of California established a Natural Community Conservation Planning Program (NCCP) to address conservation needs throughout the State. The initial focus of the program is the coastal sage scrub community. Within this program, the California Department of Fish and Game (CDFG) included the long-term conservation of alluvial scrub, which is in part occupied by the San Bernardino kangaroo rat. However, participation in NCCP is voluntary. San Bernardino and Riverside counties have signed planning agreements (Memoranda of Understanding (MOUs)) to develop multispecies plans that meet NCCP criteria, but have not enrolled in the NCCP program during the interim. The MOUs do not provide protection to candidate species during the planning process.

Reclamation of mined areas in the State of California is required under the Surface Mining and Reclamation Act (SMCRA). The County of San Bernardino also requires that mining companies submit a reclamation plan for County approval. The primary purpose of these ordinances is to provide for erosion control measures and to restore slopes to a moderate slope. However, reclamation is not likely to resolve the problem of maintaining or mitigating for the loss of species or ecosystem functions in a biologically meaningful way because of change in topography and altered hydrology. The feasibility of artificially creating a viable alluvial scrub plant community suitable for the San Bernardino kangaroo rat has not yet been demonstrated.

The BLM designated an Area of Critical Environmental Concern (ACEC) in the Santa Ana River in 1994. The ACEC is composed of three parcels of land that total 304 hectares (760 acres). The purpose of the ACEC is to protect and enhance the habitat of federally listed plant species occurring in the area, such as Santa Ana River wooly-star (*Eriastrum densifolium* ssp. *sanctorum*), and sensitive species such as the San Bernardino kangaroo rat, while providing for the administration of existing valid rights (BLM 1996). Although the establishment of the ACEC is important in regard to conservation of sensitive habitats and species in this area, the administration of valid existing rights conflicts with BLM's conservation abilities in this area. Existing rights include a withdrawal of Federal lands in this area for water conservation through an act of Congress, February 20, 1909 (Public, No. 248). The entire ACEC is included in this withdrawn land and may be available for water conservation measures such as the construction of percolation basins, subject to compliance with the Act.

The San Bernardino kangaroo rat is not protected under the CESA. The Federal and State Acts together can afford some measure of protection to the San Bernardino kangaroo rat in those areas where the species coexists with other species already listed as threatened or endangered. *Eriastrum densifolium* ssp. *sanctorum* (Santa Ana River woolly star) and *Dodecahema leptoceras* (slender-horned spineflower) are listed as endangered under the Act and the CESA, and the coastal California gnatcatcher (*Polioptila californica californica*) is listed as threatened under the Act. All three species can occur in habitats similar to those preferred by the San Bernardino kangaroo rat. However, the distribution of *D. leptoceras* and *E. densifolium* ssp. *sanctorum* is spotty and discontinuous, and only overlaps with a small portion of the habitat occupied by the San Bernardino kangaroo rat. The coastal California gnatcatcher, although known to occur within alluvial scrub habitat, has largely been extirpated from San Bernardino County within the range of the San Bernardino kangaroo rat and, therefore, occurrence with the listed species provides little ancillary protection. In Riverside County, coastal California gnatcatchers are not currently known to occur at any sites occupied by the San Bernardino kangaroo rat.

The San Bernardino kangaroo rat could potentially be affected by projects requiring a permit from the Army Corps of Engineers (Corps) under section 404 of the Clean Water Act. Although the objective of the Clean Water Act is to "restore and maintain the chemical, physical, and biological integrity of the Nation's waters" (Pub. L. 92–500), no specific provisions exist that adequately address the need to conserve candidate species. A majority of the remaining populations occur outside areas delineated as waters of the United States and, therefore, are not regulated. Moreover, numerous activities for which the Corps potentially has jurisdiction, including sand and gravel mining and flood control projects, have proceeded without their overview (see Factor A).

As a result of Fish and Wildlife Coordination Act activities, the Corps, in 1988, initiated a section 7 consultation on *Eriastrum densifolium* ssp. *sanctorum* for the proposed Seven Oaks Dam project on the Santa Ana River. About 310 ha (775 ac) of alluvial scrub habitat has been designated for preservation as mitigation for impacts to *Eriastrum densifolium* ssp. *sanctorum* resulting from the construction of the dam. Approximately 80 ha (200 ac) of this appears to be currently suitable for

VOL 63 ISS 17 JA 27 1998 UMI

the San Bernardino kangaroo rat (Service unpub. GIS maps 1997). However, the preserved area represents less than 7 percent of the alluvial scrub found in the entire Santa Ana River basin and approximately 12 percent of the basin habitat occupied by the San Bernardino kangaroo rat. Thus, the mitigation preserve, while providing some benefit, is likely not adequate to conserve the subspecies.

Local and county zoning designations are subject to change and do not specifically address the conservation and management needs of the San Bernardino kangaroo rat. However, numerous jurisdictions in western Riverside and San Bernardino counties are beginning a multi-species habitat conservation planning process, including coastal sage scrub-associated species and benefit to the kangaroo rat may result. Commitments for funding and implementation of the strategy and appropriate changes in land-use regulations to protect potential preserves during the planning process have not been made.

The Riverside County Habitat Conservation Agency is implementing an approved habitat conservation plan for the federally endangered Stephens' kangaroo rat that involves the establishment of permanent preserves in western Riverside County (Riverside County Habitat Conservation Agency 1996). Because the San Bernardino kangaroo rat occupies a largely different habitat type than that of the Stephens' kangaroo rat, the conservation plan for the Stephens' kangaroo rat will not benefit the San Bernardino kangaroo rat. Despite extensive surveys, no current records of San Bernardino kangaroo rats occur within any of the reserves established for Stephens' kangaroo rat (A. Davenport, pers. comm. 1997).

E. Other Natural or Manmade Factors Affecting Its Continued Existence.

Habitat for the San Bernardino kangaroo rat has been severely reduced and fragmented by development and related activities in the San Bernardino and San Jacinto Valleys. Habitat fragmentation results in loss of habitat, reduced habitat patch size, and an increasing distance between patches of habitat. As discussed by Andren (1994) regarding highly fragmented landscapes, reduced habitat patch size and isolation will exacerbate the effect of habitat loss on a species' persistence. That is, the loss of species, or decline in population size, will be greater than expected from habitat loss alone. The loss of native vertebrates, including rodents, due to habitat fragmentation is well documented (Soulé *et al.* 1992, Andren 1994, Bolger *et al.* 1997).

Isolated populations are subject to extirpation by manmade or natural events, such as floods and drought. Furthermore, small populations may experience a loss of genetic variability and experience inbreeding depression (Lacy 1997). Contributing to the fragmentation of San Bernardino kangaroo rat habitat are railroad tracks, roads, and flood control channels. These structures appear to function as movement barriers to the San Bernardino kangaroo rat, preventing movement between areas of suitable habitat.

All remaining population segments are at risk due to their small size and isolation. This is especially true for the four smallest populations (i.e., City Creek, Reche Canyon, Etiwanda, and South Bloomington). Urbanization exists throughout most of the San Bernardino kangaroo rat's range and the remaining larger blocks of occupied habitat (i.e., Santa Ana River, Lytle/Cajon, and San Jacinto River) now function independently of each other. This isolation of occupied patches places the entire population of San Bernardino kangaroo rat at risk because recolonization of suitable habitat following local extirpation has been precluded. The extirpation of populations from local catastrophes, such as flooding, is becoming more probable as urban development further constricts the remaining populations to the active portion of the flood plain. The largest remaining populations are now restricted entirely to flood plain habitats and vulnerable to extirpation by naturally occurring events.

Flood control structures alter both the magnitude and distribution of flooding. In the absence of flood scouring, sediments and organic matter accumulate over time, contributing to senescence of the alluvial scrub community and its conversion to coastal sage scrub or chaparral (Smith 1980, Wheeler 1991, Jigour and McKernan 1992). The dense canopy of these communities does not provide the open environment required by San Bernardino kangaroo rat, thereby reducing the habitat suitability for the species (Beatley 1976, McKernan 1997). Within the active channels, the confined flood events scour too frequently to maintain suitable San Bernardino kangaroo rat habitat.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by this subspecies in developing this rule. Based on this evaluation, the Service finds that the emergency action is to list the San Bernardino kangaroo rat as endangered. This taxon is endangered by one or more of the following factors: Habitat destruction, degradation, and fragmentation resulting from sand and gravel mining, flood control projects, urban development, vandalism, and inadequate regulatory mechanisms. Because of these factors, the San Bernardino kangaroo rat is in imminent danger of extinction throughout all or a significant portion of its range. Threatened status does not appear appropriate considering the extent of decline of the populations of this taxon and the vulnerability of those populations remaining.

Reasons for Emergency Determination

Under section 4(b)(7) of the Act and 50 CFR 424.20, the Secretary may determine a species to be endangered or threatened by an emergency rule that shall cease 240 days following publication in the **Federal Register**. The reasons why this rule is necessary are discussed below. If at any time after this rule has been published the Secretary determines that substantial evidence does not exist to warrant such a rule, it shall be withdrawn.

As discussed under Factor A, of the seven remaining populations, only three are of relatively large (viable) size. Much of the remaining habitat for the San Bernardino kangaroo rat is potentially threatened by vandalism as well as construction of approved projects. Threats of vandalism to San Bernardino kangaroo rat habitat have been made. Intentional herbicide application and grading were mentioned as possible ways to eliminate suitable habitat. Along the Santa Ana River, at least 80 percent of the remaining occupied habitat is indirectly at risk because of the projected changes in hydrology due to Seven Oaks Dam. Approximately 25 percent of the population along the Santa Ana River is further threatened by levee construction and maintenance and sediment removal activities of the San Bernardino County Flood Control District. About 20 percent of the habitat is managed, in part, for operation of water spreading basins. Finally, two proposed sand mining operations collectively threaten approximately 22 percent of the population along the Santa Ana River. These proposed sand and gravel mining expansions are expected to receive certification under the CEQA in 2–4 months. A grading permit would be issued shortly thereafter. The projects and sand and gravel mining operations also have the effect of fragmenting the habitat, further reducing the security of this species.

Along Lytle Creek and Cajon Wash, a minimum of 34 percent of the occupied habitat in this area is threatened due to the combined effects of sand and gravel mining, flood control activities, and the proposed development of The Villages at Lytle Creek. At least 28 percent of the occupied habitat in the San Jacinto River area is threatened by urban development, flood control activities, agricultural activities or sand and gravel mining.

Attempts to work with stakeholders have met with little success. When advised of the sensitivity of alluvial scrub habitats in the San Bernardino region in 1992, one local official threatened to destroy existing habitat areas by aerial herbicide application (Edna Rey, Service, pers. comm., 1997). Finally, the Service has been informed that an area of approximately 1,440 ha (3,560 ac) (approximately 26 percent) of the total remaining alluvial scrub habitat may be at risk of vandalism. Statements have been made advising the Service repeatedly that an attempt to list the San Bernardino kangaroo rat would elicit preemptive grading to protect corporate assets (Pete Sorensen, Service, pers. comm. 1996).

An emergency posing a significant risk to the well-being and continued survival of the San Bernardino kangaroo rat exists as the result of the immediate threat of destruction of a significant portion of the subspecies' remaining habitat by sand and gravel mining activities. For these reasons, the Service finds that the San Bernardino kangaroo rat is in imminent danger of extinction throughout all or a significant portion of its range and warrants immediate protection under the Act.

Critical Habitat

Critical habitat is defined in section 3(5)(A) of the Act as: (i) the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (I) essential to the conservation of the species and (II) that may require special management consideration or protection and; (ii) specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. "Conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act, as amended, and implementing regulations (50 CFR 424.12) require that, to the maximum extent prudent and determinable, the Secretary designate critical habitat at the time a species is designated to be endangered or threatened. The Service finds that designation of critical habitat is not prudent for the San Bernardino kangaroo rat. The Service's regulations (50 CFR 424.12(a)(1)) state that designation of critical habitat is not prudent when one or both of the following situations exist: (1) the species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species, or (2) such designation of critical habitat would not be beneficial to the species.

Critical habitat designation for the San Bernardino kangaroo rat is not prudent because an increase in the degree of threat to the species is expected. This subspecies is found in fragmented habitat composed of various sage scrub shrub vegetation in the presence of sandy soils. The designation of critical habitat, including the required publication of maps providing precise locations, would bring unnecessary attention to those areas of the range that are occupied by this kangaroo rat and encourage acts of vandalism or intentional destruction of habitat. This attention would likely lead to an increase in activities (such as discing or blading) by landowners who do not want listed species on their property (see Factor A, above). Therefore, given the limited/habitat specific distribution of the San Bernardino kangaroo rat, and the possibility that a significant portion of the species' remaining habitat could be rapidly vandalized and destroyed, the Service concludes that it is not prudent to designate critical habitat for that reason alone.

The designation of critical habitat is also not prudent due to an expected lack of benefit to the species. Although a majority of San Bernardino kangaroo rat habitat occurs on privately owned lands, many activities that pose threats to the continued existence of this subspecies are funded, permitted, or carried out by Federal agencies (e.g., section 404 of the Clean Water Act, flood control, impoundment, and other stream and wetland modification projects). Section 7 of the Act requires that Federal agencies refrain from contributing to the destruction or adverse modification of critical habitat in any action authorized, funded or carried out by such agency. This requirement is in addition to the section 7 prohibition against jeopardizing the continued existence of a listed species, and it is the only mandatory legal consequence of a critical habitat designation. Any action that would adversely modify San Bernardino kangaroo rat critical habitat would likely jeopardize the continued existence of the subspecies because the biological threshold for either determination would be the same. Thus, if the San Bernardino kangaroo rat is listed, activities occurring on all lands under Federal jurisdiction or ownership that may adversely affect the San Bernardino kangaroo rat would prompt the requirement for consultation pursuant to section 7(a)(2) of the Act and the implementing regulations pertaining thereto, regardless of whether critical habitat has been designated. Furthermore, the designation of critical habitat would have no regulatory effect on activities that are not subject to a Federal nexus.

The Service acknowledges that critical habitat designation, in some situations, may provide some value to the species by identifying areas important for species conservation and calling attention to those areas in special need of protection. Critical habitat designation of unoccupied habitat may also benefit this subspecies by alerting Federal action agencies to potential sites for reintroduction and allow them to evaluate proposals that may affect these areas. However, in this the case, any benefit provided by designation of critical habitat for the San Bernardino kangaroo rat would be accomplished more effectively through the recovery process and the jeopardy prohibition of section 7. Designating critical habitat for this kangaroo rat would not address vegetation seral stage management or control urban development, all of which need to be addressed in the recovery of this subspecies.

Accordingly, the Service concludes that designation of critical habitat would not be beneficial to the species and could increase the degree of threat from taking. Therefore, designation of critical habitat for the San Bernardino kangaroo rat is not prudent at this time.

The Service will continue in its efforts to obtain more information on the San Bernardino kangaroo rat biology and ecology, including essential habitat characteristics particularly in regard to stream flow regimes, current and historical distribution, and existing and potential sites that can contribute to conservation of the species. The information resulting from this effort will be used to identify measures needed to achieve conservation of the species, as defined under the Act. Such measures could include, but are not

VOL
63
ISS
17
JA
27
1998
UMI

limited to, development of conservation agreements with the State, other Federal agencies, local governments, private landowners and organizations.

Available Conservation Measures

Conservation measures provided to species listed as endangered or threatened under the Endangered Species Act include recognition, recovery actions, requirements for Federal protection, and prohibitions against certain activities. Recognition through listing encourages and results in conservation actions by Federal, State, and private agencies, groups, and individuals. The Act provides for possible land acquisition and cooperation with the States and requires that recovery actions be carried out for all listed species. The protection required of Federal agencies and the prohibitions against certain activities involving listed plants and animals are discussed, in part, below.

Section 7(a) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species that is proposed or listed as endangered or threatened and with respect to its critical habitat, if any is being designated. Regulations implementing this interagency cooperation provision of the Act are codified at 50 CFR Part 402. Section 7(a)(4) of the Act requires Federal agencies to confer informally with the Service on any action that is likely to jeopardize the continued existence of a proposed species or result in destruction or adverse modification of proposed critical habitat. If a species is subsequently listed, section 7(a)(2) requires Federal agencies to ensure that activities they authorize, fund, or carry out are not likely to jeopardize the continued existence of such a species or to destroy or adversely modify its critical habitat. If a Federal action may affect a listed species or its critical habitat, the responsible Federal agency must enter into formal consultation with the Service.

Federal agencies expected to have involvement with the San Bernardino kangaroo rat or its habitat include the Corps and the Environmental Protection Agency due to their permit authority under section 404 of the Clean Water Act. The Federal Aviation Administration has jurisdiction over areas with potentially suitable San Bernardino kangaroo rat habitat in the vicinity of Redlands Municipal Airport and Norton Air Force Base in San Bernardino County. The Federal Highway Administration will likely be involved through potential funding of highway construction projects near Devore, Rancho Cucamonga, Rialto, and San Bernardino (San Bernardino County). Because the San Bernardino kangaroo rat occurs on Norton Air Force Base (San Bernardino County), the base will likely be involved through the transfer of Federal lands to a non-Federal entity and the conversion of this area to a civilian airport. The BLM has jurisdiction over a portion of the habitat occupied by the San Bernardino kangaroo rat along the Santa Ana River. The Forest Service will likely be involved because populations of the San Bernardino kangaroo rat occur within or near the boundaries of the Cleveland National Forest and San Bernardino National Forest. The Bureau of Reclamation may be involved through the potential funding of water reclamation and flood control projects. The Bureau of Indian Affairs may be involved with this taxon at Soboba Indian Reservation (Riverside County). The Federal Housing Administration could potentially be involved through loans for housing projects in the region. The Federal Energy Regulatory Commission could be involved in projects affecting existing or proposed transmission lines in the Santa Ana River or Etiwanda Creek areas.

The Act and implementing regulations found at 50 CFR 17.21 set forth a series of general trade prohibitions and exceptions that apply to all endangered wildlife. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to take (includes harass, harm, pursue, hunt, shoot, wound, kill, trap, capture, collect, or to attempt any of these), import or export, ship in interstate commerce in the course of commercial activity, or sell or offer for sale in interstate or foreign commerce any listed species. It also is illegal to possess, sell, deliver, carry, transport, or ship any such wildlife that has been taken illegally. Certain exceptions apply to agents of the Service and State conservation agencies.

Permits may be issued to carry out otherwise prohibited activities involving endangered and threatened wildlife under certain circumstances. Regulations governing permits are at 50 CFR 17.22, 17.23 and 17.32. Such permits are available for scientific purposes, to enhance the propagation or survival of the species, or for incidental take in connection with otherwise lawful activities.

It is the policy of the Service (59 FR 34272) to identify to the maximum extent practical at the time a species is listed, those activities that would or would not constitute a violation of section 9 of the Act. The intent of this policy is to increase public awareness of the effect of listing on proposed and ongoing activities within a species' range, and to assist the public in identifying measures needed to protect the species. The Service believes that, based on the best available information, the following actions would not be likely to result in a violation of section 9:

(1) Possession, delivery, or movement, including interstate transport and import into or export from the United States, involving no commercial activity, dead specimens of this taxa that were collected prior to the date of publication in the **Federal Register** of the final regulation adding this taxa to the list of endangered species;

(2) Road kills or injuries by vehicles on designated public roads.

Potential activities involving the San Bernardino kangaroo rat that the Service believes likely would be considered a violation of section 9 include, but are not limited to, the following:

(1) Take of San Bernardino kangaroo rat without a permit, which includes harassing, harming, pursuing, hunting, shooting, wounding, killing, trapping, capturing, or collecting, or attempting any of these actions, except in accordance with applicable State fish and wildlife conservation laws and regulations;

(2) Possess, sell, deliver, carry, transport, or ship illegally taken San Bernardino kangaroo rats;

(3) Interstate and foreign commerce (commerce across State and international boundaries) and import/export (as discussed earlier in this section) without appropriate permits;

(4) Destruction or alteration of San Bernardino kangaroo rat habitat by discing, grading, sand or gravel mining, flooding, vehicle operation, or other activities that result in the destruction or significant degradation of vegetative composition, substrate composition, or other activity that impacts breeding, feeding, or availability of cover;

(5) Alteration of hydrology that results in adverse modification of San Bernardino kangaroo rat habitat (e.g., establishment of inappropriate stages of vegetation).

Questions regarding whether specific activities will constitute a violation of section 9 or to obtain approved guidelines for actions within the kangaroo rat habitat should be directed to the Service's Carlsbad Field Office (see **ADDRESSES** section). Requests for copies of the regulations concerning listed animals and inquiries regarding prohibitions and permits may be addressed to the U.S. Fish and Wildlife Service, Endangered Species Permits, 911 NE. 11th Avenue, Portland, Oregon 97232–4181 (telephone 503/231–6241; facsimile 503/231–6243).

National Environmental Policy Act

The Service has determined that an Environmental Assessment or Environmental Impact Statement, as defined under the authority of the National Environmental Policy Act of 1969, need not be prepared in connection with regulations adopted pursuant to section (4)(a) of the Endangered Species Act of 1973, as amended. A notice outlining the Service's reasons for this determination was published in the **Federal Register** on October 25, 1983 (48 FR 49244).

Required Determinations

This rule does not contain collections of information that require approval by the Office of Management and Budget under 44 U.S.C. 3501 *et seq.*

References Cited

A complete list of references cited in this rule is available upon request from the Carlsbad Field Office of the U.S. Fish and Wildlife Service (see **ADDRESSES** section).

Author

The primary author of this proposed rule is Arthur Davenport of the Carlsbad Field Office (see **ADDRESSES** section).

7 CFR Part 319

[Docket No. 97–060–1]

RIN 0579–AA88

Karnal Bunt Status of the Mexicali Valley of Mexico

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the wheat diseases regulations by recognizing a wheat-growing area within the Mexicali Valley of Mexico as being free from the wheat disease Karnal bunt. Surveys conducted by Mexican plant health authorities in that area of the Mexicali Valley since 1990 have shown the area to be free from Karnal bunt, and Mexican authorities are enforcing restrictions designed to protect the area from the introduction of Karnal bunt. This proposed change would have the effect of removing certain restrictions on the importation into the United States of wheat seed, straw, and other wheat products from the Karnal bunt free area of the Mexicali Valley.

DATES: Consideration will be given only to comments received on or before March 30, 1998.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 97–060–1, Regulatory Analysis and Development, PPD, APHIS, Suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 97–060–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Mr. James A: Petit de Mange, Import Specialist, Phytosanitary Issues Management Team, PPQ, APHIS, USDA, 4700 River Road Unit 140, Riverdale, MD 20737–1236; (301) 734–6799; fax (301) 734–5786; e-mail: jpdmange@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The regulations in "Subpart—Wheat Diseases" (7 CFR 319.59 through 319.59–2, referred to below as the regulations), restrict the importation into the United States of certain seeds, plants, and plant products from certain countries or localities in order to prevent the introduction of foreign strains of flag smut and Karnal bunt, two fungal diseases of wheat (*Triticum* spp.). Specific provisions relating to foreign strains of flag smut are located in paragraph (a) of § 319.59–2 of the regulations, and specific provisions concerning Karnal bunt are found in paragraph (b) of that section.

Under § 319.59–2(b) of the regulations, wheat seeds, plants, straw (except straw without heads that has been processed or manufactured into articles such as decorative wall hangings, clothing, or toys), chaff, and products of the milling process other than flour (i.e., bran, thistle sharps, and pollards) are designated as prohibited articles if they are from Afghanistan, India, Iraq, Mexico, or Pakistan, which are countries in which Karnal bunt is considered to exist. Prohibited articles may be imported into the United States only by the U.S. Department of Agriculture for experimental or scientific purposes in accordance with § 319.59–2(c).

The Government of Mexico has requested that the Animal and Plant Health Inspection Service (APHIS) recognize the Mexicali Valley area of Mexico as free from Karnal bunt. In support of its request, the Mexican Government submitted the results of annual surveys conducted in the wheat-producing areas of the Mexicali Valley since 1990 by Mexico's national plant protection organization, Sanidad Vegetal.

APHIS has reviewed the documentation submitted by the Government of Mexico in support of its request and conducted an on-site evaluation of Mexico's plant health programs in the Mexicali Valley with regard to Karnal bunt. The evaluation consisted of a review of Mexico's Karnal bunt survey activities, laboratory and testing procedures for the examination of samples collected during the surveys, and the administration of laws and regulations intended to prevent the introduction of Karnal bunt into the Mexicali Valley's wheat-growing areas from the rest of Mexico and from outside the country. After reviewing the documentation provided by Mexico and the data gathered during the on-site visit, we believe that Mexico has demonstrated, in accordance with the standards established by the North American Plant Protection Organization for pest-free areas, that the wheat-growing areas of the Mexicali Valley are free from Karnal bunt. We believe, therefore, that there is no longer any biological justification for that area of Mexico to be listed with the countries and localities considered to be affected with Karnal bunt.

Therefore, we are proposing to amend § 319.59–2(b) of the regulations by adding an exception for the Karnal bunt free area of the Mexicali Valley to the entry for Mexico on the list of countries and localities affected with Karnal bunt. This proposed action would mean that wheat seed, straw, and the other wheat products described in § 319.59–2(b)(1) of the regulations from the Karnal bunt free area of the Mexicali Valley would no longer be considered prohibited articles under the wheat diseases regulations. However, the importation of wheat plants into the United States from the Karnal bunt free area of the Mexicali Valley would continue to be prohibited under the regulations in "Subpart—Nursery Stock, Plants, Roots, Bulbs, Seeds, and Other Plant Products" (7 CFR 319.37 through 319.37–14). Specifically, § 319.37–2(a) lists Poaceae (vegetative parts of all grains and grasses) from all foreign places except Canada as prohibited articles due to a wide diversity of plant diseases.

For the purposes of the regulations, we would define the Karnal bunt free area of the Mexicali Valley as those portions of the municipality of Mexicali, in the State of Baja California, and the municipality of San Luis Rio Colorado, in the State of Sonora, that constitute the Distrito de Desarrollo Rural 002, Rio Colorado (Rural Development District 002, Colorado River). The area described in that definition encompasses the wheat-growing area of the Mexicali Valley that has been the subject of the ongoing Karnal bunt surveys described above and falls completely within the area into which the movement of potential Karnal bunt host material is prohibited by Mexican plant health regulations to prevent the introduction of Karnal bunt.

Because the remainder of Mexico has not been recognized as being free from Karnal bunt, we would include two additional conditions on the importation into the United States of wheat seed, straw, and other wheat products from the Mexicali Valley.

First, we would require that the articles be offered for entry at the port of Calexico, CA, which is staffed by APHIS inspectors and lies across the border from the northern boundary of the Karnal bunt free area of the Mexicali Valley. That port of entry is served by both a main road and a rail line that pass through the Karnal bunt free area, so any wheat or other articles from the Karnal bunt free area would remain within that area during their movement to the United States for entry. Once the articles arrive at the port of Calexico, CA, the shipment would have to be made available to an APHIS inspector for examination and would remain at the port of entry until an inspector released the shipment or authorized its further movement pending release.

Second, we would require that wheat or other articles offered for entry be accompanied by a phytosanitary certificate issued by Mexico's national plant protection organization. That certificate would have to include a statement confirming that the wheat or other articles were grown in the designated Karnal bunt free area of the Mexicali Valley and remained in that area prior to and during their movement to the United States. The phytosanitary certificate would be reviewed by an APHIS inspector at the port of entry to ensure that the wheat or other articles offered for entry into the United States were indeed grown and harvested in the area of Mexico that has been shown to be free of Karnal bunt and did not leave that area while in transit to the port of entry.

Other Changes

As part of this proposed rule, we would make several other changes to update the regulations. First, we would remove the authority citation that appears at the beginning of "Subpart—Wheat Diseases." The authority that applies to all of part 319, including the subpart, is cited at the beginning of the part.

We are proposing to amend § 319.59(a) to correct three erroneous references within that paragraph to other paragraphs in the subpart. Specifically, there are two references to provisions in § 319.59–2(b) that provide for the importation of otherwise prohibited articles; those provisions are actually located in paragraph § 319.59–2(c). The third erroneous reference is to articles designated in § 319.59–2(a) as prohibited articles. Although that paragraph does contain a list of prohibited articles, there is also a list of prohibited articles in § 319.59–2(b). We would, therefore, change that reference so that it refers to prohibited articles designated in § 319.59–2 (a) and (b).

We are also proposing to amend paragraph (b) of § 319.59, which provides for the disposition of articles that have been refused importation in accordance with the requirements of the regulations. That paragraph currently states that such articles shall be promptly removed from the United States or abandoned by the importer for destruction. Although the phrase "abandoned by the importer for destruction" could be construed as indicating that the importer would be relieved of any further responsibility for the articles after abandoning them, the importer is actually responsible for the costs of destruction. We are, therefore, proposing to amend the paragraph to make it clear that when an article is to be destroyed rather than reexported, the costs of destroying the article are the responsibility of the importer.

We are proposing to update the list of countries in § 319.59–2(a)(2) by removing a reference to the "Union of Soviet Socialist Republics" and adding the 15 successor States to the former Soviet Union in its place. We would also update several country names that are currently included on the list of countries.

Finally, we are proposing to make minor changes for the sake of consistency in two other subparts in part 319, namely "Subpart—Foreign Cotton and Covers" (§§ 319.8 through 319.8–27) and "Subpart—Packing Materials" (§§ 319.69 through 319.69–5). Each of those subparts contains a list of countries that is intended to agree with the list of countries found in § 319.59–2 of the regulations. However, after the lists in those two subparts were established, they were not updated to reflect subsequent amendments to "Subpart—Wheat Diseases." Therefore, we would amend § 319.8–10(d) and § 319.69(b)(1) to remove the inaccurate lists of countries and replace them with a reference to § 319.59–2 of the regulations, where the updated lists of countries and localities considered affected with foreign strains of flag smut and Karnal bunt are located.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be significant for the purposes of Executive Order 12866 and, therefore, has been reviewed by the Office of Management and Budget.

This proposed rule would amend the wheat diseases regulations by recognizing a wheat-growing area within the Mexicali Valley of Mexico as being free from the wheat disease Karnal bunt. This proposed change is based on surveys conducted by Mexican plant health authorities in that area of the Mexicali Valley since 1990 that have shown the area to be free from Karnal bunt, and on the enforcement by Mexican authorities of restrictions designed to protect the area from the introduction of Karnal bunt. This proposed change would have the effect of removing certain restrictions on the importation into the United States of wheat seed, straw, and other wheat products from the Karnal bunt free area of the Mexicali Valley.

This proposed rule would primarily affect wheat growers in the United States. There were 292,464 farms growing wheat in the United States in 1992, and 96 percent of those farms would be considered small entities. (According to the standard set by the Small Business Administration for agricultural producers, a producer with less than $0.5 million annually in sales qualifies as a small entity.) We have, therefore, examined the potential economic impact of the proposed action on small entities, as required by the Regulatory Flexibility Act, and in doing so, have assessed the anticipated costs and benefits of the proposed action, as required by Executive Order 12866.

The United States produced an average of 2,330 million bushels of wheat per year between 1992 and 1996. Of this amount, hard red winter wheat (grown primarily in Kansas, Oklahoma, and Texas) accounted for about 39 percent of production; hard red spring wheat (grown primarily in North Dakota, Minnesota, and Montana) accounted for about 24 percent of production; soft red winter wheat (grown primarily in Missouri, Illinois, and Ohio) accounted for about 19 percent of production; white wheat (grown primarily in Washington and Oregon) accounted for about 14 percent

VOL 63 ISS 17 JA 27 1998 UMI

of production; and durum wheat (grown primarily in North Dakota, Arizona, California, and Montana) accounted for about 4 percent of production.

The United States is a net exporter of wheat, accounting for about 11.4 percent of world wheat production and approximately 32 percent of world wheat exports. Of the average 2,330 million bushels of wheat produced per year between 1992 and 1996, an average of 51 percent of that wheat was exported from the United States, while wheat imports have accounted for less than 1 percent of the total U.S. wheat supply in recent years.

Mexico produced an average of about 137 million bushels of wheat per year between 1994 and 1996, most of which was grown in the States of Baja California, Guanajuato, Sinaloa, and Sonora. Mexico is a net importer of wheat, having imported in 1996 an amount of wheat equal to about 53 percent of production while exporting less than 4 percent of production; imports made up about 35 percent of Mexico's total wheat supply in 1996.

The Mexicali Valley, from which wheat could be exported to the United States under this proposed rule, is located in two of Mexico's leading wheat-producing States, Baja California and Sonora. The Mexicali Valley produced 445,967 metric tons of wheat in 1995; about 53 percent (236,171 metric tons) of that wheat was shipped to markets elsewhere in Mexico. Nearly all of the Mexicali Valley's wheat is sown in October and November and harvested from late May to early July. Table 1 below shows the classes of wheat grown in the Mexicali Valley between 1994 and 1996 and the average production share and use distribution of each class.

TABLE 1.—WHEAT CLASS, PRODUCTION SHARE, AND USE DISTRIBUTION OF MEXICALI VALLEY WHEAT; 1994–1996 AVERAGES

Wheat class	Production share (percent)	Use distribution (percent)			
		Food	Feed	Seed	Other
Hard Red Winter	51.3	65.0	25.0	3.2	6.8
White	36.2	61.5	24.6	2.6	11.3
Durum	2.2	38.5	2.1	58.8	0.6
Soft Red Winter	0.3	33.2	13.9	36.0	16.9

Between 1994 and 1997, producers in the Mexicali Valley shipped an average of 9 million bushels each year to other markets in Mexico; we have used that amount in Table 2, below, as an estimate of the total amount of wheat potentially available for export to U.S. markets. Table 2 summarizes the estimated economic impacts in the United States, based on a price elasticity of −0.63, of different levels of wheat exports from the Mexicali Valley and from the estimated producer losses and consumer gains that would result. For example, a 20 percent diversion of Mexicali Valley wheat production from markets in other countries or the domestic Mexican market to the United States would be expected to result in a price decrease of 0.09 percent in the United States. U.S. producers would lose about $5.92 million (which, when distributed among the 292,464 wheat farms noted above, amounts to about $20.25 per farm), while consumers would gain about the same amount, for a net benefit in this scenario of about $3,000. At the other end of the spectrum, a 100 percent diversion of Mexicali Valley wheat production from other markets to the United States would be expected to result in a price decrease of 0.45 percent in the United States. U.S. wheat producers would lose about $29.56 million (or about $101.00 per farm), while consumers would gain about $29.64 million, for a net benefit in this scenario of about $74,500. In all cases, consumer gains slightly outweigh producer losses.

TABLE 2.—POTENTIAL IMPACT IN THE UNITED STATES OF THE REDIRECTION OF MEXICALI VALLEY WHEAT TO U.S. MARKETS (PRICE ELASTICITY IS −0.63)

	Percentage of Mexicali Valley-origin wheat shipments diverted from other (domestic or export) markets to the U.S. market:				
	20	40	60	80	100
Imports (millions of bushels)	1.8	3.6	5.4	7.2	9.0
Percent change in price	(0.09)	(0.17)	(0.27)	(0.36)	(0.45)
Percent change in quantity	(0.04)	(0.08)	(0.13)	(0.17)	(0.22)
Decrease in producer surplus (millions of dollars)	(5.92)	(11.83)	(17.75)	(23.66)	(29.56)
Increase in consumer surplus (millions of dollars)	5.92	11.84	17.77	23.70	29.64
Total surplus (millions of dollars)	0.003	0.0119	0.0268	0.0477	0.0745

How likely even a 20 percent diversion of Mexicali Valley wheat to the U.S. market would be, however, is unclear. The production area of the Mexicali Valley is closer to markets in the United States than it is to markets in central Mexico, which means that lower transportation costs may encourage Mexicali Valley producers to ship their wheat to the United States. However, the Mexican government is considering a transportation subsidy for growers in northwestern Mexico to offset the transportation advantage that growers in central Mexico have in marketing their crops in Mexico City. Such a subsidy may encourage Mexicali Valley producers to sell their wheat in Mexico.

Prices for Mexicali Valley wheat may well prove to be a determining factor with regard to the level of potential exports, as the costs of production in the Mexicali Valley are much higher than U.S. production costs. The cost of Mexicali Valley wheat averaged between $2.47 and $3.54 per bushel, with total economic costs (which include fertilizers, irrigation, harvest costs, interest on credit, etc.) ranging between $227.60 to $247.50 per acre. The cost of wheat grown in the United States, on the other hand, averaged $2.47 per bushel, with total economic costs averaging $155 per acre. With its higher production costs and the added cost of transportation across the border into the United States, it may prove difficult for Mexicali Valley wheat to compete in the U.S. market.

The actual extent of any decrease in wheat prices in the United States resulting from action proposed in this document would depend to a great degree upon the size of the price elasticity of demand, the magnitude of the change in supply, and the size of the baseline price. For lower price elasticities, both losses and gains would be higher. We expect that the amount of wheat exported from the Mexicali Valley would not be large and would not, therefore, change wheat production and consumption patterns in the United States. Further, the increase in wheat supplies in the United States from an increase in imports from Mexico would likely be offset to some extent by an increase in exports of wheat from the United States to Mexico. Nevertheless, allowing the importation of wheat from the Mexicali Valley would likely have a net positive impact on the overall economy, since consumer benefits at any level of imports would be slightly higher than producer losses.

The only significant alternative to this proposed rule would be to make no changes in the wheat diseases regulations, i.e., to continue to prohibit the importation of wheat and wheat products from Mexico. We have rejected that alternative because we believe that Mexico has demonstrated that the wheat-growing areas of the Mexicali Valley are free from Karnal bunt, which means that there is no longer any biological justification for that area of Mexico to be listed with the countries and localities considered to be affected with Karnal bunt. Maintaining a prohibition on the importation of wheat and wheat products from the Mexicali Valley in light of that area's demonstrated freedom from Karnal bunt would run counter to the United States' obligations under international trade agreements and would likely be challenged through the World Trade Organization. Conversely, our proposal to declare the wheat-growing areas of the Mexicali Valley free from Karnal bunt would likely have a beneficial effect on international trade in general, and trade between the United States and Mexico in particular, by reaffirming the United States' continuing commitment to using scientifically valid principles as the basis for regulation.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are inconsistent with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

In accordance with section 3507(d) of the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.), the information collection or recordkeeping requirements included in this proposed rule have been submitted for approval to the Office of Management and Budget (OMB). Please send written comments to the Office of Information and Regulatory Affairs, OMB, Attention: Desk Officer for APHIS, Washington, DC 20503. Please state that your comments refer to Docket No. 97–060–1. Please send a copy of your comments to: (1) Docket No. 97–060–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238, and (2) Clearance Officer, OIRM, USDA, room 404–W, 14th Street and Independence Avenue SW., Washington, DC 20250. A comment to OMB is best assured of having its full effect if OMB receives it within 30 days of publication of this proposed rule.

This proposed rule would amend the wheat diseases regulations by recognizing a wheat-growing area within the Mexicali Valley of Mexico as being free from the wheat disease Karnal bunt. This proposed change would have the effect of removing certain restrictions on the importation into the United States of wheat seed, straw, and other wheat products from the Karnal bunt free area of the Mexicali Valley.

Because the remainder of Mexico is still considered to be affected with Karnal bunt, we would require that a phytosanitary certificate accompany wheat and other wheat-related articles offered for entry from the Karnal bunt free area of the Mexicali Valley. That certificate would have to be issued by Mexican plant health authorities, and would have to state that the wheat or other articles had been grown in the designated Karnal bunt free area of the Mexicali Valley.

We are soliciting comments from the public (as well as affected agencies) concerning our proposed information collection and recordkeeping requirements. We need this outside input to help us:

(1) Evaluate whether the proposed information collection is necessary for the proper performance of our agency's functions, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the proposed information collection, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the information collection on those who are to respond, (such as through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.)

Estimate of burden: Public reporting burden for this collection of information is estimated to average 1.2 hours per response.

Respondents: Mexican plant health authorities, growers/exporters of wheat products in the Mexicali Valley.

Estimated number of respondents: 20.

Estimated number of responses per respondent: 5.

Estimated annual number of responses: 100.

Estimated total annual burden on respondents: 120 hours.

Copies of this information collection can be obtained from Clearance Officer, OIRM, USDA, room 404-W, 14th Street and Independence Avenue SW., Washington, DC 20250.

List of Subjects in 7 CFR Part 319

Bees, Coffee, Cotton, Fruits, Honey, Imports, Incorporation by reference, Nursery Stock, Plant diseases and pests, Quarantine, Reporting and recordkeeping requirements, Rice, Vegetables.

Accordingly, 7 CFR part 319 is proposed to be amended as follows:

PART 319—FOREIGN QUARANTINE NOTICES

1. The authority citation for part 319 would continue to read as follows:

Authority: 7 U.S.C. 150dd, 150ee, 150ff, 151–167, 450, 2803, and 2809; 21 U.S.C. 136 and 136a; 7 CFR 2.22, 2.80, and 371.2(c).

VOL 63 ISS 17 JA 27 1998 UMI

§ 319.8–10 [Amended]

2. In Subpart—Foreign Cotton and Covers, § 319.8–10(d) would be amended by removing the words "§ 319.59 (notice of quarantine No. 59 relating to the flag smut disease)" and adding the words "§ 319.59–2(a)(2)" in their place, and footnote 5 and its reference in the text would be removed.

§ 319.8–11 [Amended]

3. In Subpart—Foreign Cotton and Covers, § 319.8–11(a) introductory text, footnote 6 and its reference in the text would be redesignated as footnote 5.

§ 319.8–17 [Amended]

4. In Subpart—Foreign Cotton and Covers, § 319.8–17(d), footnote 7 and its reference in the text would be redesignated as footnote 6.

5. The authority citation for "Subpart—Wheat Diseases" would be removed.

§ 319.59 [Amended]

6. In Subpart—Wheat Diseases, § 319.59 would be amended as follows:

a. In paragraph (a), in the first sentence, the reference "§ 319.59–2(b)" would be removed and the reference "§ 319.59–2(c)" would be added in its place.

b. In paragraph (a), in the last sentence, the reference "§ 319.59–2(a)" would be removed and the reference "§ 319.59–2(a) and (b)" added in its place, and the reference "§ 319.59–2(b)" would be removed and the reference "§ 319.59–2(c)" added in its place.

c. In paragraph (b), in the first sentence, the words "abandoned by the importer for destruction" would be removed and the words "destroyed as deemed necessary by an inspector at the expense of the importer" would be added in their place.

d. In paragraph (b), in the last sentence, the words "abandoned for destruction by" would be removed and the words "destroyed as deemed necessary by an inspector at the expense of" would be added in their place.

7. In Subpart—Wheat Diseases, § 319.59–2 would be amended as follows:

a. In the introductory text of paragraph (a), the words "in paragraph (b)" would be removed and the words "in paragraph (c)" added in their place.

b. In paragraph (a)(1)(i), the word "*Triticums*" would be removed and the word "*Triticum*" added in its place.

c. Paragraph (a)(2) would be revised to read as set forth below.

d. In paragraph (b)(2), the words "(except for that portion of the Mexicali Valley described in paragraph (b)(3) of this section)," would be added after the word "Mexico".

e. A new paragraph (b)(3) would be added to read as set forth below.

f. In paragraph (c)(2), the reference "7 CFR 319.37–14(b)" would be removed and the reference "§ 319.37–14(b)" added in its place.

§ 319.59–2 Prohibited articles.

(a) * * *

(2) Afghanistan, Algeria, Armenia, Australia, Azerbaijan, Bangladesh, Belarus, Bulgaria, Chile, China, Cyprus, Egypt, Estonia, Falkland Islands, Georgia, Greece, Guatemala, Hungary, India, Iran, Iraq, Israel, Italy, Japan, Kazakstan, Kyrgyzstan, Latvia, Libya, Lithuania, Moldova, Morocco, Nepal, North Korea, Oman, Pakistan, Portugal, Romania, Russia, Spain, Tajikistan, Tanzania, Tunisia, Turkey, Turkmenistan, South Africa, South Korea, Ukraine, Uzbekistan, and Venezuela.

(b) * * *

(3) The following area of the Mexicali Valley in Mexico has been determined to be free from Karnal Bunt: Those portions of the municipality of Mexicali, in the State of Baja California, and the municipality of San Luis Rio Colorado, in the State of Sonora, that are included in the Distrito de Desarrollo Rural (Rural Development District) 002 Rio Colorado. Except for wheat (*Triticum* spp.) plants, which are prohibited importation under § 319.37–2(a), any articles described in paragraph (b)(1) of this section that are from that designated area may be imported into the United States subject to the following conditions:

(i) The articles are offered for entry at the port of Calexico, CA; and

(ii) The articles offered for entry are made available for examination by an inspector and remain at the port until released, or authorized further movement pending release, by an inspector; and

(iii) The articles are accompanied by a phytosanitary certificate issued by the Mexican national plant protection organization that certifies that the articles are from the area of the Mexicali Valley described in this paragraph and remained within that area prior to and during their movement to the United States.

* * * * *

8. In Subpart—Packing Materials, § 319.69(b)(1) would be revised to read as follows:

§ 319.69 Notice of quarantine.

* * * * *

(b) * * *

(1) Cereal straw, hulls, and chaff (such as oats, barley, and rye) from all countries, except rice straw, hulls, and chaff, which are prohibited importation from all countries by paragraph (a)(1) of this section, and except wheat straw, hulls, and chaff, which are restricted importation by § 319.59 from any country or locality listed in § 319.59–2.

* * * * *

Done in Washington, DC, this 21st day of January 1998.

Terry L. Medley,

Administrator, Animal and Plant Health Inspection Service.

BILLING CODE 3410–34–P

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 1209

[FV–97–705RO]

Mushroom Promotion, Research, and Consumer Information Order; Referendum Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Referendum order.

SUMMARY: This action gives notice that a referendum will be conducted to determine whether mushroom producers and importers favor continuance of the Mushroom Promotion, Research, and Consumer Information Order (Order). In order to continue, the Order must be approved by a majority of producers and importers voting in the referendum and that majority must represent more than 50 percent of the mushrooms produced and imported by those voting in the referendum. This action announces the voting period, representative period, and agents.

DATES: The referendum will be conducted by mail ballot from February 24 through March 13, 1998. Faxed ballots will be accepted. The representative period for establishing voter eligibility shall be the period from July 1, 1996, through June 30, 1997.

ADDRESSES: Copies of the Mushroom Promotion, Research, and Consumer Information Order may be obtained from: Referendum Agent, Research and Promotion Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, Room 2535-S, Stop Code 0244, Washington, DC 20090–6456, telephone number (888) 720–9917, fax (202) 205–2800.

FOR FURTHER INFORMATION CONTACT: Stacey L. Bryson, Research and Promotion Branch, Fruit and Vegetable Programs, AMS, USDA, 1400 Independence Avenue, Room 2535-S, Stop Code 0244, Washington, DC 20090–6456, telephone (202) 720–6930 or (888) 720–9917.

SUPPLEMENTARY INFORMATION: A referendum will be conducted among mushroom producers and importers to determine whether the continuance of the Mushroom Promotion, Research, and Consumer Information Order (Order) [7 CFR 1209] is favored by persons voting in the referendum. The Order is authorized under the Mushroom Promotion, Research, and Consumer Information Act (Act) [7 U.S.C. 6101–6112].

The representative period for establishing voter eligibility for the referendum shall be the period from July 1, 1996, through June 30, 1997. Paragraph (b)(2) of § 1926 of the Act requires that the Order be approved by a majority of producers and importers voting in the referendum which majority, on average, annually produces and imports into the United States more than 50 percent of mushrooms annually produced and imported by all those persons voting in the referendum. Only mushroom producers and importers who either produced or imported, on average, over 500,000 pounds of mushrooms annually during the representative period will be eligible to vote in the referendum. Persons who have received an exemption from assessment for the entire representative period are ineligible to vote. The referendum shall be conducted by mail ballot from February 24 through March 13, 1998. Faxed ballots will be accepted.

Section 1926 of the Act provides that the Secretary of Agriculture (Secretary) shall conduct a referendum effective 5 years after the date on which the Order became effective. The Order became effective on January 8, 1993. The referendum must be conducted among mushroom producers and importers to ascertain whether they favor continuation, termination, or suspension of the Order. Persons voting in the referendum will certify their eligibility to vote and will designate their status either as a mushroom producer or importer. Producers and importers will be required to certify the pounds of mushrooms they either produced or imported during the representative period.

The Order shall continue in effect if it is approved by a simple majority of producers and importers voting in the referendum and that majority represents more than 50 percent of the mushrooms produced and imported by those voting in the referendum. If the Secretary determines that suspension or termination of the Order is favored by a majority of the producers and importers voting in the referendum, which majority, on average, annually produces and imports into the United States more than 50 percent of the mushrooms annually produced and imported by all those voting in the referendum, the Secretary shall terminate or suspend the collection of assessments under the Order and suspend or terminate activities under the Order as soon as practicable.

In accordance with the Paperwork Reduction Act of 1995 [Pub. L. 104–13], the referendum ballot has been approved by the Office of Management and Budget (OMB) and has been assigned OMB number 0581–0093. There are approximately 138 eligible voters. It will take an average of 15 minutes for each voter to read the voting instructions and complete the referendum ballot. The total burden on the total number of voters will be 34.5 hours.

Referendum Order

It is hereby directed that a referendum be conducted among mushroom producers and importers to determine whether they favor the continuance of the Order. The representative period for establishing voter eligibility for the referendum shall be the period from July 1, 1996, through June 30, 1997. A referendum shall be conducted by mail ballot from February 24 through March 13, 1998. Faxed ballots will be accepted.

By interim final rule, referendum procedures were published in the **Federal Register** on December 23, 1997 [62 FR 66973]. Comments concerning the provisions of the rule must be received by January 22, 1998. The Procedure for the Conduct of Referenda in Connection with the Mushroom Promotion, Research, and Consumer Information Order [7 CFR 1209.300–1209.307] shall be used to conduct the referendum. Ballots will be mailed to all known mushroom producers and importers on or before February 17, 1998. Eligible voters who do not receive a ballot by mail may call the following toll-free telephone number to receive a ballot: 1 (888) 720–9917. All ballots will be subject to verification. Ballots must be received by the referendum agents by mail or fax no later than March 13, 1998, to be counted.

Stacey L. Bryson and Martha B. Ransom, Research and Promotion Branch, Fruit and Vegetable Programs, Agricultural Marketing Service, U.S. Department of Agriculture, Room 2535–S, Stop Code 0244, P.O. Box 96456, Washington, D.C. 20090–6456, are designated as the referendum agents of the Secretary of Agriculture to conduct the referendum.

Ballots to be cast in the referendum, and any related material relevant to the referendum, will be mailed by the referendum agents to all known mushroom producers and importers. Only mushroom producers and importers who either produced or imported, on average, over 500,000 pounds of mushrooms annually during the representative period will be eligible to vote in the referendum. Persons who have received an exemption from assessment for the entire representative period are ineligible to vote.

Animal and Plant Health Inspection Service

9 CFR Part 71

[Docket No. 97–099–1]

EIA; Handling Reactors at Livestock Markets

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Proposed rule.

SUMMARY: We are proposing to amend the regulations pertaining to livestock facilities under State or Federal veterinary supervision to require that any livestock facility accepting equines classified as reactors to equine infectious anemia must quarantine these animals at all times at least 200 yards from all equines that are not reactors to this disease. Currently, livestock facilities accepting reactors to equine infectious anemia are required to quarantine the reactors that will remain at the facility for longer than 24 hours at least 200 yards away from all other animals. This proposed amendment would help to prevent the interstate spread of equine infectious anemia, a contagious, vector-borne disease affecting equines.

DATES: Consideration will be given only to comments received on or before March 30, 1998.

ADDRESSES: Please send an original and three copies of your comments to Docket No. 97–099–1, Regulatory Analysis and Development, PPD, APHIS, suite 3C03, 4700 River Road Unit 118, Riverdale, MD 20737–1238. Please state that your comments refer to Docket No. 97–099–1. Comments received may be inspected at USDA, room 1141, South Building, 14th Street and Independence Avenue SW., Washington, DC, between 8 a.m. and 4:30 p.m., Monday through Friday, except holidays. Persons wishing to inspect comments are requested to call ahead on (202) 690–2817 to facilitate entry into the comment reading room.

FOR FURTHER INFORMATION CONTACT: Dr. James P. Davis, Senior Staff Veterinarian, National Animal Health Programs Staff, VS, APHIS, 4700 River Road Unit 36, Riverdale, MD 20737–1231, (301) 734–5970; or E-mail: jdavis@aphis.usda.gov.

SUPPLEMENTARY INFORMATION:

Background

The regulations in subchapter C, "Interstate Transportation of Animals (Including Poultry) and Animal Products," of chapter I, title 9, of the Code of Federal Regulations contain provisions designed by the Animal and Plant Health Inspection Service (APHIS) to prevent the dissemination of animal diseases in the United States. Part 71 of subchapter C includes general provisions. Section 71.20 pertains to APHIS approval of livestock facilities, which include stockyards, livestock markets, buying stations, concentration points, or any other premises under State or Federal veterinary supervision where livestock are assembled. Section 71.20(a) includes an agreement that livestock facilities must execute to obtain APHIS approval, and subparagraph (16) of the agreement pertains to livestock facilities that accept horses. (According to the definitions in § 71.1, "horses" includes "horses, asses, mules, ponies, and zebras." Throughout this document, the same definition applies.) According to § 71.20(a)(16), approved livestock facilities may elect either to accept or not accept horses that are reactors to equine infectious anemia (EIA).

EIA is a contagious, potentially fatal disease affecting horses that is spread by infected blood coming into contact with the blood in a healthy animal. Therefore, humans can spread EIA from horse to horse through unsafe vaccination or blood-testing practices; naturally, the disease is spread by insect vectors. Although, theoretically, EIA could be spread by any type of blood-consuming insect, such as mosquitoes and deer flies, the disease is generally spread by large horse flies. EIA spreads when a blood-consuming insect is interrupted during a feeding on an infected animal and then resumes feeding on an uninfected animal while the infected blood is still on the insect's mouthparts. While mosquitoes have finely structured mouthparts that directly penetrate small blood vessels, the mouthparts of horse flies and deer flies include scissorlike blades that cut and slash the horse's skin leaving relatively large amounts of blood on the mouthparts. Research has shown that deer flies and smaller species of horse flies are not as easily disrupted from their bloodmeals on horses as are large horse flies. The large flies cause painful bites that trigger a physiological response from the horse. If disrupted by the horse while feeding, the horse fly may then move to another horse to complete the bloodmeal.[1]

Regulations pertaining to the interstate movement of animals affected with EIA are located in 9 CFR part 75. According to these regulations, EIA reactors may be moved interstate only for immediate slaughter, to a diagnostic or research facility, to the animal's home farm, or to an approved stockyard for sale for immediate slaughter. Approximately 1,600 horses in the United States test positive for EIA each year. Currently, 40 percent of these animals move through livestock markets on their way to slaughter.

Section 71.20(a)(16)(ii) currently specifies that approved livestock facilities must place any EIA reactor in a quarantined pen at least 200 yards from all non-EIA-reactor horses and other animals, unless the EIA reactor will be moving out of the facility within 24 hours of arrival. The purpose of quarantining the EIA reactors is to prevent EIA transmission: Because the types of flies that transmit EIA generally remain in the immediate vicinity of the horses with which they are associated, quarantining EIA reactors at least 200 yards away from healthy horses is effective in preventing EIA spread. However, as described above, the regulations currently allow an EIA reactor to be mixed in with healthy horses if the EIA reactor will be at the livestock facility for less than 24 hours. While in the past such short-term mixing of healthy and infected horses was not believed to contribute significantly to EIA spread, we now believe that allowing healthy horses to come into close contact with EIA reactors for any length of time could allow for infection of the healthy horses. Therefore, to help prevent the interstate spread of EIA, we are proposing to prohibit the mixing of healthy and infected horses at approved livestock facilities for any period of time. Thus, we are proposing to amend the quarantine requirement in § 71.20(a)(16)(ii) to remove the quarantine exception for EIA reactors that will be in the approved livestock facility for less than 24 hours. EIA reactors would need to be quarantined at least 200 yards away from non-EIA-reactor horses at all times.

Currently, § 71.20(a)(16)(ii) also requires that EIA reactors be quarantined at least 200 yards away from all other animals in the approved livestock facility. This requirement exists because it was formerly believed that insect vectors could spread EIA to healthy horses as far as 200 yards away from reactors if other animals were located between the reactors and the healthy horses. We previously believed that a fly could move from a reactor to feed on a nonequine animal or animals located nearby and then move on to a healthy horse, infecting it. However, as stated previously, we now know that EIA transmission by insect vector occurs only when an insect is feeding on an infected horse, is interrupted during the feeding, and then moves on to feed on a healthy horse while the infected blood is still on the insect's mouthparts. Horse flies are not known to feed on nonequine animals when horses are available because these flies prefer the relatively supple skin of horses. Moreover, the likelihood that blood from an infected horse would still be on the insect's mouthparts after the insect had fed on another animal is slight. For these reasons, we now believe that the possibility of disease transmission occurring under these circumstances is extremely unlikely. We are proposing to amend § 71.20(a)(16)(ii) to remove the words "or other animals." We believe that, in the interest of preventing EIA spread, it is only necessary to require EIA reactors to be quarantined at least 200 yards away from all equines that are not reactors.

Executive Order 12866 and Regulatory Flexibility Act

This proposed rule has been reviewed under Executive Order 12866. The rule has been determined to be not significant for the purposes of Executive Order 12866 and, therefore, has not been reviewed by the Office of Management and Budget.

The regulations in 9 CFR part 71 require that any horses classified as EIA reactors and accepted by a facility for sale are to be placed in quarantined pens at least 200 yards from all non-EIA-reactor horses or other animals, unless moving out of the facility within 24 hours of arrival. The proposed rule would remove the "less-than-24-hours" exemption: Quarantine would be required regardless of the length of time between an EIA reactor's arrival and departure from a facility. The proposed rule would also amend the regulations by requiring that EIA reactors be quarantined at least 200 yards away from all equines that are not reactors, rather than at least 200 yards away from all other animals.

Facilities that buy and sell horses are included in the Small Business Administration's SIC (Standard Industrial Classification) category "Livestock Services, Except Veterinary." Firms in this category with annual receipts of less than $5 million are considered small entities. It is likely that most, if not all, of the approximately 200 facilities that buy and sell horses are "small" under this definition.

Most facilities that buy and sell horses already have quarantine pens, in accordance with current regulations. The estimated 20 percent that do not have quarantine pens could build or modify existing pens for quarantine use at a relatively minor cost: APHIS estimates that, at most, construction of a quarantine pen would cost about $1,000.

However, costs of quarantine pen construction are not attributable to this proposed rule because quarantine, per se, is not a new requirement. Only those facilities that accept EIA reactors and that always move all EIA reactors within 24 hours of arrival would need to construct or modify pens for quarantine purposes as a consequence of this proposed rule. As no facility can always be certain of movement of EIA reactors within 24 hours, no costs should be incurred strictly because of this proposed rule. Moreover, by requiring all EIA reactors at approved livestock facilities to be quarantined, the horse industry in general would benefit from a further reduction in the risk of EIA transmission.

Under these circumstances, the Administrator of the Animal and Plant Health Inspection Service has determined that this action would not have a significant economic impact on a substantial number of small entities.

Executive Order 12372

This program/activity is listed in the Catalog of Federal Domestic Assistance under No. 10.025 and is subject to Executive Order 12372, which requires intergovernmental consultation with State and local officials. (See 7 CFR part 3015, subpart V.)

Executive Order 12988

This proposed rule has been reviewed under Executive Order 12988, Civil Justice Reform. If this proposed rule is adopted: (1) All State and local laws and regulations that are in conflict with this rule will be preempted; (2) no retroactive effect will be given to this rule; and (3) administrative proceedings will not be required before parties may file suit in court challenging this rule.

Paperwork Reduction Act

This proposed rule contains no information collection or recordkeeping requirements under the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.).

List of Subjects in 9 CFR Part 71

Animal diseases, Livestock, Poultry and poultry products, Quarantine, Reporting and recordkeeping requirements, Transportation.

Accordingly, 9 CFR part 71 is proposed to be amended as follows:

PART 71—GENERAL PROVISIONS

1. The authority citation for part 71 would continue to read as follows:

Authority: 21 U.S.C. 111–113, 114a, 114a–1, 115–117, 120–126, 134b, and 134f; 7 CFR 2.22, 2.80, and 371.2(d).

§ 71.20 [AMENDED]

2. In § 71.20, paragraph (a) would be amended in paragraph (16)(ii) of the sample agreement by removing the words "or other animals, unless moving out of the facility within 24 hours of arrival".

Done in Washington, DC, this 20th day of January 1998.

Terry L. Medley,

Administrator, Animal and Plant Health Inspection Service.

FEDERAL ELECTION COMMISSION

11 CFR Part 114

[Notice 1998–3]

Definition of "Member" of a Membership Association

AGENCY: Federal Election Commission.

ACTION: Notice of Proposed Rulemaking; technical correction.

SUMMARY: On December 22, 1997, the Commission published a Notice of Proposed Rulemaking ("NPRM") setting out proposed revisions to its rules defining who qualifies as a "member" of a membership association. The term is defined twice in the Commission's rules, and the definitions are identical. The NPRM sought comment on three alternative definitions, but inadvertently omitted one portion of one alternative from one of the parallel definitions. This technical revision to the NPRM corrects that oversight.

FOR FURTHER INFORMATION CONTACT: Ms. Susan E. Propper, Assistant General Counsel, or Ms. Rita A. Reimer, Attorney, 999 E Street, N.W., Washington, DC 20463, (202) 219–3690 or (800) 424–9530.

SUPPLEMENTARY INFORMATION: On December 22, 1997, the Commission published a Notice of Proposed Rulemaking seeking comment on three alternative revisions (Alternatives A, B and C) to its rules defining who qualifies as a "member" of a membership association. 62 FR 66832. Each Alternative describes a range of financial and organizational attachments that would be sufficient to confer membership status.

A membership association can solicit contributions from its members to a separate segregated fund established by the association, and can include express electoral advocacy in communications to its members. 2 U.S.C. 441b(b)(2)(A), 441b(b)(4)(C). The Commission's rules for both activities are identical. Those governing solicitations are found at 11 CFR 114.1(e), and those governing communications are found at 11 CFR 100.8(b)(4)(iv).

In keeping with the statutory and regulatory scheme, the Commission intended that all three alternatives would apply to both 11 CFR 100.8(b)(4)(iv) and 114.1(e). However, the NPRM as published inadvertently omitted Alternative C for paragraph 114.1(e)(2)(ii), although it included it for parallel paragraph 100.8(b)(4)(iv)(B)(2). *See* 62 FR 66837, 66838 (Dec. 22, 1997). Under Alternative C, a person would be considered a "member" of a

VOL 63 ISS 17 JA 27 1998 UMI

membership association if the person was required to pay on a regular basis a specific amount of annual dues that are predetermined by the association.

Accordingly, the Commission is publishing this technical correction to the NPRM.

§ 114.1 [Corrected]

On page 66838 of the December 22, 1997 **Federal Register**, at the bottom of the first column, following proposed *Alternative* B for paragraphs (e)(2)(ii)–(iv), insert the following:

Alternative C for paragraph (e)(2)(ii).

(2) Are required to pay on a regular basis a specific amount of annual dues that are predetermined by the association.

Dated: January 22, 1998.

Joan D. Aikens,

Chairman, Federal Election Commission.

BILLING CODE 6715–01–U

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Docket No. 97–NM–99–AD]

RIN 2120–AA64

Airworthiness Directives; McDonnell Douglas Model DC–9–31 Series Airplanes

AGENCY: Federal Aviation Administration, DOT.

ACTION: Notice of proposed rulemaking (NPRM).

SUMMARY: This document proposes the adoption of a new airworthiness directive (AD) that is applicable to certain McDonnell Douglas Model DC–9–31 series airplanes.

This proposal would require a one-time visual inspection to determine if all corners of the forward service door doorjamb have been modified previously, various follow-on repetitive inspections, and modification, if necessary. This proposal is prompted by reports of fatigue cracks found in the fuselage skin and doubler at the corners of the forward service door doorjamb. The actions specified by the proposed AD are intended to detect and correct such fatigue cracking, which could result in rapid decompression of the fuselage and consequent reduced structural integrity of the airplane.

DATES: Comments must be received by March 13, 1998.

ADDRESSES: Submit comments in triplicate to the Federal Aviation Administration (FAA), Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 97–NM–99–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056. Comments may be inspected at this location between 9:00 a.m. and 3:00 p.m., Monday through Friday, except Federal holidays.

The service information referenced in the proposed rule may be obtained from McDonnell Douglas Corporation, 3855 Lakewood Boulevard, Long Beach, California 90846, Attention: Technical Publications Business Administration, Department C1-L51 (2–60). This information may be examined at the FAA, Transport Airplane Directorate, 1601 Lind Avenue, SW., Renton, Washington; or at the FAA, Transport Airplane Directorate, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California.

FOR FURTHER INFORMATION CONTACT: Wahib Mina, Aerospace Engineer, Airframe Branch, ANM–120L, FAA, Los Angeles Aircraft Certification Office, 3960 Paramount Boulevard, Lakewood, California 90712; telephone (562) 627–5324; fax (562) 627–5210.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications shall identify the Rules Docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments, specified above, will be considered before taking action on the proposed rule. The proposals contained in this notice may be changed in light of the comments received.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy aspects of the proposed rule. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons. A report summarizing each FAA-public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Commenters wishing the FAA to acknowledge receipt of their comments submitted in response to this notice must submit a self-addressed, stamped postcard on which the following statement is made: "Comments to Docket Number 97–NM–99–AD." The postcard will be date stamped and returned to the commenter.

Availability of NPRMs

Any person may obtain a copy of this NPRM by submitting a request to the FAA, Transport Airplane Directorate, ANM–103, Attention: Rules Docket No. 97–NM–99–AD, 1601 Lind Avenue, SW., Renton, Washington 98055–4056.

Discussion

The FAA has received reports of fatigue cracks in the fuselage skin and doubler at the corners of the forward service door doorjamb on Model DC–9–31 series airplanes. These cracks were discovered during inspections conducted as part of the Supplemental Structural Inspection Document (SSID) program, required by AD 96–13–03, amendment 39–9671 (61 FR 31009, June 19, 1996). Investigation revealed that such cracking was caused by fatigue-related stress. Fatigue cracking in the fuselage skin or doubler at the corners of the forward service door doorjamb, if not detected and corrected in a timely manner, could result in rapid decompression of the fuselage and consequent reduced structural integrity of the airplane.

Explanation of Relevant Service Information

The FAA has reviewed and approved McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997. The service bulletin describes the following procedures:

1. Performing a one-time visual inspection to determine if the corners of the forward service door doorjamb have been modified;

2. For airplanes on which the modification specified in Service Bulletin DC9–53–288 has not been accomplished: Performing a low frequency eddy current (LFEC) or x-ray inspection to detect cracks of the fuselage skin and doubler at all corners of the forward service door doorjamb;

3. Conducting repetitive inspections, or modifying the corner skin of the doorjamb of the forward service door and performing follow-on action high frequency eddy current (HFEC) inspections, if no cracking is detected;

4. Performing repetitive HFEC inspections to detect cracks on the skin adjacent to any corner that has been modified; and

5. Modifying any crack that is found to be 2 inches or less in length at all corners that have not been modified and performing follow-on repetitive HFEC inspections.

Accomplishment of the modification will minimize the possibility of cracks in the fuselage skin and doubler.

Explanation of Requirements of Proposed Rule

Since an unsafe condition has been identified that is likely to exist or develop on other products of this same type design, the proposed AD would require a one-time visual inspection to determine if all corners of the forward service door doorjamb have been modified previously, various follow-on repetitive inspections, and modification, if necessary. The one-time visual inspection, follow-on repetitive inspections, and modification would be required to be accomplished in accordance with the service bulletin described previously.

Differences Between the Proposed Rule and the Relevant Service Information

Operators should note that, although the service bulletin specifies that the manufacturer must be contacted for disposition of certain conditions, this proposal would require the repair of those conditions to be accomplished in accordance with a method approved by the FAA.

Cost Impact

There are approximately 64 McDonnell Douglas Model DC–9–31 series airplanes of the affected design in the worldwide fleet. The FAA estimates that 51 airplanes of U.S. registry would be affected by this proposed AD, that it would take approximately 1 work hour per airplane to accomplish the proposed one-time visual inspection, and that the average labor rate is $60 per work hour. Based on these figures, the cost impact of the one-time visual inspection of the proposed AD on U.S. operators is estimated to be $3,060, or $60 per airplane.

The cost impact figure discussed above is based on assumptions that no operator has yet accomplished any of the proposed requirements of this AD action, and that no operator would accomplish those actions in the future if this AD were not adopted.

Should an operator be required to accomplish the LFEC or x-ray inspection, it would take approximately 1 work hour per airplane to accomplish, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of any necessary LFEC or x-ray inspection is estimated to be $60 per airplane, per inspection cycle.

Should an operator be required to accomplish the HFEC inspection, it would take approximately 1 work hour per airplane to accomplish, at an average labor rate of $60 per work hour. Based on these figures, the cost impact of any necessary HFEC inspection is estimated to be $60 per airplane, per inspection cycle.

Should an operator be required to accomplish the modification, it would take approximately 30 work hours per airplane to accomplish, at an average labor rate of $60 per work hour. Required parts would cost approximately $4,800 per airplane. Based on these figures, the cost impact of any necessary modification is estimated to be $6,600 per airplane.

Regulatory Impact

The regulations proposed herein would not have substantial direct effects on the States, on the relationship between the national government and the States, or on the distribution of power and responsibilities among the various levels of government. Therefore, in accordance with Executive Order 12612, it is determined that this proposal would not have sufficient federalism implications to warrant the preparation of a Federalism Assessment.

For the reasons discussed above, I certify that this proposed regulation (1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under the DOT Regulatory Policies and Procedures (44 FR 11034, February 26, 1979); and (3) if promulgated, will not have a significant economic impact, positive or negative, on a substantial number of small entities under the criteria of the Regulatory Flexibility Act. A copy of the draft regulatory evaluation prepared for this action is contained in the Rules Docket. A copy of it may be obtained by contacting the Rules Docket at the location provided under the caption **ADDRESSES.**

Air transportation, Aircraft, Aviation safety, Safety.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, the Federal Aviation Administration proposes to amend part 39 of the Federal Aviation Regulations (14 CFR part 39) as follows:

PART 39—AIRWORTHINESS DIRECTIVES

1. The authority citation for part 39 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40113, 44701.

§ 39.13 [Amended]

2. Section 39.13 is amended by adding the following new airworthiness directive:

McDonnell Douglas: Docket 97–NM–99–AD. *Applicability:* Model DC–9–31 series airplanes, as listed in McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997, certificated in any category.

Note 1: This AD applies to each airplane identified in the preceding applicability provision, regardless of whether it has been modified, altered, or repaired in the area subject to the requirements of this AD. For airplanes that have been modified, altered, or repaired so that the performance of the requirements of this AD is affected, the owner/operator must request approval for an alternative method of compliance in accordance with paragraph (f) of this AD. The request should include an assessment of the effect of the modification, alteration, or repair on the unsafe condition addressed by this AD; and, if the unsafe condition has not been eliminated, the request should include specific proposed actions to address it.

Compliance: Required as indicated, unless accomplished previously.

To detect and correct fatigue cracking in the fuselage skin or doubler at the corners of the forward service door doorjamb, which could result in rapid decompression of the fuselage and consequent reduced structural integrity of the airplane, accomplish the following:

Note 2: Where there are differences between the service bulletin and the AD, the AD prevails.

Note 3: The words "repair" and "modify/modification" in this AD and the referenced service bulletin are used interchangeably.

Note 4: This AD will affect Principal Structural Element (PSE) 53.09.033 of the DC–9 Supplemental Inspection Document (SID).

(a) Prior to the accumulation of 50,000 total landings, or within 3,225 landings after the effective date of this AD, whichever occurs later, perform a one-time visual inspection to determine if the corners of the forward service door doorjamb have been modified. Perform the inspection in accordance with McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997.

(b) For airplanes identified as Group 1 in McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997: If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward service door doorjamb *have not been modified,* prior to further flight, perform a low frequency eddy current (LFEC) or x-ray inspection to detect cracks of the fuselage skin and doubler at all corners of the forward service door doorjamb, in accordance with McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997.

(1) Group 1, Condition 1. If no crack is detected during any LFEC or x-ray inspection required by paragraph (b) of this AD, accomplish the requirements of either paragraph (b)(1)(i) or (b)(1)(ii) of this AD, in accordance with the service bulletin.

(i) *Option 1.* Repeat the LFEC inspection required by this paragraph thereafter at intervals not to exceed 3,225 landings, or the x-ray inspection required by this paragraph thereafter at intervals not to exceed 3,075 landings; or

(ii) *Option 2.* Prior to further flight, modify the corner skin of the forward service door

VOL 63 ISS 17 JA 27 1998 UMI

doorjamb in accordance with the service bulletin. Prior to the accumulation of 28,000 landings after accomplishment of the modification, perform a high frequency eddy current (HFEC) inspection to detect cracks on the skin adjacent to the modification, in accordance with the service bulletin.

(A) If no crack is detected on the skin adjacent to the modification during the HFEC required by this paragraph, repeat the HFEC inspection thereafter at intervals not to exceed 20,000 landings.

(B) If any crack is detected on the skin adjacent to the modification during any HFEC inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(2) Group 1, Condition 2. If any crack is found during any LFEC or x-ray inspection required by paragraph (b) of this AD, and the crack is 2 inches or less in length: Prior to further flight, modify/repair the corners of the doorjamb of the forward service door in accordance with the service bulletin. Prior to the accumulation of 28,000 landings after accomplishment of the modification, perform a HFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with the service bulletin.

(i) If no crack is detected during the HFEC inspection required by this paragraph, repeat the HFEC inspection thereafter at intervals not to exceed 20,000 landings.

(ii) If any crack is detected during any HFEC inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(3) Group 1, Condition 3. If any crack is found during any LFEC or x-ray inspection required by paragraph (b) of this AD, and the crack is greater than 2 inches in length: Prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(c) Group 2, Condition 1. For airplanes identified as Group 2 in McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997: If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward service door doorjamb *have been modified* previously in accordance with the McDonnell Douglas DC–9 Structural Repair Manual, using a steel doubler, accomplish either paragraph (c)(1) or (c)(2) of this AD in accordance with McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997.

(1) *Option 1.* Prior to the accumulation of 6,000 landings after accomplishment of that modification, or within 3,225 landings after the effective date of this AD, whichever occurs later, perform an HFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with the service bulletin.

(i) If no crack is detected during the HFEC inspection required by paragraph (c)(1) of this AD, repeat the HFEC inspection thereafter at intervals not to exceed 3,000 landings.

(ii) If any crack is detected during any HFEC inspection required by paragraph (c)(1) of this AD, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles ACO.

(2) *Option 2.* Prior to further flight, modify the corner skin of the forward service door doorjamb in accordance with the service bulletin. Prior to the accumulation of 28,000 landings after accomplishment of the modification, perform an HFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with the service bulletin.

(i) If no crack is detected on the skin adjacent to the modification during the HFEC required by this paragraph, repeat the HFEC inspection thereafter at intervals not to exceed 20,000 landings.

(ii) If any crack is detected on the skin adjacent to the modification during any HFEC inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(d) Group 2, Condition 2. For airplanes identified as Group 2 in McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997: If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward service door doorjamb *have been modified* previously in accordance with McDonnell Douglas DC–9 Structural Repair Manual, using an aluminum doubler, prior to the accumulation of 28,000 landings after accomplishment of that modification, or within 3,225 landings after the effective date of this AD, whichever occurs later, perform an HFEC inspection to detect cracks on the skin adjacent to the modification, in accordance with McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997.

(1) If no crack is detected on the skin adjacent to the modification during the HFEC required by this paragraph, repeat the HFEC inspection thereafter at intervals not to exceed 20,000 landings.

(2) If any crack is detected on the skin adjacent to the modification during any HFEC inspection required by this paragraph, prior to further flight, repair it in accordance with a method approved by the Manager, Los Angeles Aircraft Certification Office (ACO), FAA, Transport Airplane Directorate.

(e) Group 2, Condition 3. For airplanes identified as Group 2 in McDonnell Douglas Service Bulletin DC9–53–288, dated February 10, 1997: If the visual inspection required by paragraph (a) of this AD reveals that the corners of the forward service door doorjamb *have been modified* previously, but not in accordance with McDonnell Douglas Structural Repair Manual, prior to further flight, repair the corners in accordance with a method approved by the Manager, Los Angeles ACO.

(f) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Los Angeles ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Los Angeles ACO.

Note 5: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Los Angeles ACO.

(g) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on January 20, 1998.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

14 CFR Part 71

[Airspace Docket No. 97–AEA–45]

Proposed Amendment to Class E Airspace; Blacksburg, VA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Class E airspace area at Blacksburg, VA. The development of a new Standard Instrument Approach Procedure (SIAP) based on the Global Positioning System (GPS) at Virginia Tech Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to accommodate the SIAP and for instrument Flight Rules (IFR) operations at the airport.

DATES: Comments must be received on or before February 26, 1998.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, AEA–520, Docket No. 97–AEA–45, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, NY 11430.

The official docket may be examined in the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours in the Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

FOR FURTHER INFORMATION CONTACT: Mr. Francis T. Jordan, Jr., Airspace Specialist, Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AEA–45." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR Part 71 to amend the Class E airspace area at Blacksburg, VA. A GPS RWY 12 SIAP has been developed for the Virginia Tech Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommdate the SIAP and for IFR operations at the airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated Spetember 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporated by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporated by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Powers, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AEA VA E5 Blacksburg, VA [Revised]

Virginia Tech Airport, Blacksburg, VA
(Lat. 37°12'28"N., long 80°24'29"W.)

That airspace extending upward from 700 feet above the surface within a 10-mile radius of Virginia Tech Airport and within 4 miles each side of the 297° bearing from the airport extending from the 10-mile radius to 17 miles northwest of the airport, excluding the portions that coincide with the Roanoke, VA, and Dublin, VA, Class E airspace areas.

Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AEA–46." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR Part 71 to amend the Class E airspace area at Danville, VA. The ILS RWY 2 SIAP and the VOR RWY 20 SIAP for Danville Regional Airport have been amended. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the amended SIAPs and for IFR operations at the airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

Federal Aviation Administration

14 CFR Part 71

[Airspace Docket No. 97–AEA–47]

Proposed Revocation of Class E Airspace; Pennington Gap, VA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to remove the Class E airspace area at Lee County Airport, Pennington Gap, VA. The Nondirectional Radio Beacon (NDB) or Global Positioning System (GPS) Standard Instrument Approach Procedure (SIAP) was canceled on September 11, 1997. This was the only SIAP to Lee County, Airport. Consequently, the need for Class E airspace no longer exists for Instrument Flight Rules (IFR) operations at the airport. Adoption of this proposal would result in the affected area reverting to Class G airspace.

DATES: Comments must be received on or before February 26, 1998.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, AEA–520, Docket No. 97–AEA–47, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, NY 11430.

The official docket may be examined in the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours in the Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

FOR FURTHER INFORMATION CONTACT: Mr. Francis T. Jordon, Jr., Airspace Specialist, Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AEA–47." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA proposes to amend 14 CFR part 71 to remove the Class E airspace extending upward from 700 feet above the surface at Lee County Airport, Pennington Gap, VA. The NDB or GPS A SIAP has been canceled, negating the need for airspace to accommodate IFR operations. The area will be removed from appropriate aeronautical charts. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document will be removed subsequently from the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

[Airspace Docket No. 97–AEA–48]

Proposed Amendment to Class E Airspace; Galax, VA

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Class E airspace area at Galax, VA. The development of a new Standard Instrument Approach Procedure (SIAP) based on the Global Positioning System (GPS) at Twin County Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to accommodate the SIAP and for Instrument Flight Rules (IFR) operations at the airport.

DATES: Comments must be received on or before February 26, 1998.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, AEA–520, Docket No. 97–AEA–48, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, NY 11430.

The official docket may be examined in the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430.

An informal docket may also be examined during normal business hours in the Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

FOR FURTHER INFORMATION CONTACT: Mr. Francis T. Jordan, Jr., Airspace Specialist, Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone (718) 553–4521.

VOL 63 ISS 17 JA 27 1998 UMI

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AEA–48." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to amend the Class E airspace area at Galax, VA. A GPS RWY 18 SIAP has been developed for the Twin County Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAP and for IFR operations at the airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designation and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AEA VA E5 Galax, VA [Revised]

Twin County Airport, VA
(lat. 36°45′58″N., long. 80°49′25″W.)

That airspace extending upward from 700 feet above the surface within a 13-mile radius of Twin County Airport, excluding the portion that coincides with the Stuart, VA, Dublin, VA, and Marion, VA, Class E airspace areas.

Proposed Amendment to Class E Airspace; Wilmington, DE

AGENCY: Federal Aviation Administration (FAA) DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to amend the Class E airspace area at Wilmington, DE. The development of a new Standard Instrument Approach Procedure (SIAP) based on the Global Positioning System (GPS) at New Castle County Airport has made this proposal necessary. Additional controlled airspace extending upward from 700 feet Above Ground Level (AGL) is needed to accommodate the SIAP and for Instrument Flight Rules (IFR) operations at the airport.

DATES: Comments must be received on or before February 26, 1998.

ADDRESSES: Send comments on the proposal in triplicate to: Manager, Airspace Branch, AEA–520, Docket No. 97–AEA–49, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy Int'l Airport, Jamaica, New York 11430.

The official docket may be examined in the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

An informal docket may also be examined during normal business hours in the Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430.

FOR FURTHER INFORMATION CONTACT: Mr. Francis T. Jordan, Jr., Airspace Specialist, Airspace Branch, AEA–520, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, New York 11430; telephone: (718) 553–4521.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AEA–49." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to amend the Class E airspace area at Wilmington, DE. A GPS RWY 9 SIAP has been developed for the New Castle County Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAP and for IFR operations at the airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

List of Subjects in 14 CFR Part 71

Airspace, Incorporation by reference, Navigation (air).

The Proposed Amendment

In consideration of the foregoing, the Federal Aviation Administration proposes to amend 14 CFR Part 71 as follows:

PART 71—DESIGNATION OF CLASS A, CLASS B, CLASS C, CLASS D, AND CLASS E AIRSPACE AREAS; AIRWAYS; ROUTES; AND REPORTING POINTS

1. The authority citation for Part 71 continues to read as follows:

Authority: 49 U.S.C. 106(g), 40103, 40113, 40120; E.O. 10854, 24 FR 9565, 3 CFR, 1959–1963 Comp., p. 389.

§ 71.1 [Amended]

2. The incorporation by reference in 14 CFR 71.1 of Federal Aviation Administration Order 7400.9E, Airspace Designations and Reporting Points, dated September 10, 1997, and effective September 16, 1997, is amended as follows:

Paragraph 6005 Class E airspace areas extending upward from 700 feet or more above the surface of the earth.

* * * * *

AEA DE E5 Wilmington, DE [Revised]

New Castle County Airport, DE
(lat. 39°40′43″N., long. 75°36′24″W.)
Summit Airpark, DE
(lat. 39°31′13″N., long. 75°43′14″W.)

That airspace extending upward from 700 feet above the surface within a 6.7-mile radius of New Castle County Airport and within 4 miles each side of the 258° bearing from the airport extending from the 6.7-mile radius to 10 miles west of the airport and within a 6.6-mile radius of Summit Airpark and within 2.2 miles each side of a line bearing 345° from a point a lat. 39°23′36″N., long. 75°40′35″W., extending from said point to the 6.6-mile radius of Summit Airpark, excluding the portion that coincides with the Toughkenamon, PA, Class E airspace area.

Comments Invited

Interested parties are invited to participate in this proposed rulemaking by submitting such written data, views, or arguments as they may desire. Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in developing reasoned regulatory decisions on the proposal. Comments are specifically invited on the overall regulatory, economic, environmental, and energy-related aspects of the proposal. Communications should identify the airspace docket number and be submitted in triplicate to the address listed above. Commenters wishing the FAA to acknowledge receipt of their comments on this notice must submit with those comments a self-addressed, stamped postcard on which the following statement is made: "Comments to Airspace Docket No. 97–AEA–50." The postcard will be date/time stamped and returned to the commenter. All communications received on or before the closing date for comments will be considered before taking action on the proposed rule. The proposal contained in this notice may be changed in light of comments received. All comments submitted will be available for examination in the Rules Docket both before and after the closing date for comments. A report summarizing each substantive public contact with the FAA personnel concerned with this rulemaking will be filed in the docket.

Availability of NPRMs

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Office of the Regional Counsel, AEA–7, F.A.A. Eastern Region, Federal Building #111, John F. Kennedy International Airport, Jamaica, NY 11430. Communications must identify the notice number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2A, which describes the application procedure.

The Proposal

The FAA is considering an amendment to 14 CFR part 71 to amend the Class E airspace area at Andover, NJ. A GPS RWY 3 SIAP has been developed for the Aeroflex-Andover Airport. Additional controlled airspace extending upward from 700 feet AGL is needed to accommodate the SIAP and for IFR operations at the airport. Class E airspace designations for airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9E, dated September 10, 1997, and effective September 16, 1997, which is incorporated by reference in 14 CFR 71.1. The Class E airspace designation listed in this document would be published subsequently in the Order.

The FAA has determined that this proposed regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. Therefore, this proposed regulation—(1) is not a "significant regulatory action" under Executive Order 12866; (2) is not a "significant rule" under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that would only affect air traffic procedures and air navigation, it is certified that this proposed rule would not have significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

DEPARTMENT OF DEFENSE

Department of the Navy

32 CFR Parts 721 and 722

Removal of Rules on Standards of Conduct and Reporting Procedures on Defense Related Employment

AGENCY: Department of the Navy, DOD.

ACTION: Final rule; removal.

SUMMARY: The Department of the Navy (DON) is removing rules for employee standards of conduct and reporting procedures for defense-related employment (32 CFR Parts 721 and 722). Both rules have been superseded, and in that they no longer have any effect, are removed immediately. Providing for a comment period before final action in this case would be unnecessary, impracticable, and contrary to public interest. However, DON will accept and consider comments from interested persons in evaluating the effect of this action.

DATES: *Effective Date of Removal:* January 27, 1998.

Comment date: Comments on this removal action should be submitted in writing to the address shown below on or before March 30, 1998.

ADDRESSES: Interested parties should submit written comments to Department of the Navy, Office of the Judge Advocate General, Administrative Law Division (Code 13), 200 Stovall Street, Alexandria, Virginia, 22332–2400.

FOR FURTHER INFORMATION CONTACT: Lieutenant Commander Mike Quinn, (703) 604–8200.

SUPPLEMENTARY INFORMATION:

A. Background

On April 12, 1989, President Bush issued Executive Order (E.O.) 12674, "Principles of Ethical Conduct for Government Officers and Employees." Section 201(a) of E.O. 12674 made the Office of Government Ethics (OGE) responsible for promulgating "a single, comprehensive, and clear set of executive-branch standards of conduct that shall be objective, reasonable, and enforceable."

The OGE issued uniform standards of ethical conduct for all employees of the executive branch, codified at 5 CFR Part 2635, on August 7, 1992 (57 FR 35006). These regulations became effective on February 3, 1993.

Section 301(a) of E.O. 12674 allows agency heads to supplement, where necessary and appropriate, the OGE standards of conduct. The Secretary of Defense, in consultation and conjunction with the OGE, issued supplemental ethical rules applicable to all Department of Defense (DOD) Components in August 1993. These supplemental rules, codified in 32 CFR Parts 83 and 84, state that the DOD "shall have a single source of standards of ethical conduct and ethics guidance, including direction in the areas of financial and employment disclosure systems, post-employment rules, enforcement, and training." See, 32 CFR 83.4(a) and 84.1(a).

With promulgation of the OGE regulations and the DOD "Joint Ethics Regulation," the DON's standards of conduct contained in 32 CFR part 721 have been completely superseded. The Secretary of the Navy formally cancelled the DON's standards of conduct instruction on April 11, 1997. For these reasons, the Navy is now removing and reserving 32 CFR part 721.

Similarly, the rule contained in 32 CFR part 722 no longer has any meaning or effect. Part 722 contains requirements and procedures for the filing of form DD 1787 by certain present, former or retired DON personnel in reporting employment with DOD prime contractors. Authority for this rule was formerly found in 10 U.S.C. 2397. The National Defense Authorization Act for Fiscal Year 1997 (Pub. L. 104–106, Sec. 4304) repealed this statutory provision. The reporting requirement that this Part implements no longer exists.

B. Determination to Remove Without Prior Public Comment

This removal action is being issued as a final rule, without a public comment period, as an exception to the DON's standard practice of soliciting comments during the rulemaking process. Providing a period of public comment in this case would be unnecessary, impracticable, and contrary to the public interest. This determination is based on several factors. First, removal of these Parts is entirely administrative and corrective in nature, not requiring the exercise of agency discretion. Second, this action has already been substantially delayed, and further delay is unwarranted. Finally, to allow these Parts to remain in the Code of Federal Regulations any longer may mislead and confuse the public and past or present DON employees regarding applicable ethics rules and post-government employment reporting requirements.

C. Matters of Regulatory Procedure

Executive Order 12866, Regulatory Planning and Review

Removal of these Parts does not meet the definition of "significant regulatory action" for purposes of E.O. 12866.

Regulatory Flexibility Act

Removal of these Parts will not have a significant economic impact on a substantial number of small entities for purposes of the Regulatory Flexibility Act (5 U.S.C. chapter 6).

Paperwork Reduction Act

Removal of these rules will not impose collection of information requirements for purposes of the Paperwork Reduction Act (44 U.S.C. chapter 35, 5 CFR Part 1320).

List of Subjects

32 CFR Part 721

Conflict of interests, Government employees, Military personnel, Reporting and recordkeeping requirements.

32 CFR Part 722

Conflict of interests, Government contracts, Government employees, Military personnel, Reporting and recordkeeping requirements.

PARTS 721 AND 722—[REMOVED AND RESERVED]

Under the authority of Sec. 4304, Public Law 104–106, 110 Stat. 186, and E.O. 12674, and for the reasons set forth in the preamble, remove and reserve parts 721 and 722 of title 32 of the Code of Federal Regulations.

Dated: January 13, 1998.

Michael I. Quinn,

Lieutenant Commander, Judge Advocate General's Corps, U.S. Navy, Federal Register Liaison Officer.

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Parts 154 and 155

[USCG–98–3350]

Review of Cap Increases; Response Plans for Marine Transportation-related (MTR) Facilities and Tank Vessels

AGENCY: Coast Guard, DOT.

ACTION: Request for comments.

SUMMARY: Current Coast Guard response plan regulations for MTR facilities and tank vessels contain requirements for on-water oil removal capacity (referred to as caps) that plan-holders transporting or transferring groups I through IV petroleum oil are required to meet in planning for a worst case discharge. The original caps were set in 1993 and were scheduled to increase by 25% on February 18, 1998, provided the Coast Guard completed a review of the cap increases and determined the cap increases were practicable. The Coast Guard's review of the cap increases is on-going. Therefore, the Coast Guard will not implement the cap increases as originally scheduled, and the 1993 caps will remain in effect pending the results of the review. The Coast Guard requests comments on the practicability of the cap increases.

DATES: Comments must be received on or before April 27, 1998.

ADDRESSES: You may mail comments to the Docket Management Facility, [USCG–98–3350], U.S. Department of Transportation, Room PL–401, 400 Seventh Street, SW., Washington, DC 20590–0001, or deliver them to room PL–401, located on the Plaza Level of the Nassif Building at the same address between 10 a.m. and 5 p.m., Monday through Friday, except Federal holidays. The telephone number is 202–366–9329.

The Docket Management Facility maintains the public docket for this request for information. Comments, and documents as indicated in this preamble, will become part of this docket and will be available for inspection or copying at room PL–401, located on the Plaza Level of the Nassif Building at the above address between 10 a.m. and 5 p.m., Monday through Friday, except Federal holidays. You may also access the public docket on the internet at http://dms.dot.gov.

SUPPLEMENTARY INFORMATION:

Regulatory History

The regulatory history for these regulations are recounted in the preambles of the final rules entitled "Vessel Response Plans" (61 FR 1052, January 12, 1996) and "Response Plans for Marine Transportation-Related Facilities" (61 FR 7890, February 29, 1996).

Background and Purpose

One important goal of the Oil Pollution Act of 1990 (OPA 90) is to increase the overall oil spill response capability in the United States. To achieve this goal, minimum on-water oil removal capacities were developed through two rulemakings and public meetings, including Negotiated Rulemaking Committee meetings. As a result, 33 CFR 154.1045(m) and 33 CFR 155.1050(o) set out caps which an owner or operator must ensure available, through contract or other approved means, in planning for a worst case discharge. These caps were established taking into account 1993 technology and availability of response resources.

In 1993, the Coast Guard set the caps at the present levels based on the following reasons. First, in many geographic areas of the U.S., on-water recovery capability and containment and protection resources simply did not exist for responding to a large spill—especially from a very large or ultra large crude carrier. Second, the Coast Guard believed Congress intended to encourage the development and enlargement of the response community, but not to cause significant, adverse economic impacts. To support this, the Coast Guard set a nationwide criteria as opposed to geographic-specific criteria as an incentive to improve the overall response capability in the United States. Third, the caps acknowledged a reasonable and practical limit to the amount of 1993 technology resources that could be constructively used during the first stages of a spill response. Lastly, the Coast Guard intended that the caps would ensure a baseline recovery capability, and would not limit the resources brought to bear during an actual oil discharge. Owners or operators were and still are expected to activate the response resources necessary for the particular circumstances of any spill, regardless of what has been contracted for the advance.

The 1998 cap, a 25% increase from the 1993 levels, was proposed as a planning target for increasing response capabilities. This increase was discussed by the Vessel Response Plan Negotiated Rulemaking Committee as an incentive to expand response capabilities within the United States to an obtainable and desirable level by 1998. The Coast Guard concurred with the recommendation from the Committee to evaluate the proposed cap increase before the increase would be implemented to determine if it remains practicable.

The Coast Guard believes that in certain geographic areas existing response capabilities already exceed the 1998 proposed cap. Several states have enacted state requirements that meet or exceed the 1998 caps. However, the Coast Guard understands that in other regions plan-holders may have great difficulty in meeting the 1998 increase. Additionally, the Coast Guard believes, since 1993, significant advances have occurred in the use and availability of high rate response techniques and technology within the United States. The Coast Guard intends to take into account these factors when reassessing the 1998 cap.

Reason for Equipment Caps Review

In accordance with the regulations 33 CFR 154.1045(n) and 33 CFR 155.1050(p), the Coast Guard is required to conduct a review of the 25% cap increase. During the review, which is ongoing, the Coast Guard will determine if the increase is practicable; if not, the Coast Guard will propose an alternative cap which may be higher or lower. The review is to include, but not be limited to, the following topics:

a. Increases in skimming efficiencies and improvements in design technologies;

b. Advances in oil tracking technology;

c. Improvements in high rate response techniques;

d. Other applicable technologies;

e. Increases in the availability of private response resources.

The regulations also state that the scheduled cap increase would occur on February 18, 1998, unless the review is not completed by the Coast Guard. The Coast Guard can not complete the review by February 18, 1998, and will not implement the cap increase as scheduled. Any changes or additional requirements will occur through the public notice and comment process and will not become effective until 90 days after publication of a **Federal Register** notice reporting the results of the review.

Request for Comments

The Coast Guard encourages interested persons to submit specific comments with regard to the requirements of 33 CFR 154.1045(m) and 33 CFR 155.1050(o). The Coast Guard is seeking comments to determine if the proposed increase to the cap remains practicable. Responses to the following questions regarding the proposed cap increase will be helpful in determining the practicality of these requirements:

(1) Is a 25% cap increase practicable? Nationally? Regionally?

(2) Have there been advances or improvements in the efficiency of mechanical recovery designs that should be considered in determining a new cap?

(3) Have there been improvements in oil tracking technologies that should be considered in determining a new cap?

(4) Have there been improvements in high rate response technologies such as dispersants, in situ burning, etc., that should be considered in determining a new cap?

(5) Have there been large increases in the availability of private resources within specific regions of the country?

Persons submitting comments should include their name and address, identify this request for information (USCG 98–XXX), and give the reason for each comment. Please submit two copies of all comments and attachments in an unbound format, no larger than 8½ by 11 inches, suitable for copying and electronic filing, to the DOT Docket Management Facility at the address under **ADDRESSES.** If you want acknowledgment of receipt of your comments, enclose a stamped, self-addressed postcard or envelope. The Coast Guard will consider all comments received during the comment period, and may propose a new cap based on the comments.

Dated: January 21, 1998.

Joseph J. Angelo,

Acting Assistant Commandant for Marine Safety and Environmental Protection.

BILLING CODE 4910–14–M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 194

[FRL–5954–7]

RIN 2060–AE30

Opportunity to Comment on EPA's Analysis of Air Drilling as it Relates to EPA's Proposed Rule: "40 CFR Part 194, Criteria for the Certification and Re-certification of the Waste Isolation Pilot Plant's (WIPP) Compliance with the 40 CFR Part 191 Disposal Regulations: Certification Decision"

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability.

SUMMARY: The Environmental Protection Agency (EPA) is announcing the availability of EPA's analysis of the practice of air drilling during petroleum exploration and its impact on the ability of the Waste Isolation Pilot Plant to contain radioactive waste within federal environmental and public health limits. EPA's analysis of air drilling is now available for review in the public dockets listed in **ADDRESSES**.

DATES: EPA is requesting public comment on EPA's review of air drilling. Comments must be received by EPA's official docket on or before February 27, 1998.

ADDRESSES: EPA's official docket for all rulemaking activities under the Waste Isolation Pilot Plant Land Withdrawal Act, as amended, is located in Washington, DC, in the Air Docket, Room M1500, Mailcode 6102, U.S. EPA, 401 M Street, SW, Washington, DC 20460. Information on EPA's radioactive waste disposal standards (40 CFR part 191), the compliance criteria (40 CFR part 194), and EPA's proposed decision to certify WIPP is filed in the official EPA Air Docket, Dockets No. R–89–01, A–92–56, and A–93–02, respectively, and is available for review at the following three EPA WIPP docket locations in New Mexico: in Carlsbad at the Municipal Library, Hours: Mon–Thu, 10–9, Fri–Sat, 10–6, and Sun 1–5; in Albuquerque at the Government Publications Department, Zimmerman Library, University of New Mexico, Hours: Mon–Thu, 8–9, Fri, 8–5, Sat–Sun, 1–5; and in Santa Fe at the Fogelson Library, College of Santa Fe, Hours: Mon–Thu, 8–12 Midnight, Fri, 8–5, Sat, 9–5, and Sun, 1–9.

Note: The dockets in New Mexico contain only major items from the official Air docket in Washington, DC, plus all those documents added to the official docket since the October 1992 enactment of the WIPP Land Withdrawal Act, Pub. L. No. 102–579 (LWA). As provided in EPA's regulations at 40 CFR Part 2, and in accordance with normal Air docket procedures, if copies of any docket materials are requested, a reasonable fee may be charged for photocopying.

FOR FURTHER INFORMATION CONTACT: Tom Peake, Office of Radiation and Indoor Air, (202) 564–9310 or call EPA's 24-hour toll-free WIPP Information Line, 1–800–331–WIPP.

SUPPLEMENTARY INFORMATION:

Background

The Department of Energy (DOE) is developing the Waste Isolation Pilot Plant (WIPP) near Carlsbad in southeastern New Mexico as a potential deep geologic repository for disposal of transuranic (TRU) radioactive waste. As defined by the WIPP LWA, as amended, TRU waste consists of materials containing elements having atomic numbers greater than 92 (with half-lives greater than twenty years), in concentrations greater than 100 nanocuries of alpha-emitting TRU isotopes per gram of waste. Most TRU waste consists of items contaminated during the production of nuclear weapons, e.g., rags, equipment, tools, and organic and inorganic sludges.

On October 23, 1997, the Environmental Protection Agency (EPA) announced its proposed decision to issue to the Secretary of the Department of Energy (DOE) a "certification of compliance" that the WIPP will comply with EPA's radioactive waste disposal standards at 40 CFR part 191, subject to several conditions related to: (1) Waste characterization (to determine the radionuclides and other contents of waste disposal containers); (2) quality assurance programs at DOE waste generator sites; (3) implementation of passive institutional controls (PICs) (intended to warn future generations about the hazards of the radioactive waste buried in the WIPP); and (4) panel seals (used to contain the waste within compartments in the facility). In addition, DOE is required to report to EPA any change in the activities or conditions at the WIPP that differ from those described in the Compliance Certification Application (CCA), and to immediately inform EPA of any activities or conditions at the WIPP that might cause the WIPP to exceed the containment requirements of the disposal regulations. This proposal, entitled "Criteria for the Certification and Recertification of the Waste Isolation Pilot Plant's Compliance with the 40 CFR Part 191 Disposal Regulations: Certification Decision; Proposed Rule," was published in the **Federal Register** at 62 FR 58791–58838 on October 30, 1997, which marked the start of a 120-day public comment period. EPA's proposed decision to certify WIPP is based on an extensive independent technical review and evaluation (including confirmatory audits and inspections) of the DOE's CCA and supplemental materials based on the requirements specified in the WIPP Compliance Criteria at 40 CFR part 194.

The public has raised air drilling for petroleum exploration as a potential scenario that should have been considered by the DOE in its submission of the Certification Compliance Application CCA. In the CCA, DOE assumes that mud is the fluid used in conjunction with drilling for resources. EPA has received comments indicating that the use of air (instead of mud) is a drilling technique that should be considered in the performance of the WIPP. EPA has analyzed the potential for air drilling, and the potential impacts that air drilling could have on the performance of the WIPP. This analysis is now available for public review in EPA's dockets.

The Agency concludes from its analysis of the impacts of air drilling that no adverse consequences would result on the ability of the WIPP site to meet the Agency radioactive waste disposal standards at 40 CFR 191. Therefore, the Agency's proposed decision of October 23, 1997, to issue the DOE a certification of compliance remains unchanged.

Dated: January 21, 1998.

50 CFR Part 17

RIN 1018–AE53

Endangered and Threatened Wildlife and Plants; Proposed Endangered Status for Erigeron decumbens var. decumbens (Willamette Daisy) and Fender's Blue Butterfly (Icaricia icarioides fenderi) and Proposed Threatened Status for Lupinus sulphureus ssp. kincaidii (Kincaid's lupine)

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule.

VOL
63
ISS
17
JA
27
1998
UMI

SUMMARY: The U.S. Fish and Wildlife Service (Service) proposes endangered status pursuant to the Endangered Species Act (Act) of 1973, as amended, for a plant and a butterfly, *Erigeron decumbens* var. *decumbens* (Willamette daisy) and Fender's blue butterfly (*Icaricia icarioides fenderi*), and proposes threatened status for a plant, *Lupinus sulphureus* ssp. *kincaidii* (Kincaid's lupine). These species are restricted to native prairie in the Willamette Valley of Oregon and are currently known from a few small remnants of a formerly widespread distribution. In addition to its Oregon occurrences, *L. sulphureus* ssp. *kincaidii* is also known from one small site in southern Washington. The three taxa are threatened by one or more of the following—commercial and/or residential development, agriculture, silviculture, road improvement, over-collection, herbicide use, and naturally occurring demographic and random environmental events. This proposal, if made final, would invoke the Federal protection and recovery provisions of the Act for these plant and butterfly species.

DATES: Comments from all interested parties must be received by March 30, 1998. Public hearing requests must be received by March 13, 1998.

ADDRESSES: Comments and materials concerning this proposal should be sent to the State Supervisor, U.S. Fish and Wildlife Service, Oregon State Office, 2600 SE 98th Ave., Suite 100, Portland, Oregon 97266. Comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Dr. Andrew F. Robinson, Jr., Botanist; or Diana Hwang, Fish and Wildlife Biologist, U.S. Fish and Wildlife Service (see **ADDRESSES** section above or telephone 503–231–6179, FAX 503–231–6195).

SUPPLEMENTARY INFORMATION:

Background

Fender's blue butterfly (*Icaricia icarioides fenderi*), *Lupinus sulphureus* ssp. *kincaidii* (Kincaid's lupine), and *Erigeron decumbens* var. *decumbens* (Willamette daisy) are restricted to the Willamette Valley of Oregon. The valley is a 209 kilometer (km) long (130 miles (mi)) and 32–64 km (20–40 mi) wide alluvial flood plain with an overall northward gradient (Orr *et al.* 1992). The valley is narrow and flat at its southern end, widening and becoming hilly near its northern end at the confluence of the Willamette and Columbia Rivers. In addition to its Oregon occurrences, *L. sulphureus* ssp. *kincaidii* is also known from one small site in southern Washington.

The alluvial soils of the Willamette Valley and southern Washington host a mosaic of grassland, woodland, and forest communities. Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* occupy native grassland habitats within the Willamette Valley. Based on the limited available evidence, Franklin and Dyrness (1973) asserted that most Willamette Valley grasslands are seral (one stage in a sequential progression), requiring natural or human-induced disturbance for their maintenance. Johannessen *et al.* (1971) indicated that the vast majority of Willamette Valley grasslands would be forested if left undisturbed. Important exceptions to this successional pattern are grass balds on valley hillsides, which may be climax grasslands due to the presence of deep, fine-textured, self-mulching soils or xeric (very dry) lithosoils (Franklin and Dyrness 1973).

Two native prairie types occur in the Willamette Valley, wet prairie and upland prairie. Fender's blue butterfly and *Lupinus sulphureus* ssp. *kincaidii* are typically found in native upland prairie with the dominant species being *Festuca rubra* (red fescue) and/or *Festuca idahoensis* (Idaho fescue) and *Calochortus tolmiei* (Tolmie's mariposa), *Silene hookeri* (Hooker's catchfly), *Fragaria virginiana* (broadpetal strawberry), *Sidalcea virgata* (rose checker-mallow), and *Lomatium* spp. (common lomatium) serving as herbaceous indicator species (Hammond and Wilson 1993). These dry, fescue prairies make up the majority of habitat for Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii*. Although Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* are occasionally found on steep, south-facing slopes and barren rocky cliffs, neither of these species appear capable of occupying the most xeric oatgrass communities on these south facing slopes.

The primary habitat for *Erigeron decumbens* var. *decumbens* is native wetland prairie. This habitat is characterized by the seasonally-wet *Deschampsia caespitosa* (tufted hairgrass) community that occurs in low, flat regions of the Willamette Valley where flooding creates anaerobic and strongly reducing soil conditions. This wet prairie community includes *Juncus* spp. (rush) and *Danthonia californica* (California oatgrass) as co-dominant native species, as well as the introduced species *Festuca arundinaceae* (tall fescue), *Bromus japonicus* (Japanese brome) and *Anthoxanthum odoratum* (sweet vernal grass) (USFWS 1993). Another endangered species, *Lomatium bradshawii* (Bradshaw's lomatium) also grows in wet prairie habitat. Atypically, one population of *E. decumbens* var. *decumbens* occurs on top of a dry, stony butte in an upland prairie.

The impact of humans on the botanical communities of the Willamette Valley date back several centuries to the Kalapooya Indians, who cleared and burned lands used for hunting and food gathering. Early accounts by David Douglas in 1826 indicate extensive burning of the valley floor, from its northern end at the falls of the Willamette River to its southern extremities near Eugene. Burned areas were documented by Douglas as being so complete as to limit the forage available for his horse and to reduce game availability (Douglas 1972). Accounts by other early explorers support Douglas' observations and suggest a pattern of annual burning by the Kalapooya (Johannessen *et al.* 1971). The Kalapooya land practices resulted in the maintenance of extensive wet and dry prairie grasslands, which may have facilitated their hunting efforts and limited the potential for sneak attacks by enemies (Clarke 1905, Douglas 1972, Minto 1900, Smith 1949). Although much of the woody vegetation was prevented from becoming established on the grasslands by this treatment, the random survival of young fire-resistant species such as *Quercus garryana* (Oregon white oak) accounted for the widely spaced trees on the margins of the valley (Habeck 1961). After 1848, burning decreased sharply through the efforts of settlers to suppress large-scale fires. Consequently, the open, park-like nature of the valley floor was lost, replaced by agricultural fields, dense oak and fir forests, and scrub lands following logging.

The Willamette basin covers approximately 2,600,000 hectares (ha) (6,400,000 acres (ac)), which was estimated in the mid-1880's to consist of one-sixth prairie and five-sixths forest (Lang 1885). The extent of the prairie component can be analyzed through historical information from land survey records. Natural grasslands described by Federal land surveyors in the 1850's were broken down into three distinct types—oak savannah, upland prairie, and wet prairie (Habeck 1961). Of the estimated 409,000 ha (1,010,000 ac) of historic native grasslands extant prior to 1850, approximately 277,000 ha (685,000 ac) appears to have consisted of upland prairie and 132,000 ha (325,000 ac) of wet prairie (E. Alverson, The Nature Conservancy, Eugene, pers. comm., 1994).

This extensive resource was rapidly depleted through the conversion of native prairie to agricultural use during settlement. Within 30 years of passage of the Donation Land Act of 1850, most prairie lands were occupied by European-American settlers who quickly subdivided their original land grants to accommodate the rapid increase in population (Lang 1885). The level, open tracts of prairie were the first to go under the plow (Lang 1885) and only boggy, flood-prone areas prevented complete conversion of the native grassland community to cropped monoculture. Limitations on development imposed by seasonal flooding and a high water table were, however, overcome after 1936, when the U.S. Army Corps of Engineers (Corps) initiated water projects to provide flood control and security for expanded agricultural activity.

Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii* and *Erigeron decumbens* var. *decumbens* likely once occurred over a large distribution throughout the historic native prairie, and have been eliminated from these areas as native prairie habitat has been converted to agriculture or otherwise developed. Native prairie vegetation in the Willamette Valley was decimated by the rapid expansion of agriculture during the 140-year period from the 1850's to the present. With extensive changes in the fire regime, disturbance forces that maintained native prairies were substantially altered. Fire suppression allowed shrub and tree species to overtake grasslands, while agricultural practices hastened the decline of native prairie species through habitat loss and increased grazing (Johannessen, *et al.* 1971; Franklin and Dyrness 1973). Refugia from these forces of change were limited to fence rows and intervening strips of land along agricultural fields and roadsides.

Although large prairie expanses dominated by native species had been lost by the early 1900's, many remnant grasslands with a large native species component have been recently identified. These remnants, even though dominated by exotic species, support the only remaining occurrences of native prairie species in the Willamette Valley. Current estimates of the remaining native upland prairie in the Willamette Valley total less than 400 ha (1,000 ac) (Alverson, pers. comm. 1994). This estimate represents only one-tenth of one percent of the original upland prairie once available to Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and less than one half of this habitat (84 sites) is currently occupied by Fender's blue butterfly and/or *L. sulphureus* ssp. *kincaidii* and/or *Erigeron decumbens* var. *decumbens*. Within this available habitat, *E. decumbens* var. *decumbens* occupies 28 sites across 116 ha (286 ac), *L. sulphureus* ssp. *kincaidii* occupies 51 sites across 145 ha (357 ac), while Fender's blue butterfly occupies 31 sites across 165 ha (408 ac). Similar losses have occurred for wet prairie habitats, but estimates of current acreage are not available.

Fender's Blue Butterfly

Fender's blue butterfly is one of about a dozen subspecies of Boisduval's blue butterfly (*Icaricia icarioides*). *Icaricia icarioides* is found in western North America; subspecies *fenderi* is restricted to the Willamette Valley (Dornfeld 1980; R. H. T. Mattoni, University of California, pers. comm. to C. Nagano 1997; J. Emmel, Hemet, California, pers. comm. to C. Nagano 1997). Fender's blue butterfly was described by Ralph W. Macey (1931) as *Plebejus maricopa fenderi* based on specimens he had collected in Yamhill County, Oregon. The species *maricopa* is currently considered to be a synonym of the species *icarioides* (Miller and Brown 1981). The species *icaricia* has been determined to be a member of the genus *Icaricia*, rather than the genus *Plebejus* (Miller and Brown 1981; R. H. T. Mattoni, pers. comm. to C. D. Nagano 1997). Subspecies *fenderi* was considered to be a synonym of the pardalis blue butterfly (*Icaricia icarioides pardalis*), an inhabitant of the central California Coast Range near San Francisco (Downey 1975; Miller and Brown 1981); however Fender's blue butterfly is a distinct taxon based on adult characters and geographic distribution (Dornfeld 1980; Hammond and Wilson 1993; R. H. T. Mattoni and J. Emmel, pers. comm. to C. D. Nagano 1997).

Fender's blue butterfly is a small sized butterfly with a wingspan of approximately 2.5 centimeter (cm) (1 inch (in)). The upper wings of the males are brilliant blue in color and the borders and basal areas are black. The upper wings of the females are completely brown colored. The undersides of the wings of both sexes are creamish tan with black spots surrounded with a fine white border or halo. The dark spots on the underwings of the males are small on Fender's blue butterfly; surrounded with wide white haloes on the pembina blue butterfly (*Icaricia icarioides pembina*); the underside is very pale whitish gray with broad haloes around the black spots on the hindwings of Boisduval's blue butterfly.

The historic distribution of Fender's blue butterfly is not precisely known due to the limited information collected on this species prior to its description in 1931. Although the type specimens for this butterfly were collected in 1929 by Ralph W. Macy, only a limited number of collections were made between the time of the subspecies' discovery and Macy's last observation on May 23, 1937, in Benton County, Oregon (Hammond and Wilson 1992a). A lack of information on the identity of the butterfly's host plant caused researchers to focus their survey efforts on common lupine species known to occur in the vicinity of Macy's collections. As a result, no Fender's blue butterflies were observed during 20 years of widespread investigation. Finally, Fender's blue butterfly was rediscovered in 1989 by Dr. Paul Hammond at McDonald Forest, Benton County, Oregon on an uncommon species of lupine, *Lupinus sulphureus* ssp. *kincaidii*. Based on this additional information, recent surveys have determined that the animal is confined to the Willamette Valley and currently occupies 31 sites in Yamhill, Polk, Benton, and Lane Counties (Hammond and Wilson 1993; Schultz 1996). One population at Willow Creek is found in wet, *Deschampsia*-type prairie, while the remaining sites are found on drier upland prairies characterized by *Festuca* spp. Sites occupied by Fender's blue butterfly are located almost exclusively on the western side of the valley, within 33 km (21 mi) of the Willamette River.

Although only limited observations have been made of the early life stages of Fender's blue butterfly, the life cycle of the species likely is similar to other subspecies of *Icaricia icarioides* (R. H. T. Mattoni, pers. comm. to C. Nagano 1997; G. Pratt, Riverside, California, pers. comm. to C. Nagano 1997; Hammond and Wilson 1993). Adult butterflies lay their eggs on perennial *Lupinus* sp. (Ballmer and Pratt 1988), the foodplant of the caterpillar during May and June. Newly hatched larvae feed for a short time, reaching their second instar in the early summer, at which point they enter an extended diapause (maintaining a state of suspended activity). Diapausing larvae remain in the leaf litter at or near the base of the host plant through the fall and winter and some individuals likely become active again in March or April of the following year. Some larvae may be able to extend diapause for more than one season depending upon the

VOL 63 ISS 17 JA 27 1998 UMI

individual and environmental conditions (R. H. T. Mattoni pers. comm. to C. Nagano 1997). Once diapause is broken, the larvae feed and grow through three to four additional instars, enter their pupal stage, and then emerge as adult butterflies in April and May. Behavioral observations of Fender's blue butterfly indicate the larvae are alert to potential predators, with individuals dropping from their feeding position on lupine leaves to the base of the plant at the slightest sign of disturbance (C. Schultz, University of Washington, pers. comm. 1994). The life cycle of Fender's blue butterfly may be completed in one year.

The larvae of many species of lycaenid butterflies, including *Icaricia icarioides*, possess specialized glands that secrete a sweet solution sought by some ant species who may actively "tend" and protect them from predators and parasites (Ballmer and Pratt 1988; G. Pratt pers. comm. to C. Nagano 1997). Although other subspecies of Boisduval's blue butterfly are tended by ants during their larval stage (Downey 1962, 1975; Thomas Reid Associates 1982; R. H. T. Mattoni and G. Pratt, pers. comm. to C. Nagano 1997), limited observations of Fender's blue butterfly larvae in the field have failed to document such a mutualistic association (Hammond 1994). However, this may be due to the nocturnal activity patterns of the larvae of *Icaricia icarioides* as it appears that this species has an obligate relationship with ants (G. Pratt pers. comm. to C. Nagano 1997). Non-native Argentine ants (*Iridomyrmex humilis*) have been observed tending Fender's blue butterfly larvae during indoor rearing trials (Schultz, pers. comm. 1994).

The near absence of Fender's blue butterfly at sites without *Lupinus sulphureus* ssp. *kincaidii* suggest that *L. laxiflorus* (spurred lupine) and *L. albicaulis* (sickle keeled lupine) are secondary foodplants used by the animal (Hammond and Wilson 1993k). Fender's blue butterfly inhabits two sites that contain only *L. laxiflorus*, where it is the primary foodplant (Schultz 1996) and *L. laxiflorus* co-occurs with *L. sulphureus* ssp. *kincaidii* at two additional sites (Hammond and Wilson 1993). Fender's blue butterfly occupies six sites containing only *L. albicaulis*, where it is the primary foodplant. However, the butterfly is declining at two of these sites. *Lupinus albicaulis* and *L. laxiflorus* may possess physical or biochemical properties that render them less suitable for Fender's blue butterfly than *L. sulphureus* ssp. *kincaidii*. This phenomenon in foodplants has been documented in other species of butterflies and moths (Longcore *et al.* 1997).

Lupinus Sulphureus ssp. Kincaidii

Lupinus sulphureus ssp. *kincaidii* was first described in 1924 by C.P. Smith as *L. oreganus* var. *kincaidii* from a collection made in Corvallis, Oregon (Kuykendall and Kaye 1993a). Phillips (1955) transferred the taxon to a subspecies status as *L. sulphureus* ssp. *kincaidii*. Hitchcock et al. (1961) retained the position noted by Phillips (1955), but preferred the combination as a varietal rank, *L. sulphureus* var. *kincaidii*.

Lupinus sulphureus ssp. *kincaidii* occupies 51 sites throughout the Willamette Valley and one site in southern Washington. The northern limit of *L. sulphureus* ssp. *kincaidii* is Lewis County, Washington, while it ranges south to Douglas County, Oregon, a latitudinal span of over 400 km (250 mi). This distribution implies a close association with native upland prairie sites that are characterized by heavier soils and mesic to slightly xeric soil moisture levels. At the southern limit of its range, the subspecies occurs on well-developed soils adjacent to serpentine outcrops where the plant is often found under scattered oaks (Kuykendall and Kaye 1993a).

With its low-growing habit and unbranched inflorescence, *Lupinus sulphureus* ssp. *kincaidii* is easily distinguished from other sympatric members of the genus *Lupinus*. Its aromatic flowers have a slightly reflexed, distinctly ruffled banner and are yellowish-cream colored, often showing shades of blue on the keel. The upper calyx lip is short, yet unobscured by the reflexed banner when viewed from above. The leaflets tend to be a deep green with an upper surface that is often glabrous. The plants are 4–8 decimeters (dm) (16–32 in) tall, with single to multiple unbranched flowering stems and basal leaves that remain after flowering (Kuykendall and Kaye 1993).

Lupinus sulphureus ssp. *kincaidii* is a long-lived perennial species, with a maximum reported age of 25 years (M. Wilson, Oregon State University, *in litt.*, 1993). Individual plants are capable of spreading by rhizomes producing clumps of plants exceeding 20 meters (m) (65.62 feet (ft)) in diameter (P. Hammond, independent consultant, pers. comm. 1994). The long rhizomes do not produce adventitious roots, apparently do not separate from the parent clump, and the clumps may be short-lived, regularly dying back to the crown (Kuykendall and Kaye 1993a). Self-incompatible, *L. sulphureus* ssp. *kincaidii* is pollinated by solitary bees and flies (P. Hammond, pers. comm. 1994). Seed set and seed production are low, with few (but variable) numbers of flowers producing fruit from year to year and each fruit containing an average of 0.3–1.8 seeds (Liston *et al.* 1994). Seeds are dispersed from fruits that open explosively upon drying.

Erigeron Decumbens var. Decumbens

Thomas Nuttall (1840) based his description of *Erigeron decumbens* on a specimen he collected in the summer of 1835. The autonym *E. decumbens* var. *decumbens* was automatically established by Cronquist (1947) when he described *E. decumbens* var. *robustior*. Recent revisions of the *Erigeron* genus (Strother and Ferlatte 1988, Nesom 1989) treat the plant as a variety, *E. decumbens* var. *decumbens*.

According to Strother and Ferlatte (1988), *Erigeron decumbens* var. *decumbens* is geographically limited to the Willamette Valley. They also restrict the morphologically similar *E. decumbens* var. *robustior* to Humboldt and western Trinity Counties, California. Intermediate specimens of *Erigeron* from southern Oregon are considered by Strother and Ferlatte (1988) to be robust specimens of *E. eatonii* var. *plantagineus*.

A review of herbarium specimens by Clark *et al.* (1993) shows a historical distribution of *Erigeron decumbens* var. *decumbens* throughout the Willamette Valley. Collections were frequent between 1881 and 1934, yet from 1934 to 1980 no collections or observations were made (Clark *et al.* 1993). The species was rediscovered in 1980 in Lane County, Oregon, and has since been identified at 28 sites in Polk, Marion, Linn, Benton, and Lane counties, Oregon. With 28 occurrences and 115 ha (284 ac) of occupied habitat, *E. decumbens* var. *decumbens* has the most restricted range of the species proposed for listing herein.

Erigeron decumbens var. *decumbens* is a perennial herb, 15–60 mm (0.6–2.4 in.) tall, with erect to sometimes prostrate stems at the base. The basal leaves often wither prior to flowering and are mostly linear, 5–12 cm (2–5 in.) long and 3–4 mm (0.1–0.2 in.) wide. Flowering stems produce 2–5 heads, each of which is daisy-like, with pinkish to pale blue ray flowers and yellow disk flowers. Ray flowers often fade to white with age (Siddall and Chambers 1978). The morphologically similar *E. eatonii* occurs east of the Cascade Mountains, while the sympatric species *Aster hallii* flowers later in the summer. *Erigeron decumbens* var. *decumbens* can be confused with *A. hallii* in their vegetative state, but close examination reveals the reddish stems of *A. hallii* in contrast to the green stems of *E. decumbens* var. *decumbens* (Clark *et al.* 1993).

As with many species in the family Asteraceae, *Erigeron decumbens* var. *decumbens* produces large quantities of wind-dispersed seed. Flowering typically occurs in June and July with pollination carried out by syphrid flies and solitary bees. Seeds are released in July and August. Although the seeds are wind-dispersed, the short stature of this species likely precludes the long-distance travel of many of these seeds. *Erigeron decumbens* var. *decumbens* is capable of vegetative spreading and is commonly found in large clumps scattered throughout a site (Clark *et al.* 1993).

Previous Federal Action

Erigeron decumbens var. *decumbens* was initially included as a category 2 candidate in a Notice of Review published by the Service on December 15, 1980 (45 FR 82506). Category 2 candidates were those species for which the Service had information in its possession indicating that listing may be appropriate, but for which additional information was needed to support the preparation of a proposed rule. On November 28, 1983, the Service published a Notice of Review upgrading this species to category 1 status (48 FR 53649). Category 1 taxa were taxa for which the Service had sufficient data in its possession to support preparation of listing proposals. Subsequently, *E. decumbens* var. *decumbens* was reassigned category 2 candidacy by a Notice of Review published on September 27, 1985 (50 FR 39527). On February 21, 1990 the Service published a Notice of Review (55 FR 6202) that reinstated *E. decumbens* var. *decumbens* as a category 1 candidate and also designated *Lupinus sulphureus* ssp. *kincaidii* as a category 2 candidate (55 FR 6121). The Service published a Notice of Review on February 28, 1996 (61 FR 7596), updating the candidate species list and changing the policy on candidates to discontinue the use of candidate categories. *Erigeron decumbens* var. *decumbens* was retained as a candidate species; however, *Lupinus sulphureus* ssp. *kincaidii* and other former category 2 candidates were not. The 1997 Notice of Review retained *Erigeron decumbens* var. *decumbens* as a candidate species; *Lupinus sulphureus* ssp. *kincaidii* was not included as a candidate. Since this Notice of Review was published, the Service has reevaluated the available information and determined that listing is warranted for both *Erigeron decumbens* var. *decumbens* and *Lupinus sulphureus* ssp. *kincaidii*.

Fender's blue butterfly was initially assigned to category 3A taxa in the Notice of Review published by the Service on January 6, 1989 (54 FR 572). The best available information at that time indicated that this butterfly was likely extinct because the subspecies was last observed in 1937. Category 3A taxa were taxa for which the Service had pervasive evidence of extinction, however if rediscovered, such taxa might be reconsidered for listing. The rediscovery of this butterfly in May 1989 prompted the Service to change the status of the subspecies to a category 2 candidate in the Notice of Review published on November 21, 1991 (56 FR 58830). In the Notice of Review published on February 28, 1996 (61 FR 7596), the Service retained Fender's blue butterfly as a candidate for listing. The 1997 Notice of Review also retained Fender's blue butterfly as a candidate for listing.

The processing of this proposed listing rule conforms with the Service's final listing priority guidance for fiscal year (FY) 1997 that was published in the **Federal Register** on December 5, 1996 (61 FR 64475–64481), and the Service's extension of the FY 1997 guidance published in the **Federal Register** on October 23, 1997 (62 FR 55268). The guidance clarifies the order in which the Service will process rulemakings following two related events—(1) the lifting, on April 26, 1996, of the moratorium on final listings imposed on April 10, 1995 (Public Law 104–6), and (2) the restoration of significant funding for listing through passage of the omnibus budget reconciliation law on April 26, 1996, following severe funding constraints imposed by a number of continuing resolutions between November 1995 and April 1996. The guidance calls for giving highest priority to handling emergency situations (Tier 1) and second highest priority (Tier 2) to resolving the listing status of the outstanding proposed listings. Tier 3 includes the processing of new proposed listings for species facing high magnitude threats. This proposed rule for Fender's blue butterfly (*Icaricia icarioides fenderi*), *Lupinus sulphureus* ssp. *kincaidii* (Kincaid's lupine), and *Erigeron decumbens* var. *decumbens* (Willamette daisy) falls under Tier 3. According to the Listing Priority Guidance, the Service is operating under a more balanced listing program and may process Tier 3 actions. Processing of this proposed rule is in accordance with the current Listing Priority Guidance.

Summary of Factors Affecting the Species

Section 4 of the Endangered Species Act and regulations (50 CFR Part 424) promulgated to implement the listing provisions of the Act set forth the procedures for adding species to the Federal lists. A species may be determined to be an endangered or threatened species due to one or more of the five factors described in Section 4(a)(1). These factors and their application to Fender's blue butterfly (*Icaricia icarioides fenderi*), *Lupinus sulphureus* Dougl. ssp. *kincaidii* (Smith) Phillips (Kincaid's lupine), and *Erigeron decumbens* Nutt. var. *decumbens* (Willamette daisy) are as follows.

A. The Present or Threatened Destruction, Modification, or Curtailment of its Habitat or Range

The primary loss of habitat for Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* has resulted from the extensive alteration of native prairie in the Willamette Valley that has occurred over the last 140 years, described in the "Background" section above. As a result, over 99 percent of the native prairie in the Willamette Valley, the only known habitat area of Fender's blue butterfly, *L. sulphureus* ssp. *kincaidii*, and *E. decumbens* var. *decumbens*, has been lost (E. Alverson, pers. comm. 1994).

Within the 84 remnants of native prairie occupied by these species in the Willamette Valley, Fender's blue butterfly occurs at 31 sites (Hammond and Wilson 1993, Schultz 1996), *Lupinus sulphureus* ssp. *kincaidii* occurs at 51 sites (Kuykendall and Kaye 1993a), and *Erigeron decumbens* var. *decumbens* occurs at 28 sites (Clark *et al.* 1993). In this collection of sites, Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* are found in close association, occurring together at a total of 24 sites. *Erigeron decumbens* var. *decumbens* co-occurs with *L. sulphureus* ssp. *kincaidii* at only one site and with Fender's blue butterfly at only this same site, Baskett Butte. Typically these sites are small, with extirpation likely in the near future. Activities that destroy, modify or curtail the habitat of *L. sulphureus* ssp. *kincaidii*, *E. decumbens* var. *decumbens*, and Fender's blue butterfly are discussed below.

The immediacy of the threat of habitat loss in the last remaining 84 remnants of native prairie occupied by these species has been well documented. Habitat at 80 percent of the sites (e.g., 68 sites) is rapidly disappearing due to

agriculture practices, development activities, forestry practices, grazing, roadside maintenance, and commercial Christmas tree farms.

At least eleven prairie remnants are likely to be impacted by agricultural activities. Five of these are wetland prairies occupied by *Erigeron decumbens* var. *decumbens* and the remaining six are upland prairies occupied by *Lupinus sulphureus* ssp. *kincaidii* and Fender's blue butterfly. The types of impacts include examples such as a wheat field boundary adjustment near Buell in Polk County (Mill Creek-Hwy 22 at Buell) that is likely to lead to loss of a population of Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* (Hammond 1994). By 1996, this boundary adjustment was implemented with a diminished population of *L. sulphureus* ssp. *kincaidii* and Fender's blue butterfly still present; however, no Fender's blue butterflies were observed at this site in 1997 (Hammond, pers. comm. 1997). The majority of the habitat supporting populations of each of these species are habitat remnants, e.g., small habitat patches remaining after other habitat loss has occurred. Small habitat patches that occur along State and County roadsides face greater threats from agriculture than those occurring along non-roadside areas. While in past decades many roadside habitats were less disturbed, today roadside stretches of habitats adjoining grass seed farms are now being disked and/or sprayed with herbicides to kill all roadside vegetation (A. Robinson, U.S. Fish and Wildlife Service, pers. comm. 1997). Grass seed farms use herbicide spraying to create bare soil as a common practice to prevent the spread of weeds from roadsides into the grass seed fields. Many of these areas are inhabited by populations of *E. decumbens* var. *decumbens*.

Urban development has caused additional loss of prairie habitat (Clark *et al.* 1993; Hammond 1992, 1994, 1996; Kuykendall and Kaye 1993; Liston *et al.* 1994; Schultz, 1996; Sidall and Chambers 1978). Destruction of upland prairie habitat occupied by Fender's blue butterfly and *Lupinus sulphureus* ssp. *kincaidii* at several sites since 1992 has caused the butterflies at these sites to either completely die out or to be reduced to low, non-viable numbers (Hammond 1994, 1996). Future losses for 48 prairie remnants are projected as a result of urban development. This is the largest single factor currently threatening the survival of these prairie species. Nineteen of these remnants are wetland prairies supporting *Erigeron decumbens* var. *decumbens* and the other 29 are upland prairie remnants supporting populations of Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii*.

Examples of this type of threat are the Dallas-Oakdale Avenue sites 1 and 2 covering about 2 ha (5 ac) occupied by Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* near the town of Dallas in Polk County that is expected to be lost due to housing development planned at that site (Hammond 1996). The loss of native prairie habitat is further exemplified by the destruction of a site supporting 6,000 plants in Lane County, formerly the largest occurrence of *E. decumbens* var. *decumbens*, plowed under in 1986 prior to the development of an industrial and residential site (Kagan and Yamamoto 1987). Construction of a single driveway resulted in the loss of one site occupied by Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* in Kings Valley (Hammond 1994). Future highway construction potentially threatens the Nielson Road site of *L. sulphureus* ssp. *kincaidii* located in a highway expansion corridor in Lane County (Oregon Natural Heritage Program 1996). The population of Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* at Wren in Benton County occurs at two sites and covers about 9 ha (22 ac, however, only a portion of the population (7.4 ha) occurs on land owned by The Nature Conservancy (TNC). Heavy clearing and mowing activities on private lands adjacent to the TNC property has caused the decline of the lupine and is reducing the butterfly population at the Wren site to a non-viable state (Hammond and Wilson 1993). At the Willow Creek Main site, Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* occur together. This site is actively managed for the benefit of the species and the lands are considered relatively secure from development threats. Although this TNC site is considered a secure habitat area, extensive damage to habitat occupied by Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* occurred in 1996 during pipeline repair work conducted on a utility corridor easement. Two other moderately sized habitat patches occupied by *E. decumbens* var. *decumbens* face habitat loss from trash dumping (at the Grande Ronde site) and urbanization (at the west Eugene site) (Clark *et al.* 1993).

Silvicultural activities for timber production have threatened 6 percent (5 sites) of the remaining 84 prairie occurrences. The Coburg Ridge area-2 site in Lane County is the largest site occupied by Fender's blue butterfly and is among the best examples of remnant upland native prairie in the Willamette Valley (Hammond 1994). Native species were severely damaged, however, by the application of grass-specific herbicide that eliminated grasses and severely damaged other herbaceous species prior to tree planting activities. Approximately 1 ha (2.5 ac) was sprayed with herbicide. The saddle section of Coburg Ridge (area-2) that received aerial application of the herbicide is used by Fender's blue butterfly due to the presence of *Lupinus laxiflorus*, an alternate host plant, but this site does not contain *L. sulphureus* ssp. *kincaidii* (Schultz 1996). Loss of such alternate host plant sites further limits the habitat that is available to support Fender's blue butterfly. Additional tree-planting efforts by an adjacent Coburg Ridge landowner threatens to alter a different portion of the grassland in area-2, which has displayed the highest levels of butterfly activity in previous years (Schultz 1996). This site received spot herbicide application during the planting efforts, rather than the aerial broadcast method of the first case; therefore, the immediate effects to the habitat were not as severe. However, tree saplings were planted and as the trees grow they will eventually shade out the native prairie species, resulting in the loss of butterfly habitat. Herbicide spraying associated with reforestation after logging has also altered habitat and caused a decline of a *L. sulphureus* ssp. *kincaidii* population on Bureau of Land Management (BLM) properties. The other large sized occurrence of the butterfly and *L. sulphureus* ssp. *kincaidii* is in Benton County on McDonald State Forest and adjacent private lands that could be similarly affected by surrounding silvicultural operations.

Grazing is currently impacting 12 of the occupied habitat patches, with five of these being wetlands occupied by *Erigeron decumbens* var. *decumbens*. Most of the habitat occupied by Fender's blue butterfly and *Lupinus sulphureus* ssp. *kincaidii* at the Oak Ridge south site in Yamhill County has been lost due to heavy grazing (Hammond 1996). Another site of *L. sulphureus* ssp. *kincaidii*, covering about 4.6 ha (11 ac) at Crabtree Hill in Lane County, is being damaged by extensive livestock grazing. The Crabtree Hill population of 6,000 plants is the largest known *L. sulphureus* ssp. *kincaidii* population.

The next most common threat to these species is roadside maintenance activities. At least 30 sites occur along roadsides and are impacted by maintenance activities. Examples include the populations of Fender's blue butterfly and *Lupinus sulpheureus* ssp. *kincaidii* at the Oak Ridge north site that were recently lost due to road maintenance activities. When planned developments are completed on the Oak Ridge south site, the butterfly and lupine will essentially be extirpated from the Oak Ridge area (Hammond 1996). Two sites on Oregon Department of Transportation (ODOT) property and one site on land owned by the City of Corvallis receive only limited protection and could potentially be impacted by future development and highway maintenance activities. Publicly-owned roadside sites receive varying degrees of protection on a district by district basis. Although some roadside sites have been marked as no-spray zones by the Native Plant Society of Oregon, this protective measure is not always effective. The roadside portion of a *L. sulphureus* ssp. *kincaidii* population in Kings Valley continues to receive herbicide application during roadside weed control activities, despite efforts to restrict spraying. Other roadside sites receive only sporadic protection during herbicide application. Privately managed roadside occurrences do not fare much better; extensive mowing at the Wren sites in Benton County and Fir Butte Road roadside sites in Lane County have caused declines in Fender's blue butterfly and *L. sulphureus* ssp. *kincaidii* populations (Hammond 1994). With frequent weed control efforts ongoing, as well as highway and driveway construction, small roadside occurrences of Fender's blue butterfly, *L. sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* are unlikely to persist. Between 1994 and 1996, Fender's blue butterfly populations disappeared from (or are considered no longer viable) at least seven small roadside sites (Liberty Road, Monmouth Falls City Road, Fern Corner, Grant Creek, and McTimmonds Valley in Polk County, and two sites at Wren) and populations at many of the remaining roadside sites continue to decline.

Between 1990 and 1992, three sites occupied by both Fender's blue butterfly and *Lupinus sulphureus* ssp. *kincaidii* were lost in the McTimmond's Valley to the expansion of Christmas tree farming operations (Hammond 1994). Conversion of these three sites destroyed approximately 3 ha (7 ac) of habitat along roadside and private land that comprised the nucleus of two Fender's blue butterfly populations and a substantial number of *L. sulphureus* ssp. *kincaidii* plants. The two roadside occurrences of the butterfly that remain nearby are no longer considered viable due to the loss of the source butterfly populations and considerable numbers of *L. sulphureus* ssp. *kincaidii* plants. Hammond (1994) stated that these two roadside occurrences are not expected to persist for more than a few additional years. The Service does not know if the two roadside occurrences still exist.

In summary, habitat loss from a wide variety of causes (urbanization, agriculture, silvicultural practices, and roadside maintenance) is a severe problem faced by Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* at a majority of their occurrences. Development and land alteration in the Willamette Valley has been so extensive that all the occurrences of the three species on the valley floor have essentially been relegated to small patches of habitat, except for three hilltop areas (Baskett Slough National Wildlife Refuge, Coburg Ridge, and McDonald State Forest) that, because of their topography, have not been subjected to agricultural and urban development activities occurring on the valley floor. Only 16 out the 84 remnant prairie sites that are occupied by one or more of these species are currently not threatened with destruction of habitat. However, herbivory, exotic weed species competition, and/or succession threaten all of these 16 sites (see Factor E below for more information). As habitat loss continues on these prairie remnants, populations of the three species in these 64 areas are likely to be extirpated. At least 12 of 31 sites occupied by Fender's blue butterfly, 47 of 51 sites occupied by *L. sulphureus* ssp. *kincaidii*, and 24 of 28 sites occupied by *E. decumbens* var. *decumbens* occur on private lands and, without further action, are expected to be lost in the near future. The threat of extinction for these species is high, given the expected continuing extirpation of small populations, the continued habitat loss on moderate sites and large sites, and the continuing degradation of habitat, even on secure sites (see Factor E below for more information about continuing degradation of habitat).

B. Overutilization for Commercial, Recreational, Scientific, or Educational Purposes

Rare butterflies, such as Fender's blue butterfly are highly prized by insect collectors. Although there are no studies on the impact of the removal of individuals from natural populations of this animal, based on studies of another lycaenid butterfly (Duffey 1968), and an endangered nymphalid butterfly (Gall, 1984a and 1984b), it is likely that Fender's blue butterfly could be adversely affected due to its isolated, possibly small populations. There is an international commercial trade for butterfly species proposed for listing, as well as other imperiled or rare butterflies (C.D. Nagano, J. Mendoza, and C. Schroeder, USFWS, pers. obs., 1992–1997) and specimens of Fender's blue butterfly are known to have recently been offered for trade (C. Nagano pers. obs.). Some collectors and dealers closely monitor listing activities by the Service and they are known to have stockpiled rare butterflies in anticipation of their becoming designated as endangered or threatened species (C.D. Nagano and J. Mendoza, pers. obs., 1992). Collecting from small colonies or repeated handling and marking (particularly of females and in years of low abundance) could seriously damage the populations through loss of individuals and genetic variability (Gall 1984b; Murphy 1988; Singer and Wedlake 1981). Collection of females dispersing from a colony also can reduce the probability that new colonies will be founded. Collectors pose a threat because they may be unable to recognize when they are depleting butterfly colonies below the thresholds of survival or recovery, especially when they lack appropriate biological training or the area is visited for a short period of time (Collins and Morris 1985).

There likely is high interest by collectors in Fender's blue butterfly due to its unique history of assumed extinction. The rediscovery in 1989 of this animal generated a great deal of publicity and interest, which in turn increases demand by collectors. Collectors often highly prize rare butterflies (Morris *et al.* 1991) and at times take all wild specimens obtainable for use in trade (U. S. Department of Justice, *in litt.* 1993). The populations of Fender's blue butterfly that remain face strong pressure from some members of the collecting community. Since many of the Fender's blue butterfly populations occur along public roadsides, the species is easily acquired and the extremely limited numbers and distribution of many of the remaining populations make this species vulnerable to collectors.

Due to their unattractive weedy like appearance, the threat to *Erigeron decumbens* var. *decumbens* and/or *Lupinus sulphureus* ssp. *kincaidii* from collection for horticultural purposes may be less than the threat from collectors faced by Fender's blue butterfly. Although no current evidence exists of such horticultural collection or

VOL 63 ISS 17 JA 27 1998 UMI

other overutilization for scientific purposes for either *E. decumbens* var. *decumbens* or *L. sulphureus* ssp. *kincaidii*, the threat posed by collecting for personal herbarium specimens is significant due to their rarity and the relative accessability of roadside populations.

C. Disease or Predation

Although most lepidopteran larvae suffer significant mortality from parasitoid attack, no instances of parasitism (Hammond 1993) or disease (R. H. T. Mattoni, pers. comm. to C. D. Nagano 1997) have been documented for Fender's blue butterfly.

Lupinus sulphureus ssp. *kincaidii* evidently hosts a number of herbivore and parasite species. Gall-forming insects attack unopened flowers and the bases of woody stems. Weevils lay eggs in the developing floral embryos and their offspring stimulate the fruit to produce callous tissue as a food source. Misdirection of the developing fruit by weevil larvae effectively prevents viable seed formation in the parasitized fruits (Kuykendall and Kaye 1993b). Weevil damage at some sites (e.g., Willow Creek) can be high, with some plants suffering 90 percent loss of mature fruits (E. Alverson, pers. comm. 1994). Herbivory has been documented at all three Fern Ridge Reservoir sites. Loss of floral parts through herbivory can also significantly reduce reproduction. Larvae of the silvery blue butterfly (*Glaucopsyche lygdamus*) graze flowers for pollen and in doing so effectively destroy them. Silvery blue larvae can reach high population densities at some of the sites and may reduce the fecundity of *L. sulphureus* ssp. *kincaidii*, but do not appear to cause the death of mature individual plants (C. Schultz, pers. comm. 1994).

Evidence of insect herbivory on *Erigeron decumbens* var. *decumbens* is limited. Insect species collected on *E. decumbens* var. *decumbens* in 1993 included sap-sucking insects (Hemiptera), a bruchid beetle, thrips, and mites (Clark *et al.* 1993). Other threats from herbivory include consumption of *E. decumbens* var. *decumbens* by cattle; no plants were found in areas currently or recently grazed during surveys conducted in 1986 (Kagan and Yamamoto 1987) and only one site was observed to support *E. decumbens* var. *decumbens* in the presence of cattle in 1993 (Clark *et al.* 1993).

D. The Inadequacy of Existing Regulatory Mechanisms

In 1963, the protection of natural botanical resources by the State of Oregon was initiated with the passage of the Oregon Wildflower Law (ORS 564.010–564.040). This law was designed to protect specific showy botanical groups including lilies, shooting stars, orchids, and rhododendrons from collection and trade by horticulturists interested in the cultivation of these species. It also prohibits the collection of wildflowers from "within 500 feet of the centerline of any public highway" (ORS 564.020 (2)). Although protective in spirit, the Oregon Wildflower Law carries minimal penalties and is rarely enforced. As a means of protecting *Lupinus sulphureus* ssp. *kincaidii* and *Erigeron decumbens* var. *decumbens* populations, the effectiveness of the law is doubtful.

In 1987, Oregon Senate Bill 533 was passed to augment the legislative actions available for the protection of the State's threatened and endangered species, both plant and animal. This bill, known as the Oregon Endangered Species Act, mandates responsibility for threatened and endangered species in Oregon to two State agencies—the Oregon Department of Agriculture (ODOA) for plant species (ORS 564.105) and the Oregon Department of Fish and Wildlife (ODFW) for "wildlife" species (ORS 496.172).

As reauthorized in 1995 (HB 2120), the Oregon Endangered Species Act does not include invertebrate animals in the definition of "wildlife." Therefore, Fender's blue butterfly receives no protection under the Oregon Endangered Species Act. The Oregon Natural Heritage Program is the only State agency "which tracks locations of and works to protect the rare, threatened and endangered invertebrates of Oregon" (Oregon Natural Heritage Program 1993). The Heritage program has created a Sensitive Species invertebrate list, which includes Fender's blue butterfly as a "priority 1 species." Priority 1 species are "taxa threatened or endangered throughout range" (Oregon Natural Heritage Program 1993). The program can assist planning agencies in managing lands for the benefit of rare invertebrate taxa, but it has no regulatory authority over rare invertebrates (Jimmy Kagan, Oregon Natural Heritage Program, pers. comm. 1997).

For plant species, the Oregon Endangered Species Act directs the ODOA to maintain a strong program to conserve and protect native plant species classified by the State as threatened or endangered. *Erigeron decumbens* var. *decumbens*, as a State-listed endangered species and *Lupinus sulphureus* ssp. *kincaidii* as a State-listed threatened species receive protection on State-managed lands under the Oregon Endangered Species Act. The ODOA is able to regulate the import, export, or trafficking of State-listed plant species when they are in transit (under ORS 564.1200). The ODOA's ability to protect plant populations, such as restricting take under the Oregon Endangered Species Act, is limited to "land owned or leased by the State, or for which the State holds a recorded easement" (ORS 564.115). "Nothing in ORS 564.100 to 564.130 is intended * * * to require the owner of any commercial forest land or other private land to take action to protect a threatened species or endangered species" on his lands (ORS 564.135(1)). As a result, populations of *L. sulphureus* ssp. *kincaidii* and *E. decumbens* var. *decumbens* on private lands receive minimal protection from their State status as endangered or threatened.

ODOT owns and manages roadside habitat where *Lupinus sulphureus* ssp. *kincaidii* and *Erigeron decumbens* var. *decumbens* are present. The Oregon Endangered Species Act requires the protection of these State-listed species. ODOT has responded, in conjunction with Oregon State University researchers and the Native Plant Society of Oregon, by providing road crews with maps of these areas and instruction to avoid herbicide use.

Lupinus sulphureus ssp. *kincaidii*, *Erigeron decumbens* var. *decumbens*, and Fender's blue butterfly occurrences within the Service's National Wildlife Refuges receive protection within the boundaries of the refuge. All three species occur together only at Baskett Slough National Wildlife Refuge, which actively manages habitat for the benefit of the species.

Under section 7 of the Endangered Species Act, Federal agencies are required to consult with the Service if any action they regulate, fund or carry out may jeopardize the continued existence of an endangered or threatened species. Species that are candidates for listing receive no formal regulatory protection under the Act. The BLM and the Forest Service (FS) manage lands occupied by *Lupinus sulphureus* ssp. *kincaidii*. This species on BLM properties is given some protection through a general conservation agreement that applies to all Federal candidate species. The population of *L. sulphureus* ssp. *kincaidii* that occurs in the Umpqua National Forest is not covered under any conservation agreement and receives no official protection under the Act.

On Corps lands, discretion for the protection and management of State-listed and Federal candidate species lies at the local level. Funds may be available in some years to proactively manage these species. *Lupinus sulphureus* ssp. *kincaidii*, *Erigeron decumbens* var. *decumbens*, and Fender's blue butterfly have received habitat protection, as well as support for research activity from the Corps through allocation of personnel and supplies to these projects. This protection and cooperation is voluntary for candidate species and is dependent on continuation of sufficient funding.

Populations of *Erigeron decumbens* var. *decumbens* occur in seasonally flooded wet prairies with hydric soils (Clark *et al.* 1993). Under section 404 of the Clean Water Act, the Corps regulates the discharge of fill into waters of the United States, including navigable waters, wetlands (e.g., wet prairies), and other waters (33 CFR parts 320–330). The Clean Water Act requires project proponents to obtain a permit from the Corps prior to undertaking many activities (e.g., grading, discharge of soil or other fill material, etc.) that would result in the filling of wetlands subject to the Corps' jurisdiction. The Corps promulgated nationwide permit number 26 (NWP 26) to address fill of isolated or headwater wetlands. Under the 1996 reauthorized NWP 26 (61 FR 65873), project proposals that involve the fill of wetlands less than one third of an acre are considered authorized. Fill areas between 0.33 acre and 1 acre require only notification to the Corps. When placement of fill would adversely modify between 1 to 3 acres of wetland, the Corps circulates a predischarge notification to the Service and other interested parties for comment to determine whether or not an individual permit should be required for the proposed fill activity and associated impacts.

Individual Corps permits are required for discharge of material that would fill or adversely modify greater than 3 acres of wetlands. The review process for individual permits is more rigorous than for nationwide permits. Unlike nationwide permits, an analysis of cumulative wetland impacts is required for individual permit applications. Resulting permits may include special conditions that require potential avoidance or mitigation for environmental impacts. On nationwide permits, the Corps has discretionary authority to instead require an individual permit if the Corps believes that resources are sufficiently important, regardless of the wetland's size. In practice, however, the Corps generally does not require an individual permit when a project qualifies for a nationwide permit, unless a threatened or endangered species or other significant resources would be adversely affected by the proposed activity. In such cases, conferencing and consultation requirements of section 7 of the Act do pertain to the Corps' regulatory process.

Disking and some other farming, ranching and silviculture practices can degrade or destroy wetland habitat without a permit from the Corps because these activities are exempt from regulation under the Clean Water Act (33 CFR 323.4 (a)). The discontinuous configuration of the existing wet prairies further obscures these wetland losses. Occurrences of *Lupinus sulphureus* ssp. *kincaidii*, and Fender's blue butterfly in upland (non-wetland) areas receive no protection under section 404 of the Clean Water Act.

The primary inadequacies in existing regulations pertain to populations of Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* that occur on private lands that currently have no connection to Federal authority or funding. Privately owned lands where populations of these species occur constitute a significant portion of the range of these species and play a substantial role in their continued existence.

E. Other Natural or Manmade Factors Affecting its Continued Existence

Larger sites (greater than 10 ha (25 ac)) currently support relatively stable populations of Fender's blue butterflies, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* and provide the greatest potential for long-term persistence of the species if their current condition can be sustained or improved. However, few of these larger sites are secure from threats due to habitat loss. The only large site occupied by each of the species that is considered relatively secure from habitat loss is Baskett Slough National Wildlife Refuge in Polk County, although the habitat condition is declining from invasion by alien plants (Hammond 1996, Hammond 1994, Hammond and Wilson 1993). The two remaining large butterfly sites (Coburg Ridge area—1 and 2, and McDonald State Forest 1) and the one remaining large lupine site (McDonald State Forest 1) are not considered secure because these sites face loss or degradation of habitat through adjacent silviculture operations, ecological succession to shrub and forest, and competition from alien species (Hammond 1994, Kuykendall and Kaye 1993a).

Erigeron decumbens var. *decumbens* occupies three large sites. Two of those sites, one occurring on Corps property and the other on land owned by TNC, are being managed to benefit native prairie species and are relatively secure. The third site on private land is not managed for native prairie species and is not protected from habitat loss.

The small occurrences of the three taxa in this proposed rule, predominantly roadside and fence line/boundary sites, face an immediate threat of destruction from a variety of activities including development, agriculture, silvicultural practices, roadside maintenance, and herbicide application. The degree to which habitat loss threatens Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* becomes evident when the size of the populations is examined. Of the 51 sites occupied by *L. sulphureus* ssp. *kincaidii*, 40 consist of small area occurrences, less than 3.4 ha (8.3 ac) in size. The Fender's blue butterfly, occupying a subset of the lupine sites, shows a similar pattern with 23 of its 31 populations found on parcels of 3.4 ha (8.3 ac) or less. All of the small site occurrences of the Fender's blue butterfly are likely to be extirpated within the next five years because habitat may not be large enough to support viable populations. Of the 28 sites occupied by *E. decumbens* var. *decumbens*, 17 are less than 3.4 ha (8.3 ac) in size. These small occurrences account for a majority of the known populations for all three species.

Given the impact of such habitat losses on these small habitat patches, the extirpation of most of the small Fender's blue butterfly populations is anticipated within five years. *Lupinus sulphureus* ssp. *kincaidii* may survive for a time in these small sites; nonetheless, extirpation of *L. sulphureus* ssp. *kincaidii* at most, if not all, of their 40 small sites is also anticipated in the future. Similarly, these habitat losses are expected to also cause extirpation of the 17 small populations of *Erigeron decumbens* var. *decumbens*. Should these smaller populations disappear, only 8 habitat areas of Fender's blue butterfly (a 75 percent reduction in number of sites), 11 habitat areas of *L. sulphureus* ssp. *kincaidii* (a 78 percent reduction in number of sites), and 11 habitat areas of *E. decumbens* var. *decumbens* (a 61 percent reduction of sites) will remain.

The importance of these sites, particularly for the Fender's blue butterfly, lies in their potential to serve as corridors among larger, neighboring populations. The loss of these sites and

VOL 63 ISS 17 JA 27 1998 UMI

the loss of accompanying potential habitat, severely compromises the ability of any of the species to disperse from larger sites (Hammond and Wilson 1993, Schultz 1996). Larger populations will remain isolated, with no opportunities for migration and/or recolonization if local conditions become unfavorable. Thus, the status of the species as a whole declines.

A less visible threat to the smaller occurrences is the decrease in vigor and viability experienced by populations of few individuals. For the Fender's blue butterfly, small numbers and localized populations increase the risk of loss through random genetic or demographic factors. (Gilpin and Soule' 1986, Kuykendall and Kaye 1993b, Lacy 1992). Eighteen of the 31 Fender's blue butterfly sites contain 50 or fewer individuals. The threat of extinction due to naturally occurring genetic or demographic events can play a significant role in the instability of the species as a whole. The isolation of these small populations due to habitat fragmentation precludes recolonization from larger populations and could result in the permanent loss of occurrences once populations fall below a critical level.

This pattern of extinction and recolonization of connected colonies of butterflies has been disrupted by the extensive fragmentation of remaining habitat and the disruption of the disturbance regimes that have maintained them. The remnant populations, now small in numbers, are either unconnected or exchange individuals to a very limited degree. With their limited dispersal abilities, low numbers and dwindling habitat, a majority of the remaining populations of Fender's blue butterfly likely face permanent extirpation. The small population sizes at several sites pose their own threat to the survival of Fender's blue butterfly as demographic and genetic problems can push a population to extinction (Hammond and Wilson 1993).

Random human and environmental events may also affect the small populations of these species and cause future extirpations. The impact of such events are magnified by the size of the populations. It is much easier to cause the extirpation of a population occupying a small area than one occupying a larger area. Due to the small area occupied by many of the remaining populations, randomly occurring natural events can play a role in extirpation. One small population of *Erigeron decumbens* var. *decumbens* previously found on Finley National Wildlife Refuge was recently lost due to erosion (Meincke 1980). A natural change in a waterway course was apparently responsible. Shultz (1996) stated that large fluctuations in populations evident in her 3-year study from 1993 to 1995 indicate that Fender's blue butterfly populations are strongly influenced by random variation in weather conditions from year to year; these large fluctuations make Fender's blue butterfly extremely susceptible to loss of habitat and host plants due to human-caused events or invasive alien plants.

A serious long-term threat to all Fender's blue butterfly, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens* occurrences is the change in community structure due to succession. Currently, succession has been documented for 70 of the 84 relic prairie sites occupied by one or more of these species proposed for listing. Invasion by alien plant species has been documented at 36 of these 84 prairie sites. The natural transition of grassland to forest in the absence of disturbance means that prairie sites left unmanaged likely will eventually be lost (Clark *et al.* 1993; Franklin and Dyrness 1973; Hammond and Wilson 1993; Johannsesen *et al.* 1971; Kuykendall and Kaye 1993). In addition, the presence of tall, fast-growing alien species speeds the conversion of open upland prairie to dense, rank grasslands and shrublands. Invasive woody species of concern include the alien plants *Rubus discolor* (Himalayan blackberry) and *Cytisus scoparius* (Scotch broom), and the native *Toxicodendron diversiloba* (poison oak). Non-native grass species aggressive enough to suppress *L. sulphureus* ssp. *kincaidii* and *E. decumbens* var. *decumbens* include *Holcus lanatus* (velvet grass), *Dactylis glomerata* (orchard grass), *Brachypodium sylvaticum* (false-brome), and *Arrhenatherum elatius* (tall oat-grass) (Hammond 1996).

The degree of the threat of succession at roadside sites varies considerably depending on the vegetation control employed by each County at each site. Fender's blue butterfly populations at small roadside sites are weak (low numbers) and are close to extinction either through degradation of habitat from invasion of alien grasses, succession by shrubs and trees, or through development activities (Hammond 1996). One roadside site at Oak Ridge that was previously considered stable has declined since 1992, and is being invaded by large thickets of *Rubus* ssp. (blackberry) and *Cytisus scoparius* (Hammond 1996).

Non-roadside sites in general face the greatest threat from succession/weed expansion and invasion due to a lack of disturbance that disrupts successional progress. Otherwise secure habitat on Corps lands is being heavily invaded by the alien plant *Arrhenatherum elatius*, and the butterfly population is alarmingly small (Schultz 1996). Prime habitat occupied by *Erigerón decumbens* var. *decumbens* at Baskett Butte is rapidly being overgrown with alien grass and trees (Hammond 1996). About 25 percent of the large Coburg Ridge site occupied by Fender's blue butterfly and *Lupinus sulphureus* ssp. *kincaidii* is threatened by the profuse shrub growth of *Cytisus scoparius* (Hammond 1996). Regardless of the size of the site, invasion by non-native plants is a threat at all of the sites occupied by any of the three species proposed for listing in this rule.

The application of pesticides and biological control agents to control insect pests, such as gypsy moths, is also a threat to Fender's blue butterfly. Although the sensitivity of Fender's blue butterfly larvae to specific insecticides is not known, the potential result from use of gypsy moth control agents on habitats occupied by the Fender's blue butterfly should not be dismissed (Hammond 1994). The use of microbial insecticides, such as *Bacillus thuringiensis* (Bt) has been shown to have significant residual toxic impacts on native butterflies under field conditions even with heavy rain and ultraviolet light exposure (Schriber and Gage 1995).

Taken together as a category, other natural and manmade factors have a profound effect on the remaining populations of Fender's blue butterflies, *Lupinus sulphureus* ssp. *kincaidii*, and *Erigeron decumbens* var. *decumbens*. Nearly all of the populations are threatened by either alien species, successional transition of habitat, or demographic and genetic factors as a result of small population size. Populations of Fender's blue butterfly at all of the 31 sites are currently threatened by one of these factors. The same holds true for all 28 sites of *E. decumbens* var. *decumbens* and for all 51 sites of *L. sulphureus* ssp. *kincaidii*. Although progressing on a slower time scale, the encroachment of alien plants, the successional advance of tree and shrub species and other naturally occurring random events will, if unchecked, lead to reductions in population size, reductions in population viability and, ultimately, the extinction of these native prairie species.

The Service has carefully assessed the best scientific and commercial information available regarding the past, present, and future threats faced by these species in determining to propose this rule. Threats to Fender's blue butterfly are more imminent than threats to *Lupinus sulphureus kincaidii* since the butterfly, with its biology and shorter life span, will exhibit more rapid declines in numbers and in the face of threats will be extirpated more quickly at any one location. Because of its longer life span, small numbers of *L. sulphureus* ssp. *kincaidii* plants are likely to persist longer in any given habitat area than are small numbers of butterflies. Threats to *Erigeron decumbens* var. *decumbens* are also more imminent than threats to *L. sulphureus* ssp. *kincaidii* because of the fewer populations of *E. decumbens* var. *decumbens*. Secondly, many of the populations of *E. decumbens* var. *decumbens* grow along roadsides adjacent to agricultural activities (especially grass seed farms) where herbicide spraying to create bare soil is common practice. Based on this evaluation, Fender's blue butterfly and *E. decumbens* var. *decumbens* are in danger of extinction throughout all or a significant portion of their respective ranges, while *L. sulphureus* ssp. *kincaidii* is likely to become endangered within the foreseeable future. Therefore, the Service proposes to list Fender's blue butterfly (*Icaricia icarioides fenderi*) and *E. decumbens* var. *decumbens* (Willamette daisy) as endangered and to list *L. sulphureus* ssp. *kincaidii* (Kincaid's lupine) as threatened.

Critical Habitat

Critical habitat is defined in section 3(5)(A) of the Act as (i) the specific areas within the geographical area occupied by a species, at the time it is listed in accordance with the Act, on which are found those physical or biological features (i) essential to the conservation of the species and (II) that may require special management considerations or protection; and (ii) specific areas outside the geographical area occupied by a species at the time it is listed, upon a determination that such areas are essential for the conservation of the species. The term "conservation" means the use of all methods and procedures needed to bring the species to the point at which listing under the Act is no longer necessary.

Section 4(a)(3) of the Act, as amended, requires that to the maximum extent prudent and determinable, the Secretary propose critical habitat at the time a species is determined to be threatened or endangered. The Service finds that designation of critical habitat is not prudent for *Erigeron decumbens* var. *decumbens*, *Lupinus sulphureus* ssp. *kincaidii*, or Fender's blue butterfly at this time. Service regulations (50 CFR 424.12(a)(1)) state that the designation of critical habitat is not prudent when one or both of the following situations exist—(1) The species is threatened by taking or other human activity, and identification of critical habitat can be expected to increase the degree of threat to the species or (2) such designation of critical habitat would not be beneficial to the species.

The listing of *Lupinus sulphureus* ssp. *kincaidii* and *Erigeron decumbens* var. *decumbens* in and of itself contributes to a certain level of risk from over-collection. This is because listing acknowledges the rarity of a species, which then creates a certain level of demand by collectors. Easily accessible roadside populations with few individuals would be particularly susceptible to indiscriminate collection by persons interested in rare plants and/or butterflies if not for the fact that location information is not readily available.

Designation of critical habitat for *Lupinus sulphureus* ssp. *kincaidii*, *Erigeron decumbens* var. *decumbens*, and Fender's blue butterfly is not considered prudent, because the disclosure of precise maps and descriptions of critical habitat in the **Federal Register** would likely subject these populations to loss of individuals and over-collection, resulting in the further decline of the species. The Fender's blue butterfly is also vulnerable to acts of vandalism, which may damage or eliminate populations of this animal.

In the case of Fender's blue butterfly, both criteria apply. As discussed under "Summary of Factors Affecting the Species," this animal and its habitat are vulnerable to several activities, especially the removal of specimens for scientific or personal collections. The Service is concerned about the impacts of the illicit commercial trade on Fender's blue butterfly. Specimens of this species are known to have recently been offered for trade by a butterfly collector. Unauthorized collecting is an activity that can be difficult to control because it can be done in an inconspicuous and discreet manner. The international trade of butterflies, including listed species, is an established practice and the value of a specimen is commensurate with the quality of the specimen and its rarity. High prices for prized specimens can provide an incentive for illegal take and trade. Listing in itself increases the publicity and interest in a species' rarity, and thus may directly increase the value and demand for specimens. Trade of illegally captured or held butterflies and other invertebrates has lead to several arrests and convictions for violations of the Lacey Act (Claiborne 1997; Hoekwater 1997; Mendoza 1995; U. S. Department of Justice 1993, 1994, 1995a, 1995b; Williams 1996). However, with the designation of critical habitat, precise pinpointing of localities would result from publication of critical habitat descriptions and maps in the **Federal Register**. Since the access to many sites is not actively protected, managed or monitored closely enough to prevent trespass or restrict access, the disclosure of critical location information on rare species increases collection activities on the animal, even for butterflies that have been designated as endangered or threatened species.

Since many of the extant populations of Fender's blue butterfly are comprised of a small number of individuals (less than a few hundred individuals, and at seven sites only five individuals), one person seeking to augment a private or scientific collection could extirpate a population with the removal of a few individuals. Several populations are along roadsides, which make them particularly accessible. Therefore, designation of critical habitat would increase the vulnerability of smaller sites, thereby increasing the risk of extinction at these smaller sites from collection.

In addition to the threat of over-collection, critical habitat designation may also make Fender's blue butterfly and its habitat prone to visitation and impact by non-collectors curious about any of the three species discussed in this proposed rule. Curiosity seekers may inadvertently trample host plants and crush eggs, larvae or adult butterflies. Fender's blue butterfly co-occurs with *Lupinus sulphureus* ssp. *kincaidii* at 14 sites and also occurs with *Erigeron decumbens* var. *decumbens* at 1 site. Publication of critical habitat descriptions and maps for *L. sulphureus* ssp. *kincaidii*, *E. decumbens* var. *decumbens*, or Fender's blue butterfly would place all three species at an increased risk of harm from trampling or habitat destruction. For example, in the spring of 1997, naturalists intent on observing the endangered Palos Verdes blue butterfly (*Glaucopsyche lygdamus palosverdesensis*) trampled and damaged its habitat in their quest to obtain photographs of the animal (C. Nagano, pers. obs. 1997).

Designation of critical habitat could also increase the vulnerability of Fender's blue butterfly habitat to intentional destruction by landowners

UMI

who do not want a protected species on their property. In the mid-1980's, a landowner disked the habitat of the now endangered Quino checkerspot butterfly (*Euphydryas editha quino*) and eliminated the species from the site after being informed about its presence (C. Nagano, pers. obs.).

Furthermore, the designation of critical habitat provides limited benefit in addition to the protection and awareness that these three taxa will receive by virtue of their listing. Section 7(a)(2) of the Act requires Federal agencies in consultation with the Service, to ensure that any action authorized, funded, or carried out by such agency, does not jeopardize the continued existence of a federally listed species, or does not destroy or adversely modify designated critical habitat. The occurrences of these three species are so closely associated to their habitat year-round that any designated critical habitat areas would overlap areas of species' presence and occurrence. Therefore, when a species is listed, an analysis to determine jeopardy under section 7(a)(2) would consider take associated with habitat impacts. Such an analysis would closely parallel any analysis of habitat impacts conducted to determine adverse modification of critical habitat. As a result, a determination of adverse modification of critical habitat for Fender's blue butterfly or *Lupinus sulfureus* ssp. *kincaidii* or *Erigeron decumbens* ssp. *decumbens* is highly likely to be accompanied with a determination of jeopardy. Listing of these species will ensure that section 7 consultation occurs and potential impacts to the species and its habitat are considered for any Federal action that may affect these species. In the case of Fender's blue butterfly, the listing of *L. sulfureus* ssp. *kincaidii* will also ensure that Federal agencies consult even when Federal actions may affect unoccupied potentially suitable habitat for the butterfly.

It is the intent of critical habitat designation to provide additional benefits to the species through increased awareness and management activities. Benefits resulting from designation of critical habitat are anticipated to be limited because Federal, State, and conservation group land managers with moderate and larger extant populations of Fender's blue butterfly and *Erigeron decumbens* ssp. *decumbens* have known of the occurrence of these species and have initiated management activities in several cases. The largest populations of the Fender's blue butterfly occur at Baskett Slough National Wildlife Refuge (1,400 individuals on 50 ha) and the second largest is at Willow Creek Main managed by TNC (764 individuals on 3.8 ha). The largest population of *Erigeron decumbens* ssp. *decumbens* occurs at Willow Creek Preserve managed by TNC (2,080 individual plants on 20.3 ha) and the second and third occur on Corps land (Fisher Butte has 1,500 plants on 20.3 ha and Fisher Butte Dike has 1,000 plants on 4.1 ha). All of the large populations of *Lupinus sulphureus* ssp. *kincaidii* occur on private lands and designating critical habitat for *L. sulphureus* ssp. *kincaidii* would reveal locations of the Fender's blue butterfly.

The BLM, FS, Corps, and the Service are aware of the presence and locations of the three species on their properties. The Corps and Service are managing the lands that are under their jurisdiction to restore habitat for the three species and are monitoring the existing populations.

Extant populations of Fender's blue butterfly and *Lupinus sulphureus* ssp. *kincaidii* occur on State lands managed by ODOT and Oregon State University (OSU) College of Forestry. The ODOT is aware of locations of Fender's blue butterfly, *L. sulfureus* ssp. *kincaidii*, and *Erigeron decumbens* ssp. *decumbens* sites, and are currently managing these sites to avoid impacts from State road maintenance activities. The ODOT is a non-Federal representative of the Federal Highway Administration (FHA) for the purposes of section 7 consultation. Therefore, any ODOT activities funded by the FHA that may affect listed species would require section 7 consultation. The OSU Department of Botany and Plant Pathology has been working cooperatively with OSU College of Forestry to conserve habitats at McDonald State Forest where *L. sulphureus* ssp. *kincaidii* and Fender's blue butterfly occur in butterfly meadows on OSU lands (Mark Wilson, pers. comm. 1997).

Other Federal agencies will be notified with this proposed rule. Therefore, agencies such as the Department of Housing and Urban Development (HUD) would be subject to section 7 consultation under the Act. Agencies, such as HUD, with any actions that may impact listed species whether occurring on Federal, State, or private lands, would be subject to section 7 consultation under the Act. Since activities on Federal lands and federally funded activities would be subject to section 7 consultation and recovery planning with listing, protection of habitat will be addressed through the consultation and recovery processes.

Aside from consideration under section 7, the Act does not provide any additional protection to lands designated as critical habitat. Designating critical habitat does not create a management plan for the areas where the listed species occurs; does not establish numerical population goals or prescribe specific management actions (inside or outside of critical habitat); and does not have a direct effect on areas not designated as critical habitat.
